As an illustration of the value of developing the freight traffic of an electric line, the Niagara, St. Catharines and Toronto Ry. fell into the hands of a receiver prior to 1900, and was so utterly mismanaged that its goodwill seemed of little worth. Originally it was a steam road, and its gross annual freight earnings prior to 1900 were less than $20,000. Then a very serious attempt was made to build up a good freight traffic, especially in freight and express of a high class, such as package merchandise. Within a year this effort showed results, and by the close of 1901, there had been a marked gain in freight transported and in profits. The managers began to rouse the dormant trade and stimulate traffic in every possible way. Systematic handling of freight and merchandise resulted in prompt deliveries which pleased the merchants, and more freight was directed to the road instead of going over the Grand Trunk Ry., a natural competitor of the electric. Accommodating patrons proved a better business-getter than rate-cutting, and the energies of the road were devoted to this work. Side tracks or switches were arranged at convenient points where merchants could load the cars at their demand and shipping receipts were given to merchants over the counter so that there was never any question of responsibility. Within two years the old bankrupt road showed an earning of 120% greater than in 1900. Since then the gain has been steady and the freight and express end of the business is chiefly responsible for this. But business has increased in the rural districts through the accommodations afforded the merchants and farmers. To-day the electric delivers loaded cars on switches to and from the G.T.R. and merchants along the route of the electric can thus send goods straight through to any point.

In the recent reports of the leading railways of the U.S. it is shown that the income from the passenger service performed by the steam lines is only about one-fifth of the total income earnings, while the receipts from the freight amounts to seven-tenths and the balance is covered by express earnings. In leaving the steam roads to carry most of the freight and express in the past the electrics have ignored the most profitable part of the carrying trade, and kept for themselves the least profitable. The growth of towns and rural communities has moreover been more dependent upon the cheap and efficient transportation of freight and express matter than upon the passenger service. Good freight accommodation stimulates the growth of business and induces manufacturers to settle along the line. Population follows manufacturing and industrial growth rather than the reverse. Every manufacturing plant requires the services of a certain number of workmen whose families quickly build up a small community. The electrics then in developing a new region can secure quicker results.

Canadian Street Railway Association.

A meeting of the Executive Committee was held at Ottawa, Ont., July 31, the President, E. A. Evans, General Manager and Chief Engineer Quebec Ry., Light and Power Co., in the chair. At the annual meeting at Windsor, Ont., in June, A. H. Royce, President Toronto Suburban Ry., having been appointed Counsel to the Association, declined re-election to the Secretary-Treasurership, and the election of his successor was delegated to the Executive Committee which, at its Ottawa meeting, unanimously elected Acton Burrows, Managing Director of the RAILWAY AND MARINE WORLD, to the position. It was decided to hold a special general meeting of representatives of member companies of the Association, at Montreal Sept. 12 and 13. There will be no set papers read at this meeting, but the representatives have been asked to send to the Secretary-Treasurer a list of subjects they would like to have discussed and of questions to be answered, and these will be classified and a series of topical discussions will be held.

The members of the Executive Committee attending the meeting were entertained at luncheon and at dinner at the Rideau Club by J. D. Fraser, Secretary of the Ottawa Electric Ry., and in the afternoon they visited Britannia-on-the-Bay as the guests of the company, and viewed the regatta from on board the company's steam launch, accompanied by T. Ahearn, President; J. D. Fraser, and J. E. Hutcheson, Superintendent and Purchasing Agent of the Ottawa Electric Ry. Co., which has spent a very large sum in providing a most attractive park, pier, and various accessories there.

Grain Elevator Notes.

J. B. Jackson's grain elevator at Simcoe, Ont., was burned Aug. 2. It was empty at the time.

A third elevator is being erected at Asquith, Sask., the present terminus of the extension of the Manitoba and North-Western Ry.

The Montreal Harbor Commissioners are installing conveyors at a cost of about $500,000, to carry grain from their elevator to the steamship berths.

The Cupar Farmers' Elevator Co. has been incorporated at Regina, Sask., under Northwest Territories ordinance respecting joint stock companies.

The Montreal Harbor Commissioners' elevator is reported to be in danger of collapse. Large cracks have appeared in the structure, due, it is said, to a settling of the foundation.

The grain handled at the Kingston, Ont., elevators for the season of navigation to July 31, totalled 7,346,803 bush., against 5,828,201 for same period, 1906, and 1,759,308 for same period in 1905.

The Dominion Elevator Co's elevator at Hamiota, Man., was burned to the ground Aug. 2. About 1,200 bushels of grain were destroyed. The elevator was erected about 16 years ago, and the loss is estimated at $20,000.

Up to July 31 the quantity of grain arriving at Kingston, Ont., elevators from the west, for transhipment to Montreal, totalled 6,718,000 bush., an increase of 25% over the quantity handled to the same date in 1906.

The Prince Rupert Timber and Lumber Co., recently incorporated under the British Columbia Companies' Act, is authorized to construct and operate grain elevators and flour mills. E. H. Moore, Vancouver, B.C., is its attorney.

The Beaver Elevator Co., Ltd., has been incorporated under the Dominion Companies' Act, with a capital of $99,000 and offices at Winnipeg, for the purpose of carrying on the business of grain buyers, grain elevator owners and warehousemen; to construct elevators, and to own and operate piers, docks, wharves, etc., in connection therewith. The provisional directors are: D. Morrison, W. Stead, K. Murray, J. H. and E. T. Leech, Winnipeg.

The number and capacity of licensed elevators and warehouses in the Manitoba grain division, comprising the Provinces of Manitoba, Saskatchewan, Alberta and British Columbia, with Ontario terminals on the C.P.R., C.N.R., Midland Ry. of Manitoba, Brandon, Saskatchewan and Hudson's Bay Ry., and the Alberta Ry. and Irrigation Co.'s lines, are:

	Elevators.	Warehouses.	Capacity, bushels.
C.P.R.	917	32	28,538,200
C.N.R.	275	20	7,485,000
M.R. & B.S. & H.B.Ry.	13	..	365,000
A. Ry. & I. L.	7	..	209,000
C.P.R. Ont. terminals	7	..	11,625,000
C.N.R. Ont. terminals	2	..	7,000,000
Totals	1,221	52	55,222,200

MARINE DEPARTMENT.

Atlantic and Pacific Ocean Marine.

Press reports indicate that the Allan Line may institute an Oriental steamship service in conjunction with the G.T. Pacific Ry.

It is stated that the Union Steamship Co., New Zealand, has ordered a 16½-knot steamship for the Australian-Vancouver mail service.

It is reported that Capt. Outram is to be the commander of the Allan Line new S.S. Grampian, and that he will be succeeded on the Pretorian by Capt. Main.

Press reports state that three steamships are under construction for Alfred Holt & Co., owners of the Blue Funnel Line, and will be put on a route between the Orient and Puget Sound.

The steamboat Micmac, owned by J. W. Carmichael & Co., New Glasgow, N.S., while on a voyage from St. John's, Nfld., to Liverpool, Eng., ran ashore near Broad Cove, Nfld., Aug. 13.

A Vancouver despatch states that the C.P.R. has sold its coast steamships Tartar and Athenian to the Japanese Government, and will replace them by the trans-Pacific freight steamships Montrose and Monterey.

The cases in which the C.P.R. steamships Empress of China and Tartar have been found guilty of smuggling Chinese, and for which they may be liable to an aggregate fine of $21,000, are, it is reported, being appealed in Ottawa, Ont.

Capt. Nunan, of the Allan Line S.S. Ionian, has been presented with a silver cup, and the officer in charge of the rescuing boat with a bronze medal, by the Norwegian Government, for the rescue of a Norwegian vessel's crew off the banks of Newfoundland.

The propelling machinery for the S.S. Alberta, which is being built at Belfast, Ireland, for the Dominion Line, will consist of two sets of quadruple expansion engines, and one low pressure turbine. The Alberta is expected to be ready for service in June, 1908.

Experiments with an ice code, invented by Capt. Logan of the Furness-Withy line, have been made on the Manchester liners, and have proved successful. The code is regarded as of great value in communicating with vessels taking the northern route as to the condition and position of the ice.

Regarding the press reports from Montreal, that the Donaldson and Thomson Lines are contemplating the addition of another fleet of passenger steamers to cope with the increased traffic between Canada and Great Britain, we are officially informed that the principals know nothing of the report published.

Sir Wm. Van Horne has according to press reports been in conference with the Dominion Premier, on the question of the proposed "All-Red Line" between Great Britain and the Orient, via Canada. It is stated that the establishment of such a line would seriously affect steamship companies already running between these countries.

It is reported that chief amongst the new steamships which the C.P.R. contemplates putting on its various routes in the near future is one, of the Empress type, for the Pacific Ocean mail service. It is stated that the plans for this vessel are in course of preparation, and that she will be larger and faster than any of the vessels at present owned by the company.

The North American Wrecking Co. has a number of men engaged in salvage operations on the Allan Line S.S. Bavarian at Indian Cove, Quebec. The Bavarian stranded at Wye Rock, Oct., 1905, and was raised and floated to Indian Cove in the fall of 1906. It is understood that an effort is to be made to repair the vessel and tow her to New York for complete repairs.

The various steamship companies which deal with the passenger traffic from Great Britain, are realizing that there has been a considerable increase in the number of passengers booking second class, and are taking steps to meet the demand. In most of the boats recently launched, and in those now building and to be built, increased accommodation is being provided for second-class passengers.

The Weir Line S.S. Foreric, the first of a new line of steamers to run between Australia and Victoria, B.C., arrived in that port early in August with a cargo of Australian coal, and has taken lumber on her return trip. The new line is at present essentially a freight one, but if sufficient inducement offers, the owners will, it is stated, either alter existing vessels or build new ones, so as to be in a position to compete with other lines for passenger traffic.

A number of Irishmen resident in Quebec, Montreal, Ottawa and Toronto, presented a handsome clock to the C.P.R. S.S. Empress of Ireland, Aug. 8. It was accompanied by the following address to Sir Thos. G. Shaughnessy, President C.P.R.: "Please accept this clock, presented to the Empress of Ireland, as a small token of esteem and affection from the subscribing Irishmen of Quebec, Montreal, Ottawa and Toronto, to a fellow-countryman who has shed such lustre on our race and rendered such distinguished services to Canada."

A proposal is reported to have been made for the operation of a line of steamships across the Atlantic, in connection with the "All-Red Line" plans suggested at the Colonial Conference by Sir Wilfried Laurier. The company asks for a subsidy of $2,500,000 a year. The cable further states that the Canadian Government has offered to pay one-half of the subsidy. Lord Strathcona had a second conference with Sir Wilfrid Aug. 8, in regard to the proposal. While nothing has been announced as to the views of the Imperial Government upon the proposals, it is of interest to note that the Irish Piers and Railways Bill, under which it is proposed to construct a pier, etc., at Blacksod Bay, Ireland, has been passed.

The C. P. R. trans-Atlantic steamships have recently been carrying Quebec freight on to Montreal, and delivering it into Quebec by rail, the reason given being that labor troubles have reached such a state in that city that it is impossible to get sufficient longshoremen and those offering demand excessive pay. A committee appointed jointly by the Quebec City Council, Harbor Commission and Board of Trade was appointed July 31, to confer with the C.P.R. and the Ship Laborers' Society with a view of arriving at a satisfactory solution of the points of difference. The first meeting of the committee was held Aug. 8, when it was decided to invite the C.P.R. and other steamship owners to make a statement of their grievances, and to ask the Ship Laborers' Society to state its case.

Statements attributed to H. C. Thompson, the promoter of the proposed company which was to run a quick service between England and Newfoundland, via Ireland, who recently arrived in Canada on a visit, lead to the belief that the original scheme will be dropped. It was proposed to ship passengers across the channel to Ireland, thence across Ireland by rail to Killery Harbor, where they would embark. At the Newfoundland end a 20-knot boat was to run between Bay of Islands and Gaspe Bay, Que. This scheme, it is said, has been found to be impracticable, and it is now proposed to make Bristol the English port, and to run the Newfoundland boat between Goose Arm, Bay of Islands, and Sydney, N.S. The St. John's (Nfld.) Daily News in commenting on the matter says: "The probabilities of the scheme ever attaining shape do not appear to be greatly enhanced."

Maritime Provinces and Newfoundland.

S. McCormick has been appointed harbormaster at Weymouth, N.S.

C. A. Hutchins, Superintendent of Lighthouses for Nova Scotia, died at Halifax, N.S., July 20, aged 62.

Alexander Fraser, formerly captain of the Pickford-Black S.S. Ocamo, died at Camden, N.J., July 21, aged 54.

E. H. Lovitt, master of the barque Englehorn of Yarmouth, N.S., died recently at Hamburg, Germany, aged 64.

J. E. Furness, Manager of the Furness-Withy lines at Halifax, N.S., has been elected a director of the company.

The crews of the Cumberland Ry. and Coal Co.'s barges have been paid off owing to the miners' strike at Springhill, N.S.

H S. Crane, travelling agent of the Plant S.S. Line, Halifax, N.S., was married to Miss M. Thompson, at Boston, Mass., Aug. 9.

The Norwegian S.S. Freysdal, bound to Halifax, N.S., was wrecked on Western Malcolm ledges, off the coast of Maine, U.S. Aug. 9.

The barque Low Wood was badly damaged in a collision with the steamboat Prince George from Boston, in Yarmouth Harbor, N.S., recently.

The S.S. Wanda, while assisting in removing cargo from the wrecked S.S. Orinoco near Cape Sable, fouled the latter's anchor, tearing a hole in her side.

The S.S. Senlac, which was beached after colliding with the S.S. Rosalind in July, has been successfully floated and towed to Halifax, N.S., for repairs.

A ferry boat, to run between Froude Point and Lockeport, N.S., was launched at Lockeport recently, and towed to Yarmouth for the installation of machinery.

The steamboat Universe, at present in dry dock at Halifax, N.S., is to be repaired at a cost of about $60,000. A contract for this work has been awarded by the underwriters.

Plans for a seamen's institute for St. John, N.B., have been completed, and it is hoped to get the building sufficiently far advanced to afford accommodation before winter sets in.

Department of Marine officials held an investigation at Yarmouth, N.S., Aug. 15, into the collision between the Dominion Atlantic Ry. S.S. Prince George and the barque Low Wood.

The time within which the Imperial Dry Dock Co. of St. John may construct its dock at St. John, N.B., was extended to May 1, 1908, last session of the New Brunswick Legislature.

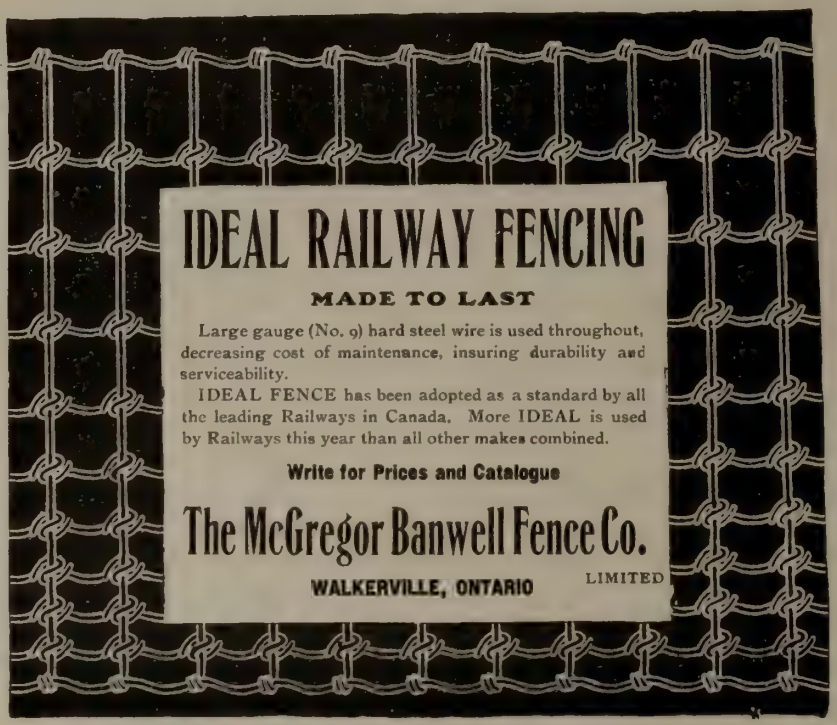
An order-in-council has been passed declaring that Glace Bay, N.S., is a port to which the provisions of the act relating to port wardens shall apply, and appointing W. Phalen to that office.

Wm. Thomson & Co., of St. John, N.B., have chartered the Norwegian S.S. Active to replace the Senlac on the South Shore route, until the necessary repairs to the latter have been completed.

The steamboat Beatrice, which went ashore at Cranberry Head last year, and which was afterwards floated and beached at North Sydney, has been pumped out and taken to Pictou, N.S., for repairs.

D. J. Purdy, St. John, N.B., sailed for England recently on the Empress of Ireland, for the purpose, it is stated, of purchasing a vessel to replace the Crystal Stream, recently destroyed by fire.

The New Brunswick Legislature at its recent session voted the following sums in the interests of the marine services of the



IDEAL RAILWAY FENCING

MADE TO LAST

Large gauge (No. 9) hard steel wire is used throughout, decreasing cost of maintenance, insuring durability and serviceability.

IDEAL FENCE has been adopted as a standard by all the leading Railways in Canada. More IDEAL is used by Railways this year than all other makes combined.

province: $14,000 to provide for steam navigation; $8,000 to provide for public wharves.

J. F. L. Parsons, of the Marine Department, has held an enquiry into the recent collision between the Senlac and the Rosalind, in which the former was so badly damaged that her owners abandoned her to the underwriters.

J. Thompson, a well-known captain on the eastern line between St. John, N.B., and U.S. ports, died at Portland, Me., Aug. 9. He was over 80 years of age, and was the commodore of the International Steamship Co.'s fleet.

An enquiry into the stranding of the schooner Wandrian, at Little River, Me., on Dec. 27 last, has been held by J. G. Riley, of the Marine Department, acting Wreck Commissioner. It is understood that the insurance companies question their liability.

A schooner named Kenneth C. has been launched at Port Greville, N.B., and will be chiefly used in the lumber trade between New Brunswick and U.S. ports. She is 162.2 ft. long, 35.4 ft. wide, 12.9 ft. deep, and 475 tons register, and is fitted with steam hoisting gear.

Capt. A. Dickson, A. Macpherson, H. Bigelow, C. Mackay, and Capt. M. Turner, have been appointed Pilotage Commissioners for the district of Glace Bay, N.S.; S. Harding, measuring surveyor of shipping at Yarmouth, N.S., and G. Tait, port warden for Chatham, N.B.

While engaged in survey work on the Labrador coast recently, the steamboat Ellinor struck an uncharted rock in Eskimo Bay. She has been docked for repairs. After completing her season's survey work she will be sent to Halifax, where during the winter new boilers of larger capacity are to be installed.

The S.S. Orinoco of the Pickford-Black West India Line, ran ashore on Seal Islands, near Cape Sable recently, in a dense fog, and became a total wreck. She was built at Flushing in 1888, and registered at London, Eng. in 1901, under the name Bromo. Her dimensions were: length, 319.9 ft.; breadth, 36.7 ft.; depth, 23.2 ft.; tonnage, 2,486 gross, 1,550 register. She was chartered from the Elder-Dempster Co. about three years ago.

Leave has been granted to the Pilot Commissioners for St. John, N.B., to appeal against the judgment of the New Brunswick Courts, subsequently confirmed by the Supreme Court at Ottawa, in the action brought by the Cumberland Ry. and Coal Co., for the return of pilotage fees. The company owns several barges which are towed from place to place, and on these the St. John Pilotage Commission collected the regular fees for pilotage. The company paid the fees under protest, and subsequently after a decision of the Quebec courts entered an action to recover the amounts paid. The case will now go to the Imperial Privy Council.

The Gloucester Navigation Co., which was incorporated by an act passed last session of the New Brunswick Legislature, is authorized to operate one or more steamboats for passengers and freight on the Baie des Chaleurs, touching at any point at Caraquet, Lower Caraquet, Shippegan, Lameque, Petite Lameque, Petit Shippegan, Miscou and other points along the said route, and to acquire such wharves, warehouses, etc., as may be necessary. The capital is fixed at $40,000, and the offices are to be provisionally at Caraquet, N.B. The first directors are: P. P. Morais, C. L. Robichaud, H. Duguay, P. Luce, W. P. Foley, A. Sormany, E. Chiasson. The company is given three years to get its business organized and a steamboat on the route.

Province of Quebec Marine.

The Dominion Government S.S. Montcalm will run between Quebec and Anticosti Island during the winter carrying mails.

A new steam tug, the Beaumont, has arrived at Montreal from Glasgow, Scotland, where she was built. She is 58 tons gross.

J. O. Poliquin, for the past ten years Secretary-Treasurer of the Sincennes-McNaughten Co., Montreal, died there Aug. 16, aged 53.

The ferry boat Valeria, of Morrisburg, Ont., has been bought by B. Crapaud, Montreal, and will be run between that city and Mouch-a-Feu, Que.

The Montreal Harbor Commissioners have engaged an engineer from London, Eng., to advise them regarding several contemplated improvements to the port.

The steamboat Orion, owned by the Quebec Transportation and Forwarding Co., Quebec, was reported ashore, Aug. 17, on Calf Island, Lake Ontario, while bound to Oswego, N.Y., with pulp wood.

The name of the Dominion Government steamboat Deerhound, official number 109,680, registered at Quebec, has been changed by order-in-council to that of Lady Evelyn. She is used to transfer mails at Rimouski, Que.

Ontario and the Great Lakes.

A. Monteith has been appointed Dominion Government wharfinger at Rosseau, Ont.

The steamboat Arabian, which went ashore in St. Francis Lake, has been released without damage.

Mrs. Durnan, wife of Geo. Durnan, for many years keeper of Toronto lighthouse, died at Toronto, Aug. 17.

C. Virtue, lock laborer Rideau Canal, has been awarded the Imperial Service medal for long and meritorious service.

The steamboat Packard, which was sunk last year in Pigeon Bay, Lake Erie, between Pelee Island and the main land of Essex County, Ont., is to be raised.

The Niagara Navigation Co.'s steamboat Cayuga was dry-docked at Kingston recently for the purpose of having longer blades fitted to her propellers.

The steamboat City of Grand Rapids, which went ashore on Manitoulin Island recently, has been floated without any apparent damage having been sustained.

The steamboat Gunion, loaded with hay and tomatoes for the U.S., sprang a leak and sank in 300 ft. of water at South Bay, Prince Edward County, Ont., Aug. 16.

The steam barge Montpelier, one of the pioneer wooden vessels of the Great Lakes, while bound for Sarnia, Ont., with a cargo of coal, recently sprang a leak, and sank.

The Dominion Department of Public Works will receive tenders to Oct. 10, for the construction of section 1 of the Ontario-Rice Lake division of the Trent Valley Canal.

The S.S. H. M. Pellatt, while en route to Montreal, ran aground, Aug. 20, near Kingston, Ont., and was subsequently released by the Donnelly Salvage and Wrecking Co., Kingston.

It is reported that the surveys for the proposed canal from Lake Erie to the Ohio River have been completed, and that the work of construction will be commenced in the spring.

The small wooden steamboat Benton has been sold for the second time this year. Her latest purchaser is located at Toledo, O., but the vessel will be used in the Georgian Bay lumber trade.

The coroner's jury in rendering their verdict regarding the death of W. H. Munce, killed by a boiler explosion on the tug Gilbert at Fort Erie recently, blamed the captain for not having a competent engineer on board.

L. Charbonneau, one of the oldest of the upper lake captains, recently died at Mount Clemens, Mich., aged 75. He was born in Quebec, and was the first man to sail a steamboat out of the Clinton river into Lake St. Clair.

The Muskoka Lakes Navigation and Hotel Co.'s new twin screw steamboat has been launched at Gravenhurst, Ont. She was christened Cherokee by Miss B. Phillips of Toronto, daughter of the President of the company.

The acting Dominion Minister of Public Works has promised that the construction of the island breakwater in Toronto harbor shall be proceeded with. The contract was let two years ago, but up to the present nothing has been done.

The Dominion Government is having a chart prepared of the Rideau Canal, and the lakes which are connected up by it, so as to form a water route between Kingston and Ottawa. The Department is providing 40 lights at different points on the route.

We have been advised that the reports that the Richelieu and Ontario Navigation Co.'s steamboat Toronto is to be lengthened, after being taken off the route for the current season, are somewhat premature. The question, however, is under consideration.

The U.S. Lake survey reports the stages of the lakes during July as follows:

	Feet above mean tide at New York.		
	1907.	1906.	1895.
Lake Superior	602.75	602.90	602.90
Lake Michigan	581.54	581.44	580.07
Lake Huron	581.56	581.45	580.16
Lake Erie	573.31	572.64	571.46
Lake Ontario	247.14	246.76	244.53

A lighthouse has been erected in the Kawartha Lakes, on the western shore of Clear Lake, near Young's Point. This is one of a number which the Government purposes erecting on the Trent Canal route. It is also proposed to erect one at the head of Clear Lake.

The name of the steamboat Van Woodland, official number 107,708, registered at Toronto, has been changed to Highland Belle; and that of the steamboat Wissahickon, official number 117,084, registered at Collingwood, Ont., has been changed to Wasaga, by order-in-council.

It is reported at St. Catharines that the Niagara, St. Catharines and Toronto Navigation Co.'s steamboat Garden City, now running between Toronto and St. Catharines, will be lengthened and re-engined, but we are advised that the matter has not yet been decided upon by the owners.

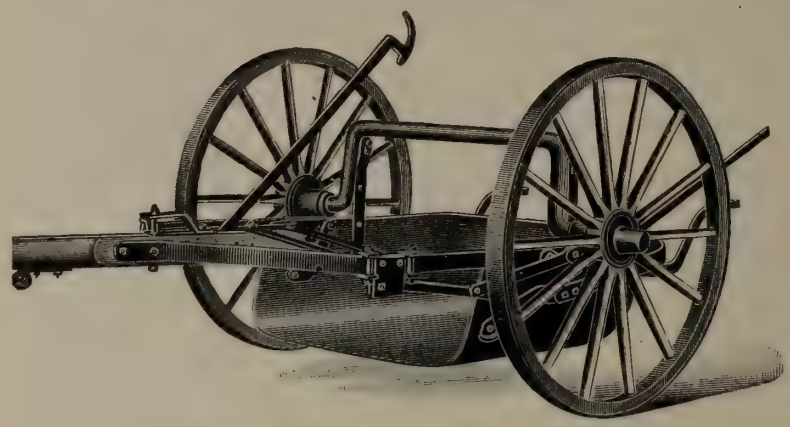
The steamboat Nevada of the Canadian Lake Line, on her way from Toronto to Montreal, ran aground near Farran's Point recently. Mariners say that the spot where the accident occurred is the worst on the whole trip, and at times it is almost impossible to avoid running aground there.

As a result of a visit paid to the principal harbors on the Georgian Bay, by the Deputy Minister of Railways and Canals and the Engineer of Public Works, a commission has been appointed to investigate and report upon the needs of these ports. The report is to be laid before Parliament next session.

The steamboat Pollux is said to be the first boat to carry lumber so far inland as Lake Erie from the seaboard. She was on her way to take up the carrying of grain on the Great Lakes during the season, and had a ballast cargo of about 860,000 ft. of spruce from St. John, N.B., consigned to Tonawanda, N.Y.

THE TORONTO PRESSED STEEL CO.

TORONTO, CANADA LIMITED



Our **SOLID PRESSED BOWL DRAG** and **WHEEL SCRAPERS** are the most satisfactory in the market. They are pressed out of one solid sheet of steel and have no joints or seams.

SUBMARINE .. SIGNALS ..

THE United States Government and the Canadian Government have arranged to send submarine signals from every important lightship in North American waters —this includes:

River St. Lawrence
The Atlantic Coast
The Gulf of Mexico
The Pacific Coast
The Great Lakes

Signals are also in operation in Germany, England, France, and Denmark.

Vessels equipped to receive submarine signals by the

Submarine Signal COMPANY

BOSTON, MASS.

The Rainy River Navigation Co.'s passenger steamboat Keenora left Kenora, Ont., Aug. 10, for Rainy River, arriving there April 13. She experienced tempestuous weather on the trip, having to shelter under one of the islands in the lake, and was further delayed by the low water at the mouth of Rainy River.

Press reports to the effect that the Richelieu and Ontario Navigation Co. has placed an order for a sister ship to the Rapids King, to be named Rapids Queen, are, we are advised, incorrect. The matter has been under the consideration of the Board, but it is more than doubtful if the order will be placed at present.

The former Spanish gunboat Don Juan de Austria, while on her way through the Welland Canal, to take up her station as a naval militia training ship at Detroit, Mich., did $150 worth of damage to the canal, and was held by the Canadian authorities at Port Colborne for some hours until the amount of the damage was paid.

The Beaty Lumber Co., which has been incorporated under the Ontario Companies' Act, with a capital of $100,000 and offices at Toronto, is authorized to own, charter, lease or hire vessels in connection with its lumber business. The provisional directors are: M. Macnair, J. P. Beaty, and Mrs. C. B. Macnair, Toronto.

On account of the number of lights in use by contractors on their drills and dredges, the official lights at Lime Kiln Crossing have been changed as follows: north or upper lightship from present two white lights to two fixed red lights, one above the other, the upper light to be 15 ft. and the lower light 12 ft. above the water.

H. Shelters, who was one of the crew of the Bannockburn, which left Fort William, Ont., for Lower Lake points, some years ago, and was never heard of since, has returned to his home in St. Catharines, Ont. He missed sailing in the vessel, went to the U.S., and never communicated with his friends, who believed he had been drowned with the rest of the crew.

An order was issued from Osgoode Hall, Toronto, removing the stay of execution previously granted, pending an appeal in the case in which Johnson & Higgins, marine insurance brokers, New York, obtained judgment for $14,824.79 and costs for premiums of insurance on the steamboat Turbinia during the winter of 1905-06, while she was chartered by the Canada-Jamaica Steamship Co.

The S.S. Keewatin, the second of the new vessels which the C.P.R. is adding to its service on the Great Lakes, has been launched at Glasgow, Scotland. The Keewatin is a sister ship to the Assiniboia, a description of which was given in our last issue. After crossing the Atlantic, she will be divided amidships, for passage through the canals to the Great Lakes, where the two sections will be rejoined.

The tug Shanly, until recently engaged in Government work, has been purchased by the Parry Sound Lumber Co., and will be used for towing lumber. She was built at Ottawa, Ont., in 1890, registered no. 107,081, in the name of the Minister of Railways and Canals. Her dimensions are: Length, 60½ ft., breadth, 15¼ ft.; depth, 6½ ft.; tonnage, gross, 40 tons; register, 19 tons, and is driven by a screw with engine of 25 n.h.p.

During the recent annual inspection of the Toronto harbor by the Board of Harbor Commissioners, J. G. Sing, Government Engineer, submitted plans of the proposed new western channel. The depth to be provided is about 25 ft., with an increased width over the present channel of about 46 ft. If the plans are approved, the work on the new channel will not interfere with the traffic in the present channel.

The Western Navigation Co. has been incorporated under the Ontario Companies' Act, with a capital of $500,000 and offices at Fort William, Ont., to acquire steam and other vessels, and to carry on the business of carriers by water, shipowners, warehousemen, wharfingers, lightermen and forwarding agents, with all necessary and incidental powers. The provisional directors are: J. Murphy, W. C. Lillie, H. McK. Piper, C. H. Jackson, P. J. Manion, Fort William, Ont.

The James L. Burton & Son Lumber Co. has been incorporated under the Ontario Companies' Act, with a capital of $200,000 and offices at Barrie, Ont., with power, among other things, to carry on business as shipowners and carriers by land and water. The provisional directors are: J. L. and F. L. Burton, W. H. Walker, F. C. Lett and A. Alexander, Barrie, Ont. The company takes over the businesses heretofore carried on by J. L. Burton in Barrie, and elsewhere in Ontario.

The Toronto Ferry Co.'s steam ferry Shamrock was totally destroyed by fire, at her moorings, Aug. 6. The company's waiting-room was also destroyed, and the wharf badly damaged. The Shamrock was built at Oakville, Ont., in 1885, and her dimensions were: length, 103.2 ft.; breadth, 24 ft.; depth, 35.4 ft.; tonnage, 144 gross, 101 registered. She was a paddle steamer driven by an engine of 50 h.p. The wharf and buildings are owned by the City of Toronto and leased to the Ferry Co. It is reported that the company will at once place orders for two additional ferry steamers.

The Spanish River Navigation Co. has been incorporated under the Ontario Companies' Act, with a capital of $40,000 and offices at Massey, Ont, to carry on all or any of the businesses of ship, vessel, tug, lighter and barge owners, warehousemen, dockowners, wharfingers, carriers and produce and general merchants; to buy, sell, build, charter, operate, repair and deal in ships, vessels, tugs, lighters, barges, coal and other goods, merchandise and things as may be deemed expedient. The provisional directors are: J. Errington, H. Sadowski, J. Sheets, I. Nellickes, J. S. Low, J. B. Andrew, H. F. Williams, Massey, Ont.

The Wiarton Steamboat Co., Ltd., has been incorporated under the Dominion Companies' Acts, with a capital of $20,000 and offices at Wiarton, Ont., to carry on the business of the transportation of passengers and goods by land and water; the business of towing, wrecking and salvage; to own and operate steamboat lines; to buy and sell vessels of all kinds; to build, repair and design vessels of all kinds; and more particularly to purchase from W. Gillies and J. W. S. Rutherford, the steamboat City of Grand Rapids, which it is proposed to have renamed Wiarton. The provisional directors are: W. Gillies, St. Edmund tp., Bruce county, Ont.; J. W. S. Rutherford, J. J. Acres, W. H. B. Spotten, T. C. Allen, Wiarton, Ont

The Dominion and Ontario Governments have arrived at an agreement whereby the Dominion takes over all the locks, dams, rights in waters, and flooded lands owned by the Provincial Government along the Trent Valley Canal. The Dominion agrees to keep the works in repair and good condition, and pledges itself to pay the Province at the rate of 50c. an acre for any unpatented lands which may be flooded by the construction of reservoirs, and to compensate private owners also, with the provision that in case it is impossible to arrive at a settlement the dispute shall be referred to the Exchequer Court for decision. It is further provided that all mines and minerals on unpatented lands taken over and flooded in the course of the construction of reservoirs, shall be preserved to the Province; and that all mines and minerals on patented lands are to remain the property of the patentee until a proper compensation be granted therefor.

The figures given below showing amounts spent by the Dominion Government on harbor improvements during the past 15 years, and the nine months ended Mar. 31, were placed before a meeting of the Special Improvement Committee of the Toronto City Council recently. The return does not show any expenditure for Toronto, but the Government has recently granted $50,000 for the improvement of the western harbor there:

	Fifteen years ended June 30, '06	Nine months ended Mar. 31, '07.
Montreal	$ 853,598.07	$ 18,229.82
Brockville	.....	.....
Prescott	7,666.58	.....
Kingston	65,066.10	.....
Cobourg	47,451.27	1,955.29
Port Hope	60,465.21	3,259.49
Collingwood	587,382.54	123,073.88
Owen Sound	245,442.33	15,220.34
Port Arthur, Ft. William	376,877.11	69,393.41
Kaministiquia River	471,479.60	145,944.59
Midland	183,129.03	69,932.66
Total	$2,898,557.84	$447,009.48

At a meeting of the council of the Canadian Manufacturers' Association held in Toronto, Aug. 16, it was decided to appeal to the Railway Commission in the matter of freight car weights. It was alleged that a shipper has to pay freight on the railway companies' weights, which are sometimes higher than his own weighing figures. The manufacturers suggest the appointment of a government weigh master.

In the matter of the winding up of William Petersen, Limited, in the Bankruptcy Court, Newcastle-on-Tyne, England, a third dividend of 4d. in the pound has been declared, making altogether 3s. 4d. in the pound. The receipts amounted to £14,903 4s. 3d., which includes £11,250, the company's proportion of the amount recovered in the action against Armstrong, Whitworth & Co., with respect to the projected steamship line between France and Canadian ports. After paying the costs of liquidation, preferred creditors and the dividends, there is a balance on hand of £606 19s. 1d. The Official Receiver states that several matters have unexpectedly delayed the closing of the liquidation, but a final dividend is expected to be paid very shortly.

CANADIAN PACIFIC RAILWAY COMPANY

NOTICE TO SHAREHOLDERS

The Twenty-sixth Annual Meeting of the Shareholders of this Company for the election of the Directors to take the places of the retiring Directors, and the transaction of business generally, will be held on WEDNESDAY, THE SECOND DAY OF OCTOBER NEXT, at the principal office of the Company at Montreal, at twelve o'clock noon.

The Common Stock Transfer Books will close in Montreal, New York and London, at 1 p.m. on Saturday, August 31st. The Preference Stock Books will also close at 1 p.m. on Saturday, August 31st.

All books will be re-opened on Thursday, October 3rd.

BY ORDER OF THE BOARD.

CHARLES DRINKWATER,
Secretary.

Montreal, August 12th, 1907.

"PAGE FENCES WEAR BEST"

PAGE WIRE FENCES stretch tighter—posts can be set farther apart. That saves money—fewer posts, less labor digging post-holes, quicker erecting. PAGE FENCES last longer—made of No. 9 wire. PAGE FENCES are heavily galvanized, and for a small extra charge are supplied coated WITH PERMANENT PAINT. PAGE FENCES stand wear better, give longer service, keep your maintenance account down. The PAGE KNOT LOCK cannot slip and positively does not injure the wire. PAGE FENCES do not sag.

50 THOUSAND MILES OF RAILWAYS USE PAGE FENCES

There must be a dollars-and-cents reason for the standing PAGE FENCES have with railway men the world over. It will pay your road to hear that reason before you spend another cent on fences.

The Department of Public Works has undertaken the work of improving the navigation of the Athabasca River. A gang of men, taking with them a quantity of machinery, left Edmonton, Alta., July 27, for Lesser Slave Lake, to begin work.

The Southern Alberta Navigation Co. is the title of the company which was formed at Medicine Hat, Alta., for the purpose of operating a passenger and freight steamboat on the Saskatchewan River between Medicine Hat and Lethbridge. The company had a steamboat named the City of Medicine Hat, built there at a cost of about $23,000, but we are informed that it has been found that the river is only navigable for about 80 miles, and that the business done has not been profitable. The company has been considering the advisability of selling the steamboat. The officials of the company are: President, W. Cousins; Secretary-Treasurer, W. J. McLean; Captain, H. H. Ross.

B.C. and Pacific Coast Marine.

The Boscowitz Steamship Co. has purchased the British steamboat Vadzo for its trade on the B.C. coast. She is on her way out from Liverpool to Victoria.

The steamboat Princess Ena, which is being built in Great Britain for the C.P.R. Pacific coast service, is reported to be expected to reach Vancouver in September.

The Burrard Steamship Co., Ltd., has been incorporated under the British Columbia Companies' Act, with a capital of $50,000 and offices at Victoria, B.C., to carry on a general navigation business.

The White Pass and Yukon route is advising shippers to get their goods forward as early as possible, as there are indications of an early closing of navigation there this season, on account of low water.

The Dominion Government has been asked to grant an appropriation in aid of removing obstructions to navigation in the upper reaches of the Fraser River. The promoters of the memorial propose to have a special steamer constructed for the navigation of the river from Quesnel.

The C.P.R. is asking tenders from shipbuilders on the Clyde, Scotland, for the construction of a 20 knot steamboat, for its Pacific coast service. It is said that the vessel will be of the same type as the Princess Victoria, but larger; that she will be 340 ft. long, with 30 ft. beam, and with capacity for 1,500 passengers.

The Prince Ruperts' Timber and Lumber Co., Ltd., has been incorporated under the British Columbia Companies' Act, with power among other things to own and operate steam and other vessels for any purposes of the company. The capital is $450,000; the officers are at Vancouver and the company's attorney is E. H. Moore, Vancouver.

The G. H. French Tug Boat Co., Ltd., has been incorporated under the British Columbia Companies' Act, with a capital of $100,000, for the purpose of acquiring and carrying on the business now carried on at Vancouver under that name, as owners of tugs and scows; to purchase steam and other vessels and to carry on a general navigation and forwarding business.

The British Coast Steamship Co., Ltd., has been incorporated under the British Columbia Companies' Act, with a capital of $100,000, to carry on a general navigation business and other businesses in connection therewith. Power is given to construct at Victoria or elsewhere, a dock with patent or other slips, workshops, buildings, machinery, etc., for the construction and repair of steam and other vessels, to acquire other similar businesses. The company is reported to have chartered the Norwegian steamships, Transit and Thordis, each of about 3,000 tons capacity, for the purpose of putting them in the ore carrying trade. It is proposed to carry supplies from Vancouver to the mines in northern B.C. and Alaska, and to bring back ore for the Vancouver Island smelters. It is also reported that the company is negotiating for the purchase of a passenger steamer in Great Britain.

Marine Notes from the Twin Ports.

Our Port Arthur correspondent wrote Aug. 15 as follows: At present all of the elevators in Port Arthur and Fort William are practically filled with grain, and as the movement toward the seaboard is very sluggish, they are likely to remain so for some time; the daily receipts being equal to, or greater than the shipments. As there is still in the neighborhood of 11,000,000 bush. in interior elevators, and almost the same quantity in farmers' hands, still unmarketed, it is likely that the grain movement, while slow at present, will be continuous until the crop of 1907 begins to move.

The market situation is such that it prevents this movement at present, and with the likelihood of a short crop, the market is likely to be maintained fairly well. The outlook, however, for vessel men for the fall season is very bright and everyone looks forward to good substantial rates for the balance of the season.

The movement of westbound package freight this season is unprecedented, and will no doubt keep up to the limit of the capacity of vessels engaged in that trade. Coal and other coarse westbound freight is heavier than ever before at this season. Both the C.P.R. and the Pittsburg Coal Co. have passed more coal over their docks so far this season than they had up to Oct. 30 in the season of 1906.

Total shipments from opening of navigation April 29, in bushels:

	To June 30	During July	To July 31.
Wheat.	16,050,998.40	6,657,135	22,708,153.00
Oats.	5,341,062.00	1,535,635	6,876,697.00
Barley.	406,838.18	162,551	569,409.18
Flax.	281,410.30	.....	281,410.30
			30,435,669 48

The British Board of Trade has issued an order that hereafter no two British vessels shall be registered under the same or similar names. A report states that the largest vessels will retain their present names, leaving it to the owners of the smaller ones to make changes. The passing of some such regulation in Canada would be an advantage, as the duplication of names, either in whole or in part, is very bad. The similarity of names in Canada, however, does not bring about much, if any, confusion, as in few cases are vessels bearing the same names to be found trading in the same waters. There are some cases in the Maritime Provinces, one of the worst being at Halifax, N.S., where there are registered one steamboat and two schooners named Annie, and schooners bearing the following variations: Annie B., Annie Eliza, Annie G., Annie Louisa, Annie McNairn and Annie S., or nine vessels registered at the one port having the same or a similar name.

LIST OF SAILING VESSELS AND BARGES REGISTERED IN CANADA FROM JULY 15, 1907, TO AUG. 15.

PEERLESS WOVEN WIRE FENCING

Made from uniformly heavy hard steel wire, well galvanized.
Made in large rolls ready to stretch up.
Requires but few posts; costs very little to erect.
Conforms perfectly to any surface, no matter how rough.
Reduces the cost of fence maintenance to a minimum.

BANWELL HOXIE WIRE FENCE COMPANY LIMITED
HAMILTON, ONTARIO

C.P.R. LANDS

THE CANADIAN PACIFIC RAILWAY COMPANY have 10,000,000 acres of selected lands for sale in Manitoba, Saskatchewan and Alberta.

Map No. 1—Winnipeg to Second Meridian	$ 8.00 to $15.00 per acre.
Map No. 2—South-Eastern Saskatchewan, 2nd to 3rd Meridians	10.00 to 25.00 per acre.
Map No. 3—Main Line, 3rd Meridian to Range 10 W., 4th Meridian(generally)	8.00 " "
Map No. 5—Calgary District	8.00 to 10.00 per acre.
Map No. 6—Part of Alberta—Edmonton, Battle and Saskatchewan Rivers Districts—Range 11 West, 4th Meridian to Range 7, West 5th Meridian	10.00 to 25.00 per acre.
Map No. 7—Part of Western Saskatchewan and Eastern Alberta, 3rd Meridian to Range 10 West, 4th Meridian	10.00 to 25.00 per acre.

Maps showing these lands in detail, will be sent free on application.
All prices are subject to change without notice.

TERMS OF PAYMENT

An actual settler may purchase not more than 640 acres on the ten instalment plan by paying a cash instalment at time of purchase, interest at six per cent. on the unpaid purchase money at the end of the first year, and the balance of the principal, with interest, in nine equal instalments annually thereafter, as shown in the following table:

160	Acres at	$ 8.00	per acre,	cash payment	$191.70	first year's interest	$65.28	and nine instalments of	$160.00
"	"	9.00	"	"	215.70	"	"	"	73.46	"	"	180.00
"	"	10.00	"	"	239.70	"	"	"	81.62	"	"	200.00
"	"	11.00	"	"	263.60	"	"	"	89.78	"	"	220.00

Notices to Mariners.

The Department of Marine has issued the following notices to mariners:

No. 57. June 29.—Prince Edward Island—156. East coast, Souris harbor, temporary mooring buoy. New Brunswick—157. Northumberland Strait; Richibucto harbor entrance, south beach, change in position of bar range lights, channel range lights extinguished. 158. Chaleur Bay, Heron rock, change in color of buoy.

No. 59. July 5.—Quebec—166. River St. Lawrence, ship channel between Quebec and Montreal, Lake St. Peter, Pointe du Lac range, lights shown from new lighthouses.

No. 60. July 10.—British Columbia—167. Haro strait, Kelp reefs, light established on beacon. 168. Strait of Georgia, Gabriola reefs, Thrasher rock, light established on beacon. 169. Grenville channel, western entrance, Watson rock, gas-lighted beacon established. 170. Chatham sound, Pointers rock, gas-lighted beacon established. 171. Chatham sound, Prince Rupert harbor, Casey point, change in character of buoy.

No. 61. July 17.—Quebec—172. River St. Lawrence, Quebec harbor, Fly bank, gas buoy established. 173. River St. Lawrence, Montreal harbor, St. Lambert shoal, buoy established.

No. 62. July 17.—Ontario Lighthouse Division—174. Quebec, Ottawa river, Ste. Anne lock, changes in range lights. Ontario—175. Lake Ontario, off Toronto, Gibraltar point, light still maintained. 176. Lake Huron, north channel, McKay island, lighthouse established.

No. 63. July 19.—Quebec—177. Gulf of St. Lawrence, Seven Islands, Carousel Island, light station—change in fog alarm.

No. 64. July 20.—Atlantic Ocean—178. Derelict reported. New Brunswick—179. Bay of Fundy, St. John tide tables, error in time. 180—St. John River, Belleisle bay, Long point, light established. Ireland—181. South coast, galley head light, character altered.

No. 65. July 24.—General—182. Canadian list of lights and fog signals, new edition. Nova Scotia—183. Bay of Fundy, Petit passage, Long island, Boar's Head, change in character of light.

No. 66.—British Columbia—184. Canadian list of lights and fog signals, new edition. 185. Discovery passage, Seymour narrows, Maud Island, gas-lighted beacon established.

The following have been issued by the U.S. Hydrographic Department:

No. 29. July 20.—St. Mary's River—1315. Mud Lake, Winter point range light station, change in lights. 1316. Old channel, Neebish Island (Hen and Chickens), range lights to be re-established. Lake Erie—1321. Huron harbor entrance, light moved.

M. J. Butler, Deputy Minister of Railways and Canals, accompanied by D. Pottinger, General Manager, made an inspection tour of the I.C.R. lines and shops during Aug.

Hall and Holcomb, Limited, has been incorporated under the Ontario Companies' Act, with a capital of $25,000 and offices at Ottawa, to acquire, carry on and extend the general forwarding business heretofore carried on as Hall and Holcomb. The provisional directors are: J. H. Hall, R. T. Holcomb, and G. T. Harris, Ottawa.

The Allan Steamship Grampian.

The twin screw steamer Grampian—the first of the two large passenger and cargo vessels which have been ordered for the Glasgow section of the Allan Line service between Great Britain and Canada, was launched at Linthouse, Govan, Scotland, July 25. The Grampian has, in dimensions, about reached the limits that the Clyde docks can accommodate, and will, with her sister ship, the Hesperian, now well advanced in construction, form an important addition to the fleet of steamers which are run under the Allan Line flag from Glasgow. The Grampian is 502 ft. long, and 60 ft. broad, with a depth to her shelter deck of 41½ ft., and a gross register tonnage of about 10,000. She is built to the highest class of the British Corporation for the Survey and Registry of Shipping; is constructed on the cellular double bottom principle, and is specially strengthened for her North Atlantic trade. Her dead weight capacity will be about 9,000 tons, and her internal cubic space will greatly exceed this figure. To facilitate the stowage of cargo, the pillaring of the holds is of the new tubular form, widely spaced, and her numerous steam winches and other appliances are of the most complete design for the rapid loading and discharging of cargo. Nine large chambers, with a capacity of 23,000 cu. ft, are being fitted up for cold storage of cargo and ship's provisions, cooled by refrigerating machinery.

The 'tween decks are lofty, and the staterooms large and tastefully furnished, giving accommodation for 500 first and second class cabin passengers, and in the third class provision is made for 1,400 passengers, who will be carried in four-berth rooms. For each of the classes large and well appointed dining saloons, music rooms, libraries, lounges, smoke rooms and covered-in recreation spaces have been provided. The first and second class public rooms are tastefully panelled in white enamel, in fumed oak, mahogany and other hardwoods, and those of the third class are finished in polished pitch pine. The ship is lighted throughout by electricity, and to ensure its unbroken maintenance the supply plant is duplicated, and in addition to natural ventilation the 'tween decks and emigrants' spaces are heated and ventilated on the thermo-tank system. There are separate galleys amidships, and at each end for passengers and crew. The Grampian is a twin screw steamer propelled by a double set of triple expansion engines, designed to maintain at sea a speed which will enable her to make the passage from her last port of call, Moville, to Rimouski, in less than seven days. Her ample boiler power is fitted with forced draught, and her engine room has a very complete installation of auxiliary machinery.

The Grampian is to sail on her maiden voyage from Glasgow to Montreal on Sept. 21. Her sister ship, the Hesperian, will take her place in the service early next year in time for the spring season's trade. Both vessels are being constructed under the personal supervision of A. M. Gordon, Naval Architect; D. Johnston, Superintendent Engineer, and Capt. Christie, Marine Superintendent, on behalf of the owners. The builders are Alex. Stephen & Sons, Ltd.

The Department of Marine has made the following appointments: A. Cyr, harbormaster at Grand Entry, Magdalen Islands, Que.; W. M. Long, measuring surveyor of shipping at Peterborough, Ont.; M. Poirier, shipping master at Glace Bay, N.S.; and W. Phalen, port warden at Glace Bay, N.S.

Stranding of Steamship Montrose.

Commander O. G. V. Spain, Dominion Wreck Commissioner, with Capt. A. Reid, Port Warden of Montreal, and C. A. Raymond, branch pilot for and below Quebec, as assessors, held an investigation at Montreal July 5 and 6, into the causes which led to the stranding of the S.S. Montrose on Red Island reef, St. Lawrence River, on July 2, when en route from Antwerp to Montreal. The following judgment was delivered Aug. 12:

The court, on the termination of hearing all the evidence which it was possible to obtain, and after affording both the pilot and the master and officers of the ship full opportunity for defence and explanation, finds as follows: The S.S. Montrose is a vessel of 6,278 tons gross, and owned by the C.P.R. Co., registered at the port of Liverpool, Eng., and commanded by Capt. J. H. Moore, who holds a Board of Trade master's certificate. The Montrose was fully found in all the requisites to safe navigation, and properly manned, in accordance with the Act. From all the evidence adduced, all went well on the voyage until after the vessel passed Father Point, at which place, at 7.56 a.m. apparent time, on July 2, Branch Pilot J. H. Talbot, who holds a pilotage certificate for and below the harbor of Quebec, was taken on board, and took charge of the navigation of the vessel. At this time the weather was fairly clear, and the east end of Barnaby Island was visible, but the weather conditions were such as conduce to caution. At 9 a.m. Bicquette was passed at an approximately assumed distance of three miles, but nothing was observed; weather thick and lifting at intervals. At 11.30 a.m. the vessel was enveloped in thick fog, but the sound signal on Red Island lightship was heard right ahead; ship was continued at full speed, which was in the neighborhood of 10½ to 11 knots; for some reason, not satisfactorily explained to the court, they passed north of the Red Island lightship, starboarding the helm, and passing between the ship and the island. The testimony at this point is somewhat conflicting, it being impossible to find out exactly how long the ship was headed to the S. E., but the evidence of the master and officers of the vessel shows that the lightship was passed at 11.56 a.m., and the Montrose was steadied on her course of S. W. b. W. ¼ W. at 12.02 p.m. (or six minutes), and she took the ground at 12.18 p.m.; clearly proving that she could not have run on the S.E. course for as long a time, or for as great a distance, as the officers in charge assumed she had. The court considers that the pilot, J. H. Talbot, was guilty of a grave error of judgment, insomuch as he continued at full speed, and on too fine a course, without first ascertaining, by the lead or otherwise, that the vessel was in a safe position to clear a thoroughly well-known danger. At the same time the court cannot exonerate the master, J. H. Moore, from blame, as this officer accepted the actions of the pilot as correct, and allowed him to alter the course, and continue at full speed, without first assuring himself of the actual position of the vessel—which might have been so easily and conveniently found out by taking the departure from the lightship, and running a course that would determine a safe offing from the Red Island reef. The court, taking into consideration the excellent record as a pilot held by J. H. Talbot, fines him $100, which is to be paid in four quarterly instalments of $25 each; Capt. J. H. Moore is admonished and warned to be more careful in future. The court exonerates the other officers of the S.S. Montrose.

Maritime Provinces Deal Ports.

J. H. Scammell & Co., St. John, N.B., have issued a map showing the location of the deal ports in the Maritime Provinces and giving the following information in regard thereto:

Loading Port	Depth of Water on Bar at High Tide.	Depth in Harbor.	How Cargo is delivered.	Cost per standing 1907
St. John, N.B.	42 ft.	50 ft.	Lighters, cars.	$1.00
Musquash, N.B.	22-24 ft.	30 ft.	Lighters	95c. 1.00
Cape Tormentine, N.B.	No bar.	19 ft.	Wharf.	80
Grindstone Island, N.B.	No bar.	30 ft.	Lighters.	75
Hopewell Cape, N.B.	No. bar	30 ft.	Lighters.	75
West Bay, N.S.	No bar.	30 ft.	Lighters.	75

The United States Government is reported to have completed surveys for the proposed canal from Lake Erie to the Ohio River. The proposed canal will be 133 miles long, 177 ft. wide and 13 ft. deep. It will, as nearly as possible, follow the natural waterways, and is estimated to cost $75,000,000. A special line of vessels will have to be constructed for the canal, which is intended for the carrying of coal.

The Dominion Government has granted permission to the U.S. Government to take the former Spanish gunboat, Sandoval, to Rochester, N.Y., as a training vessel for the naval militia there. This is the second of the Spanish naval vessels captured by the U.S. in the war of 1897 to be brought to the Great Lakes. The vessels, it is said, are to be used solely as training ships and are to remain unarmed.

Orders-in-Council have been passed authorizing changes in the names of vessels as follows: Hattie Hansen, steamboat, official number 122,338, registered at Vancouver, B.C., to that of Sechelt. Queen City, steamboat, official number 121,890, registered at Victoria, B.C., to that of Queen. Belle, steamboat, official number 85,674, registered at Victoria, B.C., to that of Red Fir. Mabel Bradshaw, steamboat, official number 117,085, registered at Collingwood, Ont., to that of Soo City. General Wm. B. Franklyn, steamboat, official number 122,352, registered at Kingston, Ont., to that of Arrah Wanna. F. Patchin, schooner, official number 103,465, registered at Halifax, N.S., to that of Doris Hull.

The Lake Freight Situation.

Our Winnipeg correspondent wrote Aug. 17 as follows: Since last report freight matters on the Great Lakes have been greatly upset, first owing to the strike of the ore trimmers on the United States side of the line, and later by the telegraph operators' strike. The effect of the first named strike was to throw hundreds of ore boats out of employment, and as a result they all looked for cargoes in the grain trade, with the result that the grain rate, Fort William to Buffalo, dropped from 2¼c. to 1c., and even at that figure a great many boats were not able to secure anything and were forced to go east light. The reduction in U.S. rates also had its effect on Canadian rates, the latter dropping from 2c. Georgian Bay ports to 1½c., the half cent reduction also applying to Kingston and Montreal business. The ore trimmers' strike had just been settled, and matters were beginning to be normal when the telegraphers' strike took place, and the result of this is still to have its effect, but already grain shippers at this end are unable to reach their New York buyers, and the result is that Buffalo business is at a complete standstill, and as Montreal is not in shape to take care of any new business until well into September, the grain trade is at a standstill until the last strike is settled.

Outside the labor troubles conditions in the bulk freight trade have never been better, and in spite of the strikes, vessels will this season show the best earnings that they have done in a number of years, as the delay in moving freight now will force a higher range of rates later, so that vessel owners will not lose anything on account of the various delays.

Port Colborne Harbor, etc.

By DeWitt Carter, Port Colborne, Ont.

Port Colborne, being the Lake Erie entrance to the Welland canal, is one of Canada's national harbors. The Dominion Government, through the Departments of Railways and Canals and Public Works, have expended a large amount of money on deepening the harbor and enlarging it by building two large breakwaters, which protect and make the outer harbor. In this outer harbor they have constructed two large piers for elevator sites. On the western pier the Government is now building one of the finest and fastest working transhipment and storage elevators in the world. It is to be built wholly of steel and cement, and will be practically fireproof. It will have four unloading legs with an hourly capacity of 20,000 bush. each. When completed it will put our water route on an equality with the United States route, via Buffalo, down to this point. The largest bulk freight steamers on the upper lakes can quickly unload their grain cargoes here and then go to some Lake Erie port and reload coal for the head of the lakes. From here to Montreal the grain can be shipped in barges, whose running expenses are much less per day than steamers. Though the barges cannot be towed as fast on the lakes as steamers usually run, they can make just as fast time in the canals, therefore their earning powers in the canals are greater when compared to their earning powers on the lakes than steamers. For the past 25 years St. Lawrence River barges have been towed between Kingston and Lake Superior, carrying grain, and during all that time only one has been lost, and that was near the head of Lake Superior, through an accident. They have proved themselves seaworthy craft on all our great lakes. When these barges are loaded with grain here they can deliver it to ocean steamers at Montreal.

The Welland Board of Trade, and especially some of its members, have questioned the advisability of the Government building a transhipment and storage elevator here, and with other boards of trade throughout the country have strongly petitioned the Government to enlarge the Welland canal as the best means of reducing the cost of transportation of grain and other products from the interior to tide water. If we are to have another era of canal enlargement as a means of reducing freight rates and increasing traffic, by all means commence at Montreal and work west. Our latest Dominion statistics show that for the last 15 years there given, that less than 55% of the freight that passed down through the Welland canal for export passed out through Montreal, while over 45% went by U.S. ports, practically all through Ogdensburg. During this period scarcely nothing has gone through the Erie canal from Oswego. When the thousand ton barge canal, now being constructed between Oswego and New York, is completed, the St. Lawrence route will have a strong competitor for grain passing through the Welland canal. Therefore if it is a national interest that the Welland Board of Trade takes in our all water route, it should take up the matter of canal improvement east of Kingston, instead of west. The Kingston Board of Trade sent out a copy of a resolution which was adopted by the Welland Board of Trade and many others. This resolution showed through the juggling of figures as to the distances, carrying capacities and freight rates that by enlarging the Welland canal, so that the largest upper lake steamers could carry full cargoes from Lake Superior through to Kingston, that the freight between Port Colborne and Kingston would be reduced to ½c per bushel. If such a reduction can be made by enlarging the Welland canal, why not enlarge the St. Lawrence canals and thus eliminate transhipment between the head of the lakes and Montreal? The Kingston resolution did not ask for improvements on the St. Lawrence canals, they merely desired transhipment at Kingston instead of at Port Colborne. Like the promoters of the Georgian Bay-Ottawa canal, they ignore three prime factors, namely —time, risk of damage, and return cargoes.

I do not believe that the enlargement of the Welland canal would materially reduce the rate of freight between Port Colborne and Kingston. I have several reasons for this conclusion, but I shall give only the following, as it will be most easily understood. The important factor in water transportation is time, especially with large and expensive steamers. When they figure on a freight they reckon the time from the moment they commence to load a cargo until they deliver it, and reach a point where they can reload another. The rate of freight per bushel from the head of Lake Superior to Buffalo this season has been about 2c. for wheat; from the head of Lake Superior to Kingston 4c., and to Montreal 6c. It takes about four days to make the run from the head of Lake Superior to Buffalo; eight days from the head of Lake Superior to Kingston and return to Lake Erie; and 12 days to Montreal and return to Lake Erie. It will be seen from the rate of freight and time taken on the trip to the three different ports, that the charge is ½c. per bushel for each day over these routes. The freight rates paid on the upper lakes govern largely the rate paid to Kingston and Montreal. Now, unless you can materially reduce the time that it now takes a steamer to go from Port Colborne to Kingston and return to Lake Erie I cannot see why the rate of freight would be reduced by enlarging the Welland Canal. It is not reasonable to expect that the large steamers will carry freight for less per day between Lake Erie and the foot of Lake Ontario, than they would carry it for on the upper lakes. In giving the time of the steamer that delivers her cargo at Kingston as eight days, I figure it up to the time she will arrive back on Lake Erie, where she must come to place herself on an equality with the steamer that goes to Buffalo, because there are practically no return freights from Lake Ontario. Steamers are returning up through the canal light every day, and going to Buffalo or some south shore port on Lake Erie to load coal for Lake Superior.

While Canada during the past quarter of a century has been expending millions on canal enlargements, our competitor, Buffalo, has merely improved and deepened her harbor, provided fast unloading facilities and elaborate storage for over 20,000,000 bush. of grain, and through these improvements has constantly diverted traffic that should have passed through our canals to the seaboard. With this precedent within 20 miles of our harbor, I feel certain that time will show the wisdom of those who have assisted and encouraged the Government to make the much needed harbor improvements and build an up-to-date transhipment elevator here.

Articles With Seamen.

F. King, Secretary Dominion Marine Association, has issued the following circular: "My circular of May 16 last, suggested that the refusal of any seaman to sign articles should be carefully noted in order that evidence should be available in the event of proceedings against the master for carrying a seaman without a signed agreement. Since then officials have imposed fines in certain cases even where this proof was produced. The Association has appealed to the Department of Marine against this apparent injustice and has asked for special consideration in cases where urgent circumstances have required masters either to pick up men upon their own terms or else sail shorthanded, but the Department intimates that the statute must be rigidly enforced, and that the only way to avoid possible penalties is for a master to refuse to take a seaman who refuses to sign articles. Following is an extract from a letter from the Deputy Minister of Marine, dated July 23:

"'The Department in its endeavors to bring about an observance of the law respecting the shipping and discharge of seamen on inland waters, is more than gratified with the results achieved, especially as that law had become practically a dead-letter. But the Department does not forget that the credit is due chiefly to ship-owners and captains who have co-operated with the Department in the matter. Agreement forms have been written and telegraphed for from all parts of the country and thousands of forms have been sent out. And one very satisfactory feature of it is that the law, so far, is being brought into operation again with but comparatively few fines, and I am prepared to say, with reference to the occasional refusal of seamen to sign an agreement, that if ship owners and captains of inland vessels continue to insist on the carrying out of the law, it will only be a short time when such a thing as a seaman on the inland waters refusing to sign an agreement will not be heard of."

Among the Express Companies.

C. G. McCoy, for the past 18 years agent National Ex. Co., Rouse's Point, N.Y., died there Aug. 4. For some years he was express messenger for the N. Ex. Co. on the run into Montreal.

The carriage of c.o.d.. parcels containing intoxicating liquor is prohibited by law in the province of Nova Scotia, where the Canada Temperance Act is in force, and the express companies have, as a consequence, forbidden their agents to accept such consignments. The management of the Sydney and Louisburg Ry. has directed its agents to refuse to receive for carriage any consignment which they may suspect to contain intoxicating liquor.

Telegraph and Cable Matters.

W. E. Earle, Manager of the Western Union Cable office at North Sydney, N.S., has presented a pipe organ to St. John's church there.

The G.N.W. Telegraph Co. has closed its offices at Cornell, Finch, Springtown, Ont.; Lanoraie, Que.; and has opened offices at Norval Station, Petawawa Camp, Ont.

An official of the Marconi Telegraph Co. in London, Eng., was quoted, Aug. 2, as saying that a radiograph service will be begun between the company's stations in Clifden, Ireland, and Glace Bay, N.S., early in Sept.

The G.T. Pacific Ry. offices in Winnipeg are being moved from Main st. to Arknis block, Portage ave.

Standard Time.

By W. J. Camp, Electrical Engineer, C.P.R. Telegraphs.

A vital necessity in the safe and efficient handling of trains is that all clocks and watches must indicate uniform time. Many serious accidents have resulted from a difference between the timepieces of two employes, and during the past few years most of the railway companies on this continent have spent a great deal of money toward securing uniformity throughout their systems.

The C.P.R. management, recognizing the great importance of a uniform time system, has established a Time Service Department under the supervision of Mr. J. J. F. Houghton, to whom I am indebted for a large part of the matter contained in this paper. The daily transmission of time signals is looked after by the telegraph department, and the following description of the method may be of interest. On account of the very long circuits worked, it has been found best to transmit the signals by hand. At 11.53.50 the preliminary caution "BK time" is given by Montreal on all duplexes and half quads over which it is desired to send the signals, as a warning to the various repeater offices to cut in their combinations. The single wires are then cut in at Montreal and other points are switched on, and a second warning of "time" is given, then single beats are made corresponding to the swing of the main clock pendulum, by alternately closing and opening the circuit each second; the beats are therefore one second in length. These are continued until 11.54.50, when the circuit is left open for ten seconds. At exactly 11.55.00 a long double beat is given and continued each alternate second until 11.55.50, when another pause of 10 seconds is made and at 11.56.00 a double beat completes the transmission.

The repeater arrangements at Montreal consist of five relays of 75 ohms, each connected up in series with an ordinary Morse key in a pony circuit. The lead from the local dynamo to the desired duplex and quad tables passes through the contact points of one relay. By means of the loop switch any duplex or half quad can be thrown into the combination. The positive and negative 130 and 200-volt dynamo leads pass through the contact points of the other four relays to the various single wires—a by-path is provided so that any leased or other wires over which "time" is not to be sent can be switched out of the combination.

The sparking at the relay contact points is almost nil, but should it become too great by adding more circuits, a small condenser would reduce it. A similar arrangement is used at all repeater offices where storage or dynamo current is employed, the pony circuit being worked by the relay on one of the incoming circuits. At points where a repeater office is equipped with gravity battery, there is seldom more than one or two side lines to connect up for time and in these cases an ordinary relay is employed for each of such lines. The combinations at the various repeater offices are made up at 11.30 or even earlier, but the pony circuits held closed by a button switch until the warning signal is received from Montreal, when it is only a moment's work to turn the switch and throw into the "time" circuit all wires on which it is desired that the signals be sent.

C.P.R. time is regularly forwarded to Fanning and other islands in the Pacific ocean, and to Bermuda, Jamaica, and the Azores Islands in the Atlantic. Officers on vessels of the British navy frequently check their chronometers with this time at Vancouver, B.C., and Halifax, N.S., and of the German navy at the Azores.

A few words as to the accuracy of the time may be mentioned here. Some years ago a long series of observations were carried on by astronomers of Canada and Great Britain, and signals exchanged over the C.P.R. wire and Commercial Cable Co. cables. An astronomer was located at Montreal, one at Canso, one at Waterville, Ireland, and one at Greenwich, Eng. Each astronomer was stationed at each of the points named in turn, in order to eliminate the personal error Signals were exchanged in each direction, giving the transit of various stars over the meridian. Finally the land lines and cables were connected through repeaters and signals exchanged both ways direct between McGill observatory, Montreal, and Greenwich, as a check of the preceding results. From these observations was obtained the true longitude of Montreal. I believe that afterwards Washington, D.C., and various other points on this continent checked up their longitude with Montreal.

A master clock at McGill observatory sends out signals over a circuit connected with an ordinary sounder in our main office. This clock is closely regulated by a sidereal clock at the observatory, which in turn is frequently checked up by observations of the stars. We have on several occasions noticed that the "time" given over the U.S. railway lines has been as much as three seconds in error. We are satisfied that our own standard was right from the fact that the reports from the various comparison clocks on the system showed a uniform variation while the signals coming in over the New York Central Rd. wire jumped two or three seconds in one day coming practically into unison with McGill.

Comparison clocks (nos. 17 or 18 regulator) are located at all divisional points. At all comparison stations a daily record is kept of the clock variations and a report sent to the Chief Inspector at the end of each month. This report shows the seconds fast or slow and when the clock is wound, set or regulated. Each month these reports are checked up and the average weekly rating ascertained, from which a statement is compiled and a copy sent to each master mechanic, superintendent, general superintendent, the Vice-President and General Manager. The Time Inspector visits every station from one to three times per year and checks up the handling of records. All way stations are supplied with a standard telegraph clock; variations are recorded daily in same manner as comparison clocks.

Watch inspectors are located at all divisional points. They are practical watchmakers doing a regular business with the general public. It is their duty to see that all trainmasters, road foremen of locomotives, locomotive foremen, roadmasters, bridge and building masters, engineers, firemen, conductors, train baggagemen, brakemen, yardmasters and yard foremen carry watches up to the required standard and that the watches are regularly cleaned. For this purpose the inspectors are advised by the proper official of the railway of all changes in the staff of the employes mentioned.

The minimum standard of excellence adopted is a grade known among American movements as 17-jeweled, double roller escapement, Breguet hair-spring, patent regulator, adjusted to temperature, isochronism and at least five positions, and corresponding to Waltham, Appleton Tracy and Co. "nickel premier"; Ball, "official standard" 16 and 18 size; Elgin "B. W. Raymond nickel"; Hampden "new railway"; "Illinois bunn"; Hamilton "936," and all grades equal or above, also Swiss movements complying with these specifications, the variation of which must not exceed 30 seconds per week. Watches which were in service prior to the reorganization of the time service, Oct., 1899, may remain in use subject to the approval of the Chief Inspector as based on the record of their performance, or on actual test in his

office of their reliability. Almost every one of these watches has been removed from the service.

Employes required to carry standard watches must submit them for half-yearly inspection to the time inspector of their divisions, and receive a certificate that they are satiacsftory, a copy of which is forwarded to his superior officer and duplicate to the Chief Time Inspector. In addition to the half-yearly inspection, employes must submit their watches to the inspectors for comparison with standard time within the first and third weeks each month, and the inspectors keep a record of the rating. Failing to make such comparison the employe is not eligible for duty without an order from his superintendent. No charge is made for these comparisons. Cards for keeping record of these ratings must be carried on the person subject to inspection on demand of a superior officer. Employes must not set or regulate their own watches, unless a watch stops through neglect to wind it. Watches must be cleaned at least once in 15 months. The rate card must be filled in in the presence of the employe, who is required to initial the corresponding entry in the inspector's rating book. When a watch is repaired and cleaned by other than an inspector, it must be submitted to the inspector for approval before being used in the service. When left with an inspector for cleaning or repairs, a standard watch will be loaned to the employe free of charge until his own is returned to him.

Inspectors are required to have a thoroughly accurate seconds pendulum clock and must ascertain the error thereof to the nearest second at least once each day by comparison with the standard time sent over the company's telegraph wires. A local circuit is extended from the contact points of a telegraph relay in the station to the place of business of each inspector, for this purpose. A similar circuit is provided for roundhouses, etc. There are a number of rules and instructions to the inspectors regarding cleaning, etc., which it is not necessary to mention here.

The C.P.R. has only installed electric clocks at Montreal and Winnipeg general offices and stations. At Montreal there are 81 clocks on five circuits worked by one master clock. These circuits obtain current from a small storage battery which is kept continually charged by a lead from the 25-volt local motor-generator in the main telegraph office a mile distant. The five circuits are worked in multiple from one pair of cells—I believe this road was the first to work clock circuits in this manner. At Winnipeg there are 37 clocks on two circuits.

The results since the establishment of the present time service have been very satisfactory. On one trip across the continent by the Time Inspector he found that the average variation of all comparison clocks was less than five seconds from standard time.

General Telephone Matters.

The Nova Scotia Telephone Co. is extending its line from Lakeville to Somerset by way of Grafton, N.S.

A convention of representatives of the independent telephone companies will be opened at Toronto Sept. 4.

Tenders have been received for the construction of a subway for the Government telephone system in Winnipeg.

The New Brunswick Telephone Co. has added an information bureau at St. John, N.B., for the benefit of its subscribers.

The Bell Telephone Co. moved to new premises in Dalhousie st., Brantford, Ont., Aug. 5, where it has inaugurated a central energy system at a cost of $40,000.

The Chilliwack Telephone Co. has been incorporated under the British Columbia Companies' Act, with a capital of $20,000, to carry on within the province the business of a telephone company.

It is stated that the negotiations on the part of the Alberta Government to purchase the Bell Telephone Co.'s property in that Province have fallen through, and that in future the company will compete with the Government 'phones.

The plans for the construction of the extensions of the Bellechasse Telephone Co.'s lines into the city of Quebec have been completed. W. H. Crumb, of Chicago, Ill., has been in Quebec for some time in connection with the matter.

The Manitoba Government has sold $500,000 of telephone bonds to F. Wilson Smith, Montreal, at a price to yield 4.43% to the investor. The proceeds of the sale of bonds will be utilized for the purpose of starting construction on the provincial telephone system.

The People's Mutual Telephone Co. has been incorporated under the Ontario Companies' Act, with a capital of $21,000 and offices at Bethel, Ont., to carry on a general telephone business in Prince Edward County. The provisional directors are: T. A. Crawford, W. H. Sine, A. F. Rightmeyer, W. H. Allison and A. S. Brown, of Sophiasburg tp., Ont.

At a meeting of the Markham and Pickering Independent Telephone Co. recently at Whitevale, Ont., the report showed that considerable progress had been made during the year, and the mileage had been increased. It was decided to further extend the company's lines both northerly and easterly. The officers were all re-elected for the current year.

The Blenheim and South Kent Telephone Co. has been incorporated under the Ontario Companies' Act, with a capital of $10,000 and offices at Blenheim, Ont., to carry on a general telephone business in the county of Kent. The provisional directors are: G. Taylor, J. R. Miller, H. Drane, A. Denholm, C. H. Echlin, Blenheim; W. J. Huffman, N. Watson, of Harwich tp., Ont.; T. L. Pardo, of Raleigh tp., Ont.

Press reports from England state that wireless telephone stations are to be erected at Oxford and Cambridge, which are about 60 miles apart. It is claimed that the voice will be perfectly audible, and that recent experiments have been successful in securing the proper attunement of each instrument so that a message sent through the transmitter can only be received at the station for which it is intended.

The Government telephone system between Calgary, Banff and other points in Alberta commenced operations early in August. At Montreal recently Hon. A. C. Rutherford, Premier of Alberta, stated that this system, covering a distance of 500 miles, is the first state-owned telephone system, and that more lines would be constructed in the future, but whether the rates would be lower than those of the private companies, he could not say.

Work on the Provincial Government telephone lines in Alberta is at present proceeding in four different parts of the province. It is stated that the line east of Edmonton will be completed as far as Lloydminster this year, while men are engaged on the line east of Lacombe. About 40 miles of line has been erected on the Daysland branch, and work is being gone on with on the Stettler branch, and also between Frank and MacLeod. Next year it is hoped to connect Calgary with Edmonton and Lethbridge.

The act amending the charter of the New Brunswick Telephone Co., passed at last session of the New Brunswick Legislature, provide for the increase of the capital stock to $2,000,000, which may be issued as fully paid up for the purpose of acquiring the property stocks and franchises of other companies. It is authorized to acquire the lines, etc., of the Central Telephone Co., subject to the right of the New Cumberland Telephone Co. in Nova Scotia, and the Bellechasse Telephone Co. in Quebec, to connect their lines with those of the C. T. Co. as existing Aug. 21, 1906; and to use its lines for the transmission of telegraphic messages over the same. The following lines, which had been purchased by and amalgamated with the Central Telephone Co., are authorized to be taken over, together with all their property, rights and franchises: Sackville Telephone Co., Hebert Telephone Line, Kent-O'Leary Company Line, Chatham Electric Co., Miramichi Company, Bathurst Telephone Co., Caraquet Telephone Co., Campbellton Telephone Co., Union Telephone Co. The purchase of the Madawaska Telephone Co., Chatham Electric Light Co., and of the telephone lines owned by F. L. Pedolin are ratified and confirmed.

New Brunswick Telephone Act.

The act Respecting Telephones passed at the last session of the New Brunswick Legislature provides that whenever it is decided by order-in-council that it is expedient and in the interests of the people of the province to expropriate, take and have the telephone property, rights, powers and franchises of any telephone company or companies in the province, it shall be done in the following manner: The order-in-council shall be published in the official gazette for four consecutive weeks, and at the end of one month from the date of the last publication, the telephone property and franchises shall vest absolutely in the province. The price to be paid to the company for its property and franchises so acquired shall be fixed by agreement, or in default of such agreement, by arbitration. The proposal to expropriate any telephone company must be approved of by a resolution of the Legislature before any steps are taken to expropriate.

The act also provides that every telephone company, or company having the right to charge telephone tolls, which may hereafter carry on a telephone business in the province shall file with the Provincial Secretary within a month after its annual meeting a statement of its receipts and expenditures for the previous fiscal year, together with such other information as may be required, and a copy of its tariff of telephone rates and tolls. The Government is authorized to appoint auditors at any time, to examine the books of any telephone company in the province for the purpose of ascertaining whether or not the tolls, rents, rates and charges of the company for business done, or to be done, are reasonable; and to alter or vary such tariff if it be found that after meeting all expenditures for maintenance, bonded indebtedness, renewals, etc., the company earned and paid dividends of 8% and over upon its capital stock. Such alteration of rates shall not, however, be so large as will reduce the prospective annual dividends to less than 8%.

The Municipal Council of any town having a population of 8,000 and upwards may, by a two-thirds vote, require any telephone company, when making substantial or extensive repairs or renewals of, or additions to its system, to place any portion of its wires and cables in underground conduits. The council may also fix the location of such conduits, and the location, height, etc., of any poles. No telephone company may construct any conduit without the consent of the municipality. Local municipalities or corporations having the right to con-

The Canadian Pacific Railway Co.

Dividends for the half-year ended 30th June, 1907, have been declared as follows:

On the Preference Stock, two per cent.

On the Common Stock, three per cent.

A further sum equal to one-half of one per cent on the Common Stock will be paid thereon at the same time out of interest on the proceeds of land sales.

Warrants for the Common Stock dividend will be mailed on 30th September next to shareholders of record at the closing of the books in Montreal, New York and London respectively.

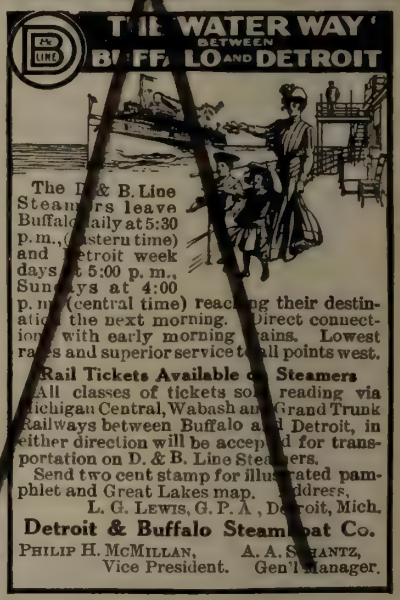
The Preference Stock dividend will be paid on Tuesday, October 1st next, to shareholders of record at the closing of the books at the Company's London Office, No. 62 Charing Cross, London S.W. The Common Stock Transfer Books will close in Montreal, New York and London at 3 p.m., Saturday, August 31st. The Preference Stock books will also close at 3 p.m. on Saturday, August 31st next.

All books will be re-opened on Thursday, 3rd October next.

By order of the Board.

CHARLES DRINKWATER,
Secretary.

Montreal, 12th August, 1907.



The D. & B. Line Steamers leave Buffalo daily at 5:30 p.m., (Eastern time) and Detroit week days at 5:00 p.m., Sundays at 4:00 p.m. (central time) reaching their destination the next morning. Direct connections with early morning trains. Lowest rates and superior service to all points west.

Rail Tickets Available on Steamers

All classes of tickets sold reading via Michigan Central, Wabash and Grand Trunk Railways between Buffalo and Detroit, in either direction will be accepted for transportation on D. & B. Line Steamers.

Send two cent stamp for illustrated pamphlet and Great Lakes map. Address,

struct local or long distance telephone lines are authorized to connect with the long distance lines of other similar companies, upon terms to be fixed by agreement, or upon failure to agree, upon an order-in-council, fixing terms and conditions.

The 12th section of the act sets out that whenever it shall be made to appear to the Lieutenant-Governor-in-Council that any telephone company refuses or neglects to extend its line or lines so as to afford telephonic communication to any person, persons or company desiring such extension, to a reasonable distance from the line or lines of such company, it shall be lawful for the Lieutenant-Governor-in-Council, in his discretion, and whenever it appears to him that the business guaranteed on such extension will yield a reasonable profit, to make an order directing such extension, and prescribing the conditions upon which such extension shall be made. Failure on the part of the company to obey such order shall render it liable to a penalty of $500.

Other sections provide for the payment of damages for the destruction of shrubs and ornamental trees by the telephone companies, and for the prevention of fires in forest areas through which any telephone lines may be constructed.

STEAM SHOVELS

The New Model Vulcan Heavy Duty Steam Shovels are substantially built throughout, with every part of sufficient strength to withstand the heaviest strains. All gears, pinions and racking have cut teeth. Built in sizes from 22 to 110 tons and 5/8 to 5 cubic yards dipper. Ask for catalog.

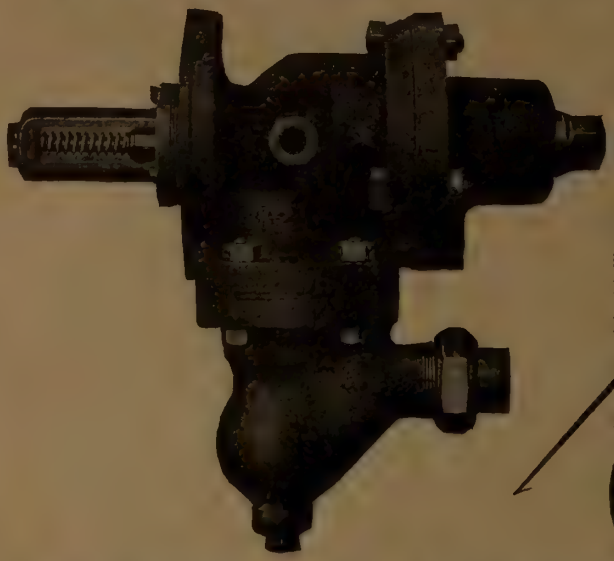
WESTINGHOUSE



Type "K"
Freight Triple Valve

Each One of the 90,000 Type "K" Triples placed in service since their introduction a year and a half ago has been a leading factor towards increased economy, efficiency, reliability and safety in handling modern, heavy freight traffic.

Because with the Type "K" service applications can be made on long trains in half the time formerly required.

Because with the Type "K" all the brakes on a train are released simultaneously, and the reservoirs uniformly recharged.

Because with the Type "K" owing to the quick service and uniform release features, break-in-twos and shocks or strains are practically eliminated.

Because with the Type "K" air consumption in brake-pipe reductions is greatly decreased for given results.

The Use of New Electric Illuminants in Railway Service.

By John Shaw, Assistant Electrical Engineer, C.P.R.

The lighting of a modern railway system is of important commercial interest, and it can be readily realized that the annual expenditure on this service amounts to a considerable sum. In general, lighting of railway premises is not always given the consideration which its importance should receive, which may be due to the subject not having been sufficiently studied in its effects on every branch of railway service. It might not be out of place to refer to one or two of these branches, for instance: In modern freight yards a large loss is suffered yearly through theft, which cannot be prevented unless watchmen are assisted by the proper illumination of tracks and boundaries of yards. Then again the loss of life in a single year due to faulty lighting of crossings, switches, stations, and other locations adds to the ever-increasing demands against the claims department. Or take the better class of work bound to result from giving roundhouse men the best of illumination in order that they may give proper attention to petty repairs on one of those wonderfully intricate pieces of mechanism, the modern locomotive, during one of its breathing spells on a severe winter's night, which if overlooked might lead to the loss of many lives. A material saving in operating expenses would in all probability be made by a very small expenditure on properly designed lighting.

However, it should be realized that it is not light that is required usually, but illumination. It is not the quantity of visible rays emanating from a light source, but the amount of light which reaches the object it is desired to see, that is, the illumination produced by the light, which is of importance. This is an error which the makers of electric lights fell into from following too closely in the footsteps of the gas industry. It has been the endeavor to generate light and leave out of consideration the importance of the utilization of the light so as to get illumination. This not only depends upon the power of the light itself, but on the reflector, the color and character of the surrounding substances, and the position of the object to be illumined in relation to the light. Under most ordinary circumstances, the objects to be illuminated lie either in a horizontal or vertical plane. At a railway station, for example, the station platforms are of the former type, and the station walls, car sides, and ends, of the latter.

Again, in producing illumination either direct lighting or indirect lighting may be used. In general, it can be said that any method of indirect lighting wastes a considerable amount of light. Light is lost by absorption varying with color. If reflected from the walls or ceilings of a building, it is obvious that a higher efficiency is obtainable with white than with black or colored walls from the same source of light, so that care should be taken to make all white or of light colors in all offices where intensity of illumination is the chief consideration. It is not always feasible to have light walls, especially in machine shops or foundries. The walls always change to the color of the carbon or iron used therein, brownish yellow if the former, or reddish brown if the latter. Both of these colors are produced by light waves of long wave length. Therefore, where reflected light is required in buildings with walls of above colors, then a source of light giving long waves will be the most efficient. This is easy to verify by comparing the illuminations from a mercury vapor lamp with that of a flaming arc lamp, where there is an absence of reflected light with the former due to the short wave length of the bluish green mercury arc, whereas with the latter even the grimy walls of a blacksmith shop will gradually reflect a certain quantity of light and improve the illumination. The mercury vapor lamp will therefore have one of its strongest fields in the open, about station platforms, where the vegetation will give better reflection than with the yellow of the incandescent lamp.

W. KENNEDY

Master Mechanic, Middle and Southern Divisions, Grand Trunk Railway, and President Central Railway and Engineering Club of Canada.

In view of the growing demand for improved and more efficient as well as economical lighting, which has been made possible by advances made in electric illuminants, it might be of interest to describe the new lamps which have recently been devised. For a number of years the standard light, which has become so familiar, has been the 16 c.p. incandescent lamp, consuming 54 watts of electrical energy (approximately 1/13 of a h.p.) or 3.5 watts per c.p. Progress has been made in the way of minor improvements in the process of manufacture, with consequent increase in the life of lamps and the reduction of their cost. Any radical improvement within the last few years seemed improbable; however, in 1905 a so-called metallized filament was introduced by one of the leading incandescent lamp manufacturers, in which by subjecting the ordinary carbon filament to a temperature of between 3,000 and 3,700° C, it was apparently transformed to the metallic state. These filaments when made up into lamps were then found to be capable of producing light with an efficiency of 2.5 watts per c.p., or a gain of 28% over the older lamp.

Improvement and research were very active following this discovery, with the result that the tantalum lamp quickly followed. Tantalum, one of the rare earth metals which do not possess the high resistance quality of carbon, makes necessary a comparatively long and fragile filament in lamps designed to operate on the usual 110 volt lighting circuit. The filament of this lamp is therefore supported on a spider in such a way that the horizontal candle power is much greater than that of the carbon filament lamp. Used in a vertical position, a horizontal candle power is thus obtained for 2 watts of electric energy, or a gain of 43% in efficiency over the 3.5 watt carbon lamp. This lamp as yet has only been developed to operate successfully on direct current, an alternating current apparently disintegrating the filament more rapidly.

More recently still, experimenters have succeeded in producing lamps with a filament of another rare earth, now largely used in high speed tool steel, namely, of metallic tungsten, which carry the standard

Galena-Signal Oil Company,

Franklin, Pa., and Toronto, Ont.

Sole manufacturers of the celebrated GALENA COACH, ENGINE and CAR OILS, and SIBLEY'S PERFECTION VALVE and SIGNAL OILS.

GUARANTEE COST per thousand miles for from one to five years, when conditions warrant it.

Maintain EXPERT DEPARTMENT, which is an organization of skilled railway mechanics of wide and varied experience. Services of Experts furnished free of charge to patrons interested in the economical use of oils.

STREET RAILWAY LUBRICATION A SPECIALTY.

GALENA RAILWAY SAFETY OIL

Made especially for use in Headlights, Cab, Classification and Tail-lights, and for Switch and Semaphore Lamps. Burns equally well with the long time as with the one day burner, with or without chimney, as the burner requires.

Is pure water white in color; high fire test; low cold test, and splendid gravity.

Please write to home office for further particulars.

of efficiency to a point far beyond that obtained with tantalum lamps. Those lamps, which are now only obtainable in limited quantities, are hardly a commercial success, owing to the great care which is required in their handling, due to their extreme brittleness. An efficiency of approximately one watt per candle power is obtained with these lamps, or 70% over the carbon filament lamp. As yet no lower candle power lamp has been produced below 25 c.p. for 110 volt circuits. It is claimed that a life of 3,000 hours has been obtained, without any serious loss in candle power throughout this period, with the tungsten lamp. It can readily be realized that when these lamps become a commercial success no difficulty whatsoever will be met in obtaining abundance of light at a very low cost compared to existing conditions.

A corresponding improvement has been taking place very recently in the case of the larger unit of light, the arc lamp. In spite of the radical changes in electrical industries, the electric open arc lamp as produced by Sir Humphrey Davy in 1808, to the 150 hour enclosed lamp to-day, progress has been confined more or less to mechanical improvements, the candle power of the open arc being almost double that of the enclosed arc taking the same energy. In the open and enclosed arc lamps the carbons are solid and comparatively free from impurity, the arc being approximately one-eighth and three-eighths of an inch long in the two lamps respectively. In the new flaming arc lamp, on the other hand, the carbons are cored and mineralized, that is to say, provided with certain substances, either in the core or in the body of the carbon, or both, which when feeding into the arc, greatly increase the light-giving efficiency of the latter. Certain fumes are given off by the burning of the minerals in the arc, which is one of the principal drawbacks of the lamp, preventing it being used in enclosed spaces. An additional disadvantage is the rapid rate at which the carbons are burnt away. In the largest burning lamps carbons require to be renewed every 16 hours. The efficiency of the arc is as much as five times that of the enclosed arc lamp. Endeavor is now being made to produce a magazine lamp in which several sets of carbons would replace one another automatically, but as yet no success has been achieved. This latter drawback is an important reason against their adoption for use in train sheds or foundries where the lamps can be used to greatest advantage owing to the fog or smoke penetrating powers of their light. In addition, lamps must be hung comparatively high to obtain best results. Another form of this lamp overcomes this trouble, namely, the magnetite lamp, which has a life of 150 hours per trimming. In this lamp only one mineralized electrode made up of the metal magnetite is used, the other electrode consisting of a short piece of solid copper, which requires renewing every 3,000 hours. This lamp, however, is limited for service on pulsating direct current only.

The greatest advance, however, in artificial illumination has been in the production of the vapor lamps. The best known and developed lamp of this type is the Cooper Hewitt mercury arc, in which the light-giving element is a gaseous vapor of mercury. This vapor is enclosed in a hermetically sealed glass tube, varying in length from 17 to 45 ins., and about 1 in. in diameter. Lamps are made to operate both on alternating and direct current circuits. The large lighting surface is one of the most important features of the lamp. It prevents the formation of sharply defined lights and shadows, and produces a good diffusion of the light. As the lighting body is a gas, it is not worn away, but only ceases to act upon failure of vacuum. Life of tubes is usually guaranteed for 4,000 hours, but they have been known to burn 10,000 hours. The objectionable feature of the light is its greenish shade where colors require to be determined, but its color is the one giving most ease to the eye. Owing to its diffusive power, the lamp is one best suited for drafting offices, where all shadows may be eliminated by its use, and, due to its color, lines and figures on blue prints are more sharply defined than with a reddish light. The characteristics of the light renders it specially valuable for the making of blue prints.

Another vapor lamp rapidly gaining favor, especially in the neighborhood of New York, the home of its inventor, is the Moore light. It, briefly, consists of a continuous glass tube of 1.75 ins. diameter, in lengths from 20 to 200 ft., the terminals of which are placed in a rigid steel box, as shown in figure 1. Beside the two carbon electrodes of the tube, the box contains a step-up transformer and a small valve. The function of this valve is to permit air or other gas to enter tube only when it is required, automatically. In normal operation, air is admitted one second each minute. Almost any color of light is obtainable by varying the atmosphere in tube, air producing a soft pink, nitrogen a yellow, and carbonic acid gas a pure white light. The life of the light is practically indefinite, and the conversion of energy into light is so efficient that practically no heat is transmitted to the tube. The use of this light would be specially adaptable for large station rotundas, halls, or waiting rooms. The efficiency of vapor lamps is extremely good, averaging 0.7 watts per c.p., and a considerable gain in economy with improved illumination is obtained thereby.

The remaining illuminant, to which reference must be made, is the Nernst lamp, now being introduced widely. This light is made up in units of from two to six glowers, with an average candle power at 45° below the horizontal from 100 with two glowers to 360 candle power with the six-glower lamp, and a corresponding current consumption of 185 and 560 watts respectively, or an efficiency of 1.7 watts per candle power. As yet the Nernst is only available for commercial operation on 220 volt alternating current circuits, unless a step-up transformer is used. One of the chief applications of the lamp is for locations where a concentrated unit of light of greater intensity than the incandescent is desired, and where the arc lamp would be objectionable on account of its fluctuating propensity and constant renewal of carbons. It must be mentioned, however, that the Nernst lamp requires periodical attention, and that glowers have an average life of 800 hours.

In deciding on the best light for any particular installation, amongst the several features which should be considered are, namely: 1. The intensity of illumination required. 2. The nature of surroundings or color of walls if an interior. 3. The necessary location of lights. 4. The most economical light as regards current consumption, maintenance and attendance to give the required illumination. 5. The class of work to be carried on.

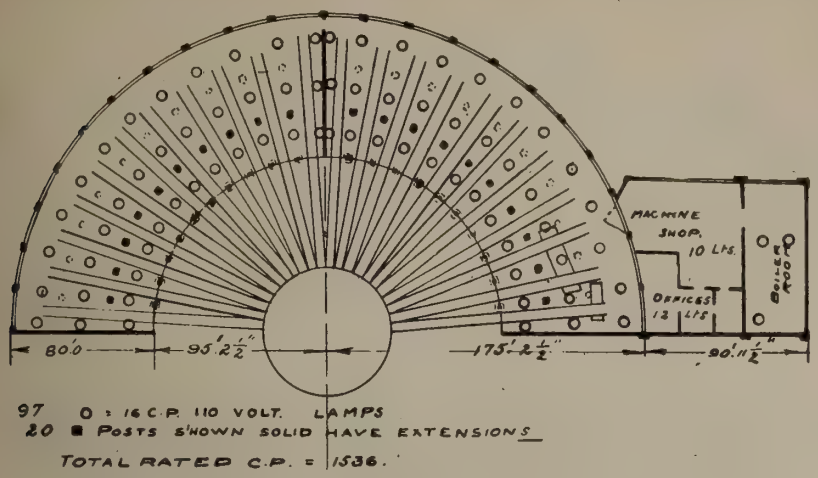

FIG. 3. LIGHTING WITH 16 C.P. LAMPS FOR 22 STALL ROUNDHOUSE.

As an illustration, consider the illumination of a railway roundhouse of 18 stalls, with locomotive foreman's office, machine shop and boiler plant, where direct current power is generated from an engine generator unit supplying current for lighting all railway premises as is usually the case at a divisional point. No assistance is to be obtained in reflection on account of the dull black non-reflecting surfaces of the engines, smoked walls and roof, therefore it is necessary to install a comparatively large amount of candle power to obtain sufficient illumination, even to produce a feeble effect. It has been the practice to install incandescent or arc lamps for this purpose, placing either an arc lamp between each stall, as shown in figure 2, or three incandescent lamps as in figure 3, with one receptacle for extension cord with portable lamp. The objection to the use of the former has been the large maintenance cost due to the gases in roundhouse destroying the various metal parts of the lamps. With incandescent lamps, on account of the smoke and usual handling, a very small percentage of light is usually given by lamps a short time after installation, unless proper supervision is exercised to have the lamps kept clear. Another trouble also met with is the carrying away of lamp and supporting cord due to lamps being placed about locomotive or in cab and not removed previous to engine leaving house. Recently the mercury vapor lamp, which is made up in specially protected form for use in locations where liable to be attacked by corrosive fumes, has been tried with success for roundhouse illumination. An approximate comparison of the inital cost of illuminating a roundhouse, as shown, is as follows: Incandescent, $750.00; arc, $1,450.00; Cooper Hewitt, $1,650.00.

OPERATING COST.

	Maintenance.	Current.	Total.
Incandescent.....	$125.00	$1,090.00	$1,215.00
Arc.....	265.00	2,230.00	2,495.00
Cooper Hewitt....	260.00	1,000.00	1,260.00

COMPARISON OF CANDLE POWER.

	Rated c.p.	C.P. per sq. ft.	Watts per sq. ft.
Incandescent.....	1536	0.04	0.16
Arc.....	5980	0.16	0.38
Cooper Hewitt....	7800	0.21	0.15

It will be noticed that, although the cost of installation is highest with the mercury vapor lamp, the annual cost is about equal to the incandescent installation, but with five times the candle power.

Consideration of the lighting of another type of building, namely, of a locomotive erecting and repair shop, might be given as a further illustration of the relative costs of the different illuminants. Assuming a shop whose dimensions are 1,170 by 162 ft., with gallery along one side 25 ft. in width, and shop divided into longitudinal sections by supporting columns of roof structure, with travelling cranes operating in each section, requiring lamps for general lighting to be placed 40 ft. above floor.

The annual cost and illumination to be obtained using a combination of series direct current arc lamps, enclosed alternating current lamps, and incandescents, as against flaming arcs and incandescents for individual machine lighting, to mercury vapor lamps, would be approximately as follows:

	Cost	Maintenance	Current	C.P.
(1) 50-9.6 amp. d.c. arc lamps and motor generator... 80-enclosed a.c. arc lamps 2500-16 c.p. lamps.....	$9,890.00	$1,400.00	$11,250.00	74,000
(2) 50-10 amp. flaming arc lamps..... 40-enclosed a.c. arc lamps 1500-16 c.p. lamps.....	9,750.00	2,900.00	8,110.00	94,000
(3) 110-700 c.p. Cooper Hewitt lamps..... 112-300 c.p. Cooper Hewitt lamps..... 500-16 c.p. lamps.....	11,600.00	2,800.00	10,300.00	118,600

Other installations might be discussed, but as each individual case usually has certain limiting or special features requiring consideration, no general purpose would be gained by doing so.

In conclusion, it may be said that it seems certain that the electric lighting industry is now passing through a complete change of almost revolutionary character. The standard of incandescent lighting efficiency will be brought by the tungsten lamp to a position three times above that at present. This means that the efficiency of all other incandescent lamps and enclosed arc lamps will be surpassed, and that with the exception of the vapor, magnetic, and flaring arcs, the tungsten lamp will be the most efficient and simplest of electric illuminants. As dull tools are no longer tolerated in a modern industrial establishment, the question will soon be active, why allow dull lighting to exist?

The foregoing paper was read at a meeting of the Canadian Railway Club recently.

The first dirigible balloon constructed for the British army has had a successful trial trip at Farnborough, Eng. She was driven against the wind, and put through all the evolutions necessary for successful aërial navigation, at an altitude of about half a mile.

Toronto Union Station, Tracks, etc.

Following is the balance of the report of W. Barclay Parsons, New York; C. B. Smith, Toronto, and C. H. Rust, City Engineer of Toronto, to the Toronto City Council on this question. The first portion of the report was published in our last issue.

The disadvantages are: 1. That the raising of the station would place the tracks westerly of it at such a height as to require the abolition of the John St. bridge; 2. The existing freight yards would have to be reconstructed; 3. The shifting and delivery facilities on the Esplanade reduced; 4. Crossings of the shifting tracks on the Esplanade would still remain; 5. Greater cost. As to the separation of streets and railway by street bridges, the advantages are: 1. No interference with existing tracks; 2. Delivery facilities on the Esplanade can be increased; 3. A less cost; 4. Better appearance to persons approaching from the water. The disadvantage is: That some streets will be cut off before reaching the water. This probably will result in property owners abutting upon the Esplanade claiming damages for the closing of these streets. In discussing the advantages and disadvantages we have not alluded to the question of damages. In all probability, judging from what has happened in other cities, the property owners, in the event of a viaduct being constructed, will set up alleged claims for damages to their property. We are so firmly of the opinion that all level crossings of streets and tracks should be eliminated, that we recommend, in the event of street bridges over the railways being adopted, that the main running tracks east of Yonge St. be fenced as far as Parliament St. This will present the same facilities for unobstructed train speeds as the viaduct would. On the other hand it would abolish the private crossings from the south side of the Esplanade as efficiently as the viaduct, and the cost, if any, of such abolition would be equally a charge against both projects.

We have estimated that the cost of track elevation from Bathurst St. to a point east of Queen St. on the G.T.R. would be substantially $3,000,000. This provides for a four-track viaduct from Yonge St. eastwardly to Parliament St., where the C.P. and G.T. lines separate. We have assumed that this work will be carried on a concrete-filled viaduct with bridges at every street opening 66 ft. wide. The portion east of Parliament St. on the C.P.R. would be a two-track viaduct running down to the present grade near Queen St. This would give subway crossings at Front and Tate Sts., and probably with the slight depression of the street a subway could be constructed at Eastern Ave. On the G.T.R., east of Parliament St., a two-track embankment constructed eastwardly a distance of 7,600 ft. This will provide for subway crossings at Eastern Ave and Queen St. We have also provided for elevating all the tracks south of the proposed station for a width of about 500 ft. This width going west is gradually decreased until it assumes the normal width of four tracks at John St., which width continues to Bathurst St. A ramp is provided for on the north side to reach the G.T.R. passenger coach yard on a one per cent. grade. From the diamond crossing immediately west of the Strachan Ave. bridge to the Humber River we have taken the plan and estimate prepared by J. Hobson, Chief Engineer of the G.T.R., who provides for four tracks and gives the total cost of the work at $1,000,000. This estimate does not, however, provide for a bridge at the Queen St. crossing at Sunnyside, which would cost, including land damages, about $100,000. This plan provides for the depression of the tracks commencing at the diamond crossing and running westerly to Queen St. The tracks would be depressed sufficiently to provide for over head bridges at intersecting streets. From Queen St. crossing at Sunnyside west to Humber it is proposed to have the track elevated, and under-crossings could be constructed into High Park, and also at the various streets west of this point, which are in the municipality of Toronto Jct. If this work were carried on with only two tracks as at present, it would probably cost not more than $500,000. The large additional cost is caused by the right-of-way that would be required for the construction of the two additional tracks. The total cost, therefore, to abolish grade crossings and to elevate the tracks throughout the city, from the west city limit at the Humber to a point east of the Queen St. crossing on the G.T.R., would be approximately $4,000,000. This does not include any amount for the reconstruction of the yards, re-laying of the tracks along the Esplanade, delays and inconvenience to travel pending the reconstruction, nor have we included any allowance for possible abuttal damages incident to the construction of a raised viaduct in the center of Esplanade St. For both projects there might be some abuttal damage to obliterate private rights crossing the tracks at grade.

The cost of five overhead bridges, including one at Yonge St., would be about $800,000. This estimate includes an allowance for the damages to abutting property.

The question as to what proportion of the cost of this work should be borne by the City is, we consider, a matter of policy to be determined by your Council, but we would point out that in the construction of the York St. bridge, the City paid one-third of the cost, and we would suggest that, if the tracks are elevated, the City should not be called upon to bear any larger amount of expense of the work than they would have to do if it were decided that overhead bridges were the best solution of the problem.

C. B. Smith has since made the following supplemental report: In reference to the report re separation of grades in connection with the railways along the waterfront, signed by Messrs. Parsons, Rust and myself, my attention has been called to what may appear to be an ambiguity in statement, and, as it is, I consider very desirable that there should be an understanding on the matter of cost of a system of separation of grades, either by subways and bridges, or subways and viaduct, I beg to append the following comparative table showing the approximate cost of grade separation by either method. In our joint report reference was made to the fact that our estimate did not include an amount for the reconstruction of the yards, relaying the tracks along the Esplanade, etc., and although such an estimate must of necessity be approximate, I consider that it is only fair that you should be advised of the possible magnitude of the same, and I have accordingly added in the table my personal estimate of what this will amount to, viz., $500,000. This amount, you will understand, does not include any sum for damages or for inconvenience to railways or the public.

Table of comparative estimated costs of separation of grades in Toronto, extending from Swansea on the west to and including Queen street crossings of the C.P.R. and G.T.R. on the east:

	With Viaduct on Esplanade and Eastward	With Bridges on Esplanade
Track depressions through Parkdale, Sunnyside bridge and track elevations at High Park, Four tracks	$1,100,000	$1,100,000
Two tracks	600,000	600,000
Four track viaduct, etc., Bathurst street to, and including subway at Queen street east	3,000,000	
Track, yard and building reconstructions due to viaduct (estimate C. B. Smith)	500,000	
Five overhead bridges across Esplanade street		800,000
Subway over G.T.R. at Queen street and Eastern avenue		$ 60,000
Bridge over C.P.R. and Don River at Queen street	$ 200,000	200,000
Total if western entrance for—		
Four tracks	4,800,000	2,160,000
Two tracks	4,300,000	1,660,000

BOARD OF TRADE REPORT.

The following report has been made to the Toronto Board of Trade by R. M. Berrian, of Boston, Mass., and J. W. Moyes, of Toronto: Having regard for your instruction for a report giving a solution of the Esplanade difficulties presenting themselves in the City of Toronto, beg to say: That a close personal investigation has been made, extending from Scarboro Bluffs on the east, to the Humber on the west, and a thorough going into the merits and claims of the railway companies regarding the present location; then having in view the personal safety of the citizens, and the providing of means that would give to Toronto a much needed free use of a developed water front, as well as afford perfect facilities for the railway needs. The situation appears to be capable of solution in two ways: 1. The elevation of the streets; 2. The elevation of the railways. A concise presentation of the merits of each would perhaps present a solution and provide for a selection.

The physical features of the southern boundary of Toronto traversed by the railways is of a complex character, and must be viewed from the standpoint of what will result in the greatest good to the greatest number, while having reasonable regard to the financial aspect of such solution.

It would appear that each of the several streets, having a southerly direction from Queen St., have access to the water front of the City, and these rights must be assumed to be maintained for the citizens in any treatment of the question. Having this in mind, then, let us see what may be done by the elevation of the highways over the railway tracks now situate on the Esplanade. A reasonable assumption would be that each of these streets have a right to the free access spoken of. In that event, then, a bridge and approaches thereto would be necessary. Commencing at the western end, say York St., we find between that and Cherry St., inclusive, 10 bridges would be necessary to reasonably serve the apparent rights now enjoyed by the citizens, but which the danger of crossing the network of railways at grade prevents their using. As the demand for a 22-ft. clearance over the rail is imperative for the operation of the railway under a street elevated over these railways, the portion of the bridge prepared for traffic would be in the neighborhood of 25 to 26 ft. above the level of the rail and surrounding ground. Assuming that a 4% grade on these approaches would be a reasonable one for vehicular operation, we are confronted by the necessity for an approach of between 600 and 700 ft. From the northerly limit of the railway tracks at Sherbourne Street the approach thereto would commence at a point north of Front and south of King St. The natural rise of ground at the highest point, Yonge St., would not entail the necessity for the approaches reaching beyond Front and Yonge St., but in each event the necessity for carrying a bridge approach to the south would mean the extension of the existing shore line some distance out towards, or even up to, the new Windmill line. If, on the other hand, the approaches to the bridges were carried at right angles, then

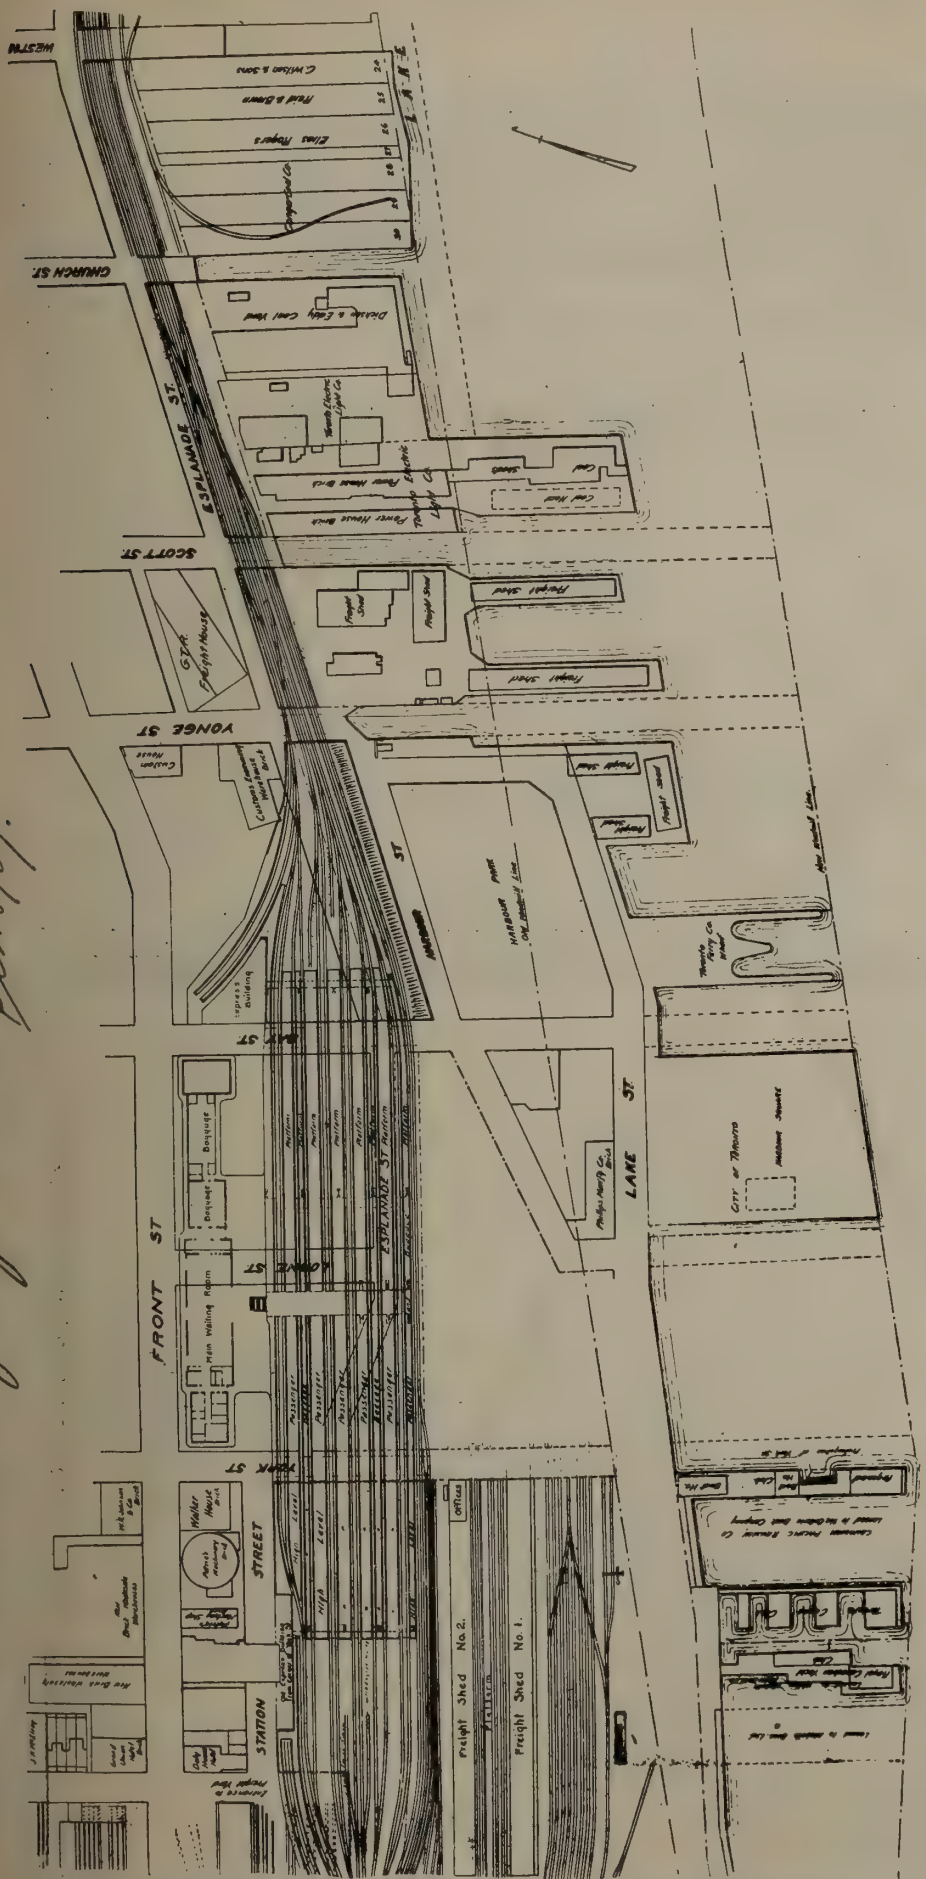
PORTABLE TIE TREATING PLANT No. 1—(Single)



such approaches could only be constructed with serious invasion of the acquired rights of property holders in that neighborhood. In the event of construction, giving a straight approach for these bridges, being decided on, then the completion of a bridge scheme, providing for access to the water front of Toronto, must, of necessity, be deferred for many years to come. The comfort of the citizens would be seriously interfered with, not only by the ascent and descent of the approaches, but also by the inconvenience caused by smoke, and trains passing under these bridges, to both pedestrians and vehicular traffic. There is a serious feature in the bridge question affecting Toronto's commercial welfare, as the lifting of water-borne traffic over these bridges must add to the cost of transportation, by a sum of money per ton, that would militate seriously against Toronto's welfare, and this phase must become more acute as the years go by, and Toronto's magnificent water front opportunities from Ashbridge's Bay west, are developed in a proper manner.

Another solution of the situation is to be found in a viaduct plan which would commence immediately east of Bathurst St. and terminate east of Cherry St. near the River Don in the east end. Under a viaduct arrangement of the Esplanade all trains passing through Toronto would be carried at an elevation and thereby provide free access at every street on the whole of the water front on the existing natural level, there being no need of legal imposition on vehicular, pedestrial or street car traffic as obtains with railway traffic; the altitude of the structure would be very considerably less than that of a bridge, providing for surface operation of railways on the Esplanade. Such a structure would invade no right along the entire Esplanade, providing a street were laid out immediately south of the proposed viaduct. A viaduct would be available for the use and protection of the citizens, and the aiding of Toronto's commercial interests, at a much earlier date, than the suggested bridge plan. Its first cost would be practically all the charge that would be against it, and a solution for all time to come of these frontage difficulties, which have continually beset Toronto's best interests in the past. You will notice from an inspection of the plan that no private or other interests on the Esplanade proper will be affected; all existing switches and easements thereto are conserved by a surface track maintained east of Church and south and north of the proposed viaduct for their sole benefit and use. Practice has demonstrated that traffic of this nature can be maintained, under proper regulation, with every safety. Having in mind the least possibilities for damage costs in connection with the bridge scheme, for the reasons before given, an average of $200,000 each would be a very modest estimate of the cost of the bridges, but the interest account covering the fixed charge for cost must be augmented by a yearly sum covering maintenance and renewal accounts.

A viaduct between the limits previously set out, would be slightly under $2,000,000, the details of which sum accompany this.

A summary of the two plans here outlined would then present the following features: Bridge plan covering 10 streets from York St. eastward to the Don (estimated cost) $2,000,000; Viaduct plan, providing for every street having access to water front at existing street level (estimated as per detail) $2,000,000 The interest account on cost would be practically the same in each case. The maintenance and renewals account, necessitated by a bridge plan at, say 2½%, would be $50,000 a year, and would be totally absent in the case of a viaduct. The cost of extending to the Windmill line, if a straight approach to the bridges were demanded, on

"HART" CONVERTIBLE CARS

Our Cars are not an Experiment. **Over 25,000 in actual service.**

Hart Convertible Cars have been in successful operation for the last four years on many of the leading railroads and during that time have been working under exceptionally hard conditions. This year we offer a car stronger in every way than heretofore produced, and guaranteed to stand up under the hardest steam shovel work and general road service.

the south side, would add seriously to the above figures for a general bridge plan of the Esplanade. Careful study of every feature in connection with the Esplanade situation, of which the foregoing is a summary, leads to no other conclusion than that a viaduct is the preferable solution, giving immediate and permanent relief from the dangers besetting the citizens as well as aiding Toronto's growing commerce and making railway operation more free and much faster. With a viaduct, the question of providing a railway station suitable for the present and growing needs of Toronto becomes simplified. Such a station would be situate between York and Bay Sts. immediately south of Front, and would provide for all passenger trains from the east and west depositing their passengers on commodious terminal platforms leading to a central concourse slightly above the street level of Front St. Provision is also made in the accompanying plan for easy and rapid movement of all through trains, as well as making liberal provision for accelerating the movement of freight. The adoption of a viaduct and station plan as here presented would permit of a suburban railway train development that is not attainable otherwise, and that is one of the growing necessities of Toronto. In connection with this plan the extension of the viaduct easterly, providing for the entrance of the G.T., C.P. and Canadian Northern Railways across Queen St., can be carried out on the exact lines of the plans now presented. West of where the viaduct ends, near Bathurst St., the submerging of the railways would begin and be carried westerly towards Sunnyside, and out to the Humber, giving safe crossings at Sunnyside and into the Park. In connection with these suggested additions we desire to point out that not a single dollar of expenditure on the proposed viaduct, as submitted to you would be lost, as this plan has been prepared with a thorough belief that the eastern street traffic approaching the city must be protected, at no distant day, in the same manner and for the same cause as the proposed improvement of the Esplanade is now suggested. The plan shown on page 721, the original of which accompanied Messrs. Berrian and Moyes' report, shows the district between Church and York Sts., where they propose the elimination of all tracks on the level.

The Canadian General Electric Co. has been granted supplementary letters patent under the Dominion Companies' Act, authorizing the increase of its capital stock from $5,000,000 to $8,000,000.

An interesting item in the Labor Day procession at St. Thomas, Ont., was a fully equipped freight train. The locomotive, which was driven by the Mayor, was one of the first switch locomotives used on the old Canada Southern Ry. in 1872, and now used on the transfer in the M. C. R. shops.

The Ozone Sterilization Co., Ltd., which has been incorporated under the Ontario Companies' Acts, with a capital of $100,000 and offices at Haileybury, Ont., to acquire and operate processes for the purification, etc., of water, liquids, air, gas, minerals, clays and ores, is among other things empowered to construct, acquire, charter, operate, hire, lease, sell or otherwise dispose of all kinds of vessels, wharves, docks, elevators, and warehouses, freight sheds and other buildings, and generally to carry on the business of an elevator, navigation and transport company, and establish, lease and operate hotels, lunch rooms, restaurants and shops. The provisional directors are: W. A. Gordon, R. O. Morrow, Miss E. M. Little, Miss M. L. Doherty, F. A. Day, Haileybury.

Quebec Bridge and Railway Co.

The annual meeting of the shareholders was held at Quebec, Sept. 3, S. N. Parent, President, being in the chair The directors, in their annual report, said:

"It may be recalled that in Oct. and Nov. last a joint meeting of all railway and steamship companies interested in the port of Quebec, including representatives of the City Council, the Quebec Harbor Commissioners, the Quebec Board of Trade, and the shipping interests, was held in the Company's office at the calling of the National Transcontinental Ry. Commissioners, at which the Dominion Government was represented by the Minister and Deputy Minister of Railways and Canals. That important conference lasted several days; sub-committees were appointed to consider the questions of railway terminals and dock facilities respectively; engineers were appointed to prepare reports, which were submitted, and after consideration the joint committee unanimously approved the Champlain Market site as terminal passenger station and the 55 ft. dock line from Lampson's Cove to the north end of Champlain Market Square, and reported accordingly to the National Transcontinental Ry. Commissioners for presentation to the Dominion Government. Recommendation was made to the Government accordingly, who afterwards convened all the railway companies in the office of the Minister of Railways to discuss the question of terminals with the Quebec Bridge and Ry. Co., so that a bill to that effect might be prepared. Owing, however, to the early departure of the Prime Minister for Europe in April last to attend the Colonial Conference, the terminal question had to be postponed. In the meantime, to satisfy our company, legislation was passed authorizing the Government to advance by way of loan $6,678,200, being the full amount of the Company's authorized bond issue. For the purpose of approving the above according to law, a resolution was adopted by the shareholders at a special general meeting, which was held Aug. 5. A copy of this resolution was sent to the Minister of Finance so that effect could be given to the new act."

The report of E. A. Hoare, chief engineer, which was annexed, follows: "The present condition of the work on the bridge over the River St. Lawrence can be considered satisfactory. From the south side of the river, the steel superstructure erected to date extends over the river as far as the fourth panel of the suspended span, or about 1,450 ft. from the land abutment, reaching to 112 ft. of the centre of the bridge, the season's work to date being about 600 ft. Out of a total of about 38,000 tons of metal for the whole structure, only about 2,500 tons, for the north half of the suspended span, remains to be fabricated at the Phœnix Bridge Co.'s workshops. Part of the metal for the north end of the structure is still in storage at Phœnixville, Pa., which is being shipped to destination as fast as cars can be procured. A storage yard to receive this, fully equipped with craneways and electrical power, had to be installed near Belair station, on the C.P.R., at a point where it can be conveniently reloaded for transfer, by the National Transcontinental Ry. early next year, to the regular yard at the bridge. The yard at Belair was

considered necessary to store sufficient metal ahead of erection within a reasonable distance of the bridge, as the final yard will be of no service until connected by rail. The accumulation of fabricated metal at Phœnixville increased to such an extent that it became necessary to remove it as quickly as possible regardless of erection requirements, also for the reason that metal, if left too long at steel works, receives some damages from furnace gases, etc. The steel and wooden falsework for the erection of the north anchor arm will be completed this season, and protected from the ice. This is a very large and costly structure, 500 ft. long and 150 ft. high, the foundations of which are all below the tides. No work has been done on the railway approaches between Quebec and the bridge since the date of my last report, but the question has been discussed by the Government and the railway companies interested in the Quebec terminals and is under consideration."

The directors submitted the following supplementary report: "Since the above report has been prepared for this general meeting, it is the painful duty of your directors to inform you of the terrible accident which occurred five days ago, on Aug. 29, collapsing the largest part of the Phœnix Bridge Co.'s works on the south shore. There is nothing to say so soon after that awful occurrence, beyond expressing our profound grief at the loss of so many lives and our heartfelt sympathies to the bereaved families of the victims. The Government has at once taken steps towards the creation of a commission of engineers to investigate into the causes of the accident, which may be truly considered as a national calamity. The Directors believe they express the feeling, not only of the shareholders, but of the whole country, when they say that the duty of the hour is to renew all our energy with a view of the early resumption of the work. The Quebec Bridge will be finished: it is only a question of more time. There is something cheerful under such dire circumstances in the fact that we are powerfully encouraged in this hopeful view of the situation by the noble words of Sir Wilfrid Laurier in his message to the Mayor of Quebec, in which he says that the duty of the moment is not to lose courage, but to join all energies to repair the loss and continue the undertaking; and also by the sympathetic declaration of R. L. Borden, the leader of the Opposition at Ottawa, that the Quebec Bridge is a national enterprise and must be rebuilt in the shortest time possible."

Theodore Cooper, the Company's Consulting Engineer, having been made to say, in an interview with a reporter of the New York Times, that on the day of the accident, he had wired "the men in charge of the works to get off the bridge and stay off until it could be examined." The President at once telegraphed Mr. Cooper to inquire whether he had given out to the press such a statement, or any other. The answer received from the Consulting Engineer is to the effect that the interview had not been correctly reported, and that he would have it corrected immediately.

The Chief Engineer, in his supplemental report, says: "After examination, I ascertained that the piers were undisturbed, the coping levels being unchanged; the accident, therefore, was confined to the steel work alone. On the evening of Aug. 27, Mr. McLure, the Resident Inspecting Engineer, came to see me with a sketch showing that the ribs in one of the lower chords of the west truss of the anchor arm showed an inward side deflection. The matter was reported the same day to the Consulting Engineer and the Phœnix Bridge Co., but in order to avoid the delays and any misunderstanding that might arise from transmission of messages, Mr. McLure left the next morning for New York and Phœnixville to discuss the question. Soon after these interviews took place the structure very suddenly collapsed. Whether the chord in question was the cause of the accident or not, is at present undetermined. Personally, I did not see immediate danger; at the same time I considered the question of sufficient importance to send Mr. McLure to explain the situation to the Consulting Engineer and the Phœnix Bridge Co. Before Mr. McLure left he satisfied me as to the pier levels and the line of the main post, etc. A few days previously the levels were taken for deflection, which agreed with the theoretical calculations, showing that everything was working as it should do. If results had been otherwise, the conclusions would have been that something was wrong. A Government commission has been appointed to investigate and ascertain the cause of this disaster. In the meantime I must refrain from stating anything further."

The report of J. H. Paquet, Treasurer, showed that the cost of the construction of the bridge from the beginning to June 30, 1906, was $1,556,209.50, for foundations, substructure, etc., and $3,116,742.69 for superstructure. This latter amount was paid to the Phœnix Bridge Co. and $163,577 was still due that company on estimates for work completed to date.

The reports having been adopted, the following resolution was unanimously passed:

"The shareholders of the Quebec Bridge and Ry. Co., whilst regretting exceedingly the unfortunate catastrophe which has destroyed so much of their property and has caused the loss of so many valuable lives, desire to place on record their sense of the increasing importance of the bridge to connect the north and south sides of the St. Lawrence at Quebec, as is evidenced by the fact that, in addition to the six lines of converging railways which were in existence when the construction of the bridge was commenced, new connections and sources of traffic have been developed which promise to give the bridge a much larger volume of business than we had hoped for. Amongst these may be enumerated: (1) The National Transcontinental Ry. now being constructed on both sides of the St. Lawrence, which without this bridge would be unable to send its winter traffic to Maritime Province ports for shipment. (2) The Canadian Northern Ry., another transcontinental railway, now rapidly approaching completion, which is building its line to a point of connection with the north side of the bridge. (3) The Delaware and Hudson Ry., one of the most powerful of the railways of the United States, which is now seeking an entrance to the city of Quebec, and is building its line to the south side of the bridge. (4) The approaching construction of some very large industries at the great water-power at La Tuque, recently acquired by U.S. capitalists, who have contracted to furnish 4,000 carloads of pulp, paper and other freight annually for a long period of years to date from the completion of the bridge. For all these reasons the shareholders of the Quebec Bridge and Ry. Co. are more than ever convinced of the utility of the bridge and of its certainty of remunerative traffic, of its absolute necessity as a chain in the transcontinental railway system joining Eastern with Western Canada, and of its national importance as affording a crossing of the St. Lawrence at a point remote from the frontier. They rejoice at the unanimous expressions of opinion by Sir Wilfrid Laurier and R. L. Borden as to this being a national work, and they urge upon the directors of the company and upon our esteemed President, S. N. Parent, in whom the shareholders have entire and undiminished confidence, the necessity of continuing without interruption the construction of this national enterprise."

An indemnity of $3,000 was voted the President for his services during the past year.

The President asked to be relieved of the duties of President, and suggested the election of J. H. Walsh, but the sentiment of the shareholders was strongly in favor of his retaining the position. The retiring directors were re-elected. Following are the officers and directors for the current year: President, S. N. Parent; Vice-President, R. Audette; other directors (elected by shareholders), H. M. Price, H. M. Allan, Hon. N. Garneau, G. Lemoine, Hon. J. Sharples, V. Boswell; (appointed by the Government), J. B. Laliberte, P. B. Doumoulin· Secretary, A. Barthe.

Canadian Northern Ry. Earnings, etc.

Gross earnings, working expenses, net profits, increases or decreases over 1906-07, from July 1, 1907:

DETROIT, GRAND HAVEN & MILWAUKEE RY.

Earnings	$ 166,240	$ 174,000
Expenses	145,420	111,000
Net earnings	$ 20,820	$ 63,000

Approximate earnings for Aug., $4,142,579, against $3,885,271 for Aug., 1906.

The New Brunswick Government has commenced the issue of a year book for the province, the object of which is to place the extent and resources of New Brunswick before the public The statistical information is full and carefully arranged, and considerable space is devoted to the railways in the province and to the marine interests. There are 1,518 miles of railway in the province, and a considerable mileage under construction, of which the most important are the G.T. Pacific Ry., 250 miles; and the International Ry. of New Brunswick, 100 miles. Including the lines under construction there are 15 lines of railway serving the province, of which three are through lines; one connects with a U.S. system, and the others are branch lines connecting with the Intercolonial Ry.

Orders by the Railway Commissioners.

3437. Aug. 13. — Authorizing Canada Screw Co. to lay a sewer pipe under G.T.R. tracks at Hamilton, Ont.

3438–3441. Aug. 15.—Authorizing Quebec Central Ry. to reconstruct four bridges on its Tring & Megantic Branch, and Chaudiere Valley branches.

3442. Aug. 15.—Authorizing C.P.R. to construct a spur near Caledonia Springs station to the Caledonia Springs Co.'s property.

3443. Aug. 15.—Authorizing Canadian Northern Quebec Ry. to construct a bridge across the St. Foye and St. Louis roads, near Cap Rouge, Que.

3444. Aug. 15.—Authorizing Canadian Northern Quebec Ry. to construct a bridge on its Garneau-Carmen branch over the Cap Rouge River.

3445. Aug. 15.—Authorizing Bell Tel. Co. to place its wires over G.T.R. tracks near Drayton, Ont.

3446. Aug. 16. — Authorizing Quebec, Montreal and Southern Ry. to cross with its track, at rail level, the G.T.R. Three Rivers Branch, near St. Gregoire, Que.

3447. Aug. 16.—Authorizing A. Oulette, of Aston, Que., to place a telephone wire across G.T.R. tracks.

3448–3450. Aug. 16.—Authorizing Quebec, Montreal and Southern Ry. to carry its railway across highways in parishes of Becancourt and Precieux Sang, Nicolet, Que., and across Notre Dame St., Nicolet, Que.

3451–3462. Aug. 16.—Authorizing Bell Tel. Co. to place its wires over various railway tracks.

3463. Aug. 15.—Approving located line of the G.T. Pacific Ry. from east line of sec. 17, tp. 53, r. 23, west of 4th meridian, to east line of tp. 53, r. 25, west of 4th meridian.

3464. Aug. 13.—Directing that the order made on July 3, 1907, regarding wooden trestles, shall not have effect or come into operation during the present calendar year, except as regards trestle bridges of the length of 200 ft. or more.

3465. Aug. 14.—Extending the time for the coming into force of regulation made in order of July 4, 1907, prohibiting the use of lignite coal on locomotive engines until Oct. 1, 1907.

3466. Aug. 21.—Authorizing the C.P.R. to open for traffic that portion of the Lacombe Branch of the Calgary and Edmonton Ry. from Alix to Stettler, Alta.

3467. Aug. 21.—Authorizing the C.P.R. to construct a spur in Floss township, Ont., to H. Wise's premises.

3468. Aug. 21.—Authorizing the G.T.R. to construct a branch line to Titterington Bros.' premises, St. Catharines, Ont.

3469. July 31.—Approving revised location of Vancouver, Westminster & Yukon Ry. from Third Avenue to 20th St., New Westminster, B.C.

3470. Aug. 14.—Authorizing Canadian Northern Ry. to place its track across the C.P.R. Souris Branch in the s. w. ¼ of sec. 32, tp. 9, r. 20, west of the principal meridian, near Brandon, Man.

3471. Aug. 6.—Authorizing the C.P.R. to construct an extra track across Dunlevy Ave., Vancouver, B.C.

3472. Aug. 22.—Authorizing the C.P.R. to open for the carriage of traffic that part of the Stonewall Branch of its Teulon Extension from Teulon to Komarno, Man., 8.8 miles.

3473. Aug. 22.—Authorizing the G.T. Pacific Ry. to cross, for construction purposes, at grade, the Canadian Northern Ry. Regina Branch tracks, in sec. 16, tp. 36 north, r. 5, west 3rd meridian, Saskatchewan.

3474. Aug. 20.—Authorizing the G.T.R. to construct a branch line in Simcoe, Ont., for the Canadian Canners, Ltd.

3475. Aug. 20.—Authorizing the Windsor, Essex & Lake Shore Rapid Ry. to place and maintain transmission wires over the Michigan Central Rd. tracks at Talbot St., Essex, Ont.

3476. Aug. 20.—Authorizing the Central Ontario Ry. to construct a reinforced bridge over Papineau Creek, Ont.

3477. Aug. 20.—Approving location of C.P.R. from 10 miles northwest of Nomining, Que., to mileage 35.

3478. Aug. 22.—Authorizing Thessalon Lumber Co. to cross C.P.R., Sault Ste. Marie Branch, between Dayton and Dean Lake stations, Ont.

3479. Aug. 23.—Authorizing Hamilton Cataract Power, Light & Traction Co. to place electric power and telephone wires across the G.T.R., Northern and Northwestern Branch, east of Hamilton, Ont.

3480. Aug. 23.—Authorizing the Vancouver, Victoria & Eastern Ry. & Nav. Co. to carry freight over its railway between the International boundary line and Keremeos, B.C.—16.9 miles.

3481. Aug. 23.—Authorizing the Water Commissioners of Brantford, Ont., to lay a water main and house service connections under G.T.R. tracks.

3482. Aug. 23. — Authorizing City of Brantford to attach electric wires to the bottom of the superstructures carrying the G.T.R. across subways at Niagara and Albion Streets, Brantford, Ont.

3483. Aug. 29.—Approving location of Canadian Northern Quebec Ry. from the Transcontinental Ry. to the junction of the St. Foye and St. Louis roads; and that portion of the line from the junction of the St. Louis & St. Foye Roads to station 161 + 07.

3484–3491. Aug. 22.—Authorizing Bell Tel. Co. to place its wires across G.T.R. tracks at different points.

3492. Aug. 14.—Authorizing Canadian Northern Ry. to provide and operate an interlocking signal and derailing plant at the crossing by its railway of the C.P.R. line at Headingly, Man., in place of the present system.

3493. Aug. 14.—Authorizing Canadian Northern Ry. to provide and operate an interlocking and derailing plant at the crossing of its railway by the C.P.R. at Morris, Man., in place of the present system.

3494. Aug. 14.—Authorizing C.P.R. to place its track across the Qu'Appelle, Long Lake & Saskatchewan Ry. at Saskatoon, Sask.

3495, 3496. Aug. 12.—Extending to Nov. 13, 1907, the time for filing Bell Telephone Co.'s and North American Telegraph Co.'s tolls.

3497. Aug. 14.—Certifying corrections in location plans of G.T. Pacific Ry. from the north line of sec. 8, tp. 18, r. 30, west 1st meridian, to tp. 20, r. 4, west 2nd meridian, district of Assiniboia, Sask., being from mileage 14.188 to 60, already approved in order 692.

3498. Aug. 14.—Certifying corrections in location plans of G.T. Pacific Ry. from east line of tp. 17, r. 30, west 1st meridian, to north line of sec. 8, tp. 18, r. 30, west 1st meridian, district of Assiniboia, Sask., being from mileage 8.859 to 14.188, as approved in Order 1311.

3499. Aug. 7.—Authorizing Vancouver, Westminster & Yukon Ry. to construct a branch line from its main line in Vancouver, B.C., south of False Creek drawbridge, to near Clark Drive; and that the company, upon and after the construction of the last-mentioned branch, construct and operate a branch line from the last mentioned branch across the south shore of False Creek, and northerly to the intersection of the southern limit of Parker St. with the eastern limit of Boundary Ave.

3500. Aug. 7.—Authorizing the Vancouver, Westminster & Yukon Ry. to join its tracks with the C.P.R. tracks, operated by the B.C. Electric Ry., at and near the junction of Columbia and Front Sts., Vancouver, B.C.

3501. Aug. 6.—Authorizing A. E. Beck, Vancouver, B.C., to examine upon oath any witnesses who may be produced before him for examination in the application of the Brunette Saw Mill Co., to change the location plan of the Vancouver, Westminster & Yukon Ry., across certain lots in New Westminster, B.C.

3502. Aug. 15.—Authorizing the Vancouver, Westminster & Yukon Ry. to operate its southbound trains over the crossing of the B.C. Electric Ry. on Park Drive, Vancouver, B.C., by the railway of the applicant company without bringing such trains to a full stop before crossing; provided such trains shall not cross at a greater speed than six miles an hour.

3503. Aug. 2.—Authorizing the B.C. Electric Ry. to lay a second track on Park Drive, across the Vancouver, Westminster & Yukon Ry. tracks.

3504. Aug. 6.—Requiring the Vancouver, Westminster & Yukon Ry. to furnish forthwith adequate and suitable accommodation for the receiving and loading of traffic offered for carriage on its railway to any point of junction of such railway with the C.P.R.

3505. Aug. 5.—Authorizing the Vancouver, Victoria & Eastern Ry. & Nav. Co. to carry its railway along a portion of the River Road, Delta, B.C.

3506. July 19.—Authorizing the C.P.R. to construct a branch line from the Southwestern and Pembina Mountain Branch, Winnipeg, Man., southerly between lots 53 and 54, St. John parish.

3507. Aug. 15.—Approving location plans of the G.T. Pacific Ry. from west line of sec. 18, tp. 11, r. 3, west of the principal meridian, Manitoba, to and in the City of Winnipeg.

3508. Aug. 6.—Requiring the Crow's Nest Southern Ry. forthwith to furnish adequate and suitable accommodation for the receiving and loading of all through traffic offered for carriage on its railway to any point of junction of such railway with the C.P.R.

3509. Aug. 27.—Approving standard passenger tariff C.R.C. 142, cancelling tariff C.R.C. 32 of the Central Vermont, and providing a basis of 3c. per mile between stations in Canada.

3510. Aug. 27.—Authorizing the Sunderland Telephone Co. to place its wires across G.T.R. tracks at highway west of Blackwater Jct. station, Ont.

3511. Aug. 27.—Authorizing the City of Ottawa to lay a sewer under G.T.R. tracks between Concession and Turner Sts., Ottawa.

3512. Aug. 27.—Authorizing the Town of Hespeler, Ont., to lay a water main across G.T.R. tracks.

3513. Aug. 27.—Authorizing location of C.P.R. across highways in township of Glenelg, Ont., between mileage 11.76 and 10.29, and between mileage 12.84 and 13.38.

3514. Aug. 27.—Authorizing the Chatham, Wallaceburg & Lake Erie Ry. to carry its power wires, during the construction of its railway, across G.T.R. tracks at William St., Chatham, Ont.

3515. Aug. 27.—Authorizing C.P.R. to cross with its diverted railway streets in Woodbridge municipality, Ont.

Ry. over the portions where the existing locations conflict.

3520. Aug. 29.—Authorizing the Montreal Natural Gas and Fuel Co. to lay a gas pipe under G.T.R. tracks at Main St., Welland, Ont.

3521-3527. Aug. 29.—Authorizing Bell Telephone Co. to place its wires over various railways at certain points.

3528. Aug. 29.—Authorizing the Vancouver, Victoria & Eastern Ry. & Nav. Co. to carry passenger traffic over its railway between the boundary line and Keremeos, B.C., 16.9 miles.

3529. Aug. 29.—Authorizing the City of Stratford, Ont., to lay water pipes under G.T.R. tracks.

3530. Aug. 29.—Authorizing G.T.R. to operate an additional track across Superior St., Stayner, Ont.

3531. Aug. 29.—Authorizing C.P.R. to construct a branch line at Blairmore, B.C., to P. McLaren's premises.

3532. Aug. 30,—Authorizing Bell Telephone Co. to place its wires across C.P.R. tracks at Tillsonburg, Ont.

3533. Aug. 30.—Authorizing G.T.R. to put interlocking and derailing plant in operation at crossing of G.T.R. and C.P.R., west of Bathurst St. Jct., Toronto.

3534. Aug. 30.—Authorizing Georgian Bay & Seaboard Ry. to locate its tracks across highways in Tay township.

3535. Aug. 30.—Authorizing Guelph & Goderich Ry. to open for the carriage of traffic its line from Blyth to Goderich, Ont., 17 miles.

3536. Aug. 30.—Approving alteration in alignment of the C.P.R. Co.'s Lachine Canal South Bank Branch, near Cote St. Paul Bridge, Que.

3537, 3538. Sept. 3.—Authorizing Canadian Northern Ontario Ry. to place its wires across C.P.R. tracks in concessions 2 and 4, York township, Ont.

3539. Sept. 3.—Authorizing G.T.R. to construct a branch line to the Sawyer-Massey Co.'s premises, Hamilton, Ont.

3540. Sept. 3.—Authorizing G.T.R. to construct a branch line from Ferguson Ave., Hamilton, Ont., to the corner of Murray and Elgin Sts., with a spur from said siding where it crosses Ferguson Ave., 345 ft., to Murray St.

3541, 3542. Sept. 3.—Authorizing C.P.R. to construct two bridges over the Sawga River, Que., at the first and second crossings of the Nomining extension.

3543. Sept. 3.—Authorizing C.P.R. to construct a bridge over the Laurville River, Que.

3544. Sept. 3.—Authorizing the Canadian Northern Telegraph Co. to place its wires over C.P.R. Souris Branch tracks, at the crossing of the latter and the C. N. Ry. Brandon-Regina Branch, in the s. w. part of sec. 32, tp. 9, r. 20, west of the principal meridian, Man.

3545. Sept. 3.—Authorizing C.P.R. to construct a branch line to Parker & Thorpe's premises, near Wardner, B.C.

3546. Sept. 3.—Approving location of Hamilton, Waterloo & Guelph Ry. Co.'s line from northerly boundary of Dundurn Park, Hamilton, to Galt, Ont., mileage 1.25 to 25.60.

Ry. Commissioners' Operating Orders.

3464. Aug. 11—In pursuance of the powers conferred upon it by secs. 30 and 269 of the Railway Act, and of all other powers possessed by the Board in that behalf; the Board orders that the regulations made on July 3, 1907, requiring every railway company subject to the legislative authority of the Parliament of Canada, operating by steam power any railway or railways, any part or parts of which is or are constructed of or upon wooden trestles, during the months of May, June, July, Aug. and Sept. in each year, to place and keep upon every portion of its railway or railways, where such trestles exist, watchmen for the purpose of protecting such trestles from fire, shall not have effect or operation during the present calendar year, except as regards trestle bridges of the length of 200 ft. or more.

USE OF LIGNITE COAL.

3646. Aug. 14—In pursuance of the powers conferred upon it by secs. 30 and 269 of the Railway Act, and of all other powers possessed by the Board in that behalf; the Board orders that the time fixed for the coming into force of the regulation made by the Board on July 4, 1907, prohibiting every railway company subject to the legislative authority of the Parliament of Canada for burning lignite coal on its locomotive engines as fuel for transportation purposes be extended to Oct. 1, 1907, and that until the said last mentioned date, the said regulation be not operative.

G.T.R. Directors' Inspection.—For the first time for several years past, Sir C. Rivers Wilson, President G.T.R., has not made a trip to Canada. A. W. Smithers, Vice-President, arrived in Montreal from England, Sept. 3, having travelled over the Central Vermont Ry. from New London, Conn., in company with C. M. Hays, Second Vice-President and General Manager. Accompanied by Mr. Hays and a number of officials of the company, Mr. Smithers made a trip of inspection over the G.T.R., and subsequently went to Vancouver, B.C., visiting a number of points on the route of the G.T. Pacific Ry.

Freight Car Balance and Performance.—The Car Efficiency Committee of the American Railway Association has issued statistical Bulletin 2, comprising a statement of freight car balance and performance for the six months ended Dec. 31, 1906. The different railways are grouped in districts and the tables given include the Canadian lines under one head, the information given being as follows: Revenue freight cars owned, 43,415; average number system cars on line, 25,201; average freight railroad cars on line, 14,673; total railway cars on line, 39,874; per cent. railway cars on line of total owned—home, 58; foreign, 34; all railway, 92; private cars on line, 2,780; total all cars on line, 42,654; per cent. of cars in shops, 5.43; number of freight locomotives owned, 722; average cars on line per freight locomotive owned, 59; total freight car mileage, 216,749,558; average miles per car per day, 27.9; per cent. loaded mileage, 76.0; total mileage revenue freight, 2,591,512,370; average ton miles—per car mile, 11.9; per loaded car mile, 15.6; per car per day, 330; gross freight earnings, $17,467,160; average daily earnings—per car owned, $2.19; per railroad car on line, $2.38; all cars on line, $2.22.

Railway Finance, Meetings, etc.

Beersville Coal and Ry. Co.—See North Shore Ry. Co.

Bessemer and Barry's Bay Ry.—Following are the officers and directors for the current year: President and General Manager, H. C. Farnum, Bessemer, Ont.; Vice-President, G. E. Hoyt, Bancroft, Ont.; Secretary-Treasurer, H. L. Bingham, Bessemer; other directors: J. C. Dale, W. Cross, Madoc, Ont.

Buffalo and Lake Huron Ry.—The accounts for the half-year ended June 30 show an available balance, after providing for the interest on first and second mortgage bonds, of £14,536, out of which the directors propose to pay the usual dividend of 5s. 3d. per share, leaving £751 to be carried forward.

Canada Coal and Rd. Co.—The annual meeting of shareholders held at Montreal, Sept. 3, was purely formal. The company's property, franchises, etc., have been sold to the Maritime Coal, Ry. and Power Co.

Canadian Pacific Ry.—A London, Eng., cable Sept. 3, stated that within the previous ten days the C.P.R. sold £1,250,000 4% debenture stock at 102.

Caraquet Ry.—The annual meeting of shareholders was held at Bathurst, N.B., Aug. 27, when the directors reported as to the operations of the past financial year. The report is not made public. Following are the directors for the current year: R. H. Bowes, W. D. Northgrave, A. G. Ross, E. B. Stockade, J. H. Whitehead, J. J. Warren and J. Webster.

Columbia and Western Ry.—The suit which the C.P.R. brought against A. Heinze, Butte, Mont., in connection with the land grant given by the B.C. Government for the construction of the C. and W. Ry., has been decided in favor of the C.P.R. The Legislature voted 600,000 acres of land to the railway, and there was an agreement as to the partition of the land when the C.P.R. purchased the railway. Heinze claims that the partition was not to take place until 1912, but the C.P.R. wants an immediate partition. Heinze has been directed by the B.C. courts to select the area to which he is entitled under the agreement with the C.P.R. An appeal has been entered against the decision.

Cumberland Ry. and Coal Co.—A special general meeting of shareholders was held in Montreal, Sept. 26, to authorize the directors to issue bonds aggregating $1,500,000 for such period, rate of interest and terms as might be deemed advisable, and to secure the same in such manner as may be determined upon, and to provide for the redemption or retirement of the company's outstanding bonds.

Dominion Atlantic Ry.—Gross earnings for July $159,800, against $146,544 for July, 1906. Gross earnings for seven months ended July 31, $616,900; against $576,237 for same period 1906.

Grand Trunk Ry.—London, Eng., papers continue to criticize the G.T.R. directors upon the recommendations in the half-yearly report to be presented at the meeting on Oct. 2. One paper refers to the "extreme conservatism of the board, which seems determined to pour cold water on the legitimate hopes of the junior stockholders," and adds that the "extraordinary proposal of the directors to provide $200,000 for a nucleus of a pension fund will assuredly be vigorously opposed at the forthcoming meeting."

Great Northern Ry. of Canada.—The matter of the Great Northern Construction Co., in liquidation, and Hyde, liquidator, and Scott, tiers opposant, and Hyde contestant, came before the courts at Quebec, for proof and final hearing, Aug. 30. The G.N.C.

Salary-Raising Training For Railroad Men

There is no profession in which promotion depends in any higher degree upon a man's real ability and technical knowledge than in railroading. Quick promotion then for the railroader is the result of quick and also thorough acquirement of that technical training which will qualify him to hold a higher position. In no way can the ambitious railroad employe secure this technical knowledge so quickly and yet so simply as through the I. C. S. Courses of home training. These Courses have been written by the best railroad experts on this Continent and are taught after a manner that 15 years' experience in training hundreds of thousands of ambitious men for promotion and better earnings has proved to be the most practical and efficient. These Courses include instruction in LOCOMOTIVE MANAGEMENT, LOCOMOTIVE BOILERS, STEAM CYLINDERS, and VALVE GEARS, BREAKDOWNS, COMPOUND LOCOMOTIVES, TRAIN RULES, WESTINGHOUSE and NEW YORK AIR BRAKES, CAR LIGHTING and HEATING, and ELECTRIC HEADLIGHTS.

If **YOU** wish to secure the training in your own home, in your spare time, and at an insignificant cost, that will qualify you for promotion to the highest positions in your profession, simply mark and mail this coupon and we will tell you how you can do so. The fact that we have enabled hundreds of other railroad men to secure promotion in itself warrants your careful investigation of our plan if you really wish to better yourself. Don't let a postage stamp stand between you and a better position. **Mark and mail this coupon NOW.**

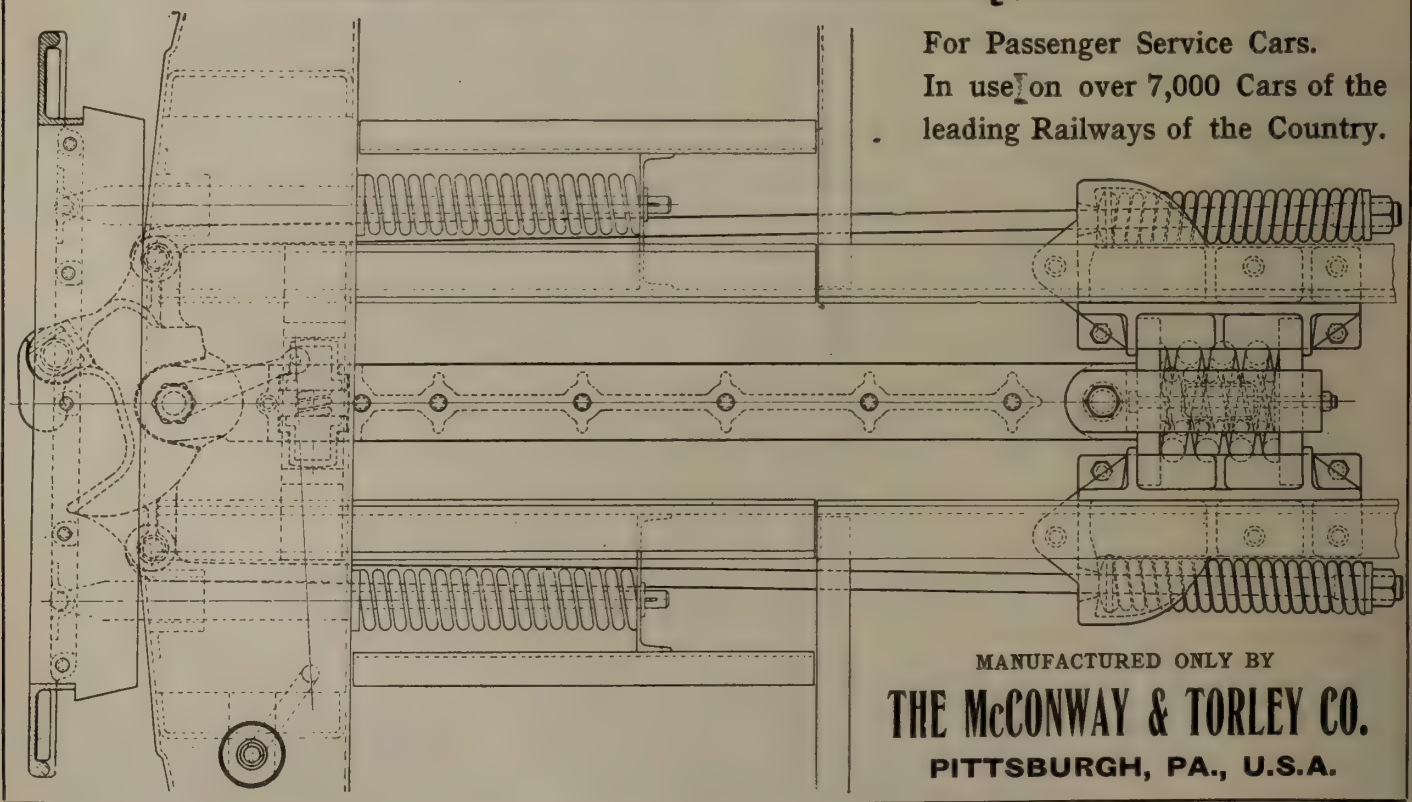
THE BUHOUP 3-STEM COUPLER

THE MOST COMPLETE AND UP-TO-DATE EQUIPMENT



For Passenger Service Cars.
In use on over 7,000 Cars of the leading Railways of the Country.

MANUFACTURED ONLY BY
THE McCONWAY & TORLEY CO.
PITTSBURGH, PA., U.S.A.

Co. was a U.S. corporation formed for the purpose of constructing the Great Northern Ry. of Canada, and its affairs have been before the courts for several years.

Great Northern Ry., U.S.—At the annual meeting of shareholders to be held at New York Oct. 10, there will be presented for consideration and action a proposition that the Great Northern Ry. acquire, subject to the existing liens thereon, any or all of the properties of its subsidiary companies. Accompanying the circular is the following statement to stockholders issued by J. J. Hill, chairman of the Board of Directors: "The Great Northern Railway Co. now controls the various companies constituting its railway system through ownership of their stocks. The proposition to be submitted for your action at the annual meeting for the purchase of the railways and properties of these subsidiary companies as outlined in the formal notice of meeting sent to you herewith is to substitute for the present form of ownership through stocks a direct ownership of the railways and properties of the Great Northern Ry. Co. Your directors consider this change desirable, as it will consolidate ownership of the property and simplify the management of the system, and they recommend the proposition for your favorable action."

There are 17 of the subsidiary companies. The G.N. Ry. owns the entire capital stock of 16 of them, and all except about $360,000 of the $20,000,000 capital stock of the seventeenth, the St. Paul, Minneapolis and Manitoba Ry.

Intercolonial Ry.—A statement issued at Ottawa Aug. 29, is to the effect that for the year ended June 30 the I.C.R. showed a surplus of $400,000 compared with $62,000 in 1905-06. For the nine months ended Mar. 31, the surplus was $219,000. In 1904-05 there was a deficit of $1,725,000, and in 1903-04 a deficit of $900,000. From present indications, the despatch says, the current year will be far and away the most successful in the history of the road.

Hon. G. P. Graham, who has been appointed Minister of Railway and Canals, in an interview expressed the view that a Government railway should give good service to the people; it should pay its way, and if possible some interest on the investment; beyond this it should reduce fares, thereby helping to bring about a reduction of fares on other lines.

Joliette and Brandon Ry.—There has been deposited with the Secretary of State at Ottawa a mortgage deed of trust between the J. and B. Ry. Co., the Royal Trust Co., and the C.P.R., securing the mortgage bonds of the J. and B. Ry. to the extent of $125,000.

Massawippi Valley Ry.—At the annual meeting of shareholders at Rock Island, Que., Sept. 4, the usual report of the operation of the line was submitted and approved. The railway is operated under lease by the Boston and Maine Rd., and no separate report is issued. A resolution referring to the death since the last annual meeting of Hon. C. C. Colby, a director, was passed. Following are the officers and directors for the current year: President, J. G. Foster, Derby Line, Vt.; Vice-President, C. W Cote, Sherbrooke, Que.; Treasurer, J. H. Williams, Bellows Falls, Vt.; other directors: C. D. White, F. Grundy, F. N. McCrea, Sherbrooke, Que.; J. W. Dunklee, Boston, Mass.; C. W. Kathan, Rock Island, Que.; H. N. Turner, St. Johnsbury, Vt.; Secretary, S. Stevens, Rock Island, Que.

North Shore Ry. Co.—Application is being made to the New Brunswick Government for the incorporation of a company with this title under the provisions of the Joint Stock Companies' Act, for the purpose of taking over and operating the Beersville Coal and Ry. Co., with a capital of $190,000 and offices at Beersville, N.B. The provisional directors are: J. M. Seeley, W. G. Kennedy, H. Von Hagen, New York City; I. Purdy, Purdy's Station, N.Y.; M. F. Keith, Moncton, N.B. The petition sets forth that J. M. Seeley and others obtained a writ of fieri facias in the Supreme Court under which the lands, tenements, buildings, and franchises of the Beersville Coal and Ry. Co. were sold at Sheriff's Auction, at Beersville, Aug. 6, to J. M. Seeley, who has received a deed thereof from the sheriff. The property transferred consists of the railway from near Adamsville station on the Intercolonial Ry., to Beersville, with an extension to Coal Branch, altogether 8.63 miles, with all the property used in connection with the operation of the same; the power to extend the line to Brown's Landing, and to construct branch lines. The North Shore Ry. Co. desires power to operate the line, to engage in coal mining and other allied businesses, and to issue bonds or debentures to the extent of $8,000 a mile of railway.

Pere Marquette Rd.—The reorganization of the P.M. Rd., and the amalgamation of the P.M. Rd. Co. and the P.M. Rd. Co. of Indiana, will be formally accomplished at special meetings of shareholders to be held Oct. 26.

The new Pere Marquette Rd. $5,000,000 6% notes have been oversubscribed, says a Boston, Mass., despatch. This was accomplished by the combination of preferred and common stock subscriptions. A total of slightly more than 94,000 shares out of 102,000 shares outstanding have assented to the reorganization plan. In addition, 16,181 shares of common stock availed themselves of the right to subscribe to the extent of 20% of their holdings in the notes. The subscription works out about as follows: 94,000 shares preferred take 50% their par in new notes, say $4,700,000; 16,181 shares common take 20% their par in new notes, say $323,600; additional subscriptions to even up fractions, $4,760; total, $5,028,360. The notice calling the meeting says that the business is: To ratify, approve and confirm an agreement dated Aug. 12, 1907, between the Pere Marquette Rd. Co., the Cincinnati, Hamilton and Dayton Ry. Co., and N. Thayer and others, committee, providing for the settlement by arbitration of all claims between the two corporations and for the cancellation of the indenture of lease from the P.M. Rd. to the C.H. & D. Ry., dated March 1, 1905, upon such terms as the arbitrators (W. W. Crapo and J. Harmon) may determine.

Quebec Southern Ry.—South Shore Ry.—Judgment has been rendered in the Exchequer Court, by Justice Burbidge, in the action of the claims against the Q.S.R. Co. and the South Shore Ry. Co. The Registrar of the Court had prepared a report on the subject and recommended that the purchase price of the two roads which now form the Quebec, Montreal and Southern Ry. be divided for the payment of claims to the Bank of St. Hyacinthe, $121,019, and for privileged claims of clerks and other incidental expenses, $15,972 out of the proceeds coming to the Quebec Southern; while for the South Shore portion the registrar recommended the payment of $715 to L. G. J. Fosbrook; $1,763.77 to W. H. Eglaugh; $28,229.80 to the estate of Hon. R. Prefontaine, and $250 to Christina Rowse. Hon. F. L. Beique, who appeared for the Hochelaga Bank, asked that the report be continued until Oct., but this was opposed by other counsel, especially by J. L. Perron, K.C., on behalf of the Prefontaine estate. After argument on various objections to the report, Justice Burbidge rendered judgment as follows: Payment of the Bank of St. Hyacinthe's claim is refused, and immediate payment of the following claims is allowed: Working expenditures and the vendor's lien of L. G. J. Fosbrook, W. M. Eglaugh, estate Hon. R. Prefontaine and Christina Rowse. The Court further ruled that anyone interested could, within 30 days, apply to have the report varied for some specific reason, under reserve of the rights of Messrs. Hodge and White, former President and Secretary of the Quebec Southern Ry. Company.

Temiskaming and Northern Ontario Ry.—The commission leased certain of its lands to various mining companies upon agreements under which the companies pay from 15 to 50% of the value of the ore according to the result of the assay. During the current year the commission has paid over to the Ontario Government $3,189 on account of royalties from the Cobalt Townsite Mining Co., and $30,309 from the Right-of Way Mining Co.

The Provincial Treasurer has filed an affidavit asking for further particulars in the action which Coates, Son & Co., London, Eng., has instituted against the Ontario Government. The plaintiffs acted as agents for the Ontario Government in the sale of treasury bills to provide funds for the construction of the T. and N.O. Ry., and claim that they should have had the disposal of the permanent securities issued. The claim is for $14,600, being ¼ of 1% commission on securities issued.

Toronto, Hamilton and Buffalo Ry.—Estimated earnings for Aug., $78,026.08, against $62,062.84 (actual) for Aug., 1906.

Vancouver, Victoria and Eastern Ry.—Vancouver, Westminster and Yukon Ry.—Press reports state that negotiations are in progress for the sale of the property and charter rights of the latter to the first-named company. The V., V. and E. Ry. is operated as part of the Spokane Falls and Northern Ry., a Great Northern Ry., U.S., subsidiary; and so much of the V., W. and Y. Ry. as has been constructed is operated in connection with the Victoria Terminal Ry. and Ferry Co., and the New Westminster Southern Ry., in order to give the Great Northern Ry., U.S., an entrance into Vancouver, B.C. Other press reports credit the G.T. Pacific Ry. with being the company which is desirous of purchasing the V., W. and Y. Ry. charter.

Canadian Ticket Agents' Association.

There has been practically no change in the arrangements for the Canadian Ticket Agents' Association trip to Winnipeg as announced in our Aug. issue. The members and their guests will leave Toronto on Thursday, Oct. 10, at about 10 p.m., by special C.P.R. train, which will be run over the G.T.R. to North Bay about an hour ahead of the regular Pacific express. Members from the Montreal district will be conveyed to North Bay on a special sleeping car attached to the Pacific express from Montreal, and at North Bay this car will be transferred to the Association's special train, which will then run to Port Arthur about an hour behind the Pacific express. Saturday, Oct. 12, will be spent at Port Arthur and Fort William, and Winnipeg will be reached on Sunday morning, Oct. 13. The annual meeting will be held at the Royal Alexandra Hotel, Winnipeg, on the morning of Monday, Oct. 14, and a dinner will be held at the same place in the evening. For the return trip the special train will leave Winnipeg Wednesday, Oct. 16, about 4 p.m., reaching Toronto on Friday, Oct. 18. No doubt many of the members will return via St. Paul and Chicago. Arrangements are being made for the entertaining of the party at Port Arthur, Fort William and Winnipeg. Two C.P.R. dining cars, which have been specially chartered by the Association, will be attached to the special train.

Works: TURCOT

The Quebec Bridge Collapse.

The unfortunate collapse of the southern extension arm and approach span of this bridge, which occurred Aug. 29, occasioning the death of 65 men, will delay for a considerable time the completion of a work which was commenced over seven years ago, and which would have had the longest single span of any bridge in the world. The Dominion Government has appointed a commission, consisting of H. Holgate, C.E., Montreal, Chairman; Prof. J. G. G. Kerry, of McGill University, Montreal; and Prof. J. Galbraith, of Toronto University, and Principal of the School of Practical Science, Toronto, to enquire into the causes of the disaster, and report thereon. The first sitting of the commission took place at Quebec Sept. 10. The Quebec Bridge and Railway Co., the Phœnix Bridge Co., Phœnixville, Pa., the contractors for the construction of the bridge, and the International Bridge and Structural Ironworkers' Union, on behalf of employes, were legally represented.

The collapse of the structure does not interfere with the navigation of the river, as there is a great depth of water at that point, and most vessels keep close to the north shore, the wreckage being all on the south side.

At the general meeting of the Quebec Bridge and Railway Co., Sept. 3, a report of which appears in another column, references were made to the disaster, but in view of the Government enquiry, it was not considered advisable to make any lengthened statement. The Quebec Bridge Co. was originally formed in 1887, for the purpose of building a bridge across the St. Lawrence about 6½ miles above the city of Quebec.

THE QUEBEC BRIDGE DISASTER. VIEW LOOKING TOWARDS THE SOUTH BANK OF THE RIVER.

Certain powers, which were then conferred upon the company were revived, and confirmed by Parliament in 1897. Among the promoters was the Hon. S. N. Parent, then Mayor of Quebec, who was also Premier of the Province, and he became President of the Bridge Company. In 1899 the company obtained from the Dominion Government a subsidy of $1,000,000. In 1901, the Quebec Terminal & Railway Co. was formed, the directors being Hon. S. N. Parent, Hon. J. Sharples, T. Taschereau, G. Lemoine, and D'Arcy Scott, the present Mayor of Ottawa. In Aug., 1899, Sir Wilfrid Laurier, in the House of Commons, estimated that the cost of the bridge would be $4,000,000. This figure was given as a result of the investigations made by Theodore Cooper, of New York, consulting engineer of the Bridge Company. In 1903, a statement was made in Parliament that the cost would be $6,866,882. During the last session of Parliament, the Hon. W. S. Fielding stated that the estimated cost would be somewhere between $7,500,000 and $8,000,000. In 1903 the company admitted having a subscription list of $2,000,000, and an authorized capital of $3,000,000. The Province of Quebec voted a subsidy of $250,000, and the city of Quebec $300,000. Bonds were also negotiated to the extent of $472,000, forming a terminal company in which the railways which used the bridge would be interested. Mr. Fielding explained that if that company was formed, the Government would either take over the bridge and lease it to the terminal companies or transfer it to them in some other way. The terminal company would have the management and operation of the bridge, and, pending the accomplishment of that end, the Government would assist the Bridge Company by becoming its banker, and lending it money instead of guaranteeing its bonds.

At the point on the river where the bridge is being erected, the waterway is about 1,900 ft. wide at low tide, and about 2,500 ft. at extreme high tide, the rise varying from a minimum of 14 ft. to a maximum of 20 ft. The maximum depth of water is about 180 ft., decreasing towards the main river piers, where at low tide it is 10 ft., and at high tide 30 ft. deep. These piers are 1,800 ft. apart between centers. The original plans provided for the channel to be crossed by a suspended span and two cantilever arms, thus making an unsupported structure 1,800 ft. long between centers of main piers. The length of anchor arms on each side of the main span was to be 500 ft., with an approach span of 220 ft., at each end between anchor piers and terminal abutments. The total length of the structure would be, including abutments, 3,300 ft. A headway clearance of 150 ft., between underside of lower chords and highest tides for vessels in the channel, was to be provided. There would be a clear width of 62½ ft. between trusses for two steam railway tracks in the center, divided by screens from a single electric track and highway on each side. The coping of the main piers is 30 ft. above high tide, and the highest point of superstructure above coping would be about 330 ft. The substructure consists of two main piers, two anchor piers and two abutments. The anchor piers are placed at the foot of the cliffs beyond the limits of high water. The north anchor pier is founded on solid rock, and the south one on a formation of hard blue clay about 86 ft. thick, containing large boulders. Both piers are of granite backed with concrete, 105 ft. long by 24 ft. wide at coping, and about 111 ft. by 30 ft. at the base, and 56 ft. high from bottom of anchorage to the coping, or base of steel towers. The north abutment is

THE QUEBEC BRIDGE AS PROJECTED. THE WHITE LINES INDICATE THE 1,300 FEET AT THE SOUTH END WHICH COLLAPSED.

built into the face of the cliff, and the south one is built on a similar formation. Both are massive U shaped structures built of granite backed with concrete, having the same lateral dimensions, 80 ft. wide by 40 ft. deep, the maximum height of front wall for both abutments being about 40 ft. The main pier on the north side is built of concrete, faced with granite masonry, with the exception of the upper part of the pier for a depth of 19 ft. below the coping, which is laid with solid granite blocks throughout. The total height of pier from top of caisson to coping is 57½ ft.; at the latter point its length is 133 ft., and width 30 ft. The caisson was sunk through a compact mass of granite boulders bound together with cobble stones and fine gravel. The progress of penetration of the caisson averaged 4 inches in 24 hours, but at times was too small to be recorded. The substructure was practically completed in 1902, and the work on the superstructure commenced the following year. It was expected that the work would have been completed in 1908, but the collapse will doubtless occasion a delay of two or even three years.

G.T.R. Betterments, Construction, Etc.

Branch at St. Lambert.—Application is being made to the Railway Commission for approval of the location plans of a branch line at St. Lambert, Que. The proposed line will leave the present line about 1,700 ft. south of St. Lambert, and run northerly and westerly through the town, crossing Hickson, Edison and First avenues to a point on the company's line near the entrance to the Victoria Jubilee bridge. It is stated that the new branch is designed to give direct connection with the Victoria Bridge for the line from Rouse's Point and St. John's, Que.

Montreal Level Crossings.—The level crossings committee of the Montreal City Council is considering a proposal to depress the G.T.R. tracks in the city 15 ft., and carry the streets over them by means of bridges. One of the main difficulties that has prevented a conclusion being reached on the question has been the fact that if the tracks were elevated certain streets must of necessity be closed. The committee is having rough plans and an estimate of the cost prepared so that full consideration may be given to the project. W. Wainwright, Fourth Vice-President, stated, Sept. 11, that the proposal had not been submitted to the company, and consequently there was nothing to be said about it.

Ottawa Station and Hotel.—The Dominion Cabinet has approved of the plans for the Ottawa central station and hotel. The station will be on practically the same site as the present central station which was taken over by the G.T.R. from the Canada Atlantic Ry. The hotel will be located on the south-west corner of Major's Hill Park, with a frontage of 135 ft. on Wellington St. and a side elevation on the west, facing the canal and eastern block of 80 ft. It will be 7 stories high, with 300 rooms and 100 bathrooms. The architecture will be Norman gothic, to harmonize with the Parliament and Departmental buildings. Is is said that construction will be started this autumn. B. G. Gilbert, of New York, is the architect, and associated with him is C. P. Meredith, of Ottawa.

Pembroke Southern Ry.—Plans for the extension of this line—leased to the Canada Atlantic Ry. (Ottawa Division G.T.R.)—from Pembroke to Golden Lake, Ont., 21 miles, have been approved by the Ontario Railway and Municipal Board. The company has decided to erect a new station at Pembroke.

Rice Lake Bridge.—A proposal is under consideration at Harwood, Ont., to rebuild the bridge across Rice Lake, on the old railway between Cobourg and Peterborough, Ont. The re-opening of the iron mines at Blairton and other mining activity adjacent to Peterborough is the ground upon which the proposal has been made.

Grade Raising at Listowel.—The company is raising the level of its Stratford-Owen Sound line at Listowel, Ont. The level of the bridge over the Maitland River is being raised 4 ft. Heavier steel is also being laid, and the general character of the branch improved.

London Improvements.—C. M. Hays, Second Vice-President and General Manager, accompanied by a number of the company's officials, was in London, Ont., Sept. 6. He said nothing definite had been decided in regard to the proposed track elevation in the city. The elevation of the tracks was bound to come, and he thought that a move would be made in that direction very shortly.

A contract has been let to J. Hayman, London, for the erection of an addition to the company's car shops in that city. The work will be gone on with at once.

The site of the new station in the city will be just opposite the present one, on lands which the company purchased some time ago.

Among the cases set down for hearing at the term of the Supreme Court, opening at Ottawa, Oct. 1, is the appeal of the G.T.R. against the order of the Railway Commissioners directing the company to run one train daily between Montreal and Toronto, with third-class accommodation at two cents a mile. T. K. Meredith, K.C., has been appointed to represent the Province of Ontario.

The G.T.R. has issued a circular declining to haul cars containing stored acetylene gas, or cars with their own acetylene generating plant charged. Official cars equipped with acetylene gas for illuminating purposes will not be declined providing the storage tanks and generating plants or cartridges are emptied. The C.P.R. is reported to have determined to discontinue the use of acetylene gas in its cars.

Railway Rolling Stock Notes.

The I.C.R. during Sept. received twelve 15-ton hopper cars from Rhodes, Curry & Co., Ltd., Amherst, N.S.

The Crossen Car Manufacturing Co., Cobourg, Ont., is making delivery of stock cars to the Canadian Northern Ry.

The Temiskaming and Northern Ontario Ry. Commission is considering tenders for two vans and two baggage-mail cars.

The Canada Car Co., Montreal, is building 15 Hart convertible ballast cars for the Dominion Dump Car Co., and one erecting car for the Hamilton Bridge Co.

The G.T. Pacific Ry. has ordered 2,400 box cars for 1908 delivery, from the Canada Car Co., Montreal. They are to be of the same standard type as those previously built for the line.

The G.T.R. recently despatched from Depot Harbor, Ont., by steamboat to Fort William, Ont., 200 flat cars and a complete outfit of construction cars, unloading plows, etc., for the G. T. Pacific Ry.

The Winnipeg Board of Control has purchased from Mussens Ltd., Montreal, subject to inspection, a 38-ton standard gauge locomotive, for $3,600. It has also bought 6 flat cars, 50,000 lbs. capacity, in the U.S.

In the description of the I.C.R. motor car in our Sept. issue, pg. 669, the following particulars were given:

Weight of motor (without car) . . . . . 51,000 lbs.
Weight of motor (with car) . . . . . 92,000 lbs.
Total weight of motor and car loaded about 142,000 lbs.

One of our subscribers, a prominent motive power official, having asked if some mistake had not been made in these particulars, we communicated with the I.C.R. Superintendent of Motive Power, G. R. Joughins, who advises us that the weights as given in the specification are correct, but that perhaps the manner in which they are put down is not quite clear. The "weight of motor without car, 51,000 lbs.," is correct. The "weight of motor with car, 92,000 lbs.," should read "at motor end." The other end of the motor car weighs 50,000 lbs., making a total of 142,000 lbs.

The Canadian Northern Ry. ordered 200 Hart convertible ballast cars, 34 ft. long, 80,000 lbs. capacity, from the Dominion Dump Car Co., Montreal, for delivery during Mar. and April, 1908. They are to be built by the Canada Car Co., Montreal.

The G.T. Pacific Ry. has ordered 200 Hart convertible ballast cars from the Dominion Dump Car Co., Montreal, for delivery in 1908. The dimensions and character of these cars are similar to those previously built for the line. They are to be built by the Canada Car Co., Montreal.

The Locomotive and Machine Co., of Montreal, delivered during July, eight consolidation locomotives to the C.P.R., and two 10-wheel locomotives to the Delaware and Hudson Rd. It is building a steam shovel for

immediate delivery and a snowplow for Dec. delivery for the C.P.R.

The C.P.R. has ordered the following rolling stock: 10 passenger locomotives, Pacific type, 67 box cars, 1 refrigerator, 2 stock cars, 30 flat cars, 5 steel coal cars, at its Angus, Montreal, shops; 3 vans at its Farnham, Que., shops; 1 rotary snowplow at the Locomotive and Machine Co., Montreal; and 2 60-ton wrecking cranes in the U.S.

The Imperial Rolling Stock Co., for the Canadian Northern Ry., is placing through the Dominion Securities Co., Toronto, and W. A. Reid & Co., New York City, an issue of $1,500,000 series O, equipment trust 4½% notes. The notes mature in 10 equal annual instalments beginning June 1, 1908, and are secured on 750 box cars, 170 dump cars, 140 flat cars, 25 cabooses, four snowplows, 21 ten-wheel locomotives, and 29 passenger cars.

The G.T. Pacific Ry. has ordered from the Canada Foundry Co., Toronto, 20 locomotives, to the following specifications: Weight on drivers, 125,000 lbs.; weight on leading truck, 44,000 lbs.; driving wheels, 69 ins.; cylinders, 18 and 24 ins.; truck wheels, 34 ins.; water capacity, 6,000 imp. gals.; coal capacity, 12 tons. They are of the eight-wheel express type, with two pairs of coupled drivers and four-wheel leading truck.

The Toronto, Hamilton and Buffalo Ry. is having 140 box cars built by the Canada Car Co., Montreal, which are to be of the standard specification for 60,000 lbs. capacity, the special fittings including: Diamond arch bar trucks, wheel base, 5 ft. 2 in., Westinghouse air brakes, Simplex body and truck bolsters, Simplex brake beams, McCord journal boxes, Canadian Bronze Co.'s journal bearings, cast iron wheels, 33 ins.

The specifications for the 32 ore cars, 100,000 lbs. capacity, 61 box cars, 49 flat cars, five stock cars, refrigerator car, ballast car, two vans, 25 colonist cars, 20 first-class cars without smoking rooms, and 10 first-class cars with smoking rooms, recently ordered at the company's Angus, Montreal, shops, are similar to those described in our Sept. issue. The 10 sleeping cars are similar to those described in our May issue; the 40-ton coal cars are 36 ft. 8 in. by 8 ft. 10 in. over frame, have side doors and standard equipment similar to freight cars already described.

The C.P.R., between Aug. 14 and Sept. 17, received the following additions to rolling stock: 740 box cars, 26 steel coal cars, 20 coal cars of 40 tons capacity, 12 suburban cars, 7 first-class cars, 3 tourist cars, 3 passenger locomotives, 5 switching locomotives and 2 pile drivers, from its Angus, Montreal, shops; 8 vans from its Farnham, Que., shops; 11 steel ore cars from the Dominion Car and Foundry Co., Montreal; 16 freight locomotives and 1 steam shovel from the Locomotive and Machine Co., Montreal, and 2 sleeping cars, 2 first-class and smoking cars, and 2 tourist cars from the U.S.

The C.P.R. motor car which was operated between Montreal and Vaudreuil, in the summer of 1906, was changed during last winter so as to burn coal instead of oil, as last year's experience showed that there was not sufficient advantage in burning oil to compensate for the additional cost. The boiler has also been turned round, partly to enable it to be more conveniently fired with coal and partly on account of the rearrangement of details of the superheater in order to avoid the burning out of the superheater tubes, which occurred once or twice last year. These are practically all the alterations made, but there were some repairs necessary to such portions as showed wear, which, however, amounted to very little. The car has not been operated this year as in consequence of the second track and bridge work which is going on on the Montreal-Vaudreuil section, it was felt that no extra service in addition to the regular steam trains could be conveniently given. It was proposed to operate the car between Toronto and Brampton for suburban traffic, but this idea was abandoned. The operation of this car in 1906 is said to have been satisfactory from a mechanical standpoint, but the service was too exacting for one car, its daily run being 184 miles in train service and 10 miles in terminal run. There should be at least two, or possibly three cars, in order to give such a service satisfactorily.

Canadian Northern Ry. Construction, Etc.

Liverpool and Milton Ry.—Tracklaying on the line is about completed, and the connection with the Halifax and Southwestern Ry. has been made. Four spans of the new bridge across the Mersey River have been erected, and work is being rushed on the trestle across the docks at Liverpool.

St. John Valley Ry.—Wm. Mackenzie, of Mackenzie, Mann & Co., Ltd., recently made a trip of inspection over the company's eastern lines. Before returning to Toronto he said the project for the construction of a railway down the St. John River valley had not sufficiently developed for him to say anything about it.

Canadian Northern Quebec Ry.—Tracklaying is reported to be in progress on the cut-off between Garneau Junction and Quebec city, and it is expected that the line will be completed early in the summer of 1908. Plans showing the location of the company's line between the junction with the National Transcontinental Ry. at mileage 2.4 west from the Quebec Bridge, and a point north of St. Foye road, have been deposited in the registry office of the county of Quebec, at Quebec city.

The line connecting the Montford branch —the old Montford and Gatineau Colonization Ry.—with the company's line at St. Jerome, has been completed, and was opened for freight traffic Aug. 26, and for passenger traffic, Sept. 16. The new line extends from St. Jerome, and effects a junction with the old line near Morin's Flats, 21.6 miles. The old line extends to Huberdeau, 26 miles, giving the branch a total length of 47 miles.

The construction of the branch from St. Jacques to Rawden, Que., about nine miles, has been started, the company doing the work direct. It is expected to have it completed this year.

Canadian Northern Ontario Ry.—A plan showing the location of the company's projected line in the county of Two Mountains, Que., mileage 19.6 to mileage 38 east of Hawkesbury, Ont., has been deposited in the registry office at Ste. Scholastique, Que. The construction gangs on the extension of the line from Hawkesbury to Ottawa have reached that city, and grading is well in hand. It is not expected, however, that the line will be completed as early as was anticipated, but H. K. Wicksteed, C.E., says that trains will be running over it by the end of the year. The entrance of the line into Ottawa has not been finally determined upon, but it is expected that for the present the entrance will be over the tracks of one of the existing lines from Hurdman's Bridge.

Canadian Northern Ry.—After several conferences between officials of the C.N.R. and the G.T. Pacific Ry., D. D. Mann, Vice-President C.N.R., stated Sept. 12, that the difficulty experienced in reaching a satisfactory agreement respecting the proposed union station at Winnipeg, was on account of the fact that the site at present in view did not contain sufficient room to adequately accommodate both companies to the extent they would really need. He added: "We have abandoned the idea of building the hotel in the terminal, as the limited space will not allow of it, and it will be built nearer the business center of the city if possible. Anyway that is a matter that can be deferred for the present, as the first consideration is a good terminal."

Work has been started on the new roundhouse for the company at Dauphin, Man. The building is to be of solid brick. S. Brown, Winnipeg, is the contractor.

A new roundhouse is in progress of construction at Brandon, Man., the May-Sharpe Construction Co., Winnipeg, being the contractors. The building is expected to be completed early in Nov. Replying to a deputation Sept. 8, M. H. McLeod, General Manager, stated that he could not make any definite promise when the erection of the new station at Brandon would be commenced.

Work is being proceeded with upon the grading of the line from Etiomami, Sask., towards Hudson Bay. It is stated that it is the intention of the company to bring in large quantities of supplies during the coming winter, which will be cached at points along the right of way for use of the engineers and contractors during the following summer.

A start has been made upon the construction of the line from Saskatoon to the Goose Lake district. Contractor McCrimmon's plant reached Saskatoon from Edmonton, Sept. 12, and a camp was pitched at Bonehill, about 18 miles out. Gangs of men were set to work in both directions. A. J. Sill is engineer in charge of the work.

D. D. Mann, Vice-President, stated in an interview at Edmonton, Alta., Sept. 4, that six construction trains were at work between Vermillion and Edmonton, engaged in strengthening the line. As soon as this section of the line is completed the work of reballasting the section between Vermillion and Battleford will be taken in hand. The great trouble with the railways west of Winnipeg was the want of coal. The whole foothills country, from the Yellowhead pass to the International boundary, is an immense and continuous coal field, and it was imperative that the Canadian Northern Ry. extend its system as quickly as possible to tap these coal fields. This extension, said Mr. Mann, would be the first thing to receive the company's attention in 1908.

D. D. Mann, Vice-President, reached Vancouver, B.C., Sept. 8, and stated in an interview that the company was ready to complete the line through British Columbia to Vancouver if the Provincial Government provided a substantial subsidy. Such a line from Vancouver to the main line would, said Mr. Mann, be probably constructed before the main line was completed. He further stated that it had been decided that the Pacific terminus of the C.N.R. would not be at Port Simpson. Several plans were under consideration, but he was not in a position to make any announcement. He subsequently proceeded to Victoria, where he had several interviews with the Provincial Government upon the subsidy question. (Sept., pg. 665.)

The Northern Construction Co. has been registered under the Northwest Territories, ordinance respecting foreign corporations.

There is no foundation, we are advised, for the recent press reports that the G.T.R. had decided to appoint auditors to make ticket collections on its trains in place of conductors, as at present.

The Department of the Interior has issued a map of the Dominion, giving a view of the whole railway system. It is of convenient size, and while not all the railways, nor all the branches of the trunk lines, are shown, the principal lines are indicated in such a way that it can be readily seen where they come in contact one with the other, and their relative importance.

TRADE AND SUPPLY NOTES.

The matter which appears under this heading is compiled, in most cases, from information supplied by the manufacturers of, or dealers in, the articles referred to, and in publishing the same we accept no responsibility. At the same time we wish our readers to distinctly understand that we are not paid for the publication of any of this matter, and that we will not consider any proposition to insert reading matter in our columns for pay or its equivalent. Advertising contracts will not be taken with any condition that accepting them will oblige us to publish reading notices. In other words, our reading columns are not for sale, either to advertisers or others.

The Canadian Westinghouse Co. has declared a quarterly dividend of 1½%, payable Oct. 1, to shareholders of record Sept.24.

The Canadian General Electric Co. has been registered at Regina, Sask., under the North-West Territories ordinance respecting foreign corporations.

Mussens Limited, Montreal, has issued catalogue 15 of railway mining and contractors' supplies, etc., containing 639 pages, profusely illustrated.

Hayes Track Appliance Co., Geneva, N.Y., has issued circulars 47 and 48, giving some new illustrations and descriptive matter of the derails which it manufactures.

K. W. Blackwell has resigned his position as General Manager of the Montreal Steel Works, but retains the office of President. He is succeeded as General Manager by W. F. Angus.

Golden-Anderson Valve Specialty Co., Pittsburg, Pa., has issued catalogue 9 of its steam and water specialties, including automatic valves and traps for steam and water service, which are largely used by railway and navigation companies.

The Brown Hoisting Machinery Co., Cleveland, Ohio, has issued an illustrated catalogue of its "Brownhoist" locomotive cranes, with grab buckets, for handling ore, coal, limestone, slag, etc. The illustrations show the cranes handling ore from stock hills, gondola cars, etc.

The Chicago Pneumatic Tool Co.'s statement for the half-year ended June 30, shows profits of $507,528.12, less depreciation and written off, $108,633.58, leaving net profit, $398,894.54. After setting aside $82,500 for bond interest and sinking fund reserve, there remained a balance of $190,818.88, which was carried to surplus account, making the total to the credit of that account, $1,069,-228.32.

The American Locomotive Co. has issued the tenth of its series of catalogue pamphlets, which illustrates and describes the prairie type locomotives built for various roads. This pamphlet contains half-tone illustrations and the principal dimensions in tabulated form of 15 different designs of locomotives of this type, ranging in weights from 136,000 to 245,000 lbs. The pamphlet begins with a description of this class of locomotives and presents the advantages which it offers for fast freight and passenger service.

Klondike Mines Ry.—Application will be made next session of the Dominion Parliament for an act authorizing the company to extend its line to Edmonton, Alta. The line already extends from Dawson, Yukon, towards the Stewart River, and the projected extension would follow the Stewart River Valley, and proceed by the Great and Lesser Slave Lakes to Edmonton. The total length of the line would be about 1,400 miles. It is stated that the company will not ask for a Government subsidy, but will ask that the Dominion Government guarantee its bonds. (Sept., pg. 663.)

The 52nd annual convention of the American Association of General Passenger Agents will be held at Washington, D.C., Oct. 15 and following days.

RAILWAY DEVELOPMENT.

Projected Lines, Surveys, Construction, Betterments, Etc.

Alaska.—A company has been organized to construct an electric railway from Valdez, Alaska, to the copper country, about 180 miles. A large number of men are reported to be engaged upon construction work, and it is expected to complete about 34 miles this fall. H. D. Reynolds, of Valdez, Alaska, and Seattle, Wash., is one of the promoters.

On the Tanana Valley Ry. work is in progress upon an extension from Gilmore to Chuteneka, Alaska, 20 miles. Grading has been completed upon the first ten miles. Upon the completion of the line to Chuteneka, it is intended to continue the line to Cleary Creek, a further distance of six miles. (Sept., pg. 663).

Atlantic, Quebec and Western Ry.—The recently completed line between Paspebiac and Port Daniel, Que., was opened for traffic Sept. 1. We are advised that while the company is doing certain work at three different points between Port Daniel and Gaspe, no contract covering the construction of that portion of the line has been let. (Sept., pg. 665.)

The Bessemer and Barry's Bay Ry. extends from the Central Ontario Ry., near L'Amable station, Dungannon tp., Hastings County, easterly to the village of Bessemer, where the properties of the Mineral Range Iron Mining Co. are situated. Construction was commenced in July, 1906, and the first five miles of line, less 800 ft., were completed Jan. 15, on which date the first carload of magnetite iron ore was moved from no. 4 mine. It is intended to extend the line at an early date, for a distance of 2½ miles, so as to connect up the furthest group of mines. This group has a known area of 1,200 ft. square. The company contemplates eventually extending its line on through Craigmont and Combermere to Barry's Bay. The line is standard gauge, and is laid with steel rails, originally 65 lb. Since the line was opened, nearly 20,000 tons of freight have been carried, and it is expected that a considerable quantity of lumber will be handled. During the present season the company has done considerable work on the road-bed in the way of ballasting, etc., so that it is now in a very good condition. (Oct., 1906, pg. 583.)

Crow's Nest Southern Ry.—Reports from Fernie, B.C., state that the company is extending its line from that point northerly to Michel, 20 miles.

Dominion Atlantic Ry.—The extension of the D.A. Ry. to the Annapolis Iron Co.'s mine shaft at Torbrook is nearly completed, and is expected to be in operation in Oct. (Jan., pg. 1.)

Gunflint and Lake Superior Ry.—The Minnesota, U.S., charter authorizing the construction of a railway from Gunflint, near which point the old Port Arthur, Duluth and Western Ry., now part of the Canadian Northern Ry., at present has its terminal, to Lake Superior, is reported to have been sold to W. Alexander, Warsaw, Wis.

Great West Ry.—The Great West Coal Co. has been organized at Port Arthur, Ont., with J. J. Carrick as President, and J. J. O'Connor as Secretary-Treasurer, for the purpose of developing some 12,000 acres of coal lands in Alberta. In addition to the coal areas the company, for which a charter of incorporation is being obtained, has acquired the charter of the Great West Ry. The North West Coal and Coke Ry. was incorporated by the Dominion Parliament in 1903, and in 1905 an extension of time for the construction of the railway was granted and the name of the company was changed to the Great West Ry. The company has power to construct a railway from Bull Park to the C.P.R. Crow's Nest Pass line near Cowley Alta. (May, pg. 323; June, 1905, pg. 243; July, 1903, pg. 239.)

Indian River Ry.—At the annual meeting of shareholders held at Quebec Sept. 4, it was decided that construction work should be commenced within a year. Following are the officers and directors for the current year: President, M. P. Davis; Vice-President and General Manager, W. Tettengill, Rumford Falls, Me.; other directors: W. P. Davis, L. A. Cannon, G. Parent; Treasurer, G. W. York, Portland, Me.

Intercolonial Ry.—M. J. Butler, Deputy Minister of Railways, upon completing an inspection of the I.C.R. recently, said: "We made the whole trip by daylight and ran at high speed, making stops at every point where there was work going on. I did this for the purpose of testing the track and at the same time seeing every mile of the system by daylight. The roadbed was never in better shape; as far as rails, ballast and bridges are concerned, there is not a better road to-day in America." Speaking of the construction of the new shops at Moncton, Mr. Butler said: "The work is going on well, and is being thoroughly done. The contractor is putting up the best quality of steel and cement structural work. The car shop will be ready for use this autumn. The locomotive shop will not be ready so soon. There has been some delay occasioned by continued wet weather, during which cement work cannot be done, by scarcity of labor and by delay in delivery of structural steel. We have to get this from Scotland. The Canadian firms are so piled up with orders that we would not have been able to get materials from them for at least a year. However, good progress is being made, and when the shops are completed the I.C.R. will be thoroughly provided with repairing and construction facilities."

A flour shed is under construction at York Point slip, St. John, N.B. It will be 202 by 140 ft. Flood and Bates are the contractors.

Tenders are under consideration for the construction of a concrete and brick machine shop and boiler house at Riviere du Loup, Que. (Sept., pg. 663.)

Kettle Valley Lines.—Grading and tracklaying are in progress on the extension from Grand Forks, B.C., up the Kettle River to McKinley mine, 50 miles. It was expected to have the track laid from Grand Forks to Lynch Creek by Sept. 30. (Aug., pg. 561.)

Kingston, Smith's Falls and Ottawa Ry.—A letter from A. T. Drummond, respecting the route of entrance of this projected railway into Ottawa, is before the city council. Some years ago the council voted $50,000 to the company towards the construction of its railway, but nothing was done towards earning it. The company has been taken up by the G.T.R., and an assurance given that as soon as the location plans have been approved of by the Government, construction will be started. The application to have these plans approved by the Railway Commissioners was made by the G.T.R. legal department, and we are advised that while the company is not a G.T.R. one, traffic arrangements have been made between the two companies. (Sept., pg. 663.)

London and Port Stanley Ry.—The new bridge over the Thames near London is practically completed, and the new bridge at Kettle Creek, near St. Thomas, is expected to be finished by Oct. 1. It is being built of reinforced concrete. The quantities of materials used being: 400 cords of gravel, 19 tons of steel, and six carloads of Portland cement. (Aug., pg. 563.)

THE LEEDS COMPANY

Solicits your patronage and invites you to write for Illustrated Folder and Rates.

CHALFONTE IS ALWAYS OPEN

The Mabou and Gulf Ry. line extends from the Mabou mines to Mabou Harbor, N.S., about five miles. It is graded and partially constructed to a junction with the Inverness Coal and Ry. Co.'s line, about three miles from Mabou Harbor. It handles the output of the Mabou mines and a tug service in Mabou Harbor; no passenger trains are at present operated on the railway. We are advised that it is planned to complete the line between Mabou Harbor and the Inverness Coal and Ry. Co.'s line in 1908. W. P. Deppe, Mabou Mines, is President, and A. A. Mackay, Halifax, N.S., Secretary-Treasurer.

Midway and Vernon Ry.—R. W. Morris, an English civil engineer, arrived in Vernon, B.C., Aug. 28, and made a trip of inspection over the route of this projected railway. It was stated that he would report to a British syndicate which contemplates undertaking the construction of the line. (July, pg. 479.)

Reid Newfoundland Co.—A drawbridge to carry the railway over the Main River, Newfoundland, is being completed.

Sydney and Louisburg Ry.—We are officially advised that the Dominion Coal Co. has been making some surveys to ascertain the best line for connecting the Victoria-Luigan mine areas with the main line of the S. and L. Ry. So far these surveys are merely preliminary, and a definite location has not been selected. It is probable, however, that the location which will be adopted will leave the main line somewhere between the Old Gardner mine and Grand Lake, running down approximately in the middle of the peninsula towards the Old Victoria mine. The company has not reached any definite decision as to when construction will be undertaken. (Sept., pg. 665.)

Temiskaming and Northern Ontario Ry.—The erection of a building at North Bay, Ont., for use as a stores department, and offices for the Master Mechanic, is being proceeded with.

The scarcity of steel is causing considerable delay in construction upon the line. The bridges at Wabi and Watybeag, which were to have been completed in May, had not been completed Sept. 12. The severe rains of Aug. caused landslides at Taylor's Creek, near Englehart, and prevented supplies of heavy material being taken in The scarcity of labor is also preventing the carrying on of work on the line as speedily as was anticipated. (Sept., pg. 665.)

Vancouver, Victoria and Eastern Ry. and Navigation Co.—An order has been issued by the Board of Railway Commissioners granting permission to the V., V. and E. Ry. to carry its line along a portion of the river road in the municipality of Delta, B.C. (Sept., pg. 665.)

Vancouver, Westminster and Yukon Ry.—At the recent sittings of the Railway Commissioners in Vancouver, a number of matters affecting the construction of this line were considered and disposed of. Permission has been given to build a line round False Creek, but its lines will have to join, not cross the C.P.R. tracks, unless a further order is obtained. See also National Transcontinental Ry. (May, pg. 327.)

The Victoria Terminal Ry. and Ferry Co. is taking proceedings for the expropriation of additional lands at New Westminster, B.C., for the extension of its lines there. (Aug., pg. 565.)

White Pass and Yukon Ry.—Reports from Dawson, Yukon, state that it is expected to start construction on a line from Whitehorse to the copper mine camps, about 20 miles, early next year. It is expected that the extension will handle 1,000 tons of ore daily.

Winnipeg City Power Line.—The City of Winnipeg has under consideration tenders for the equipment of its power station at Point du Boise, its transmission line to Winnipeg, and the distributing station in Winnipeg, for the construction of a bridge across the Winnipeg River, and for rolling stock for its tramway. The tender of C. A. Tiefft for clearing the right of way from Lac du Bonnet to Point du Boise, 22 miles, has been accepted. (Sept., pg. 665.)

Yukon.—The Yukon Legislature has adopted a memorial to the Dominion Parliament, asking that a subsidy be voted for an all-Canadian railway from some transcontinental Canadian railway to Dawson. The G.T. Pacific Ry. has power to construct a line from near Edmonton, Alta., on its main line, to Dawson; and the Vancouver, Westminster and Yukon Ry., has power to construct a line to Dawson through British Columbia. Press reports recently credited the G.T. Pacific Ry. with having arranged to purchase the V., W and Y. Ry. charter.

National Transcontinental Railway.

An agent of the National Transcontinental Ry. Commission is reported to have purchased about three acres for right of way about three miles from Moncton, N.B. Nothing has been done towards purchasing right of way between that point and Moncton, as the exact point of junction with the Intercolonial Ry. does not appear to have been finally determined upon.

The G.T. Pacific Ry. Co. has sublet contracts as follows: 50 miles west from Moncton to J. H. Corbett, a Pennsylvania contractor, and for the next eight miles to J. W. McManus Co., Ltd., Memramcook, N.B. This eight miles includes a large steel bridge over the Salmon River, and about a mile of line to connect with the New Brunswick Coal and Ry. Co.'s line. Work has been started on this eight mile section.

GRAND TRUNK PACIFIC RY.

Work is in progress at various points on the line between Winnipeg and Portage la Prairie, Man., but the contractors—Treat and Johnston—are meeting with considerable difficulty in getting men. The McDonald, McMillan Co. expected to finally complete the grading from Portage la Prairie to the Touchwood Hills, 275 miles, by the end of Sept. A report received by the Dominion Government at Ottawa gives details of the progress of construction up to Aug. 31. At that date steel had been laid for 124 miles west of Portage la Prairie, and of this mileage 87 miles is ballasted. Of the grading between Portage la Prairie and Saskatoon, 85% had been completed. There were 1,100 men and 800 teams at work on the 462 miles between Winnipeg and Saskatoon. On the line between Saskatoon and Edmonton, Alta., the grading is being pushed, and the greater part of the distance is about ready for the ties. Plans have been filed in the Dominion Land Office at Edmonton, showing the route through that city. A double track is shown, and it branches south at the intersection with the Canadian Northern Ry. Thence it runs north paralleling the south side of the Queen's avenue school between First and McDougall, then westerly, cutting off the corner of the St. James hotel to McKenzie, and along that avenue due west to Twenty-first St., where it recrosses the C.N.R. and runs due north, joining the main line in what is known as the Hagman estate. The right of way passes through the grounds of Queen's avenue school, and will also mean the tearing down of the St. James hotel.

A recent letter from Barkerville, Cariboo county, B.C., says that about 100 miles of the G.T. Pacific in that vicinity had not been definitely located. Three engineers, Leask, Horner and Gunn, are in the field working to fill the gap. The route being surveyed leaves the north bank of the Fraser at Five-mile Bend, above the Grand canyon, goes through a pass at the head of Tonaquah creek, and down that creek to its mouth on the Fraser, ten miles below the canyon. This part of the line is to avoid following the Fraser through the Grand canyon, where two tunnels would be necessary. The new survey crosses to the south bank of the Fraser; goes up Goat River a short distance, crosses to Bear River; thence via Otter and Eagle lakes to Willow River, and down Willow river to its mouth. It will probably cross to the north bank of the Fraser at the mouth of Little Salmon River, where there will be a single span bridge on solid rock. It is expected that steps will be taken at an early date to let contracts for the 700 miles between Edmonton and Prince Rupert, B.C.

We are advised that a contract has been let to Foley Brothers, Larson & Co. for the grading along a certain portion of the company's projected line in British Columbia, but that details of the same have not been settled. Local press despatches state that this contract covers the grading of the line between Kitamaat and the headquarters of the Copper River, and that the route will follow the location staked out for the Pacific, Omineca and Northern Ry., the charter for which was acquired by the G.T. Pacific Ry. A start was made Aug. 17, when the first sod was cut. There will be a good deal of rock cutting, and this will be gone on with throughout the winter. A wagon road will be cut the entire length of the Kitamaat branch, and supplies will be got in during the winter.

The question of the entrance of the company's line into Vancouver is being discussed and press reports state that the charter of the Vancouver, Westminster and Yukon Ry. had been purchased, but J. Hendry, President, is quoted as stating that the line has not been sold. He further stated that the line would be constructed from Vancouver northward with the direct object of tapping the G.T. Pacific Ry., and giving that railway a connection with Vancouver.

A press report states that on the return of Chief Railway Commissioner Killam to Ottawa from the West early in Oct., the Board will take up the complaints of alleged discrimination in freight rates in favor of Winnipeg as against other western points. Among the other questions to be dealt with by the Board are the Bell Telephone Co.'s rates, the express companies' rates, standard operating rules for railways, the re-classification and authorization of new schedules of maximum freight rates, the adoption of new forms for bills of lading, the drafting of new regulations affecting the safety of passenger trains in the matter of heating, lighting, etc., and the settlement of the Toronto union station problem.

Canadian Northern System Terminals has been incorporated under the Dominion Companies Act, with a capital of $2,000,000 and offices at Toronto, to lay out, construct, purchase, lease or otherwise acquire, maintain, operate and manage terminals, transportation, warehouse and storage facilities, yards, stock yards, etc., and tracks and equipment for the movement, care storage, or handling any merchandise or traffic; passenger facilities and accommodation, hotels, parks, amusement resorts, etc.; grain elevators and cleaning plants, steamships and vessels, piers, docks, dry docks, wharves, slips, etc.; smelters and furnaces, mines, power-houses and structures, and for a number of other objects necessary in connection with either of these businesses. The provisional directors are: G. Ruel, A. J. Mitchell, J. B. Robertson, R. P. Ormsby, F. C. Annesley, L. W. Mitchell, Toronto; all of whom are in the employ of Mackenzie, Mann & Co. (Ltd.)

MAINLY ABOUT PEOPLE.

A. H. Campbell, Vice-President of A. C. Leslie & Co., Montreal, died in that city, of typhoid fever, Aug. 26.

W. Whyte, son of W. Whyte, Second Vice-President C.P.R., was married at Winnipeg, Sept. 4. to Miss M. M. Blair.

Mrs. M. McLellan, wife of W. M. McLellan, of the Ottawa Forwarding Co., Ottawa, died there Sept. 15, aged 67.

Lady Shaughnessy, with two daughters, sailed from Quebec for Great Britain on the Empress of Britain, Sept. 27.

A. Dulhanty, trackmaster Cumberland Ry. and Coal Co., left Parrsboro, N.S., Sept. 13, on a trip to the U.S.

P. J. Ryan, for many years one of the principal operators in the C.P. Telegraph Department, died at Montreal Sept. 17.

W. Mackenzie, President Canadian Northern Ry., was a successful exhibitor of Jersey cattle at the recent Toronto Exhibition.

Jas. T. Scanlan, lumberman, who died in Montreal, Sept. 12, was son of M. Scanlan, of the Dominion Steamship Co., Montreal.

Mrs. M. Farrell, wife of T. Farrell, late manager for the Hendrie cartage agency at St. Catharines, Ont., died there Sept. 14.

Mrs. Pullen, wife of J. Pullen, Assistant Freight Traffic Manager, G.T.R., died at Montreal, after a serious operation, Aug. 22.

A. W. Shearwood, Secretary of the Dominion Bridge Co., Montreal, died in the General Hospital there, Sept. 6, after a lengthened illness.

T. A. Gillick, commercial agent, Chicago, Milwaukee and St. Paul Rd., at Winnipeg, Man., was married at St. Paul, Minn., Sept. 4.

Admiral Sir A. H. Markham, who has written extensively on navigation in Hudson Bay, spent some days in Toronto at the end of August.

M. K. Cowan, K.C., assistant solicitor G.T.R., is recovering from an attack of pleurisy, and is spending some time at Saranac Lake, N.Y.

Miss F. I. Swinford, daughter of Mayor Swinford, General Agent Northern Pacific Road, Winnipeg, was married there to C. D. Corbould, Sept. 3.

D. McEwen, employed on the C.P.R. engineering staff on the Crow's Nest Pass Line, had one of his legs amputated recently as the result of injuries.

Major-General M. L. Synge, of the Royal Engineers, who died in Great Britain recently, was connected with the surveys for the C.P.R. in the early days.

K. Copeman was presented with a gold watch by the staff of the C.P.R. steamship department, Quebec, recently, on leaving the company's service.

Mrs. Johnson, wife of W. T. Johnson, for a number of years C.P.R. ticket agent at the Chateau Frontenac, Quebec, died at Montreal, Sept. 14.

Miss S. L. Panser, daughter of C. J. Panser, C.P.R. roadmaster, Winnipeg, Man., was married there recently to M. Feely, of the Manitoba Cartage Co.

Jas. Hardwell, chief traffic officer, Board of Railway Commissioners, has been staying at Preston Springs, Ont., to recuperate after his recent illness.

H. Harding, Local Secretary of the Canadian Northern Ry. in London, Eng., reached Montreal, Sept. 13, and is making a trip over the company's line.

F. A. Hibbard was presented with a purse of gold by the engineering staff of District B, National Transcontinental Ry., Sept 17, on his leaving the service.

Alex. McDonald, Toronto, Building Foreman G.T.R., was struck by a train at London, Ont., Aug. 23, and died in the Victoria Hospital there from his injuries.

W. Pugsley, formerly Premier of New Brunswick, has been appointed Minister of Public Works for the Dominion, succeeding Hon. H. S. Hyman, resigned.

Capt. C. H. Jenks, who died at Crookstown, Minn., recently, was for a number of years Superintendent of the Northern Division of the Great Northern Ry., U.S.

Lieut.-Col. Sir Henry M. Pellatt, who is associated as a director with a number of transportation companies in Canada, has been promoted to the rank of Colonel.

Mrs. J. P. Hawkins, who died at Sherbrooke Aug. 23, was sister of J. H. Walsh, General Manager Quebec Central Ry., and of T. and P. Walsh, of the same company.

W. H. Heskett, who moved to Winnipeg recently as assistant storekeeper, C.P.R., died in the general hospital there from typhoid fever, Sept. 10, aged 39.

J. E. Hutchison, heretofore chief clerk at the C.P.R. Royal Alexandra Hotel, Winnipeg, was presented with a purse of gold by the staff on leaving for Montreal, Sept. 1.

O. Morency, local purchasing agent and superintendent of stores for the Transcontinental Ry. Commission at Quebec, was married there, Sept. 16, to Miss B. Samson.

G. H. Woolley, one of the directors of the Furness-Withey Co., steamship owners, managers and builders, and the company's manager at New York, died there Sept. 12.

J. Law, who died at London, Ont., Sept. 5, was for many years track superintendent of the Great Western Ry., and its successor the G.T.R. retiring from active service in 1893.

T. A. de Gaspe, who died at Montreal, Aug. 27, aged 85, had been in the G.T.R. employ for over 50 years. He was a nephew of the late P. A. de Gaspe, a well-known Canadian author.

T. Williams, Superintendent C.P.R., Farnham, Que., is reported to be recovering satisfactorily from his recent accident and is expected to return to his office in about a month.

F. O. Lockhart, who has been appointed Chief Train Dispatcher, Atchison, Topeka and Santa Fe Rd., at Raton, N.M., is a son of W. J. Lockhart, trackmaster, Intercolonial Ry., Moncton, N.B.

The body of A. H. Birks, who was engineer in charge of the erection of the Quebec bridge for the contractors, was found floating in the river, Sept. 11. He was on the structure at the time of the collapse.

J. W. Goodall, who died at Toronto, Aug. 26, aged 89, was father of J. H. Goodall, chief clerk in the District Passenger Agent's office, G.T.R., Toronto, and of A. Goodall, G.T.R. train dispatcher, Barrie.

E. V. Slocum, Vice-President Safety Car Heating and Lighting Co., New York, was married at Montreal on Oct. 2 to Miss Maud Baker, eldest daughter of W. R. Baker, Assistant to the President C.P.R.

J. U. Gregory, representative of the Department of Marine at Quebec, presented a handsome prize for competition at the yacht races of the Quebec Yacht Club, Sept. 5. He is Honorary Commodore of the club.

D. D. Mann, of Mackenzie, Mann & Co., has successfully appealed against an assessment of $49,000 on income at Toronto, on the ground that he is now residing at Scarboro Cliff Park, just east of Toronto.

Dr. W. Merrill, C.P.R. surgeon at Chapleau, Ont., who died at Ottawa from cerebro-spinal meningitis in Sept., was a nephew of Mrs. C. W. Spencer, wife of the General Manager of Mackenzie, Mann & Co., Eastern Lines.

V. I. Smart, heretofore Signal Engineer of the Chicago and Eastern Illinois Ry., has been appointed an assistant professor in the Transportation section of the Faculty of Applied Science at McGill University, Montreal.

H. G. McMicken, European representative of the Great Northern Ry., U.S., arrived in Montreal, Sept. 16, and will visit Winnipeg, Man.; St. Paul, Minn., and other points before returning to London, Eng.

Hon. J. S. Hendrie, President of the Canadian Artillery Association, has been made a Commander of the Royal Victorian Order, in connection with the recent visit of the British Artillery Association's teams to Canada.

The administration building at the King Edward Sanitarium for Consumptives at Weston, Ont., which was opened by Earl Grey, Aug. 28, was the gift of H. C. Hammond, President Northern Navigation Co.

Capt. D. J. Kennelly, for many years manager of the Sydney and Louisburg Coal and Ry. Co., until the merger with the Dominion Coal Co. in 1893, died at Sydney, N.S., Aug. 28, aged 76, after an operation for cancer.

F. H. McGuigan, formerly Fourth Vice-President, G.T.R., has recovered from his recent indisposition and was in Montreal in the middle of September. He declined to make any statement as to his future engagements.

D. D. Mann, Vice-President C.N. Ry., was reported, Aug. 31, to be seriously ill at Winnipeg, but telegrams dated Sept. 6 stated that his indisposition had been greatly exaggerated, and that he had left for Edmonton, Alta.

J. Scriver, who died at Hemmingford, Que., Sept. 5, aged 82, was interested in the development of railways in Huntingdon county, and was president of one of the local companies subsequently absorbed by the G.T.R.

G. A. Oulton, Travelling Freight and Passenger Agent, Illinois Central Rd., Boston, Mass., was married there, Sept. 5, to Miss M. D. Neal. He is a son of G. H. Oulton, of the railway mail service, St. John, N.B.

Hon. G. P. Graham, Minister of Railways and Canals, was elected by acclamation Sept. 18 to represent Brockville, Ont., in the House of Commons. He previously represented the constituency in the Ontario Legislature.

A. M. McLellan, chief clerk to W. B. Mackenzie, Chief Engineer Intercolonial Ry., was married in Moncton, N.B., Sept. 11, to Miss M. B. Thomson. He was presented with a cabinet of silver by the engineering staff prior to the ceremony.

S. J. Kearns, for some years prior to 1888 connected with the G.T.R. at London, Ont., of which city he is a native, has been appointed Assistant Superintendent Western Division New York Central and Hudson River Rd., Syracuse, N.Y.

Jos. Paquet, contractor for the La Tuque branch of the Quebec and Lake St. John Ry., has been appointed a Justice of the Peace for the districts of Quebec and Three Rivers, under the provisions of article 2572 of the revised statutes of Quebec.

F. A. Valentine, heretofore travelling passenger agent C.P.R., Los Angeles, Cal., who was recently transferred to Spokane, Wash., has been missing since Aug. 11, and it is alleged that he has left financial entanglements amounting to nearly $4,000.

W. R. Baker, Assistant to the President C.P.R., who has been a widower for several years, will be married in the near future to Mrs. Drysdale, who is a daughter of the late Andrew Paton, of Sherbrooke, Que., and a sister of Mrs. H. S. Holt, of Montreal.

W. L. Morkill, heretofore General Manager of the Mexican Southern Ry., has

resigned to become General Manager of the Peruvian Corporation—a British company trading throughout South America. He formerly resided at Sherbrooke, Que.

John Little, who for a number of years was chief of the land department of the old Great Western Ry., died at Annandale, Scotland, Aug. 16. He was a volunteer officer during the Fenian raid, and for three years was a member of the Canadian team at Wimbledon.

W. C. Hall, formerly Superintendent C.P.R. at Quebec, died there Sept. 15, aged 76. He was originally employed on the G.T.R., then on the Levis and Kennebec Rd., and subsequently on the North Shore Ry., remaining with the C.P.R. when it took over this line.

W. G. McWilliams, who died at Wellington, Prince Edward County, Ont., Aug. 23, was at the time engaged upon some special legal work for the Central Ontario Ry. J. D. McWilliams of the C.P.R. engineering staff, Toronto, is a son, and another son, W. N., is also in the C.P.R. service.

W. Whyte, second Vice-President C.P.R.; A. M. Nanton, Managing Director, Alberta Ry. and Irrigation Co.; J. A. M. Aikens, Local Solicitor C.P.R.; and E. L. Drewry, are among the provisional directors of the Winnipeg City Band Co., recently incorporated under the Manitoba Companies' Act.

The engagement is announced of Miss Marion Dunsmuir, fourth daughter of Jas. Dunsmuir, Lieut.-Governor of British Columbia, and principal owner of the Wellington Collieries and Ry. Co., to M. Lampson, who represented the Imperial Government on the recent tour of Prince Fushimi in Canada.

While making a trip of inspection over the Halifax and South-Western Ry., Aug. 28, a private car, in which were travelling W. Mackenzie, of Mackenzie, Mann & Co., Ltd., and C. W. Spencer, General Manager of the firm's Eastern Lines, was wrecked. The occupants escaped without sustaining any injuries.

W. F. Biggar, who died at Grand Haven, Mich., recently, aged 65, was a native of Niagara, Ont., and was for a number of years engaged as an engineer upon railway construction work in Canada. He was Superintendent of the Welland Canal, and after going to the U.S., was on the engineering staff of the Michigan Central Rd. for some years

G. T. Davie, who died at Levis, Que., Sept. 1, aged 79, had been engaged in shipbuilding there for many years. He was head of the firm of G. T. Davie & Sons, owning the dry docks and patent slips, the ship repair yards at Levis, and a wrecking plant. He had been, also, for many years, a director of the Quebec Steamship Co., and of the Quebec and Levis Ferry Co.

J. G. G. Kerry, who was appointed one of the commissioners to investigate the collapse of the Quebec bridge, now resides in Toronto, and had previously been appointed by the Department of Railways to investigate the railway situation between Toronto and Ottawa with a view of assisting the department in arriving at a conclusion as to the best location for the Canadian Northern Ontario Ry. and other lines.

F. Nicholls has presented to the Royal Canadian Yacht Club, Toronto, a starboard side-light which formed part of the equipment of the torpedo boat destroyer Raztorophy, blown up in Chefoo Harbor by the Russians to prevent her falling into the hands of the Japanese. He secured this interesting relic from Capt. Scott Harden, war correspondent of the London Graphic, while in England recently.

The tablet erected in Salisbury Cathedral, Eng., in memory of those killed in the disaster to the steamship express on the London and South-Western Ry. there, July 1, 1906, was unveiled Aug. 20. It was dedicated by the Bishop of Salisbury, and an address was made by the U.S. Ambassador. The names of the 28 killed, including Rev. E. L. King, W. Barwick, K.C., and C. A. Pipon, of Toronto, are appended to the inscription.

P. Webb, who has resigned his position as Superintendent of the Locomotive and Machine Co. of Montreal, will return to the United States. He was chief draughtsman for the C.P.R. in its early days, prior to going into the service of one of the locomotive building companies in the U.S. merged in the American Locomotive Co. He is a brother of Capt. M. Webb, who lost his life in an attempt to swim the whirlpool at Niagara River in the early 80's.

E. A. Stone, who has been appointed Professor of Civil Engineering at Dalhousie University, N.B., in succession to Prof. B. Jack, is a native of Charlottetown, P.E.I., and a graduate of McGill University. He was on the C.P.R. engineering staff for four years in the bridge department, and was subsequently engineer and chief draughtsman for the Montreal Steel Co.; engineer for the Canadian Electro-Chemical Co., Sault Ste. Marie, Ont., and since 1902, structural engineer for the Canada Foundry Co., Toronto.

W. Kennedy, whose portrait appears on the first page of this issue, was born at Belleville, Ont., Dec. 23, 1869, and has been in the service of the G.T.R. continuously since 1883, his record being: 1883 to 1886, apprentice in the Belleville shops; 1886 to 1891, apprentice and journeyman in the Point St. Charles shops; 1891 to Sept., 1897, in charge of waterworks between Montreal and Toronto, under the Master Mechanic, with headquarters at Belleville; Sept., 1897, to June, 1901, locomotive foreman at Sarnia tunnel; June, 1901, to date, Master Mechanic, Middle and Southern Divisions, Toronto.

The testimonial presented to John Ennis, Passenger Manager of the Allan Line Steamships, Liverpool, Eng., who recently retired after 40 years' service, took the form of an illuminated address and a cheque. Mr. Ennis has taken up his residence in his native town of Wexford, Ireland, and was unable, owing to an accident, to journey to Liverpool to receive the presentation publicly. The committee having charge of the presentation included Lord Strathcona, chairman; Sir A. L. Jones, of the Elder-Dempster Co., Vice-Chairman; A. Dobell, Archer Baker, European Manager, C.P.R.; and T. Skinner, Director C.P.R.

F. W. Salsbury, District Passenger Agent C.P.R., Pittsburg, Pa., was stricken with paralysis in his office, Sept. 11, and died a few hours later in the West Penn Hospital. He was born Aug. 24, 1861, and entered railway service with the Duluth, South Shore & Atlantic Rd. in 1887, working on construction. From Oct., 1887, until Oct., 1888, he was agent at St. Ignace, Mich., and then for some time was travelling passenger agent. On Jan. 1, 1889, he was appointed chief clerk in the general freight office, which position he held until Oct., 1893, when he went to Pittsburg as commercial agent for the D., S.S. & A.R.R. and the Minneapolis, St. Paul & Sault Ste. Marie Ry. In April, 1897, he was made commercial agent of the C.P.R., and on July 1, 1902, district freight and passenger agent for the Canadian Pacific and its subsidiary lines. He is survived by his wife and one brother.

Detroit River Tunnel.—A cave-in occurred at the tunnel works under the Detroit River at Windsor, Ont., as a result of which Sandwich St. sank 6 ft. for a distance of 50 ft. Some 20 men were at work in the shaft at a depth of 60 ft., but owing to the gradual cave in of the soil they were able to get out without injury.

TRANSPORTATION APPOINTMENTS.

Atlantic, Quebec and Western Ry.—The following are the officers having charge of operations: General Manager, A. Lemieux, 409 Board of Trade Building, Montreal; Superintendent, F. C. Bouvier, New Carlisle, Que.

J. V. Nimmo, having resigned his position as Chief Engineer, of the new Canadian Company, Limited, and Resident Engineer of the Atlantic, Quebec and Western Ry, W. Lyon Browne has temporarily undertaken the duties.

Canadian Northern Ry.—S. S. Foley, heretofore Chief Train Dispatcher district 3, has been also appointed Trainmaster. Office, Dauphin, Man.

A. Brunton, heretofore Trainmaster district 3, at Dauphin, Man., has been assigned to other duties.

R. Nelson, heretofore Train Dispatcher district 3, has been appointed Assistant Chief Train Dispatcher, same district. Office, Dauphin, Man.

Chicago, Milwaukee and St. Paul Ry.—J. G. Thompson, heretofore connected with the Minneapolis, St. Paul and Sault Ste. Marie Ry. at Winnipeg, has been appointed Travelling Passenger Agent, C.M. and St. P. Ry., succeeding L. W. McConnell. Headquarters, St. Paul, Minn.

Canadian Pacific Ry.—Firemen G. David and T. Richmond have been appointed travelling firemen, district no. 2, Eastern Division. Their duties will be to instruct men in their duties as firemen, and to successfully fire locomotives. They will report to the locomotive foremen at both ends of the road, and notify them at once of anything they may consider a betterment of the service.

W. J. Brown has been appointed locomotive foreman at Toronto, succeeding T. Milne, transferred to London, Ont.

G. W. Lawson has been appointed Grain Agent, in charge of the issue of warehouse receipts on account of the company's lake front terminal elevators. Office, city freight department, McDermot Ave. and Main St., Winnipeg.

A. E. Stevens, heretofore Chief Dispatcher, district 2, Pacific Division, has been appointed Superintendent district 2, Central Division, succeeding J. T. Arundel, transferred to the Pacific Division.

F. H. Cummings has been appointed Chief Clerk at the Royal Alexandra Hotel, Winnipeg, succeeding J. E. Hutcheson, resigned.

W. H. Deacon has been appointed city passenger agent at Nelson, B.C., succeeding J. S. Carter, recently appointed General Agent, Passenger Department, Spokane, Wash.

R. C. Barker, heretofore train dispatcher, has been appointed Chief Dispatcher, district 2, Pacific Division, succeeding A. E. Stevens, promoted. Office, Vancouver, B.C.

G. M. Jackson has been appointed travelling passenger agent at Spokane, Wash., succeeding F. A. Valentine, resigned.

Department of Railways and Canals.—G. P. Graham, Brockville, Ont., has been sworn a member of the Privy Council of Canada, and appointed Minister of Railways and Canals, succeeding Hon. H. R. Emmerson, resigned.

Detroit Traffic Bureau.—W. P. Fitzsimmons of the Lackawanna-Grand Trunk Fast Freight Line, has been appointed Commissioner of the Detroit Traffic Bureau of Detroit, Mich.

Duluth, South Shore and Atlantic Rd.—S. R. Lewis, heretofore Chief Clerk in the General Freight Office, Marquette, Mich., has been appointed Assistant General Freight Agent of the D., S.S. and A. Ry., and of the Mineral Range Rd. Office, Duluth, Minn.

Grand Trunk Pacific Ry.—J. W. Loud, Freight Traffic Manager G.T.R. and Central Vermont Ry., has also been appointed Freight Traffic Manager, G.T. Pacific Ry.

HEAD OFFICE AND WORKS: **SYDNEY, CAPE BRETON, CANADA**

Canadian Northern Ontario Railway

CANADIAN NORTHERN ONTARIO

HUNTING TRIPS

Deer—Moose—Bear—Partridge—Duck

The Canadian Northern Ontario opens up a new country—the best hunting on the Continent. Beside Muskoka Lakes, Georgian Bay, innumerable water-ways north of Parry Sound, including the Shawanaga, Magnetawan and Still Rivers, hitherto almost inaccessible, more Deer come out of this section than from the rest of Canada. Partridge, Duck and small game in abundance.

REDUCED RATES; costs no more to go where game abounds than to where it has been hunted out. Write C. PRICE GREEN, Passenger Agent, Toronto, for "Big Game Hunting," illustrated with best maps.

WM. PHILLIPS, GENERAL PASSENGER AGENT, TORONTO

G. W. Caye, heretofore Chief Clerk to the Vice-President and General Manager, at Montreal, has been appointed Assistant to the Vice-President and General Manager. He will also act as Purchasing Agent. Office, Winnipeg, Man.

Grand Trunk Ry.—G. Martin, heretofore accountant G.T.R. and Wabash Rd. at St. Thomas, is reported to have been appointed auditor of expenditures G.T.R. Office, Montreal.

D. McCooe, formerly General Roadmaster, Eastern Division, who resigned to enter the Great Northern Ry. (U.S.) service, has been re-appointed General Roadmaster, in place of G. Beckingham, acting General Roadmaster, assigned to other duties. Office, Montreal.

H. Paton, locomotive engineer, Stratford, Ont., has been appointed instructor and examiner on engines for the Middle Division. His duty will be to instruct firemen seeking promotion in their duties, and to prepare them for the examinations. This is a new position, and is in the nature of an experiment.

Great Northern Ry., U.S.—S. A. Walker, heretofore Assistant Superintendent Montana Division, has been appointed Superintendent, succeeding J. McNaught, resigned. Office, Havre, Mont.

F. E. Gerrish has been appointed Assistant Superintendent, succeeding S. A. Walker.

F. S. Elliott, heretofore Assistant Superintendent Kalispell Division, has been appointed Assistant Superintendent Spokane Division, succeeding W. Willerton, resigned. Office, Spokane, Wash.

W. R. Smith, heretofore Assistant Superintendent Spokane Falls and Northern Ry., has been appointed Assistant Superintendent Kalispell Division, G.N.R., succeeding F. S. Elliott. Office, Whitefish, Mont.

J. M. Doyle has been appointed Assistant Superintendent Spokane Falls and Northern Ry., succeeding W. R. Smith. Office, Spokane Wash.

Manitoba Department of Railways.—P. L. Leach, Winnipeg, has been appointed Secretary in the Department of Railways, Telephones and Telegraphs by the Manitoba Government.

Michigan Central Rd.—G. J. Duffy, Master Mechanic Canadian Division, St. Thomas, Ont., has resigned.

Mineral Range Rd.—See Duluth, South Shore and Atlantic Rd.

Pere Marquette Rd.—J. F. Deimhing has been appointed Chief Engineer, succeeding E. K. Woodward, resigned. Office, Detroit, Mich.

White Pass and Yukon Route.—J. H. Rogers, heretofore Traffic Manager, has resigned to take a similar position on the Tanana Ry., Alaska. There will be no appointment of a successor for the time being.

C.P.R. Betterments, Construction, Etc.

Georgian Bay and Seaboard Ry.—An inspection of the route of the proposed line from Victoria Harbor to near Peterborough was recently made by Sir Thos. G. Shaughnessy.

Guelph and Goderich Ry.—The official celebration in connection with the opening of the Guelph and Goderich Ry. took place at Goderich, Ont., Sept. 12. The line is an extension of the Guelph Junction Ry., and was opened for passenger traffic Aug. 26. It has a total length of 80 miles, and was opened from Guelph to Elmira in Aug., 1906; and subsequently to Milverton and Blyth, but owing to the heavy works which had to be undertaken at Goderich, the opening of the last few miles from Blyth was delayed until Aug. 26. The first meeting called to secure a C.P.R. connection for Goderich was held at Brussels, Dec. 16, 1884, the idea then being to secure a line to Elora.

The branch from Linwood to Listowel is being proceeded with, and the grading is reported practically completed. Tracklaying was expected to be well in hand by the end of Sept.

Fort William Terminals.—Several conferences have recently been held at Fort William, Ont., between C.P.R. officials and representatives of the City Council, with respect to the company's terminals there. The C.P.R. has under consideration extensive plans for the reconstruction of its terminal accommodation there. According to press reports the plans do not take into consideration a single portion of the terminals now in use. The new work involves the construction of a coal dock with a capacity of 1,000,000 tons; freight sheds with over 6,000 ft. of frontage; the entire rearrangement of the yards without regard to the present sheds, a large cleaning elevator, and other buildings on an extensive scale. It is also stated that the rearrangement of the yards, etc., may involve the transfer of the package freight business to Port Arthur. The result of the recent conference will be discussed at an early meeting of the City Council.

Fort William-Winnipeg Second Track.—G. J. Bury, Assistant General Manager Western Lines, has completed an inspection of the second track work in progress between Fort William, Ont., and Winnipeg. It is estimated that between 250 and 300 miles of the second track work will be completed by the end of this season, and that the remainder will be completed by June, 1908.

Winnipeg Station Building.—The construction of the roof on the train shed at Winnipeg station was started Aug. 21.

Bridge at Brandon.—An arrangement is reported to have been completed between the C.P.R. and the Brandon, Man., City Council, whereby the company agrees to pay its share of the new bridge to be built at First St. The bridge will probably be constructed of steel upon reinforced concrete abutments. The work of removing the old bridge is to be begun at once.

Bienfait Collieries.—W. Whyte, Second Vice-President, returned to Winnipeg, Aug. 29, from an inspection of the coal mines in the Bienfait, Sask., district. They are at present turning out about 500 tons of coal a day, but it is expected that the output will be increased to 2,000 or 2,500 tons a day in the near future. The Souris Coal Co., which leases from the C.P.R., has installed four electric coal crushers to handle the output.

Manitoba and Northwestern Ry.—A. Price, General Superintendent Central Division, was in Saskatoon, Sask., Aug. 29, inspecting the work in progress there, which includes a depot, yards and a bridge to connect the section of the line from Sheho, now nearly completed, with the line already constructed westerly, which is in operation as far as Asquith, Sask. The works are all reported to be well forward. The line will be used to carry grain this fall, but Mr. Price would not give a definite promise respecting a date for the inauguration of passenger traffic.

Pheasant Hills Branch.—H. A. K. Drury, of the Railway Commission's staff, has completed an inspection of the extension of the Pheasant Hills branch from Strassburg to Nokomis, Sask., 31 miles, prior to the inauguration of a freight and passenger service. The extension of the line to Lanigan, a further distance of 10 miles, where a junction is being effected with the Manitoba and Northwestern line into Saskatoon, is being completed.

Weyburn to Lethbridge.—The Souris branch has been completed to Weyburn, Sask., and local press reports state that it is intended to extend the branch to Lethbridge, Alta., and that surveys have been completed for the line as far as the Dirt Hills Gap. This would give practically an air line and would save considerably in distance of haul and gradient between Winnipeg and Lethbridge over the present line.

Belly River Bridge.—The contractor's plant for the work of putting in the piers of the new bridge across the Belly River at Lethbridge arrived early in Sept., and the preliminary operations are in progress. The work will be prosecuted as far as possible during the winter. John Gunn & Sons, Winnipeg, have the contract.

Hector-Field Grade Revision.—Press reports state that a contract has been let for the work of reducing the grades between Hector and Field, B.C., as described on pg. 653 of our Sept. issue, to Macdonell, Gzowski Co., Vancouver, B.C.; that the amount involved is $1,500,000, and that the time for the completion of the work is 18 months. The present main line between Hector and Field is eight miles in length and the difference in altitude is 1,143 ft., Hector's elevation being 5,207 ft., and Field's 4,064 ft. Between these points the controlling gradient is 4.5%, which has necessitated the use of two, three and four locomotives to take a passenger train over. By the new route the gradient will be cut in half, but the distance will be increased to about 12 miles. The most interesting feature of the new line will be the tunnel work. Two tunnels, one on each side of the Kicking Horse River, will be driven through the solid rock, and carry a gradient through their entire length.

Kamloops to Edmonton.—For some time past articles have appeared in daily and other papers to the effect that the C.P.R had issued instructions for the survey of a line of railway to connect Edmonton, Alta., and Kamloops, B.C., the company having secured the charter of a company covering the territory. We are advised that the C.P.R. has not given any such instructions, and that it is not expected that any survey will be ordered. The company by its charter has authority to construct such a branch line as the suggested one would be.

Kootenay Central Ry.—Nothing has been definitely decided with reference to the project for the taking over of the charter of this railway by the C.P.R. The line would extend from Golden, B.C., on the main transcontinental line to a point on the company's Crow's Nest Pass line, about 175 miles. W. Whyte, Second Vice-President, recently went over the projected route, and has reported to the directors. Sir Thos. G. Shaughnessy is reported to have said that the owners of the charter would be able to make some arrangements for the construction of the line in the near future.

Vancouver Island Betterments.—R. Marpole, General Executive Assistant C.P.R., and Vice-President Esquimalt and Nanaimo Ry., in a recent interview said: "New Alberni will be the new terminus of the line: it will be necessary to go there in order to have sufficiently deep water for ocean liners to come to the wharves. We shall pass through old Alberni, but New Alberni will be the terminus." The company also proposes to extend its line to Comox, and will apply to the B.C. Government for a subsidy at the next session of the Legislature.

Minneapolis, St. Paul and Sault Ste. Marie Ry.—A regular service has been opened on the new line between Bismarck and Minot, N.D. An amendment to the company's charter has been filed in Wisconsin, permitting it to construct a branch from Brooton, north-west to Superior, Minn., 180 miles. (Sept., pg. 659).

The Hudson's Bay Company

THE COMPANY OFFERS FOR SALE

Farming and Grazing Lands in Manitoba and the Northwest Territories

ON EASY TERMS OF PAYMENT

Town Lots for sale at Winnipeg, Ft. William, Edmonton, Prince Albert, etc.

The Company has General Stores at Winnipeg, Vancouver, Calgary, Edmonton, and other places where purchasers will find the best of goods at moderate prices.

Transportation by the Company's Steamers, brigades of boats and canoes throughout the Territories not traversed by railways.

C.P.R. ANNUAL REPORT.

Following is the 26th annual report, addressed to the shareholders over the signature of the President, Sir Thos. G. Shaughnessy:

The accounts for the year ended June 30, 1907, show the following results:

Gross earnings		$72,217,527 64
Working expenses		46,914,218 83
Net earnings		$25,303,308 81
Net earnings of steamships in excess of amount included in monthly reports		723,648 56
Interest on deposits and loans	$836.034 70	
Interest from Minneapolis, St. Paul & Sault Ste. Marie Ry. on bonds held by the Co.	159,720 00	
Interest from Mineral Range Railroad Co. on bonds held by the Co.	50,160 00	
Interest from Montreal & Atlantic Ry. and on other bonds held by the Co	54,915 00	
Dividends on Minneapolis, St. Paul & Sault Ste. Marie Ry. preferred and ordinary stocks held by the Co	530,002 00	
Dividend on St. John Bridge & Ry. Extension Co. stock	10,000 00	
		1,640,831 70
		$27,667,789 70
Deduct fixed charges		8,511,755 56
Surplus		$19,156,033 51
Deduct amount transferred to steamship replacement fund	$700,000 00	
Contribution to pension fund	80,000 00	
		780,000 00
From this there has been charged a ½-yearly dividend on preference stock of 2%, paid April 1, 1907	$ 857,494 88	
And a ½-yearly dividend on ordinary stock of 3%, paid April 1, 1907	3,650,400 00	
		4,507,894 88
		$13,868,138 63
From this there has been declared a second ½-yearly dividend on preference stock of 2%, payable Oct. 1, 1907	$878,733 31	
And a second ½-yearly dividend on ordinary stock of 3%, payable Oct 1, 1907	3,650,400 00	
		4,529,133 31
Leaving net surplus for the year		$ 9,339,005 32

In addition to the above dividends on ordinary stock, 1% was declared from interest on land funds.

The working expenses for the year were 64.96% of the gross earnings, and the net earnings 35.04%, compared with 62.75 and 37.25% respectively in 1906. Four per cent. consolidated debenture stock to the amount of £930,000 was created and sold and the proceeds were applied towards the construction of various branch lines, and the acquisition of mortgage bonds the interest on which had been guaranteed by the company. Preference stock to the amount of £250,000 was created and sold for the purpose of meeting expenditures sanctioned. The Minneapolis, St. Paul & Sault Ste. Marie Ry. Co., to meet the cost of constructing 175 additional miles of railway, issued and sold 4% consolidated mortgage bonds to the amount of $3,500,000, on which the company's guarantee of interest was endorsed. The land sales were 994,840 acres, which realized $5,887,377, an average of $5.92 an acre. Included in these sales there is a large area for which contracts had been previously made at $4 to $5 an acre. The average price realized from lands actually sold within the year was $8.09 an acre.

The Directors have made an agreement with the Northern Colonization Ry. Co. to construct an extension of that company's railway from Nomingue to Rapide de l'Original, Que., about 34 miles, the extension when constructed to be taken over at a rental equivalent to 4% per annum on the bonds of the Northern Colonization Ry. Co., which may be issued, not exceeding in amount $20,000 a mile of railway, as provided for in the lease of that railway already approved.

An agreement has been made with the St. Mary's and Western Ontario Ry. Co. for the lease, on its completion, of that company's line from St. Mary's, Ont., to a connection, at or near Embro, with the proposed extension of the Tillsonburg, Lake Erie and Pacific Ry., leased to the company, a distance of about 15¼ miles. The rental to be paid is 40% of the gross earnings, but not less than $7,930 a year, which represents the interest at 4% per annum on $198,250 first mortgage bonds of the St. Mary's and Western Ontario Ry., to be issued by that company, and being at the rate of $13,000 per mile of its railway; the C.P.R. Co. having the option of acquiring the whole of the capital stock of that company at any time within twelve years on payment of the sum of $25,000. The agreement will be submitted for approval.

In 1904 you authorized the Directors to proceed with the construction of a railway from the vicinity of Sudbury to Kleinburg, on the Ontario Division, in order to provide a route entirely under this company's control between Toronto and the main line, and to meet the cost the Directors were empowered to issue and dispose of consolidated debenture stock to such an amount as they might deem expedient, but not exceeding in the aggregate $30,000 per mile of railway. Owing to the difficult character of the country and the increased cost of labor and material, the expense involved in the construction of this line exceeded the original estimate, and, therefore, shareholders will be asked to authorize the issue and sale of such further amount of 4% consolidated debenture stock as may be deemed necessary to complete the work, but not exceeding $10,000 per mile of the 226 miles under construction. Two steamers are being constructed, at a cost of $900,000, to supplement the fleet plying between Georgian Bay ports and the head of Lake Superior, and it is desirable that another high-class steamship should be provided as soon as possible for the route between Vancouver, Victoria and Seattle, of which the approximate cost will be $600,000. A resolution authorizing the issue and sale of securities to meet these expenditures will be submitted for approval. The subsidy that is now being paid to this company for the carriage of the mails between Liverpool and Hong Kong will expire in April, 1908, and it is not improbable that a faster and more frequent service will be made a condition of its continuance. In view of this fact the directors recommend that they be authorized to arrange for the acquisition or construction of two steamships to meet the requirements of your Pacific trade, or to build two larger and faster boats for the Atlantic service and transfer the Empress of Britain and Empress of Ireland to the route between Vancouver and Hong Kong.

Authority has already been given for the construction of a branch line from Moose Jaw, on the main line in Saskatchewan, northwesterly for 50 miles, but it is not unlikely that in the near future circumstances will make it desirable that this branch should be continued 100 further, and another branch should be constructed from Regina, on the main line in Saskatchewan, to a point in the vicinity of Saskatoon, a distance of about 165 miles. The shareholders will be asked to authorize the directors to proceed with these works whenever they deem it advisable to do so, and to sanction the issue of the requisite 4% consolidated debenture stock to meet the expenditure.

Notwithstanding the scarcity of labor, fair progress was made during the year with most of the works in hand. West of Lake Superior where the company was building 747 miles of railway, two-thirds of the grading has been completed, 270 miles of track laid and the rails and fastenings for the remaining mileage are on hand. It is confidently expected that approximately 200 miles of the double track between Winnipeg and Fort William will be available for use this autumn, and that the whole work will be completed in 1908. In Eastern Canada the line from Guelph to Goderich (80 miles) is practically completed. Twenty miles of grading has been done on the Walkerton and Lucknow Ry. out of a total of 38 miles, and sufficient progress had been made with the line between Kleinburg and Sudbury (226 miles) to ensure its availability for freight traffic before winter sets in. Of the second track that is being laid between Ste. Anne's and Smith's Falls, a distance of 108 miles, it is expected that 50 miles will be ready for use in 1907, and the balance in the following year. Portions of the new lines when completed were turned over to the operating department, and are included in the mileage covered by the traffic returns for the year. By-law 92 increasing the membership of the executive committee from five to six will be submitted for your approval. The following directors retire from office and are eligible for re-election: E. B. Osler, R. B. Angus, Sir Wm. C. Van Horne, Hon. L. J. Forget.

CONDENSED BALANCE SHEET.

Railway and equipment		$253,711,217 76

General.

It is announced that on and after Oct. 1 all dinners on C.P.R. dining cars throughout the system from the Atlantic to the Pacific will be served a la carte.

The Winnipeg City Council has accepted the tender of Buchanan & Co., for the erection of a Howe truss bridge over the river at Lac du Bonnet, on the route of its power transmission line, at an approximate cost of $44,127.

Railway Development.

Ottawa Terminal Ry.—The plans for the new central station at Ottawa were discussed at considerable length Sept. 12, at a meeting with a number of members of the Government. W. Wainwright, Fourth Vice-President, and W. H. Biggar, Chief Solicitor, represented the G.T.R., while D. McNicoll, Vice-President, and A. R. Creelman, Chief Counsel, represented the C.P.R. The Ministers expressed general approval of the plans, and it is expected that official approval will be given by order-in-council at an early date. There are certain matters as between the different companies to be adjusted.

Tests were made of the ground on the site of the new station building Sept. 12, with a view of arranging the foundation work. Rock was reached in most places at a depth of 2 ft.

Yonge St. Bridge, Toronto.—The Ontario Court of Appeal delivered judgment Sept. 17, dismissing the appeal of the C.P.R. and the G.T.R. against the original order of the Railway Committee of the Privy Council, and the decision subsequently given by Justice Anglin directing the companies to bear the whole expense of the construction of a bridge to carry Yonge St. over the railway tracks at the bay front, and to maintain the same when erected. The court held that the Railway Committee had ample power to deal with the matter, and that the courts had no right to interfere with its findings. The difficulty in the case arose from the fact that the Railway Act of 1903 did not contain any provision for the continuance of any business pending before the Railway Committee. The court also failed to find anything to sustain the argument of the railway companies that what was commonly called Yonge St. south of the north side of the Esplanade was not in reality a highway, and not part of Yonge St. proper.

The first order of the Railway Committee of the Privy Council was made Jan. 14, 1904, on the application of the city of Toronto. By it direction was given that the railway companies should, in the interests of the public safety, construct a bridge at the lower end of Yonge St. across the railway tracks; work to be begun before April 1, and to be completed on or before Aug. 1. To be valid this order had to be sanctioned by the Governor-in-Council, and this endorsation was not secured until Oct. 7, 1904, at which time the time of performance had already expired. A new period of time was, however, inserted, and this, it was then contended by the railway companies, was illegal, and in reality was the reviving of a dead order since, as they claimed, the Railway Committee's order expired when the time of performance had thus expired. Action was then brought before Justice Anglin to have a declaration made that the Railway Committee had exceeded its jurisdiction, and to obtain an injunction restraining the city of Toronto from taking any proceedings under the order mentioned. At this trial the Judge reserved decision to enable the city to make application to the Governor-General-in-Council for certain amendments to the orders, and, these having been made, judgment was given dismissing the action. It was then from this action that the appeal to the Court of Appeal was made, and which is now dismissed with costs.

Canada West Coal and Coke Co.—By supplementary letters patent under the Dominion Companies' Act the Canada West Coal and Coke Co. has been authorized to change its name to that of the Canada West Coal Co.

Railway Finance, Meetings, etc.

Vancouver, Victoria and Eastern Ry. and Navigation Co.—A meeting of the shareholders has been called to be held Oct. 15, for the purpose of approving an agreement for the purchase of that portion of the railway and undertaking of the Vancouver, Westminster and Yukon Ry. in the city of Vancouver; from Vancouver to New Westminster, in New Westminster, and all lines of railway connecting it with the bridge over the Fraser River at New Westminster; also for the purpose of approving an agreement for the purchase of the portion of the line of the Victoria Terminal Ry. and Ferry Co. known as the third section of the undertaking, and extending from near the mouth of the Fraser River easterly to a connection with the New Westminster Southern Ry.

at Cloverdale, and also the line extending from near Mud Bay southeasterly to the International boundary at Blaine, connecting there with the line of the Seattle and Montana Ry. The shareholders of the Vancouver, Westminster and Yukon Ry. have also been called to meet on the same day to sanction an agreement for the sale of its lines to the V.V. and E. Ry. and N. Co.

Canada Atlantic Ry.—The meeting of the Canada Atlantic Railway Co.'s shareholders, which was to have been held Sept. 24, was adjourned to Oct. 24. One of the purposes of the meeting is to vote on the question of amalgamating with the G.T.R. Co. Although the C.A.R. is controlled by the G.T.R., and is known as a division of the G.T.R. system, the C.A.R. Co. has still separate corporate existence, and the accounts are kept separate from the G.T.R. ones.

Temiscouata Ry.—Following are the officers and directors for the current year: President, Frank Grundy, Sherbrooke, Que. Vice-President, J. H. Walsh, Sherbrooke; other directors: W. Cook, K.C.; A. H. Cook, K.C.; A. Lawrie, W. N. Campbell, A. Steele; Secretary and General Manager, D. B. Lindsay; Superintendent, G. G. Grundy.

Atlantic and Pacific Ocean Marine.

A. J. Colston has been appointed liquidator of the Quebec Transport Co., Ltd

A Donaldson, senior partner of the firm of Donaldson Bros., owners of the Donaldson Line of steamships trading between Glasgow and Canada, died in Glasgow, Scotland, Sept. 17.

The Dominion Line S.S. Dominion, which arrived in Montreal Sept. 23, reported that during a severe storm one seaman was washed overboard and drowned and another was severely injured.

The Allan Line S.S. Grampian left Glasgow, Scotland, Sept. 22, for Montreal, on her maiden trip. Her recent trial trip was satisfactory, and it is confidently expected that she will make a record.

The Allan Line S.S. Bavarian, which was stranded on Wye Rock, in the St. Lawrence, in the fall of 1905 and raised last year, has, press reports state, been sold by the underwriters to the North American Wrecking Co. of New York, for $62,000.

The C.P.R. S.S. Empress of Britain, which left Liverpool 24 hours before the Lusitania, which latter vessel was on her maiden trip, landed her mails at Rimouski, Que., Sept. 12, 20 hours before the Lusitania's mails were landed at New York.

A Belfast-Ireland despatch states that A. M. Carlisle, manager of the Harland and Wolff Shipbuilding Yard there, has given details respecting a steamship which the company is designing for the International Mercantile Marine Co., to have a speed of 30 knots an hour.

The Union Steamship Co. of New Zealand, has placed an order with A. Stephen & Sons, Linthouse, Glasgow, Scotland, for a steamship for its New Zealand-Vancouver service. The vessel will have accommodation for 250 first-class, 160 second-class, and 100 third-class passengers, and will be fitted with reciprocating engines.

The C.P.R. has announced a reduction of passenger rates on its Atlantic Steamship Line from Montreal to Liverpool, bringing them a little below the usual winter rates. The new rates become effective at once, and though the rates from Liverpool to Montreal are not affected, it is expected that the same will come into force for westbound traffic Nov. 1.

Ottawa and Montreal press reports state that the Fairfield Shipbuilding Co have submitted designs for 26-knot steamers to the C.P.R., and that negotiations for the construction of two such vessels are in progress. It is also stated that there is a project on foot by which the C.P.R. and the Allan Steamship Co. will unite to provide a 26-knot passenger service on the Atlantic between Canada and Great Britain.

In connection with the announcement in the C.P.R. annual report on another page of this issue that the S.S. Empress of Britain and Empress of Ireland will in the near future be transferred from the Atlantic to the Pacific service, it is announced that the Co. will build two 22-knot vessels for the Atlantic trade so as to make the trip between Halifax, N.S., and Liverpool, Eng., in 4 days and 8 hours, and giving the quickest time between Europe and this continent.

Maritime Provinces and Newfoundland Marine.

A. H. Zwicker, of Lunenburg, N.S., has purchased the barque Strathern in the U.S.

Capt. J. D. Apt has been appointed wharfinger of the Dominion Government wharf at Port Wade, N.S.

Tenders are invited by the Dominion Public Works Department for the construction of a block and span wharf at Selma, N.S.

The damaged steamboat Micmac, which was wrecked recently off the Newfoundland coast, was offered for sale by public auction at St. John's, Nfld., Sept. 24.

Pontoons have been built at Halifax, N.S., to assist in the work of floating the S.S. Turret Bell, which went ashore at Prince Edward Island some time ago.

A press report states than an offer of $10,000,000 has been made for the Dominion Atlantic Ry. steamships fleet, on behalf of the New York, New Haven and Hartford Rd.

Ontario and Great Lakes.

The Midland Navigation Co. is reported to be negotiating for the construction of another large freight steamship, to be larger than the Midland Prince.

Capt. S. Crangle, of the St. Lawrence and Chicago Steam Navigation Co., who went to Great Britain in connection with the building of the company's steamship G. R. Crowe, and who was ill while there, returned to Toronto Sept. 22, much improved in health.

Press reports state that a deputation from the Boards of Trade of Montreal and Toronto will be sent to the Dominion Government to request that the St. Lawrence canals be deepened and widened so as to allow the passage of large ocean-going vessels right up to ports on the Great Lakes.

Manitoba, Saskatchewan, Alberta, Etc.

Capt. G. F. Fortney, of the steamboat Alexandra, was married to Miss C. Quail, Sept. 12. The ceremony took place on the barge Togo, which had been moored in the river about 2 miles beyond Norwood bridge, Winnipeg.

The Winnipeg Board of Control has decided to purchase, subject to inspection, the tug Queen from the Rat Portage Lumber Co., for $2,000. The tug is required in connection with the construction of the corporation power transmission plant at Point du Boise.

B.C. and Pacific Coast Marine.

The steamboat Iroquois on the route between Vancouver, B.C., and Seattle, Wash., is being equipped for wireless telegraphy.

A contract for building two scows has been awarded by the Dominion Public Works Department to W. Turpel & Son, Victoria, B.C.

The Northern British Columbia Transportation Co.'s stern-wheel steamboat Northwest, running on the Skeena River, struck a rock about 40 miles from Hazleton, B.C., and went to pieces. This, with the recent loss of the Mount Royal and the accident to the Hazleton, which was badly damaged, has completely suspended traffic on the river.

ELECTRIC RAILWAYS

Projects, Construction and Betterments.

British Columbia Electric Ry.—The first sod of the electric line between New Westminster and Chilliwack was turned Aug 26. When completed it will be 62 miles long and is estimated to cost $2,500,000. Construction will take about two years. (Sept., pg. 683).

A press report states that within the next five years a scheme will be completed by which a fast electric service between Vancouver, B.C., and Seattle, Wash., will be assured. It is stated that the holders of the controlling interests in electric railways, now at Everett, Wash., have decided to extend to Bellingham, and later on to Blaine, and that the B.C.E.R. Co. will construct a line to meet them, and make an arrangement for the interchange of cars and running rights.

Chatham, Wallaceburg and Lake Erie Ry.—A committee of Petrolea business men has been appointed to confer with the company as to the right-of-way, and other points regarding the proposed extension of line between Wallaceburg and Petrolea.

Cobalt-Larder Lake.—A project to construct an electric railway from Cobalt to Haileybury, New Liskeard, Tomstown and Larder Lake is being discussed at Haileybury. A survey between Cobalt and Haileybury is in progress.

Grand Valley Ry.—The plans for the extension of the line from Brantford to Port Dover show that the route to be taken is from Brantford on the west side of Mount Pleasant Road through that village to Boston, thence south to Townsend Center, on to Waterford and through Simcoe to Port Dover. There will be two grade crossings, one at Brantford over the Toronto, Hamilton and Buffalo Ry., and the other at Simcoe, over the Brantford and Port Dover line. At a short distance over the first crossing the track will enter private grounds, and the roadway is not to be used again for the entire route. A subway will be constructed under the Michigan Central Rd. at Townsend Center, and another under the G.T.R. at Simcoe. The maximum gradient is about 1½% and the average about 6-10 of 1%. In construction it is intended to use an 80-pound rail, and it is hoped to complete the line by the end of 1908.

Hamilton Street Ry.—On the application of the City of Hamilton the Ontario Railway and Municipal Board has ordered that the rails recently laid on Herkimer St., between Queen and Locke Sts., be taken up and relaid, so as to leave the "devil strip" 4 ft. wide. In relaying the track recently the strip had been widened to 5 ft.

Hamilton, Waterloo and Guelph Ry.—The Hamilton Parks Board and Finance Committee has approved the by-law granting a franchise, and J. Patterson on behalf of the company has accepted the terms imposed. A right-of-way is granted along the northerly portion of Dundurn and Harvey Parks, but for the most part the line will run through G.T.R. property. A private right-of-way will be acquired between Dundurn Park and the corner of James and Vine Sts., and work commenced as soon as possible. The line to Galt is to be completed by the end of 1909, and to Guelph a year later. Should completion be delayed, an extension of one year will be granted, provided the company can show that it has expended $100,000 on construction. It is provided that the motive power be electricity, and that six trips each way are to be run daily between Hamilton, Galt and Guelph. The fare is fixed at 2c. a mile, and 1¾c. a mile return, and the company must allow any other company to

N. J. HOLDEN & CO., Agents, 302 St. James St., MONTREAL

use the right-of-way in the city on terms fixed by the Railway Commission. (Sept., pg. 683).

Huron and Ontario Ry.—There has been deposited with the Secretary of State at Ottawa duplicate of a mortgage dated July 30, made between the H. and O.R. Co., and the Trusts and Guarantee Co., as mortgagees, whereby the company mortgaged its real and personal property, franchises and undertaking.

Lanark-Rideau.—E. T. Haines, of New York, who was interested in the Hamilton, Ancaster and Brantford Ry., finally selling out to the Brantford and Hamilton Ry., has been in Lanark, Ont., with a view of undertaking the construction of an electric railway there. The line which it is proposed to construct would extend from Lanark Village to Rideau Ferry. A. T. Judd, of Toronto, is interested in the promotion of the company. There is no charter at present in existence for the line.

The London Street Ry. Co. is being asked to arrange for extensions of its lines in the north end of the city.

Montreal and Southern Counties Ry.—The question of passing a by-law to permit the company to enter the city and operate electric cars there, which was discussed in July last, and adjourned for the reconsideration of the city council, is again to the fore. A new by-law has been prepared and submitted. The company seeks powers to operate passenger and freight cars on certain streets in the city, and to construct a Y; it also desires to take passengers and freight at its city terminal and convey them outside the city limits, but not to carry passengers or freight to points between its city terminal and the city limits. On its part, the company undertakes to pay its share of the cost of removing ice and snow from all streets occupied by its lines to the satisfaction of the city surveyor, and should it fail to comply with such provisions it shall pay to the city such sum as may be deemed necessary to enable the city to perform the work. The company will also do a certain amount of street paving, and pay to the city $500 for the streets actually used.

Musquodoboit-Stewiacke (N.S.)—A project is being discussed to construct an electric railway to connect these two places by way of the Stewiacke Valley. It is thought that sufficient water power can be obtained in the neighborhood to operate the system, but if not, auxiliary stations will be erected at various points. It is proposed to arrange a service for both passengers and freight, and to apply to the Provincial Government for a subsidy.

Niagara, St. Catharines and Toronto Ry.—The work on the extension to Welland is being pressed forward, and it is expected that cars will be running to the Welland River by the end of October. It is stated that cars will not enter the town until next year, but that the company will run a bus from its terminal to the town until the further extension is completed.

Quebec Ry., Light and Power Co.—New track is being laid along St. James St., so as to form a connecting link between St. Peter St., and the east end of Dalhousie St.

A fireproof car barn is to be erected in St. John St., to be constructed with steel girders and concrete roof. It is estimated that this will cause a considerable saving in insurance.

Sydney and Glace Bay Ry.—The new power station at Glace Bay is 50 by 75 ft., and is being erected by Rhodes, Curry & Co., Amherst, N.S. It will be equipped with three 150 h.p. boilers, one 300 h.p. upright engine, one 25 k.w. railway generator in addition to the engine and generator in use at the existing power station, which will be moved to the new building. The engine and boilers are to be supplied by the Robb Engineering Co., Amherst, N.S.

Westmoreland Power Co.—Application will be made next session of the New Brunswick Legislature for an act incorporating a company with this title, with all the powers usually granted to electric street railway, light, heat and power companies, with authority to construct such street railway in the city of Moncton, and such extensions into the counties of Westmoreland, Kent, and Albert as may be authorized; also to maintain and operate within the same territory an automobile service for the transportation of passengers and freight. Weldon and McLean, St. John, N.B., are solicitors for the applicants.

Windsor, Essex and Lake Shore Rapid Ry.—A regular service of cars has been inaugurated over the line from Windsor to Kingsville, passing through Essex, Ont. It was promoted by W. Newman, City Engineer of Windsor, and the late Dr. Brien, and later A. J. Nelles became associated with them. These did a large portion of the preliminary work of securing the franchises, etc., but it was not until May, 1905, that construction was started. A contract was entered into with the Keystone Construction Co., of Philadelphia, but owing to some difficulties the company did not carry out the contract, and J. Piggott & Sons reorganized the company, and completed the line. The track is laid with 80-lb. steel and is constructed according to the standard of steam railways. The overhead construction is of the catenary type, the trolley being suspended on steel cables, 7-16 in. in diameter, by hangers every 10 ft. Strain guys are placed at distances of 1,100 ft. to prevent slacking of wires; and the wires are carried on concrete poles. The power-house is at Kingsville, and is equipped with two 500 k.w. Westinghouse alternating current dynamos, driven by two cross-compound engines, steam being supplied by six boilers, each 360 h.p., erected by the Canada Foundry Co., Toronto. The cars are 55 ft. long, are fitted with lavatories, smoking room, and are equipped with air brakes. The motors are capable of developing a speed of 70 miles an hour. There are five motor cars and six trailers. For freight purposes the company has purchased an electric locomotive capable of hauling 40 loaded cars. Two cars will be reserved for baggage and express business. The officers of the company are: President, John Piggott; First Vice-President, Chas. Magee, Toronto; Second Vice-President, W. E. McKeough, Chatham; Secretary, W. T. Piggott, Chatham; Treasurer, W. C. Crawford, Tilbury; other directors: E. G. Stevenson, Toronto; W. R. Phillimore, M. Wilson, K.C., Chatham; P. Heseltine, Detroit, Mich.

Electric Ry. Finance, Meetings, Etc.

British Columbia Electric Ry.—Gross earnings for July, $151,340, against $103,013 for July, 1906. Working expenses, $77,878; renewal funds, $11,030; net earnings, $11,030; approximate income from investments, $11,036; net income, $73,468 against working expenses, $54,866; renewal funds, $9,624; net earnings, $38,523; approximate income from investments, $9,536; net income, $48,059 for July, 1906.

Grand Valley Ry.—A meeting of shareholders was called to be held at Brantford, Ont., Sept. 30, for the purpose of receiving a report, election of directors and auditors; to ratify the issue of bonds to the extent of $30,000 a mile, and a mortgage to secure the bonds; to ratify agreements for the purchase of the Brantford Street Ry., and the Woodstock, Thames Valley and Ingersoll Electric Ry., or either of them; and to confirm contracts for the extension of the lines.

The Grand Valley Ry. Co., on Sept. 7, deposited with the Secretary of State at Ottawa a mortgage made to the Trust and Guarantee Co., securing an issue of $4,000,000 of bonds.

Halifax Electric Tramway Co.—Railway earnings for Aug., $19,611.41, against $17,026.88 for Aug., 1906.

Montreal Park and Island Ry.—Following are the officers and directors for the current year: President, L. J. Forget; Vice-President, K. W. Blackwell; Managing Director, W. G. Ross; Manager, D. McDonald; other directors: Sir H. Montagu Allan, F. L. Wanklyn, Lieut.-Col. Henshaw; Secretary, P. Dubee. The M.P. and I. Ry. is owned by the Montreal Street Ry. Co., and does not issue a separate report.

Montreal Street Ry.—Passenger earnings for Aug., $322,204.56; total earnings, $329,755.11; against $293,401.69 passenger, and $300,278.36 total earnings for Aug., 1906 Operating expenses, $184,844.15; city percentage on earnings, $32,906.56; interest on bonds and loans, $17,851.27; contingent for renewals, $16,110.23; rent leased lines, $339.96; and surplus, $77,702.94 for Aug., against $158,415.38 operating expenses; $28,337.71 city percentage on earnings; $16,077.98 interest on bonds and loans; $15,013.92 contingent for renewals; and $82,433.37 surplus for Aug., 1906. Gross earnings for eleven months ended Aug. 31, $3,164,399.46; operating expenses, $1,946,389.33; fixed charges, $524,555.10; surplus, $693,455.03; against $2,794,947.90 gross earnings; $1,686,769.19 operating expenses $434,239.87 fixed charges, and $673,938.84 surplus for same period, 1905-06. Rental of leased lines is an extra charge in the current year's accounts.

Ontario and West Shore Electric Ry.—The township of Ashfield, Ont., has carried a by-law to guarantee the bonds of this company to the extent of $125,000.

Toronto Ry.—Car earnings for Aug., $319,797.64, against $275,836.46 for Aug., 1906. The car earnings for the eight months ended Aug. 31, have been quoted as $2,200,668, showing an increase of $233,720 over those for the same period of 1906.

Quebec Ry., Light and Power Co.—Owing to the absence from the city of a number of directors the annual meeting of shareholders called for Sept. 10 was adjourned to Oct. 10.

It is reported, on what appears to be good authority, that the C.P.R. Co. has obtained an option of the Q.R., L. and P. Co.'s stock.

Woodstock, Thames Valley and Ingersoll Electric Ry.—A meeting of shareholders was held at Woodstock, Ont., Sept. 9, when a resolution was passed ratifying the sale of the railway to the Grand Valley Ry. Co.

Electric Railway Notes.

A petition is being prepared in London, Ont., asking for a Sunday street car service.

A. Killingsworth, Manager of the municipally-owned street railway at St. Thomas, Ont., has resigned to accept a position on the Pere Marquette Ry.

It is reported that the Toronto Suburban Ry. Co. has secured an option on about 22 acres of the Holly estate at Weston, Ont., with a view of making a park and summer resort there.

During Aug. 166,301 passengers were carried on the Port Arthur, Ont., Electric Railway, the receipts being $8,315.05, against 146,176 passengers carried and $7,308.80 received during Aug., 1906.

At a joint meeting of the councils of Port Arthur and Fort William, held Sept. 13, at Fort William, Ont., the share of Port Arthur in the street railway was offered to Fort William for $250,000.

THE ANDERSON AUTOMATIC VALVES AND WATER COLUMNS FOR RAILROADS

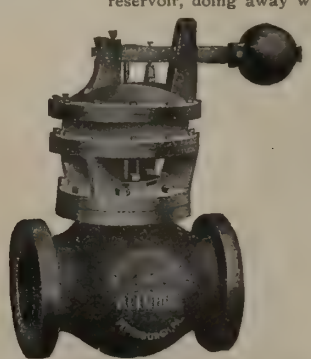
Anderson Patent Altitude Valve

Connected to Tank Service

No Waste of Water
No Freezing of Floats

This valve maintains a uniform stage of water in tank or reservoir, doing away with the annoyance of floats or fixtures in the tanks.

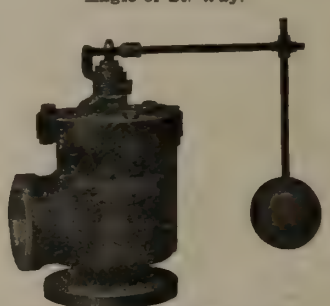
Accessible and protected from frost. Adapted for Buildings regardless of height.



Anderson Patent Float Valve
"Simply Has No Equal."

Cushioned in opening and closing. Float swivels to any angle desired.

"Angle or St. Way."



The Valves with an Absolute Guarantee.

For high and low pressure. Absolutely controls the water level in tanks or reservoirs. Instantly adjusted to operate quick or slow, as desired. "No waste of water." The upper portion of body being lined with bronze, also the valve or piston being solid bronze, makes the valve indestructible. Railroad men that use them say, "Their equal is not made."

"Angle or St. Way"

The Anderson Cushioned Non-Return Valves

"Life and Property Insurance Valves"

Why! endanger your power plant by using the regular angle, globe or gate valves at the boilers when you can get the Anderson Cushioned Non-Return Valve, which is an AUTOMATIC STOP VALVE, also a HAND-STOP VALVE, all in one?

The Heaviest Line OF AUTOMATIC VALVES AND TRAPS

For High-Pressure Steam and Water Service ever Presented to Users.

GOLDEN-ANDERSON VALVE SPECIALTY CO.

Offices: 1001 Fulton Bldg., Pittsburg, Pa.

C. E. A. Carr, formerly Manager of the London, Ont., Street Ry., and now manager of the Helena Light and Ry. Co., Helena, Mont., is taking an active part in steps to establish an electric railway and light association for the State of Montana.

The Walkerville, Ont., council claims that the Sandwich, Windsor and Amherstburg Ry. is not complying with the terms of its franchise, and has directed the town clerk to endeavor to enforce the penalty of $10 a day, so long as any defect continues.

A motion to commit the council of the town of Thorold, Ont., for contempt of court, has been dropped on the council giving an undertaking to lay their water-pipes so that no damage will be done to the Niagara, St. Catharines and Toronto Ry. track.

A number of employes of the Southwestern Traction Co. at St. Thomas, Ont., recently presented an illuminated address to G. H. Miller, in commemoration of an act of bravery by which he saved the life of another employe who had been caught by live wires.

An action taken recently by one of the stockholders in the Grand Valley Ry. Co., against A. J. Pattison, Jr., for issuing an improper statement of the company's position, was withdrawn in the police court at Brantford, Ont., the plaintiff admitting that there was no ground for the action.

D. J. Stewart, local traffic manager, has been appointed assistant to F. R. Glover, Assistant General Manager British Columbia Electric Ry. Co. His duties will be to act as intermediary between landowners and the company on matters concerning rights of way, etc. He is succeeded as local traffic manager by W. Dunlop.

The Dominion Park Company of Montreal has declared a dividend of 6% on its common stock, payable Oct. 1. Although the weather was extremely unfavorable, the season which closed Sept. 15 was a good one financially, and about 20% of the $250,000 bond issue has been retired. About 800,000 persons visited the park during the season.

That electric railway sleeping cars will soon be in demand is the opinion of a number of Indiana traction men who recently made a trip over the trolley lines between Indianapolis, Ind., and Detroit, Mich. They say that it is now possible to travel from Indianapolis by electric lines to the principal points in the neighboring states, requiring from eight to twelve hours, and if sleeping accommodations could be obtained, they would be patronized.

A writ has been issued on behalf of Mary M. Mitchell, of Woodstock, Ont., against the Trust and Guaranty Co., Ltd., as administrator of the estate of S. R. Ickes, deceased. The plaintiff seeks to have it declared that she is the owner of $4,000 worth of bonds of the Woodstock, Ingersoll and Thames Valley Electric Ry. Co., claimed by the defendant company, and that she is entitled to possession of same, after payment of certain loans, or in the alternative, that she is entitled to be paid the value of the bonds.

Intercolonial Ry.—In connection with the work of constructing a second track between Moncton and Painsec Jct., N.B., 7.25 miles, we are advised that the gradient has been changed from 1% to 0.5% on the present right-of-way. The bridges over Hall's Creek and at Humphrey's are double track deck plate girders on stone abutments. The overhead crossing at Union St., Moncton, is a through plate girder, having concrete floor and covered with paving brick.

Canadian Street Railway Association.

A special general meeting of this Association was held in Montreal, Sept. 12 and 13, the following being present: A. F. Townsend, Manager, Cape Breton Electric Co.; Hon. D. McKeen, President; J. Hutchison, director; J. W. Crosby, Manager; P. A. Freeman, Chief Engineer, Halifax Electric Tramway Co.; W. G. Ross, Managing Director; P. Dubee, Secretary; D. McDonald, Manager; H. E. Smith, Comptroller; R. M. Hannaford, Chief Engineer; M. Neilson, Consulting Engineer; D. E. Blair, Superintendent Rolling Stock; N. Graburn, Master Mechanic; A. Gaboury, Superintendent, Montreal Street Ry.; J. E. Hutcheson, Superintendent and Purchasing Agent, Ottawa Electric Ry.; E. A. Evans, General Manager and Chief Engineer; H. N. Bartlett, Superintendent Citadel Division, L. Burran, Electrician Quebec Ry., Light and Power Co.; R B. Emerson, Director; H. M. Hopper, Secretary-Treasurer, St. John Ry. Co.; W. H. Moore, Assistant to the President; A. M. Grantham, Purchasing Agent; W. R. McRae, Master Mechanic; W. H. Nix, Head Roadmaster, Toronto Ry.; J. McArthur, Superintendent Toronto and York Radial Ry.; A. H. Royce, President; G. C. Royce, Manager, Toronto Suburban Ry.; W. Phillips, Manager; J. S. Mackenzie, Purchasing Agent, Winnipeg Electric Ry.; Acton Burrows, Secretary-Treasurer of the Association.

The President, E. A. Evans, who occupied the chair, made some brief introductory remarks. The Secretary read letters expressing regret at not being able to attend the meeting from C. K. Green, Traction Manager, Dominion Power and Transmission Co.; N. P. Baker, Division Superintendent, International Ry. Co.; C. B. King, Manager, London Street Ry.; E. R. Wood, Vice-President, Toronto, Niagara and St. Catharines Ry.; J. A. Everell, Superintendent Montmorency Division, Quebec Ry., Light and Power Co.; T. Irwin, Chief Engineer, St. John Ry.; and J. Anderson, Manager Sandwich, Windsor and Amherstburg Ry.

The Executive Committee reported the election of Acton Burrows as Secretary-Treasurer, vice A. H. Royce, who declined re-election, and recommended certain changes in the by-laws respecting dates for meetings, and membership fees, which were adopted.

The Secretary-Treasurer's report dealt with the work of his office since his election on July 1, stated that 20 of the principal electric railway companies in Canada were comprised in the Association's membership, and urged that steps should be taken to secure the other companies as members It pointed out that the Executive Committee having decided that no papers should be read at this meeting the officers and officials of the member companies had been requested to suggest topics for discussion, and that the following subjects had been suggested and listed for discussion:

TRACK CONSTRUCTION AND MAINTENANCE OF WAY.

The best system of track construction for paved streets, using (1) Girder rails; (2) Tee rails.

The best system of track bonding for: (1) A new track on an unpaved street. (2) An old track on an unpaved street. (3) A new track on a paved street. (4) An old track on a paved street. The lowest cost, with efficiency for light traffic, to be kept in view.

The keeping of grass and weeds from off the track and right of way.

MOTIVE POWER AND OVERHEAD EQUIPMENT.

The value of storage accumulators in connection with rotary converter street railway generating stations.

The best system of measuring the output of a power station where the load fluctuations are heavy.

The average cost per k.w. power generated by steam.

The advantages and disadvantages of the adoption of a frequency of 15 cycles per second for heavy railway service.

ROLLING STOCK.

Insert versus grey iron brake shoes.

The question of trolley stands, harps and wheels for inter-urban work.

In the case of chilled wheels, does it pay to true-up flat wheels, or, where one wheel is good, to remove the flat wheel and press on the new one?

OPERATION.

Transportation for officials.

Different-colored versus uniform-colored street car signs.

Smooth versus rough cloth for uniforms.

TRAFFIC.

The carrying of baggage, such as trunks, on the same car with the passenger, or having them forwarded by freight, and charges paid extra.

The best method of collection of fares by conductors.

The best fare-box in use.

Methods of checking conductors' returns.

The best kind of transfer in use.

Methods of safeguarding the use of transfers so as to avoid doubling up on belt lines or on loops.

The carrying of freight.

Are electric railways successful competitors of parallel steam lines, so far as local traffic is concerned?

PURCHASING.

Imported versus domestic goods.

ACCOUNTING.

Is the system of accounting, as called for by the Ontario Railway and Municipal Board, adopted by the various electric railway companies under its jurisdiction.

The average cost of operating inter-urban and urban electric railways per car mile, exclusive of interest and sinking fund.

The average ratio of operating expenses to gross income for inter-urban and urban electric railways.

The sessions, during the Association's two days' meetings, were devoted to discussing the principal questions given above, the balance for want of time having to be left over till the next meeting. The discussions were very full and valuable, especially those on track construction and maintenance of way, which occupied the whole of one session. The discussion on the value of storage accumulators was greatly enhanced in interest by an excellent speech from J. Murphy, Electrician to the Department of Railways and Board of Railway Commissioners.

The representatives attending the meeting were the recipients of many courtesies from the Montreal Street Ry. Co., and from the local entertainment committee which was organized in connection with the meeting of the Association and the meeting of the Canadian Electrical Association, and which included a visit to the electrical show in the drill hall, a theatre party, the races at Blue Bonnets, and a visit to Dominion Park.

Intercolonial Ry.—Gross returns for Aug. are reported to have been $859,000, or $55,000 in excess of the revenue for Aug., 1906.

Baie de Chaleur Railway.—Judge Burbidge, of the Exchequer Court, has decided that the Baie de Chaleur Ry. be sold by sheriff's sale. The application was made by the Royal Trust Co., acting for Gallindes Bros., of London, Eng., asking for the foreclosure of the mortgage on the road. No interest has been paid on the outstanding bonds and Gallindes Bros. are creditors for £217,400.

THE BAKER HOT WATER FIRE-PROOF CAR HEATERS

Attention is especially called to the only Fire-proof and Break-proof Heaters on the market, made of ¼ in. jointless steel casings. Single and double coils. Steam Attachments to circulate the water of the Baker Heater by steam from the locomotive ; or will circulate hot water independently of any Heater. Pipe and pipe fitting for Baker Heater work. Avoid infringements by ordering direct from the makers.

CATALOGUES CHEERFULLY FURNISHED

THE WILLIAM C. BAKER HEATING & SUPPLY CO.

Double Coil Jointless Fire-proof Steel Heater

143 Liberty Street New York, U.S.A.

Single Coil Jointless Flexible Steel Fire-proof Heater.

A SAFEGUARD TO ECONOMY

The Soule Dust Guard wearing surface is protected by what is known as SINGAPORE BUFFALO HIDE. Friction polishes, but DOES NOT WEAR THE SURFACE. INVESTIGATE. TRY THEM and we feel confident YOU WILL ALWAYS SPECIFY THEM.

SOULE RAW HIDE LINED DUST GUARD CO.

113 Devonshire Street - - BOSTON, MASS.

THE RUGGLES FLUE CLEANER

The best production for this purpose ever put on the market. Does the work cleaner, with greater ease and with better results, than any other flue cleaner. **Absolute guarantee.**

THE CELEBRATED PARMALEE WRENCH

Built on natural principles, can be used on greased shafting without slipping, on nickel-plated pipe without injury from scratching. No difficulty in getting into corners as each joint can be set in place separately. This is without doubt the greatest pipe wrench ever manufactured.

RICE LEWIS & SON, LIMITED

TORONTO

Shawinigan Terminal Ry. Locomotive.

The Shawinigan Terminal Ry. Co., Shawinigan Falls, Que., is having built a single phase electric locomotive, which will have a steeple cab with sloping end cabs, and will be supported on swivel trucks with 44-in. wheels, and equipped with 4 alternating current, compensated type motors. The approximate weight of the electrical equipment is 24 tons and the balance of the locomotive weighs about 27 tons, a total of 51 tons. All the wheels are driving wheels, so that the weight on drivers is 51 tons. The motor trucks will have cast steel side frames carried on journal boxes by semi-elliptic springs and hangers. The side frames, end frames and pedestals of the truck, also the longitudinal sills, cross sills and buffers of the locomotive platform, will be riveted and bolted together so as to secure a rigid structure capable of taking the maximum hauling and buffing strain for which the locomotive is designed. The springs will be of steel tempered in oil and proportionate to the weights to be carried. The wheels will be of cast steel, having spoked centers and removable tires. The axles will be of forged steel, and will have a diameter of 7½ in. at the wheel seat and 7 ins. between the wheels and in the motor axle bearings. Under the gear the diameter will be 7⅜ in. The motors will be inside hung, half the weight of each motor being carried on the axles and the other half carried by nose suspension on the truck bolster. The platform framing will be built up of steel panels with suitable cross sills and the flooring of steel ¼ in. thick. The bumpers will be of cast steel riveted to longitudinal sills, with push pole pockets cast in near the ends. The draw head casting will be supported from the bumper castings and the center sills. No pilots will be provided, the locomotive being equipped with wooden end steps. The main cab will be 9½ ft. by 8 ft. The end cabs will each be 5½ ft. by 10¼ ft. The roof and sides will be of sheet steel and the framing of angles suit-amperes with 30 cycle frequency. The rated maximum draw-bar pull of the locomotive is 11,000 lbs., and its maximum instantaneous draw-bar pull for starting purposes will be approximately 18,000 lbs. The above is for 30 cycles. With 15 cycle current, these values will be increased considerably. It is expected that the locomotive will pull a train of approximately 100 tons gross weight, running free on a grade of 5% at approximately 19 miles an hour. On a level track it is expected that the locomotive will be able to operate a train of 110 tons gross weight at a speed in the neighborhood of 45 miles per hour. The current will be collected by means of a pantagraph trolley, from a trolley wire located centrally above the tracks. Following are the approximate general dimensions: Length over bumpers, 31 ft.; length over cab, 28 ft. 6 ins.; height over cab, 11 ft. 6 ins.; height with trolley down, 12 ft. 10 ins.; width over all, 9 ft. 6 ins.; total wheel base, 22 ft. 6 ins.; rigid wheel base, 8 ft. 0 ins.; track gauge, 4 ft. 8½ ins.

The locomotive's electrical equipment is being built by the Canadian General Electric Co., and the balance of the work by the Canada Foundry Co.

The Hibbard Co. has been incorporated under the Quebec Companies Act, with a capital of $20,000 and offices at Quebec, to construct by contract or otherwise, works of an engineering character, such as bridges, railways, tramways, wharves, docks, etc. The provisional directors are F. A. Hibbard, Quebec; F. W. Hibbard, R. B. Hutcheson, H. G. Temple, Westmount, Que.; L. Gosselin, Montreal.

Grain Elevator Notes.

The Ogilvie Milling Co.'s elevator at Melita, Man., has been enlarged.

The Conger Lumber Co. is building a fifth elevator at Conger, Sask.

The Northern Elevator Co. is erecting an elevator at Foxwarren, Man.

The North Saskatchewan Elevator Co. is erecting an elevator at Benito, Sask.

The Saskatchewan Elevator Co.'s elevator recently erected at Kennedy, Sask., is now in operation.

The Northern Elevator Co.'s elevator at Holland, Man., has been sold to W. Campbell, of that place.

The Northern Elevator Co. has built an elevator with a capacity of 30,000 bush. at Bienfait, Man.

Lund's flour mill and elevator at Wapella, Sask., were destroyed by fire Sept. 1. There was only 750 bush. of grain in the elevator at the time.

McCaskel Bros.' grain elevator at Ladysmith, Man., was destroyed by fire recently. The loss is estimated at $1,400, partly covered by insurance.

At the annual meeting of the Farmers' Elevator Co., at Carlyle, Man., Aug. 28, it was reported that the amount available for dividend was $1,754, out of which it was decided to pay 7%.

Within the boundaries of the principal cities of the three western provinces, Alberta, Saskatchewan and Manitoba, and in Western Ontario, there are 245 elevators with a total capacity of 33,462,000 bush.

The McCabe Elevator Co. has acquired a site from the C.N. Ry., at Brandon, Man., upon which it will erect an elevator. The company proposes to erect elevators at a number of points on the C.N.R.

An elevator is being erected at Swift Current, Sask., and it is expected that it will be finished in time to handle this year's crop. The machinery is on the way for another elevator, which it is hoped will be erected this fall.

The British-America Elevator Co., which operates the Canadian Northern Ry. elevator at Port Arthur, Ont., has been reorganized as the Port Arthur Elevator Co. The alteration is one of name only and does not affect the officers.

The quantity of wheat in storage at the elevators at Port Arthur, Ont., Aug. 31, was reported to be 3,500,575 bush., and of other grains, 148,990 bush., against 145,877 bush. of wheat, and 24,183 bush. of other grains, at the same date, 1906.

A fire occurred at Muirhead and Black's elevator at Fort William, Ont., Sept. 9, doing damage to the extent of about $5,000. This elevator has only been in use a short time, and was erected to take the place of one destroyed last winter.

A by-law has been passed at South Battleford, Sask., voting $10,000 towards the erection of an elevator and flour mill at that place. Stock to the amount of $20,000 has been subscribed locally. The elevator is to be built at once and the flour mill is to be erected ready for operation by Feb., 1908.

What is regarded as a remarkably speedy clearance was effected at the Montreal Transportation Co.'s elevator at Kingston, Ont., recently, The steamboat Iroquois arrived in port in the early morning with a cargo of 102,000 bush., was unloaded, and on her return journey to Fort William by 5 o'clock of the same day.

The Colonial Grain Co., Ltd., has been incorporated under the Manitoba Companies' Act, with a capital of $150,000 and offices at Winnipeg, to own and operate elevators in connection with a general grain dealing business. The provisional directors are: J. C. Gage, K. B. Stoddart, T. H. Hatchard, W. C. Leistikow and A. Reid.

Work on the 2,000,000 bushel elevator, which is being erected for the Dominion Government at Port Colborne, Ont., is being pushed, and it is hoped to have one wing with a capacity of 850,000 bush. completed for this season's crop. When entirely completed the elevator will stand 170 ft. above the wharf, occupying a ground space of 210 by 75 ft.

On the representation of the Grain Growers' Association of Manitoba, the C.P.R. has reduced the charges for the storage of grain in its elevators at Fort William, Ont. The former charges were, ¾c. per bushel for the first term of 30 days, and the same amount for a second term of 30 days, or any portion of that time. The charge for the first term remains the same, but the charge under the new scale, for any period beyond the first term of 30 days, will be 1-30 of a cent per bushel per day.

The Port Stanley Elevator Co., Ltd., has been incorporated under the Dominion Companies' Act, with a capital of $100,000 and offices at St. Thomas, Ont., for the purposes of carrying on a general storage and warehousing business, and in connection therewith to acquire elevators, docks, wharves, steam and other vessels and freight cars. The provisional directors are: R. N. Price, St. Thomas; R. D. Ferguson, Southwold tp., Ont.; G. W. Tillson, W. D. Robertson, Tillsonburg, Ont.; John and Jas. Goldie, Ayr, Ont.

The International Blacksmiths' Association's fifteenth annual convention was held in Montreal, Aug. 20 to 22. At the opening gathering H. H. Vaughan, Assistant to the Vice-President C.P.R., gave an address on organization, and recommended the association to take up the handling of medium-sized forge work, and the cost of the same. The subjects considered were: Flue welding, J. Conners; Tools and formers for bulldozers and steam hammers, G. M. Stewart; Piece work, G. Bollinger; Discipline, and classification of work, S. Uren; Case-hardening methods, time taken and samples, G. Masser; Best fuel for use in smith shop, Jos. Jordan; Frame making, either steel or iron, also repairing same, G. Bothinger; What can each member do to increase the usefulness of the Association, G. F. Hinkens. Following are the officers for the current year: President, G. H. Judy, Allegheny, Pa.; First Vice-President, J. W. Russell Renova, Pa.; Second Vice-President, G. W. Kelly, Elizabeth, N.J.; Secretary and Treasurer, A. L. Woodworth, Lima, Ohio; Chemist, G. H. Williams, Medford, Mass.

The Alberta Government's telephone lines, according to an Edmonton despatch, have been completed in several parts of the province, and work is proceeding briskly on the unfinished sections. The Calgary-Hudson Bay line is now complete, and instruments will be installed very shortly. The MacLeod and Blairmore and Franklin are almost finished, and will be operated very shortly. The line from Wetaskiwin east to Hardisty will be completed this week, and the line from Lacombe to Stettler is complete. The section from Edmonton to Lloydminster is finished past Vegreville, and is expected to be completed this fall. [We do not understand the reference to a Calgary-Hudson Bay line. Probably there is a mistake in the despatch, as we do not think the Province is building a line to Hudson Bay, which is outside its jurisdiction.—EDITOR.]

MARINE DEPARTMENT

The S.S. Lusitania and Mauretania.

The Cunard S.S. Lusitania arrived in New York on her first voyage from Liverpool, Eng., Sept. 13, making the trip in 5 days, 54 min., from Queenstown, Ireland. The total distance from point to point was 2,722 miles, and the days run were: 5, 556, 575, 570, 593 and 493. The average speed was 23.01 knots an hour. The record for the Queenstown-New York trip was previously held by the Cunard S.S. Lucania, with a run of 5d. 7h. 23 min., but the fastest average speed had previously been made by the North German Lloyd S.S. Kaiser Wilhelm II., and the Hamburg-American S.S. Deutschland with 23.58 knots, and 23.84 knots respectively.

The dimensions, etc., of the Lusitania are as follows:

Length over all	785 ft.
Length between perpendiculars	760 ft.
Breadth, moulded	88 ft.
Depth	60.4½ ft.
Gross tonnage	32,500 tons.
Draught	33½ ft.
Displacement	38,000 tons.
Number of passengers	2,198
Type of engine—Parsons turbine	
Nnmber of boilers, cylindrical	25
Number of furnaces	195
Steam pressure	195 lbs.
Total heating surface	158,350 sq. ft.
Total indicated horse power	68,000
Speed (designed)	25 knots.

Engines (4) turbine developing 66,000 h.p., at 100 revolutions a minute, with working pressure 200 lbs. a square inch.

Boilers (25) Scotch marine type, having 192 furnaces; grate area, 3,950 sq. ft.; heating surface, 160,000 sq. ft.

Funnels (4) 25 ft. diameter; 155 ft. above keel.

Sea speed, 25 knots.

Estimated coal consumed, 1,200 tons per 24 hours.

Steam consumed per hour, 435 tons.

Air passing through furnaces per hour, 700 tons, or 21,000,000 cub. ft.

Water required for condensing per hour, 22,000 tons.

Engine room staff, 400.

The keel plate of the Lusitania is 5 ft. wide and 3¾ ins. thick, and is flush outside with the bottom of the ship. Associated with this flat keel is a vertical keel 5 ft. high and 1 in. thick. The double bottom is a vertical keel 5 ft. high and transverse frames into compartments in which water ballast may be carried. The tops of these tanks are carried well round the turn of the bilge, so that should the bilge keels be torn away and the hull pierced the entering water would be confined within the inner and outer bottoms. This is only one precaution in the direction of procuring unsinkability. The lower deck is made completely watertight. Below it are the lower orlop and orlop decks, and above are the main, upper shelter, promenade, upper promenade and boat—nine decks in all. In all, the Lusitania has 175 water-tight compartments, so that it is claimed for her that she is as unsinkable as a ship can be. The steel plates which cover the ribs or framing of the vessel or are used for the decks, bulkheads and casings or in other ways number 26,000, the largest being about 40 ft. long, and weighing from four to five tons. To secure these plates to each other and the structural framework of the ship, over 4,000,000 rivets have been used, aggregating in weight about 500 tons. The largest rivets are used in the keel plate, and these are eight inches long, and weigh 2¾ lbs. The rudder, which has two sets of steering gear, one of which is below the water line, weighs 65 tons, and the diameter of the rudder stock is 26 ins. The castings for the stern, stern post, shaft bracket and rudder together weigh 280 tons. The three anchors each weigh ten tons, while the 1,800 ft. of cable is composed of 22. in. links, the iron in which is 3¾ ins. in diameter and the weight of each link about 1½ cwts. Every portion of this has been vigorously tested, the links and shackles emerging successfully from a test strain of 370 tons. The Lusitania carries 18 lifeboats under davits in addition to a large number of life rafts, and has the submarine signalling apparatus.

The Mauretania—a sister ship—built on the Tyne, completed her three days' sea trials Sept. 20, and is said to have developed abilities in excess of what was expected. She is intended to be put on the route in Oct.

These steamships have been built under a special agreement with the Imperial Government by which the Government provided £2,600,000 at 2¾%, and one payment of £150,000 a year on condition that a minimum ocean speed of 24½ knots an hour be maintained and other conditions are complied with. The vessels are to be manned entirely by British crews, and the Government has the right to hire them at any time upon certain terms.

The Prescott-Havana Collision.

Commander O. G. V. Spain, Dominion Wreck Commissioner, assisted by Capt. A. Hawkett, assessor, held an investigation in Montreal in July into the collision between the S.S. Prescott and the S.S. Havana, the latter being loaded with pulpwood, and bound from Quebec to Erie, Pa., outside lock 1, Lachine Canal, the collision resulting in the sinking of the Havana. The following judgment was rendered Sept. 12:

It appears from the evidence adduced that the S.S. Havana, on the evening of July 2, arrived at the entrance of lock 1, Lachine Canal, and put two men ashore to look after the lines, which were to help the vessel through the lock. At this moment the lockmaster gave orders to the Master of the Havana to allow the S.S. Prescott, which was following her, to go ahead, in accordance with par. c, sec. 19, of Regulations for Dominion Canals. To execute these orders the Havana went alongside, and made fast to a barge, which was moored on the south side of the entrance to the canal, so as to allow the Prescott to pass, the Havana overlapping the barge a portion of her length. According to the evidence, at this time, the Havana was within 150 ft., approximately, of the canal gate. The Prescott passed the Havana, and arrived at the entrance to the gate. A. Ouelette, who was in charge of her at the time (the Master being down below), gave the signal to stop and reverse, by pulling two bells, but, finding his vessel still going ahead, he endeavored to communicate with the engine room, by pulling the forward bell, and also the port bell; he then gave two blasts of the whistle, which, he presumed, the engineers would understand meant to reverse, and, at the same time, he called down into the engine room for the engineer to stop and reverse the engines. The Prescott, however, by this time, had too much way on, and smashed into the upper gates of the lock. The rush of water caused by the smashing of these gates was enormous (as there was a difference of some 12 ft. in the level of the upper basin). This rush, which lasted for about 30 seconds, carried the Prescott back at the rate of some 15 miles an hour, her stern striking the port bow of the Havana, about 15 ft. from the stem, driving her on to the north pier, as the Havana was heading for the north side of the dock, causing considerable damage, and necessitating her being beached at the south end of the Bickerdike pier, where she sank.

The accident was caused by the wrong signal being communicated from the upper deck of the Prescott to the engine room, the gong only striking once, instead of twice, as the officer-in-charge of the Prescott, at the time, intended; the reason for this being, that the spring on the hammer of the gong in the engine room broke after the first stroke was given. Ouelette, from the evidence, apparently did everything in his power to stop the way of his vessel, when he found that his orders to the engine room were not being carried out, and that, instead of the speed of the Prescott being lessened, it was increased; but the court considers that this speed was too great, even before he attempted to give the signal to reverse the engines, it evidently being his intention to stop the way of the Prescott by her engines, instead of with lines, as laid down in sec. 5 and 26, of the Regulations for Dominion Canals.

Sec. 621, chap. 113, of an Act respecting shipping in Canada, distinctly states that there should be some approved arrangement to repeat back the signal from the engine room to the deck; in the case of the Prescott, as far as the court has been able to ascertain, there was no arrangement, approved or otherwise, by which a signal could be repeated back. Whether such a repeating signal would have avoided the casualty in this case the court is not prepared to state, but it is the duty of the owners to provide their ship with the proper appliances and equipment for her navigation, and it is negligence on the part of the Master to proceed on his voyage without them. The Act provides that all passenger vessels shall be equipped with certain mechanical devices, and the Inspector of Hulls overlooked the fact that the Prescott was not provided with a means of repeating signals from the engine room.

As far as the steamer Havana is concerned, if she had been allowed to proceed on her way into the lock, the probabilities are that no accident would have occurred, but, at the last moment, she was instructed by the people in authority to give way to the Prescott. She immediately endeavored to carry out these instructions, in the best and most convenient way, and made room, as far as possible, for the Prescott to pass her, by going alongside the barge and, although her actions were not in accordance with par. d, of sec. 19, of the Regulations for Dominion Canals, which says that she should not have been at a less distance than 300 ft. from the entrance to the lock, the court is of opinion, taking all the facts of the case into consideration, and the short time at the disposal of the Havana, that the local conditions were such that it was impossible for her to do otherwise.

The court, therefore, considers as follows: 1. There should have been repeating signals from the engine room to the deck of the Prescott. 2. The Master of the Prescott, that is to say if Capt. Dunlop is considered Master of the vessel—which the court presumes he is—should have been on deck at the time when his vessel was passing through the lock. 3. The engineer of the vessel is

"PAGE FENCES WEAR BEST"

PAGE WIRE FENCES stretch tighter—posts can be set farther apart. That saves money—fewer posts, less labor digging post-holes, quicker erecting. PAGE FENCES last longer—made of No. 9 wire. PAGE FENCES are heavily galvanized, and for a small extra charge are supplied coated WITH PERMANENT PAINT. PAGE FENCES stand wear better, give longer service, keep your maintenance account down. The PAGE KNOT LOCK cannot slip and positively does not injure the wire. PAGE FENCES do not sag.

50 THOUSAND MILES OF RAILWAYS USE PAGE FENCES

There must be a dollars-and-cents reason for the standing PAGE FENCES have with railway men the world over. It will pay your road to hear that reason before you spend another cent on fences.

The Page Wire Fence Co., Limited, Walkerville, Ont. Branches in Montreal—Toronto—St. John

not responsible, in any way, for the casualty, as he carried out the orders received by him, in obeying the signals from the deck. 4. The court concludes from the evidence that the bells, spring, gong, etc., in question had been inspected on occasions, and that the breaking of the spring of the hammer in question could not have been foreseen; but, as before stated, there should have been some means of repeating the signal from the engine room to the deck. 5. Sec. 26 of the Regulations for the Dominion Canals distinctly states that a vessel of over 200 tons, in navigating the canals, shall be provided with four good and sufficient hawsers, two laid astern, one laid ahead, and one breast-line, and each hawser shall be attended to by one of the crew, to check the speed of the vessel while entering the lock. These rules do not appear to have been carried out.

The court censures Capt. Dunlop for not seeing that the proper equipment was on board his vessel, and, also, for the vessel proceeding at too high a speed when entering the lock; although the court is aware that Capt. Dunlop was not on deck at the time, it is considered that, as Master of the vessel, he should have been. The negligence of the Inspector of Hulls, in reference to the lack of repeating signals from the engine room to the deck, is brought to the attention of the Department of Marine; and the court also considers, as before stated, that it is the duty of the owners to see that the vessel is supplied with all proper appliances and equipment. No blame is attached to the owner and Master of the steamship Havana.

The steamship Senlac, which sank after a collision with the S.S. Rosalind recently, and was subsequently raised, was offered for sale by public auction at Halifax, N.S., Sept. 26.

The Naval Pocket Book, edited by G. S. L. Clowes, London, Eng., corrected to June 7, has been issued. It contains a large amount of information respecting the navies of the world with facts as to the dry docks and ship repairing yards. This is carefully condensed and well arranged. The publishers are W. Thacker & Co., Creed Lane, London, Eng., the price being 7s. 6d.

The Inland Waterways Commission recently appointed by the U.S. Government met at Cleveland, Ohio, Sept. 22, and subsequently started on a trip through the Great Lakes and the Mississippi Valley. A writer in a U.S. magazine recently advocated the creation of a trunk waterway, so that ocean freighters could pass from the Gulf of St. Lawrence to the Gulf of Mexico.

Mrs. Patterson, wife of the lighthouse keeper at Cape Beall, on the south-west point of Vancouver Island, was presented recently with a piece of silver plate, and Capt. Hacket and Chief Officer McDonald, of the Government steamboat Quadra, with a gold watch and chain each, by the U.S. Government, for saving the lives of the captain and crew of the barque Coloma, wrecked near Cape Beale in Dec. last.

The Richelieu and Ontario Navigation Co.'s steamboat Picton was completely gutted by fire Sept. 21, while at her berth in Toronto harbor, and two lives were lost. The Picton is stated to be one of the oldest boats in the lake service. She was formerly known as the Corsican until two years ago, when she was re-fitted and renamed. Her value with cargo is estimated at $120,000. The cause of the fire was the dropping of a lighted torch lamp by one of the hands, who carelessly refilled it when lit, and the jury declared that the company had been negligent in not enforcing discipline in the handling of the fire fighting appliances.

The Dominion Line S.S. Alberta.

A subscriber asked us recently for information respecting the proposed combined use of turbines and reciprocating engines in the S.S. Alberta, which is being built at Belfast for the Dominion Line's Liverpool-Montreal service. We are officially advised that triple propellers are being adopted. Each of the wing propellers will be driven by four crank triple balanced engines, using steam of 215 lbs. pressure. They will each have a high pressure cylinder of 30 ins., intermediate 46 ins., and two l.p.'s of 53 ins. diameter, all with a stroke of 4½ ft. The exhaust steam from the four l.p. cylinders will pass into the turbine, which in turn will drive the central propeller. In this turbine the steam will be expanded down to 2 lbs. absolute pressure before exhausting into the condensers, of which there will be two, each supplied with independent air pumps. When the ship may be required to go astern, the exhaust steam from the reciprocating engines will go direct to the condensers, so saving the complication of the astern turbine, while for manœuvring in and out of port the reciprocating engines only will be used, which will be more than sufficient, as under such conditions they will develop over three-fourths of the total combined horse-power of the turbine and reciprocating engines. The full speed of the reciprocating engines at sea will be about 83 to 85 revolutions, and of the turbine about 230 revolutions.

Atlantic and Pacific Ocean Marine.

A recent despatch from Glasgow, Scotland, states that the C.P.R. has ordered two 12,000-ton steamers of the Empress type, from a Clyde firm, for its trans-Atlantic fleet.

The French Government is reported to have agreed to grant a subsidy to any company establishing a direct line of steamers between Marseilles and a Canadian port.

It is reported that the Allan, Dominion and C.P.R. Atlantic lines have decided to lower the third-class passenger rates on their vessels from Montreal to Continental ports, in order to enable them to compete with other lines.

A London, Eng., dispatch states that at a meeting of the Milford Dock Co., the Chairman in referring to the "All Red" route to Canada, said he had grounds for saying that the claims of Milford Haven as the terminal port would not be overlooked.

The S.S. Empress of Ireland, on a recent voyage from England, carried the largest number of passengers ever landed at Quebec from any ocean steamer. There was a total of 1,554 passengers, made up as follows: saloon, 326; second class, 332; steerage, 896.

J. W. Thomson, one of the principals of the firm of Wm. Thomson & Co., owners of the Thomson Line of freight steamers trading to Canadian ports, died at Leith, Scotland, recently. Many years ago the firm owned a fleet of sailing vessels trading between Leith and Quebec.

J. Thom, manager of the Dominion Line Steamships at Montreal, is reported to have stated that nine large vessels are to be constructed for the International Mercantile Marine Co.'s trans-Atlantic service, and that the first of these will be placed on the Canadian route in the spring. He did not confirm the report that vessels were being built to run at 30 knots an hour.

Press reports state that the C.P.R. contemplates several important changes in its Pacific Ocean service, on account of the large increase of freight now offering for Oriental ports. It is said that the steamships Montrose and Montcalm will be transferred from the Atlantic to the Pacific, at the close of the St. Lawrence navigation season, to take the places of the Athenian and Tartar, which have been sold to some Japanese shipping interests.

The Maritime Boards of Trade at a meeting at St. John, N.B., recently, passed the following resolution: "This convention, believing that fast high-class mail passenger and express freight service between the British possessions would be of immense material and political advantage to Canada, and all parts of the Empire, hereby endorses the All Red Line project proposed by the Premier of Canada, and unanimously adopted at the recent Imperial Conference held in London, and urges the Canadian Government to take all possible steps to hasten the inauguration of the scheme."

The British Board of Trade, under the provisions of sec. 10 of the Merchants' Shipping Act, 1906, has approved of the classes of ships for the purpose of carrying heavy wood goods as deck cargo, and passed regulations with respect to the loading of heavy wood goods as deck cargo, and for the protection of seamen from risk arising from the carriage of wood goods as deck cargo in uncovered spaces on board ship. The classes of vessels approved are iron or steel steamships, having covered spaces, that is to say, poops, bridges, forecastles or shelter decks which form part of the permanent structure of the ships, and comply with certain regulations

The Midland Dredge and Construction Co.'s tug Beaumont en route for the Georgian Bay arrived in Montreal recently, having accomplished her journey from Scotland by a circuitous route to enable her to call at various coaling stations, as her coal carrying capacity is limited. Her route was, Glasgow, Scotland, to Cape St. Vincent, Portugal; thence to the Canary Islands; from there to St. John's, Nfld., and on to Quebec. She was built at Kirkintilloch, Scotland, in 1907, her dimensions being: length, 69 ft.; breadth, 16 ft.; depth, 8 ft.; coal capacity, 31 tons; gross tonnage, 105; engines with cylinders, 15 ins. and 30 ins. and 21 ins. stroke, of 275 h.p., maintaining a speed of 10 knots on a daily consumption of 3 tons of coal.

The steamships Athenian and Tartar, which have been sold by the C.P.R. to the Osaka Shosen Kaisha, of Japan, who are starting a new freight line between Yokohama and Calcutta, India, were bought from the Union Steamship Line, and were at the time running between England and South Africa. They were brought to Canada during the Klondike rush in 1897, and placed on the Vancouver-Skagway route, but proved too large for the service. They were subsequently chartered for two years by the U.S. Government, and ran as transports during the Spanish-United States war, after which they were placed on the run between Vancouver and the Orient. The price paid for the vessels is said to be £55,000, delivered at Kobe, Japan.

The Quebec Steamship Co.'s new S.S. Guiana left New York on her first trip to Bermuda Aug. 31. She was built in Sunderland, Eng., and has the following dimensions: length, 345 ft.; breadth, 44 ft.; depth, 27½ ft. The deadweight carrying capacity is 4,800 tons. She is fitted for 62 first-class passengers, two to each room, and 80 steerage passengers. All the first-class sleeping accommodation is on the bridge deck forward of the machinery. Above this deck is a large house handsomely fitted as the dining saloon. The boats are carried on the sides of the deck over the dining saloon, and on this deck is a good-sized music room and smoke room, both handsomely fitted. The engines are on the triple compound system, working under a pressure of 180 lbs. per sq. in., supplied from three large boilers.

Maritime Provinces and Newfoundland.

A lighthouse is being erected on Sable Island, N.S., by the Dominion Government.

David Richards, President of the Interprovincial Navigation Co., Campbellton, N.B., has resigned.

The Halifax and Canso Steamship Co.'s steamboat Scotia made her first trip to East shore ports, Sept. 19.

E. R. McDonald has been appointed Secretary of the Pilotage Commission for the district of Shediac, N.B.

W. D. Bennet, Hopewell, N.B., has been appointed receiver of wrecks for the district of Hopewell, Albert County.

Press reports state that a contract has been placed in Liverpool, N.S., for two steamboats for J. A. Neville, of Halifax, N.S.

G. S. Mayes has submitted a tender to the St. John, N.B., City Council for dredging at berths 1, 2, 3 and 4, for the sum of $33,000.

Capt. J. Currie, an old Nova Scotia coasting mariner, and latterly a pilot, died at the Home for Aged Men at Halifax, N.S., Sept. 9, aged 97.

D. D. Mann is the name of a new steamboat engaged in the passenger and freight service at Lockeport, N.S. She is commanded by J. Nickerson.

The name of the schooner King of Avon, official number 112,064, registered at Windsor, N.S., has been changed by order-in-council to that of Hieronymus.

The schooner Atlantic, owned and commanded by Capt. Olsen, bound from Buenos Ayres to St. John, N.B., in ballast, was 20 days overdue at that port Sept. 22.

An order-in-council has been passed approving by-laws for the government of the pilots in the pilotage district of St. Mary and Liscomb, Guysborough County, N.S.

The four steamship berths at Sand Point, St. John, N.B., where the C.P.R. and Allan Line steamers are berthed during the winter, are to be dredged to a depth of 30 ft.

Press reports state that several vessels were wrecked and two lives lost in Bonaventure Bay, during a severe gale, which swept the Newfoundland coast Sept. 21 and 22.

The British wooden three-masted schooner Melba, 419 tons register, built at Gardner's Creek, N.B., 1899, and owned in New York, has been purchased by R. C. Elkin, Ltd., St. John, N.B.

D. J. Purdy has been negotiating with New York owners, with a view of purchasing a steamer to take the place of the Crystal Stream, recently destroyed by fire, on the Washademoak route.

The Department of Marine has issued in tabular form a very complete list of aids to navigation in Restigouche River, prepared by Lt.-Col. W. R. Anderson, Chief Engineer of the Department.

The St. John, N.B., City Council has appointed the City Engineer to act as its representative in conference with the engineers of the Department of Public Works, upon the question of harbor improvements there.

The S.S. Hudson, bound from Musquodoboit, N.S., to New York with lumber, took fire recently and was completely burned out off the coast of Nova Scotia. She was about 350 tons, and was owned in Bridgeport, Conn.

A new schooner for use in the fishing industry, similar to the Henry D. Davis, is under construction at Liverpool, N.S. Her dimensions will be: length, over all, 78 ft.; breadth, 18½ ft.; depth, 7½ ft.; 40 tons register.

The S.S. Nordamerika was seized recently by the Customs authorities charged with selling and landing intoxicating liquor at Parrs-

boro, N.S., in June last. She was released on depositing $400 pending a decision of the case.

J. H. Longmire & Sons, Bridgetown, N.S., are having built at Shelburne, N.S., a 70 ft. schooner to be used between Bridgetown and St. John, N.B. She is to be supplied with gasolene engines driving twin screws for use in calm weather.

It is reported that surveyors are at work on the proposed railway route between Southwest Arm, Green Bay and the West coast, in connection with the projected short line service between England and Canada, via Newfoundland.

The following appointments have been made: T. Canty, to be a member of the pilotage authority for Bathurst, N.B.; Capt. J. McQuieny, to be harbormaster for Port Wade, N.B.; R. Miller, to be wharfinger of the Queen's wharf, Annapolis Royal, N.S.

The Norwegian barque from Halifax, N.S., to Conway, Eng., has arrived there after a rough passage of 63 days. Owing to the provisions running short, signals of distress were flown, but the crew were four days without food before the signals were responded to.

The keel of what is said to be the first steel vessel to be built in the Maritime Provinces has been laid in New Glasgow, N.S., for Carmichael & Co. of that place. The dimensions will be: length, 146 ft.; breadth, 34 ft.; depth, 14 ft., and about 400 tons gross.

Although there has been a considerable increase in the wages paid to seamen recently, there is still a shortage of men, and vessels sailing from St. John, N.B., have for some time had their dates of departure postponed, in some cases, as much as two weeks owing to this.

Two members of the crew of the schooner Muriel were each presented with a silver watch by the Dominion Government, at Lunenburg, N.S., recently, for bravery in rescuing the captain, who was knocked overboard in a storm while on a trip to the West Indies.

The Norwegian Government has awarded Capt. Cottrell, Marine Superintendent of the Elder-Dempster Line, a silver cup, and W. H. Havercroft, of the S.S. Sokoto, a silver medallion for saving the lives of the crew of the Norwegian barque Wellington in mid-ocean, Dec. 3, 1906.

The steamship Senlac, which was damaged recently in a collision with the Rosalind, is at Plant wharf, Halifax, N.S., where the question of her ownership is still unsettled. The appraisers have valued her, as she floats, at $28,000, and declined to accept complete abandonment.

The steam tug Samson, built for the Lahave Steamship Co., of Bridgewater, N.S., was launched at Shelburne, N.S., Sept. 3. Her dimensions are: Length, 85 ft.; width, 20½ ft.; depth, 9 ft. She is to be used for a general towing and wrecking business along the south shore.

The S.S. Dahomey, which has been running between Liverpool, Eng., and Halifax, N.S., in connection with the Furness Line, has been chartered by the Pickford and Black Steamship Lines to take the place of the S.S. Orinoco, which was recently wrecked near Cape Sable.

The S.S. Hermann Winter, New York to Boston, collided with the S.S. Silvia, New York to Halifax, N.S., recently, and had about 25 feet of plates torn from her starboard bow. The Silvia, it is stated, was at anchor at the time of the collision and sustained no damage.

Press reports state that the Interprovincial Navigation Co. is considering a proposal from W. Thomson and Co., Ltd., of St. John, N.B., to manage the steamboat Lady Eileen, by which the shareholders would be guaranteed a dividend of 6% per annum. The Lady Eileen runs between Campbellton and Gaspe and Bonaventure, Que.

The S.S. Strathord, from Ardrossan, Scotland, to New Zealand, was recently taken into St. Lucia, West Indies, by the chief officer, who reported that the Captain, L. T. Mudie, had died on the voyage. Capt. Mudie was well known in Montreal, having had command for many years of the S.S. Fremona, of the Thomson Line, engaged in the trade at that port.

A. Nilsen, captain of the steamship Borgestad, who has been a resident in Sydney, N.S., for the past ten years, has resigned command of that vessel and has retired to his old home in Norway. He was for six years captain of the Britannic, after which he was transferred to the Christian Knudsen, and subsequently to the Borgestad, all operated under charter by the Dominion Coal Co.

The Chestnut Canoe Co., Ltd., has been incorporated under the New Brunswick Companies' Act, with a capital of $48,000 and offices at Fredericton, N.B., to carry on the manufacture of canoes, steam launches, motor boats, engines, motors, etc. W. Kitchen, railway contractor, Kingsclear, N.B., and K. Chestnut, Fredericton, are among the provisional directors.

The St. John, N.B., City Council are discussing the allotment of berths for the winter season for the vessels of the various companies using that port. Reports state that the C.P.R. claims that certain berths should be allotted to them continuously, on the ground that it handles considerably more freight than all the other lines combined, and a larger number of passengers than any one of them.

The Halifax and Canso Steamship Co.'s steamship Scotia sailed on her first trip to eastern shore ports Sept. 19. She was built at Mahone Bay, and her dimensions are: length, 130 ft.; beam, 27 ft.; depth of hold, 9½ ft.; tonnage, 268 tons register; and a capacity of 2,500 barrels below deck. She is to replace the Strathcona, which was destroyed by fire off Isaacs Harbor about nine months ago.

At the annual meeting of the shareholders of the Canada Atlantic and Plant Steamship Co., Ltd. (Plant Line), held at Halifax, N.S., Sept. 11, the statements for the financial year showed satisfactory business. Following are the officers for the current year: President, A. W. Perry; Vice-President, McC. Grant; Treasurer, H. G. Perry; Auditor, R. C. Verner; Sec. and Eastern Manager, H. L. Chipman.

The schooner Chlorus, which was confiscated to the Dominion Government, owing to the alleged breaking of the law by her owner in bringing Chinese to Cape Breton, has been taken to Westmount and stripped of her fittings, etc. She is an old hulk, having been built at La Have, N.S., in 1875. Her dimensions are: Length, 64 ft.; breadth, 20½ ft.; depth, 8¼ ft.; register tonnage, 57 tons. Registered at Yarmouth, N.S., number 69,217, in the name of D. J. McDonald, Glace Bay, N.S.

The Atlantic Shipping Co., Ltd., has been incorporated under the Dominion Companies' Acts, with a capital of $12,000 and offices at Maitland, N.S., to purchase the barque Kate F. Troop, and to pay for the same with fully paid up shares of the company; to sell the vessel and to purchase others as may be advisable, and to carry on a general navigation business. The provisional directors are: G. N. Crosby, Mrs. T. I. Crosby, Beaver River, N.S.; G. S. Crosby, C. K. Thurston, Maitland, N.S.; P. L. Hatfield, Acadia, N.S.

The new lighthouse at Cape Race, Nfld., it is reported, has the largest lantern yet constructed for lighthouse work. The diameter of the lantern is 17 ft. 1½ ins.; the focal length of the lenses, which project a beam of light having an intensity of 1,100,000 candle power, is about 50 ins. The burner, which is of 2,400 candle power, is of the petroleum vapor type, and is used in conjunction with an 85 m/m incandescent mantle. The whole is supported by a tower of reinforced concrete, the total height being about 100 ft. Intermittent flashes will be given at the rate of eight per minute from west to east.

A schooner named Decorra, 157 tons register, loaded with coal, drifted ashore, three miles west of Gulliver's Cove, near Digby, N.S., recently. There was no one aboard of her, she having been apparently abandoned by her crew, of whom there was no trace. Letters found aboard addressed to Capt. J. W. Berry, Larrabee, Me., imply that that is the name of the owner, but he perished in the wreck of the schooner Emma A. Harvey in Bogart's Cove, Digby, N.S., last Dec. It is reported that the crew landed at Machias, Me., having abandoned the vessel owing to a leakage. A searching inquiry, it is said, is to be held, as there appears to be a doubt about such a leak as would justify abandonment.

Marine Notes from the Twin Ports.

Our Port Arthur correspondent wrote, Sept. 6: The total shipments of the crop of 1906, through Port Arthur and Fort William, to Sept. 1, amounted to 51,500,000 bushels. The elevators at both these ports are practically full to-day, with a large amount of this year's crop still in interior elevators, and unmarketed, so that while the present prospects for the crop of 1907 are that it will be a light one, possibly in the neighborhood of 65 to 75 millions of bushels, the outlook for the lake carrying trade is good, owing to the large amount of the old crop still on hand to be moved.

Coal receipts at the head of the lakes exceed anything in the history of these two ports, and it is quite evident from the quantity still to be received, that all four docks will be worked to their fullest capacity to the close of the season, to take in the quantity already under contract.

It is almost impossible to pick up vessels for any kind of wild trade out of here, such as timber, wild coal cargoes, or pig iron.

The Atikokan Iron Co. is now offering its first shipments of pig iron for lake delivery at eastern points. This is a trade that from now on will grow very materially, as the blast furnaces are about to quadruple their plant.

This is the off season for the package freight business, and it has consequently slackened down rather below the normal, but will soon pick up now that the fall trade is commencing.

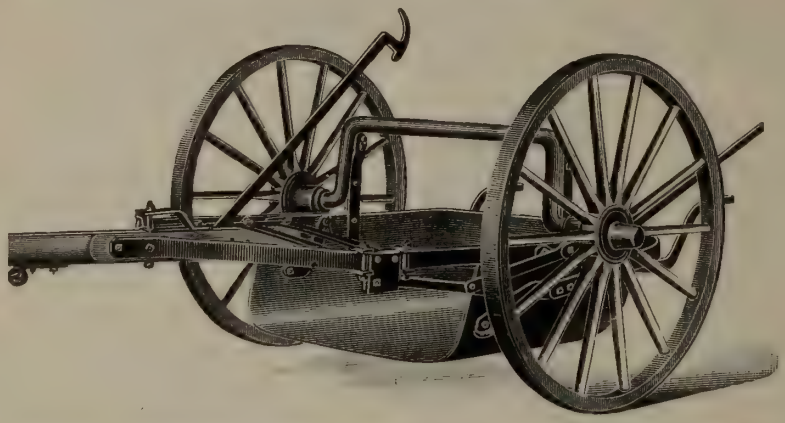
The Canadian Lake Line is adding two steamships to its line, the first of which should be in commission on the lakes about Oct. 15, and the other about the end of Oct.

Upper Lake passenger travel has exceeded anything in the history of Lake Superior. The Northern Navigation Co.'s S. S. Huronic has been filled to her capacity for the past three months. The C.P.R. steamships and the Booth line steamboats have had more passengers than they could well take care of. More and more tourists are coming this way each year.

Large quantities of material, and the entire plant of the contractors, have arrived for the construction of the new Government breakwater, which is being extended from the old breakwater in a general southerly direction, and will be continued to the mouth of the Kaministikwia River at Fort William. When this breakwater is completed, Port Arthur will have a harbor with a capacity for handling more tonnage than any port on either side of the chain of lakes.

THE TORONTO PRESSED STEEL CO.

TORONTO, CANADA LIMITED



Our **SOLID PRESSED BOWL DRAG** and **WHEEL SCRAPERS** are the most satisfactory in the market. They are pressed out of one solid sheet of steel and have no joints or seams.

We manufacture a complete line of Contractors' Supplies, including

PLOUGHS **DUMP CARS**
DUMP WAGONS **DUMP CARTS**
WHEELBARROWS **TRUCKS**
CEMENT MIXERS **WAGONS**
etc., etc.

SUBMARINE SIGNALS

Have been adopted by the United States, England, Germany, France and Canada.

Vessels not equipped to receive submarine signals suffer costly delays, and run needless risks.

...For full particulars address..

Submarine Signal
COMPANY

BOSTON, MASS.

The Government is placing a gas buoy at Jackfish. It has installed a new foghorn on Thunder Cape, and is about to do the same at Victoria and Welcome Islands. These very necessary coast aids will do much to facilitate the navigation of these waters in thick and heavy weather.

The Government has done very wisely in keeping the Welland and St. Lawrence canals open on Sundays, beginning Sept. 1, for the balance of the season. This will materially aid vessels in the Kingston and Montreal trade, and add very largely to the tonnage passing down the St. Lawrence River.

The following shows shipments of grain by vessels from Fort William and Port Arthur from the opening of navigation, Apr. 29 to Aug. 31, 1907, and also for the crop year, 1906 (Sept. 1, 1906, to Aug. 31, 1917), with ports of destination:

Province of Quebec Marine.

H. Poitevin has been appointed wharfinger of the Dominion Government wharf at Masson, Que.

J. S. Thom has been appointed a member of the Quebec Harbor Commission, succeeding H. Kennedy, resigned.

A large increase of traffic through the Lachine canal is shown for August, as compared with the same month last year.

E. Dussault has been re-elected as the representative of the Levis Board of Trade on the Quebec Harbor Commission.

L. Gelinas has been appointed Secretary-Treasurer of the Sincennes-McNaughton Company, Montreal, succeeding the late J. O. Poliquin.

The Interprovincial Navigation Co.'s steamboat Lady Eileen ran aground at high tide, in Gaspe Basin, Sept. 5. She was released without serious damage.

Cranston Cockburn, for 20 years superintendent of the dredge Richelieu, belonging to the Dominion Public Works Department, died in Montreal Aug. 23.

Tenders for the supply of two sets of triple expansion engines for each of steamers numbered 21 and 22, are under the consideration of the Marine Department.

Capt. P. Plante, a well-known navigator and steamship owner on the St. Lawrence and Saguenay Rivers, died at St. Petronille, Orleans Island, Que., Sept. 6, aged 86.

The Canadian Lake Line's steamboat Corunna, which was to have left Montreal, Sept. 14, broke her rudder and her departure was delayed until the damage was repaired.

The Norwegian steamship Armenia, of 1,169 tons register, in ballast, bound to Matane, N.S., ran on the rocks recently near Cape Chatte, and is regarded as a total loss.

It is reported that the Montreal Harbor Commissioners have purchased a large floating crane for use in that port, and hope to have it ready for use by the opening of navigation next year.

At a special meeting of the Quebec Board of Trade held recently, G. Tanguay, a member of the Quebec Legislature, was elected as the Board's representative on the Harbor Commission for that city.

A writ was issued recently by the Admiralty Court, for the seizure of the barge Robert, then in the port of Montreal, at the instance of A. Hetu and S. Desrosiers, who claim $206 and $25 respectively as salary due. The owners are O. Turcotte and L. J. Leclaire, Sorel, Que.

The dredging of the Beaujeu channel through the Crane Island flats below Quebec has been completed. This will allow of the passage of the large liners at low tide, thus obviating delay. Similar work on the St. Thomas flats, where there is only a 24 ft. draught, is contemplated.

The Quebec and Levis Ferry Co.'s ferry steamer Queen has been given an extensive overhaul in preparation for the winter season of navigation. The steamboat Pilot has been dry-docked for an overhaul, and extensive alterations are being made in the Polaris. The cost of the alterations on the three boats is estimated at $25,000.

Montford Granite has been incorporated under the Dominion Companies' Act, with a capital of $200,000 and offices at Montreal, with power among other things to own and operate steamboats, steam tugs, barges and other vessels. C. E. Leclerc, A. S. Hamelin, R. T. Leclerc, Mrs. V. Desjardines, J. H. Loranger, Montreal, are the provisional directors.

W. Davidson, the engineering expert who was recently engaged by the Montreal Harbor Commissioners to advise them as to the projected improvements in the harbor, has completed his survey, presented his report and returned to England. It is understood that the report deals principally with an extensive plan for the elevation of tracks, with other necessary improvements.

The depth of water in the river at Montreal has maintained a fairly high level this year as compared with previous years. There has been a drop of about 18 inches in 20 days, but no anxiety is felt on this account, the depth being 31 ft. 2 ins. in the new channel and 28 ft. in the old, while few vessels are coming into the harbor with a greater draught than 26 ft., the majority being only about 19 to 23 ft. draught.

The old portable wooden sheds have been removed and foundations are being laid for a group of new steel frame sheds on the Montreal harbor front. Considerable delay has been experienced in obtaining delivery of the structural steel, and it is stated that there is some difficulty in finding mechanical appliances capable of taking heavy freight from the holds of vessels to the second story. Elevators have been suggested, but nothing has as yet been decided on.

A statement of the revenue of the Montreal Harbor shows a total of $182,751 for the period commencing with the opening of navigation to Sept. 1 of this year, as compared with $180,487 for the same period last year. Of this year's revenue, $129,500 represented imports, $33,500 exports, and $19,751 local traffic. During Aug. the total receipts were $50,400, as compared with $48,987 for Aug. last year. The same month's customs receipts were $45,000, an increase of about $3,000 over Aug., 1906.

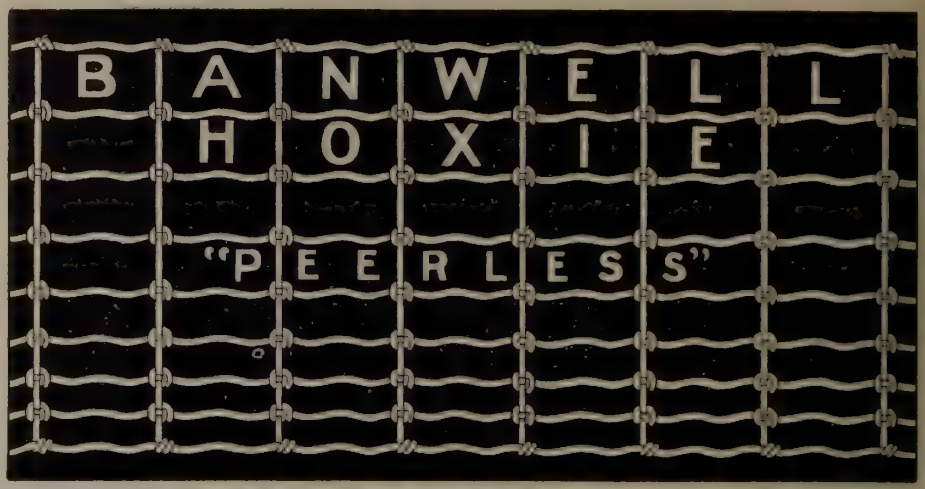
Signal stations have been established at the following points on the St. Lawrence River: Montreal, Longue Pointe, Vercheres, Sorel, Three Rivers, Batiscan, Cap a la Roche, Portneuf, St. Nicholas, Cap. Rouge, and Quebec. The stations at Montreal, Three Rivers, Cap a la Roche, St. Nicholas and Quebec will be operated by day and night, but the remainder by day only. Each of the stations named is connected with the Bell Telephone Co.'s system, and is provided with a mast 65 ft. high, with a cross spar 25 ft. long placed 20 ft. from the top of the mast, on which signals will be displayed for the benefit of boats passing between Montreal and Quebec. A code of flag signals for day use, and of lights for night uses, has been prepared, and distributed to the various vessels using the route. The work has been carried out under the superintendence of F. W. Cowie, Chief Engineer of the Montreal Harbor Commission.

The work of constructing the Tarte pier at Montreal has been completed, and by next year the Harbor Commissioners will have under their control what is probably the largest pier of its kind on the whole continent. There is accommodation for eight large ocean-going vessels, and this will obviate to a considerable extent the present difficulty in accommodating all the vessels that desire to berth there. The contract for erecting the pier was let to the W. J. Poupore Co. in July 1900, and construction was commenced in the following spring. The original contract price was $700,000, but owing to alterations and additions required by the Government, the price has risen to almost $1,000,000. The dimensions of the pier are: length on the west or upper side from the angle with the shore wharf, 1,000 ft.; on the east or lower side, 850 ft.; width, 325 ft.; height, 65 ft. from the bottom of the river, 26 ft. above the mean summer water level, and about 20 ft. higher than the two low level piers, the

Laurier and the Sutherland. Amongst the materials used were: 20,000,000 ft. of timber, 2,000,000 lbs. of iron bolts and plates, 200,000 cubic yards of broken stone, and 65,000 barrels of Portland cement. The structure has been examined and passed by the Government inspectors, and handed over to the Public Works Department.

The U.S. Government is carrying out extensive dredging operations in the lower Detroit river. The channel has been divided into 14 sections and operations are in progress in the fourth section, which extends into Lake Erie. The new channel will pass west of Bois Blanc Island and between Bois Blanc and Stony Islands. There is available for the work $2,000,000, and altogether $4,670,000 has been authorized by Congress to be spent on the improvement. It is expected that the new channel will be completed in about two years.

The Dominion Government has issued a pamphlet giving all available information respecting the Hudson Bay route, showing what it is necessary should be done in the way of railway construction to give a connection with deep water at Fort Churchill, and all the known facts regarding the navigation of the bay. In the course of 175 years it is shown that 750 vessels ranging from 70-gun ships to a 10-ton pinnace crossed the ocean, passed through the straits and sailed the bay in the service of the Hudson's Bay Co. Only two of these were lost



PEERLESS WOVEN WIRE FENCING

Made from uniformly heavy hard steel wire, well galvanized.
Made in large rolls ready to stretch up.
Requires but few posts; costs very little to erect.
Conforms perfectly to any surface, no matter how rough.
Reduces the cost of fence maintenance to a minimum.

BANWELL HOXIE WIRE FENCE COMPANY LIMITED
HAMILTON, ONTARIO

C.P.R. LANDS

THE CANADIAN PACIFIC RAILWAY COMPANY have 10,000,000 acres of selected lands for sale in Manitoba, Saskatchewan and Alberta.

Map No. 1—Winnipeg to Second Meridian	$ 8.00 to $15.00 per acre.
Map No. 2—South-Eastern Saskatchewan, 2nd to 3rd Meridians	10.00 to 25.00 per acre.
Map No. 3—Main Line, 3rd Meridian to Range 10 W., 4th Meridian (generally)	8.00 " "
Map No. 5—Calgary District	8.00 to 10.00 per acre.
Map No. 6—Part of Alberta—Edmonton, Battle and Saskatchewan Rivers Districts—Range 11 West, 4th Meridian to Range 7, West 5th Meridian	10.00 to 25.00 per acre.
Map No. 7—Part of Western Saskatchewan and Eastern Alberta, 3rd Meridian to Range 10 West, 4th Meridian	10.00 to 25.00 per acre.

Maps showing these lands in detail will be sent free on application.
All prices are subject to change without notice.

TERMS OF PAYMENT

An actual settler may purchase not more than 640 acres on the ten instalment plan by paying a cash instalment at time of purchase, interest at six per cent. on the unpaid purchase money at the end of the first year, and the balance of the principal, with interest, in nine equal instalments annually thereafter, as shown in the following table:

160	Acres at	$ 8.00	per acre,	cash payment	$191.70	first year's interest	$65.28	and nine instalments of	$160.00
"	"	9.00	"	"	215.70	" " "	73.46	" "	180.00
"	"	10.00	"	"	239.70	" " "	81.62	" "	200.00

"	"	15.00	"	"	359.50	" " "	122.44	" "	300.00

Purchasers who do not undertake to go into residence on the land are required to pay one-sixth of the purchase money down, balance in five equal annual instalments with interest at the rate of six per cent. per annum.
Interest at six per cent. will be charged on overdue instalments.

F. T. GRIFFIN, Land Commissioner, Winnipeg.

CANADA NORTH-WEST LAND CO.

This Company has 550,000 acres of selected lands in Manitoba and Assiniboia which offer excellent opportunities to settlers and investors who desire to secure good lands in well-settled districts. These lands are on sale at the Company's Office at Winnipeg, and at the various land agencies of the Canadian Pacific Railway Company.

F. T. GRIFFIN, Land Commissioner, Winnipeg.

Underwood

¶ Accurate alignment is an essential of good typewriting; not merely good alignment, but permanently good alignment.

The Underwood has a guide which compels every character to appear in exactly the right position.

The principle of this guide is fully protected by our patents. Other typewriter manufacturers have been working overtime in the endeavor to circumvent us in the matter of a guide—without success.

Without it their machines must continue to occupy their present position—of inferiority.

619-623 THE TEMPLE - - CHICAGO

Ontario and the Great Lakes.

The lighthouse at Winfield Basin, near Wiarton, Ont., is reported to have been destroyed by fire.

G. Trick has been appointed wharfinger of the Dominion Government wharf at Cook's Bay, Silver Water, Ont.

The Richelieu and Ontario Navigation Co. has at present the largest number of shareholders it has ever had.

J. & J. T. Mathews, of Toronto, are said to be about to place an order in Great Britain for a large lake freighter.

The branch canal of the Trent Valley Canal to Fenelon Falls, Ont., a stretch of about 4 miles, was opened for traffic Sept. 18.

The wrecked schooner Dobie, which has been a danger to navigation in Deseronto harbor since 1904, has been removed.

An order-in-council has been passed authorizing the City of Toronto to erect a sea wall in front of the Exhibition grounds.

The steamship North-West was quarantined at Buffalo, N.Y., recently for several hours, there being some cases of typhoid fever on board.

The steamboat Lakeside, of the Niagara, St. Catharines and Toronto Navigation Co., has been thoroughly overhauled and again placed in service.

V. Murray, a well-known river pilot, who died at Kingston, Ont., recently, was a son of Capt. J. Murray, of the Montreal Transportation Co.

The interests of H. Finger, of Port Arthur, Ont., in the Lake Superior Tug Co., it is reported, have been sold to W. Alexander, of Warsaw, Wis.

The Department of Railways and Canals has under consideration, tenders for the construction of a dam at Bobcaygeon, Ont., in the Trent Canal.

Two United States steamboats, A. G. Brower and Isaac L. Ellwood, collided in Lake Erie, off Bar Point, Aug. 28, and the latter vessel sank.

The tug Alert, while being towed by another tug in Georgian Bay, Aug. 28, was swamped and three of the five men on board of her were drowned.

The steamboat Monkshaven, which was wrecked near Port Arthur, Ont., two years ago, is to be raised, a contract having already been let for the work.

The Niagara, St. Catharines and Toronto Navigation Co.'s steamboat Garden City was placed in her winter quarters at Port Dalhousie, Ont., Sept. 12.

The name of the steamboat John Owen, official number 117,039, registered at Sault Ste. Marie, Ont., has been changed to Columbus by order-in-council.

The Dominion Public Works Department has under consideration, tenders for the construction of a public wharf at Sand Point, Ont., on the Ottawa River.

The freight steamboat Nepigon passed through the Welland Canal recently in 10½ hours, which is said to be the quickest passage made by any freighter.

Navigation was resumed on the Erie Canal, Sept. 16, after having been suspended since July 30, owing to the giving way of the aqueduct over Onondaga Creek.

Ontario No. 1, the new car ferry which is to run between Cobourg, Ont., and Charlotte, N.Y., had a successful trial trip, under the command of Capt. Forest, Sept. 12.

The barge B. B. Buckhout, with a cargo of lumber in tow, sprang a leak in Thunder Bay, Aug. 31, and was towed into the port, where she lies at the bottom of the slip.

G. Durnan, for over 50 years keeper of the lighthouse at Gibraltar Point, Toronto, died at Toronto, Sept. 7, aged 81. He retired from the lighthouse service in 1904.

The wooden steamboat John Otis has been purchased by the Detroit River Transit Co., and will be converted into a sand steamer for use on the M.C.R. tunnel at Detroit, Mich

The steamboat Orion, which went ashore on Calf Island in Lake Ontario recently, has been released and taken to Kingston, Ont., by the Donnelly Wrecking Co., for repairs.

The Toronto Ferry Co.'s ferry steamboat Shamrock, which was recently sunk after being on fire, has been raised. It is reported she will be re-modelled and in future used as a barge.

During July and August, the water level of Lake Ontario was lowered 3½ ins., but was 6 inches higher than last year, 30 ins. higher than in 1895, and 14 ins. lower than in 1876.

Press reports state that the C.P.R. intends to construct another dock at Fort William, Ont., at a cost of $1,000,000, and to erect six freight sheds, an elevator and other accommodations.

P. Hardy, inspector of lighthouses, has been making a tour of the lakes, in the Midland Navigation Co.'s steamboat Midland Queen, with supplies for the various lighthouses.

Two tugs were launched recently at Collingwood, Ont., and the machinery is now being rapidly installed. When completed one will go to Blind River and the other to Port Arthur.

The dredge Sir Wilfrid Laurier, which was sunk five years ago in 80 ft. of water, near Port Hope, Ont., has been raised and towed to Toronto, where she is being examined by the Polson Iron Works Co.

While entering the channel at Cardinal, Ont., Sept. 9, the barge Annie Minch broke away from the tug Cardinal and ran aground near the foot of the Galop Rapids. She was subsequently released by the tug Proctor.

While being towed by the steamboat American Eagle, in Lake Erie, during a heavy sea, the barge Houghton parted her cable off Bar Point, near Amherstburg, Ont., and immediately sank. The crew were all saved.

Capt. F. D. Forest has been appointed Master of the Ontario Car Ferry Co.'s car ferry steamboat Ontario No. 1, and W. Smeaton, formerly of the steamboat Turbinia, has been appointed Chief Engineer.

J. Ganley, of Sault Ste. Marie, is reported to be visiting England in company with his brother, where, it is stated, they will purchase a steamboat to replace the Batchewana, which was recently destroyed by fire.

A cave-in occurred in the tunnel shaft, in connection with the Detroit River tunnel, at Windsor, Ont., Sept. 11. It was presumed that the slide was caused by the recent heavy rains. The damage is estimated at about $2,000.

The Toronto City Council is considering the advisability of constructing a double-decked landing stage at the foot of Bay St., Toronto, thus allowing passengers to board or leave both decks of the ferry steamers at the same time.

The steamboat David W. Rust, while towing the C. G. Barnes, laden with ore in Lake Erie, ran aground off Pelee Point, Sept. 13, and the Barnes crashed into her stern; causing her to settle to the bottom. Both vessels are owned in Toledo, O.

The steamboat G. R. Crowe built for the St. Lawrence and Chicago Steam Navigation Co., Ltd., of Toronto, which was fully described in our issue of July, was launched from the Caledon Shipbuilding yards, Dundee, Scotland, Aug. 15.

The proposal to establish a dry dock at Port Dalhousie, or between there and Port Colborne, does not appear to be favorably received in marine circles, owing to the fact that large vessels could not pass the first lock at Port Dalhousie.

The C.P.R. steamship Assiniboia arrived at Levis, Que., from Great Britain, Sept. 11, where the work of dividing her for her passage through the canals will be undertaken. A complete description of this vessel was given in our Aug. issue.

W. A. Clark, of Collingwood, Ont., has contracted for the construction of a tug to be built there to be 85 ft. long, with 18 ft. beam and 9 ft. depth of hold. The engine and boiler of the tug Hodgson will be installed in the new boat.

The schooner Dundee dragged her anchor and drifted aground on a sandbank in the mouth of the Humber River, Lake Ontario, Sept. 10. Considerable difficulty was experienced in obtaining assistance, and she was not released until a week later.

R. W. Perks, who is again visiting Canada in connection with the Georgian Bay Canal project, is reported as having said that his company is prepared to go on with the construction of the canal if the Dominion Government will guarantee its bonds.

The G.T.R. car ferry Huron, while undergoing repairs in the Railway Co.'s slip at Windsor, Ont., was flooded by waves caused by passing excursion steamboats, and sank in 25 ft. of water. She was subsequently raised and the repairs proceeded with.

The vessels belonging to the Rideau Lakes Navigation Co., Ltd., have been placed in winter quarters six weeks earlier this year than is usual, owing to the shallowness of the water on the route, making it unsafe. The last trip for the season was made Sept. 21.

The Montreal Transportation Co.'s steamboat Advance was held at Thorold, Ont., in the Welland Canal, Sept. 17, at the instance of four discharged seamen on a claim for wages due. After the court proceedings, the claims were paid and the vessel proceeded.

The steamboat Lycorning, with a vessel in tow, took the wrong channel in the Detroit River, Sept. 18, and collided with the steamboat Isabella Boyce, also engaged in towing, at the Limekiln crossing, near Amherstburg, Ont., and caused her considerable damage.

As the result of a petition by the Dominion Marine Association, instructions were issued Aug. 31, that the Welland, Murray, Williamsburg, Cornwall, St. Lawrence, Lachine and Soulanges Canals be kept open for traffic on Sundays for the remainder of the season.

Press reports state that two steamboats will be built at Kingston, Ont., during the winter, for the Thousand Islands, and that C. E. Emory, of Frontenac Island, has volunteered to pay the cost. It is stated they will be equipped with searchlights of 1,000,000 candle power.

Foghorns are being installed on Welcome Island and at Point Porphrey, by the Dominion Government. The first named is of the single engine class, and the latter of the double engine class, and will be of material assistance to those navigating the north shore and Thunder Bay.

The St. Lawrence and Chicago Steam Navigation Co.'s steamship E. B. Osler was launched on Lake Erie Sept. 7. Her dimensions are: length over all, 510 ft.; keel, 500 ft.; beam, 56 ft.; depth, 31 ft. She is equipped with quadruple expansion engines and Scotch boilers.

The U.S. steamboat Alexandra Nimick ran ashore at Vermillion Point, Sept. 21, and was broken to pieces by the force of the waves. The captain and five of the crew were drowned.

83 Front Street West - TORONTO

She was a wooden steamer of about 1,968 tons gross, her dimensions being: length, 318 ft.; breadth, 40 ft.

The first section of the M.C.R. Detroit River tunnel was launched at St. Clair, Mich., recently and towed to Windsor, Ont., where it will be lowered into a 500 ft. trench, by means of air tanks. It was expected that the second section would be ready for launching by the end of Sept.

Delivery of the first 25 of the 100 5 h.p. induction electric motors, ordered by the Department of Railways and Canals, for the Welland Canal lock gates, has taken place, and it is expected that the equipment will be completed in time for the opening of navigation next season.

The schooner Lizzie Metzner, registered number 116,549; length, 82¾ ft.; breadth, 21¾ ft.; depth, 6½ ft.; of 91 tons, has been sold by her owner, H. Deryaw, Kingston, to W. Lobb, South Bay, Ont., who will sail her for the remainder of the season. She was built in 1888 in the U.S.

It is reported that the wreck of the steamboat Dean Richmond, which was lost in a gale with all on board, in Oct., 1893, has been discovered near Vanburen Point, Lake Erie. She is stated to have had a cargo of lead and copper ore valued at $200,000, and attempts to locate the wreck have previously failed.

The steamboat Winnebago, a small vessel of 500 tons, Capt. G. H. Ewart, left Sault Ste. Marie, Ont., recently for San Francisco, Cal., via the St. Lawrence River and Cape Horn. The steaming capacity of this small vessel is estimated at about 200 miles a day, and the distance to be travelled is approximately 16,000 miles.

A private settlement was reached in the case where sailors sued the owner of the yacht Christine, at present in Toronto harbor, for wages due. This yacht was formerly owned by Lord Strathcona, and recently by Capt. Farquhar, of Halifax, N.S. and is reported to have been sold to a Halifax, N.S., resident for $20,000.

Consequent upon the appointment of Capt. F. D. Forest to the Ontario Car Ferry Co.'s boat Ontario No. 1, the following changes in the command of the G.T.R. Detroit River car ferries are announced: H. Oldenburg, Captain of the Huron, to be Captain of the Lansdown, and A. Dallargau, mate, to be Captain of the Huron.

The Algoma Central Ry. steamship King Edward, while endeavoring to make the port of Thessalon, Ont., Aug. 27, during a storm, ran aground on the rocks, tearing a large hole in her side. Temporary repairs were made at Thessalon, after which she was taken to Detroit, Mich., where she has been placed in the dry dock for proper overhauling.

Press reports state that Capt. J. F. Allan left Kingston, Ont., Sept. 9, for Detroit, Mich., to bring down the steamboat Ottawa, purchased by the Thousand Islands Steamboat Co. The vessel was purchased from the Bay Transportation Co., of Sandusky, O. She was built at Saugatuek, Mich., is about 115 ft. long, with 21 ft. beam and a draught of about 7 ft.

The fisheries protection cruiser Vigilant, stationed in Lake Ontario, has been supplied with four modern quick-firing guns, having a range of about 4½ miles. These have taken the place of the old pattern seven-pound muzzle loaders, with which she was originally equipped. The mounting of the new guns necessitated the strengthening of the decks.

The steamboat Nevada, of the Canadian Lake Line, which was wrecked at Farren's Point in the St. Lawrence, in July, has been raised and taken to Toledo, O., for repairs, by the Donnelly Wrecking Co., of Kingston, Ont. It is not expected that she will be in commission again this season, as the damage sustained is considerable, and extensive repairs are to be undertaken.

The U.S. lake survey steamboat General Williams reports the existence of a wreck lying in 36 ft. of water, 2 miles north 66° 10′ east of Colchester light. The wreck lies close to the main track of the freighters between Pelee Passage and Detroit, taking the north side of the Colchester light. The position of the wreck has been marked temporarily by a spar buoy bearing a white flag with red centre.

The first contract since the appropriation was voted for the construction of the Rice Lake-Ontario division of the Trent Canal, has been let to Brown & Aylmer, Peterboro, Ont. The contract extends from Campbellford to Widder Falls, 3 miles, with two dams and two locks. The contract calls for the work to be completed by Nov. 30, 1908, and the price mentioned therein is $600,000.

Complaints were made recently, that the contract let by the Dominion Government to the Great Lakes Dredging Co., amounting to $50,000, for the dredging of the sandbar at the mouth of the Rainy River, was not being carried out. It was stated that the old channel had been completely filled in, and that vessels had to use a roundabout route, entailing serious delays to those who rely on the steamers for supplies.

The Sable Logging Co., Ltd., which has been incorporated under the Ontario Companies' Act, with a capital of $75,000 and offices at Massey, Ont., to carry on a general lumbering business, is given power also to carry on business as ship owners or carriers by land or water. The provisional directors are: W. J. Bell, C. McCrea, Sudbury, Ont.; B. W. Arnold, Albany, N.Y.; J. A. Ferguson, R. Friar, Massey, Ont.

An amended tariff of wharfage tolls and dues to be levied on vessels and merchandise using the Government wharf at Sault Ste. Marie, Ont., has been approved by order-in-council. The Tariff hitherto in force was approved by order-in council dated Oct. 15, 1892. There is a slight increase in the tariff, made necessary by the greater expenditure entailed for the necessary assistance in handling freight at the wharf.

The package freight steamship Regina, for the Canadian Lake Transportation Co., was launched at Dumbarton, Scotland, Sept. 3. She is 256 ft. long, 42 ft. beam, with a carrying capacity of about 3,000 tons. A sister ship, to be named Kenora, is in course of construction, and it was hoped to have her launched during Sept. The Regina should arrive in Canada during Oct., and the Kenora is expected about a month later, when they will be placed on the Montreal-Port Arthur route, as part of the Canadian Lake Line.

The Montreal Transportation Co. has purchased the U.S. steamboat Iroquois, taking delivery at Windsor, Ont., Sept. 10. The Iroquois proceeded from Windsor to Fort William, where she loaded wheat for Kingston, Ont. After discharging at the latter port

THE ALLAN LINE ROYAL MAIL TWIN SCREW STEAMSHIP CORSICAN.

This vessel, which has been placed on the Liverpool-Canada route this season, was fully described in our June issue.

she was remeasured under the Canadian rules, and is to be renamed. She will be engaged in the coal trade between Lake Ontario and Montreal, principally for account of F. Robertson, who has constructed an extensive discharging plant at that port. The Iroquois was built in 1892, is 242 ft. in length, with 42 ft. beam, and is of 1,957 tons gross.

J. L. Weller, Superintendent of the Welland Canal, in an interview recently said: "The first half of the present year has shown a very large increase over any previous half-year, new vessels are being added to the fleet every few weeks, and it may confidently be expected that the future of the Welland Canal as a heavy freight carrier is assured. Improvements are continually being made to facilitate the passage of vessels, and these, together with the abolition of all tolls, have done much to make this route what it should be, the main transportation route between the Northwest and the ocean."

The steamboat Canadian, built recently at Newcastle-on-Tyne, Eng., has arrived on the Upper Lakes, having made the fastest trip from England ever made by a lake vessel. She will be run by the Mutual Steamship Co., Ltd., operating under a Dominion charter. She has been built to special survey under the British corporation, and is of the following dimensions: length over all, 256 ft.; breadth, 43 ft.; depth, moulded, 26 ft.; the engines are placed at the after end of the vessel, and are of the triple expansion type with cylinders 19, 32, and 52 ins. diam., by 36 ins. stroke, with two boilers at a working pressure of 180 lbs.

Statistics show that the loss of life and destruction of vessels on the Great Lakes and connecting rivers, during the navigation season of 1906, was greater than usual. During the year 229 vessels were more or less damaged, and 49 were total losses. There were 250 lives lost during last year. The loss is placed at $2,043,850 and was greater than in any other season of the previous ten years except 1905, when losses amounted to $4,055,250. The list is headed by Lake Superior, with losses amounting to $691,000, followed by Lakes Erie, $428,000; Huron, $412,000; Michigan, $324,500; Ontario, $34,900; and in the connecting rivers losses amounted to $153,150.

The C.P.R. steamship Assiniboia arrived at Levis, Que., from Great Britain, Sept 11, where the work of dividing her for her passage through the canals will be undertaken. A complete description of this vessel was given in our Aug. issue. The cutting, etc., will be done by G. T. Davie & Son, under the supervision of H. Calderwood on behalf of the C.P.R. The cut will be made about 105 ft. from the stem, leaving the stern section about 235 ft. long, each section being protected at the cut end by a watertight bulkhead which has been provided. The two sections will be towed to Buffalo, N.Y., where they will be rejoined. The sister vessel, the Keewatin, reached Montreal Sept. 24, and after discharging her cargo, proceeded to Levis, where she will also be cut in two. It is hoped to have both the vessels in Owen Sound before the close of navigation.

The unreliability of sound during fogs is a subject with which all mariners should make themselves conversant, and the audibility of fog whistles during such periods should not be taken for granted. It may be supposed that a buoy emitting a loud and continuous whistle would be heard at equal distances, in any direction, in the absence of wind and without the interposition of any large, solid body, but experiments have proved that this is not the case. What are technically termed "sound shadows" are formed, within the area of which no sound can be detected, though the whistle may be blowing and can be distinctly heard outside the shadow. The existence of a bluff behind the whistle may cause the sound to ricochet over the water, causing it to be audible and inaudible, alternately, at irregular distances, until it dies away. Peculiar atmospheric conditions will also cause "sound shadows" during a fog, and any seaman who relies on his hearing of the whistle, and judging distance by the sound, can easily be misled. Warnings on these points have been issued, and experiments have been conducted from time to time by the U.S. Hydrographic Office.

Press reports state, that North-West Mounted Police patrol boat Rouville will not be sent to Hudson's Bay this year, the police having established an overland route to Fort Churchill, and compliance with the laws by foreign whalers rendering a patrol vessel unnecessary.

The Lesser Slave River, the link between Athabasca River and Lesser Slave Lake, is to be dredged, and wing dams are to be constructed to increase the depth of water, and thus allow heavy draught vessels to navigate the river between these two ports, a distance of about 200 miles. A party of men left Edmonton, Alta., recently to commence the work for the Dominion Government.

Reports received at Athabasca Landing, Alta., from Herschell Island near the mouth of the Mackenzie River, Sept. 3, state that the sailing ship Duchess of Bedford has been lost. Capt. Mickleson and the crew left the ship in Feb. with 60 days' provisions and proceeded north. The Duchess of Bedford sailed from Vancouver, B.C., in 1906, on a voyage of discovery in the Arctic Ocean.

The Sovereign-Germaine Collision.

Commander O. G. V. Spain, Dominion Wreck Commissioner, assisted by Captains Arch. Reid and Jas. Riley, assessors, held an investigation in Montreal on Aug. 30 and 31, into the collision between the S.S. Sovereign and the sailing barge Germaine, where she lay discharging cargo at wharf section 24, port of Montreal. The following judgment has been rendered:

"It appears from the evidence adduced that the steam vessel Sovereign (so-called Imperial) is a vessel reconstructed from the wreck of the Ottawa River Navigation Company's steamship Sovereign, which was burnt in March, 1906, and purchased by the present owners, the St. Lawrence Canadian Navigation Co., Ltd., from C. Sessewein; and she has been plying between the ports of Montreal, Three Rivers, Sorel and Quebec, without a proper certificate of registry, or license, since shortly after the opening of navigation. The vessel has been lengthened considerably, and been reconstructed without any special survey, though a copy of the certificate of survey (written in pencil), signed by W. Paul, Surveyor for the Port of Sorel (who is also the manager of the Company), was handed into the Court. In his evidence Manager Paul stated that he was assisted in the survey by a man by the name of J. K. Noel, of H.M. Customs. Mr. Noel, under oath, denied this.

"J. K. Noel, of H.M. Customs, whose duty, it appears from his evidence, is to inspect all vessels, and to see that their certificates of registry and inspection are in proper order, knew that the steamer Imperial (so-called) had no certificates, and yet allowed her to continue to run with passengers and cargo, between the ports aforesaid, in direct contravention of the law relating thereto. This whole matter appears to have been most irregular, and is brought by the Court to the attention of the Department of Customs."

"At about 5.00 p.m. on Aug. 23, 1907, the steamer Imperial (so-called), in charge of Wm. Paul, Senr., as Master, backed out from her berth, at section 20, and, when clear of the end of the Victoria pier, starboarded her helm, to cant the vessel head down river. When orders were given to steady the helm, the wheel could not be righted, and the vessel continued to move, in obedience to her starboard helm, till she struck, and sunk, the barge Germaine. The wheel chains are supposed to have jammed in the rudder blocks, and freed themselves again when she backed out, after striking the barge. The evidence is also very unsatisfactory with regard to the signals to the engine room. The Master, in his evidence, states that, although he knew the bells could not be relied upon, he gave the signals to stop and go astern by the bell, but, finding the engines were still going ahead, he went down to the engine-room himself to communicate with the engineer, instead of at once using the whistle, as he was in the habit of doing, to signal to the engineer to stop and go astern, there being no means of repeating the signals, or communicating with the bridge from the engine room, either by a repeating signal, or as voice tube. Sec. 621, cap. 113, of the Act respecting Shipping in Canada, is as follows:

"'Every passenger steamboat shall be provided with wire tiller ropes, or iron rods or chains, correctly and properly laid with suitable rollers for the purpose of steering and navigating the vessel, and shall use wire bell pulls for signalling the engineer from the pilot house, where bells are used, together with tubes of proper size so arranged as to transmit the sound of the engine bells to the pilot house, or other arrangement approved by the inspector to repeat back the signal'

"The evidence proves that there was a lack of discipline, and a want of organization, and of regular inspection, on this vessel; she was navigated in a haphazard manner. There was manifestly a want of care taken in reference to the equipment; the rudder chains had been foul, on previous occasions, from preventible causes, and the signal bell to the engine room had also failed to work, on account of the members of the crew having used the bell wires as clothes lines. The Inspector of Hulls overlooked the fact that there was no system whatever of repeating signals from the engine room to the bridge; this should have been taken exception to by the inspector, at the time of his inspection, and he should have called the attention of the owners to the omission. The defence of inevitable accident cannot be sustained. Capt. Wm. Paul, who holds a certificate as master of a passenger steamer on the minor inland waters, is severely censured, and warned to be more careful in future, as the Court considers that it is the master's duty to see that the steering gear, and means of communicating his orders to the engine room, are in proper order, more especially, as stated above, similar circumstances had occurred frequently. It is also recommended by the Court that the Department of Marine deal with the Inspector of Hulls for his negligence in this respect.

"The Court therefore finds that the steamer Imperial (so-called), her master and owners, are responsible for the sinking of the barge Germaine, which was providentially unattended with loss of life."

Writs of seizure in the Admiralty Court have been taken out against the steamboat Imperial by A. Massicotte and E. Laliberte, both of St. Jean de Chaillons, Que., who are the owners of the barge Germaine and her cargo respectively. Mr. Massicotte claims $5,500 for the barge, Mr. Laliberte claiming $500 for the cargo of bricks.

Negotiations are in progress between the Canadian and United States Governments, the Imperial Government being also a party, with a view to arranging a treaty for the settlement of all questions affecting international waterways.

The Montreal Board of Trade has been discussing the probable effect upon the water level of the St. Lawrence River, of the projected Lake Erie-Pittsburg Canal. The Board decided to draw the attention of the Government to the project and to guard against any diversion of water which might affect the level of the St. Lawrence.

B.C. and Pacific Coast Marine.

Capt. J. Griffiths, of Seattle, Wash, has purchased the German steamship Arthur Fitger, for use in the iron ore trade between Irondale, Wash., and Quatsino Sound, B.C. She was built by Harland & Wolff, Belfast, Ireland, in 1880, is 1,609 tons register, and will continue to sail under the German flag.

Joseph K. Smith and Co., Ltd., has been incorporated under the British Columbia Companies' Act, with a capital of $10,000 and offices at Vancouver, B.C., to carry on a general ship-broking business, and in connection therewith to own and operate steam and other vessels, docks, wharves, and warehouses.

Stracey and Garland, Limited, has been incorporated under the British Columbia Companies' Act, with a capital of $300,000 and offices at Vancouver, to take over the business of timber merchants and tug owners, etc., now carried on by A. H. Stracey and M. Neelin Garland, and to carry on and extend the same.

The City Wharf Co. has been incorporated under the British Columbia Companies' Act, with a capital of $25,000, to own and operate steam and other vessels; to act as ship brokers, insurance brokers, freight contractors, stevedores, etc., and to carry on any other businesses that may be properly carried on in connection therewith.

The Marine Department has under consideration tenders for the supply and delivery in Vancouver of a double cylinder tandem hoisting engine, winch with four hoisting drums and two winch heads, an upright steel tubular steam boiler of 30 h.p. capacity, and a structural steel derrick for the British Columbia buoy scow.

Press reports state that the C.P.R. has placed an order with the Fairfield Co., Govan, Scotland, for a new steamship for its Vancouver-Seattle service. Her dimensions are given as: length, 340 ft.; breadth, 48 ft.; depth, 18 ft., and it is stated she will be provided with two sets of four cylinder triple expansion engines and twin screws for a speed of 22 knots.

Owing to the presence of the plague in San Francisco, Cal., vessels from that port are excepted from the order of July 9, 1907, excepting certain vessels from the quarantine regulations at Canadian ports. Until further notice vessels arriving at Canadian ports from San Francisco will be dealt with in the manner prescribed in the quarantine

specifications of a new vessel similar to the Princess Victoria, for the Pacific Coast service. We are advised that reports to the effect that the proposed new boat would replace the Princess Victoria, are incorrect, the increase of business offering necessitating an additional service.

The British Columbia Government received applications to Sept. 28 for a charter for a ferry to ply between Summerland and East Summerland, Okanagan Lake, 2¾ miles. The charter will expire June 30, 1909, two trips a day each way to be made by a steamboat conforming in all respects to the requirements of the Canadian Steamboat Inspection Act. The Government will pay $250 at the expiration of every three months of satisfactory service during the continuance of the charter.

Notices to Mariners.

The Department of Marine, Ottawa, has issued the following notices to mariners:

No. 67. Aug. 2.—Quebec—New Brunswick —186. Restigouche river, aids to navigation.

No. 68. Aug. 7.—Lake Erie—187. Lake Erie, western end, Hen island, shoal northnortheastward. 188. Detroit River, Limekiln crossing, north light vessel, change of characteristic of light. 189. U.S.A.—Lake Erie, Buffalo harbor, and Niagara River, storm signal stations. 190. River St. Mary, old channel, Neebish island (Hen and Chickens), range lights re-established.

No. 69. Aug. 7.—Nova Scotia—191. South coast, Egg Island, color of gas buoy light, erratum in list of lights. 192. Newfoundland.—West coast, St. George's Bay, St. George's harbor, conspicuous objects.

No. 70. Aug. 7.—Quebec.—193. River St. Lawrence, ship channel between Quebec and Montreal, Cap Madeleine, changes in buoyage. 194. River St. Lawrence, ship channel between Quebec and Montreal, Pouillier Laforce, gas buoy established. 195. River St. Lawrence, ship channel between Quebec and Montreal, Lake St. Peter, gas buoys established.

No. 71. Aug. 8.—British Columbia.—196. Off southwest approach to Brown passage, uncharted rock. 197. Dixon entrance, Queen Charlotte Islands, dangers off Rose point.

No. 72. Aug. 9.—British Columbia.—198. Chatham sound, southern approach to Prince Rupert harbor, shoals, hydrographic notes. Alaska.—199. Stephens passage, Taku harbor entrance, Stockade point, light established. 200. Lynn canal, Chilkoot inlet, Battery point, light established.

No. 73. Aug. 7.—Ontario.—201. Canadian list of lights and fog signals, new edition. 203. Lake Erie, Port Stanley, breakwater under construction, caution.

No. 74. British Columbia.—203. Tolmie channel, Sarah Island, Boat Bluff, gas-lighted beacon established. 204. Grenville channel, Morning reef, gas-lighted beacon established.

No. 75. Quebec.—205. Saguenay River, Chicoutimi, change in light. 206. River St. Lawrence, Pilgrim shoal, gas and bell buoy changed. 207. River St. Lawrence, Beaujeu bank, gas and bell buoys changed.

No. 76. Aug. 17.—Ontario—208. Lake Ontario, Port Dalhousie, fog alarm established. 209. Lake Erie, Pelee passage, Grubb reef, gas buoy changed. 210. Lake Erie, Mouth of Detroit River, Bar point, cut gas buoy changed. 211. Lake Huron, Southampton, gas buoy established off north end of Chantry Island bank.

No. 77. Aug. 17.—Quebec—212. Chaleur Bay, Carleton, wharf and light.

No. 78. Quebec—213. Gulf of St. Lawrence, Anticosti, Heath point, tower being increased in height, temporary light.

No. 79. Aug. 23.—Ontario—214. Lake Huron, North channel, Manitoulin Island, improvements at Little Current, range lights established, and town light discontinued. 215. Lake Huron, Manitoulin Island, west end, Mississagi strait, temporary light.

No. 80. Aug. 26.—Ontario—216. Georgian Bay, west side, Cabot head, fog alarm building destroyed by fire.

Among the Express Companies.

A. C. Thorne, heretofore in the Montreal office, Dominion Ex. Co., has been appointed agent at Halifax, N.S.

Amongst the matters which will engage the attention of the Board of Railway Commissioners, shortly, is, it is reported, an enquiry into the rates charged by Express Cos., and it is regarded as probable that orders will be promulgated for substantial reductions in many cases.

W. C. Muir, heretofore Auditor of the Canadian Northern Ex. Co. at Winnipeg, has been appointed Superintendent of the same company, in charge of the territory covered by the Canadian Northern Ontario, the Canadian Northern Quebec, and the Quebec and Lake St. John Railways, and also Superintendent of the Halifax and South-Western Ry. Express Department. Office, Toronto.

Telegraph and Cable Matters.

The annual meeting of the Yale-Kootenay Telegraph Co. was held at Rossland, B.C., Sept. 11. The company is one of the Great Northern Ry. (U.S.) subsidiaries, and the directors are officials of that company. No separate report is issued.

W. C. Muir, heretofore Auditor of the Canadian Northern Express Co. at Winnipeg, Man., has been appointed Superintendent of the Canadian Northern Telegraph Co., operating on the Canadian Northern Ontario Ry. Office, Toronto.

An English paper stated recently that the British Admiralty had issued revised regulations for the use of wireless telegraph apparatus for the transmission of private messages and for the despatch of parcels to His Majesty's ships. It has been suggested that the writer responsible for the inclusion of the latter portion of the regulation is a little before his time.

It is reported that patent rights have been granted in several European countries, and also in the U.S., and a company organized, for the manufacture of glass telegraph and telephone poles; the glass being reinforced by a series of interwoven wire threads. The advantage claimed for such poles is that they are impervious alike to the ravages of insects and climatic influences.

The Dominion Deforest Wireless Telegraph Co. recently took action for libel, claiming $100,000 as damages, against the proprietors of a U.S. publication. The defendants claimed that the action should be dismissed, on the ground that their publication is not a newspaper within the meaning of the law, and that action should have been taken in the U.S., and not in Canada, but this contention was not upheld.

The C.P.R. telegraphers have applied to the Department of Labor for a board of conciliation and arbitration in their dispute with the company. J. G. O'Donoghue will represent the operators, and Wallace Nesbitt, K.C, Toronto, will appear for the company. Prof. Adam Shortt, Queen's University, Kingston, Ont., has been agreed upon as chairman, and he has had a conference with D. McNicoll, Vice-President C.P.R., and an official of the Order of Railway Telegraphers, on the subject.

G. Marconi, who arrived at Sydney, N.S., Sept. 22, stated in an interview that all the difficulties in regard to the transmission of messages across the Atlantic had been overcome, and that success was assured. It was hoped to open the station at Glace Bay about the middle of October. It is stated that the rates to be charged for messages between Glace Bay and Ireland are, for ordinary messages, 10c., and press messages 5c. a word, respectively, the land charges in each case being an additional charge.

At a meeting of the Ottawa Board of Trade, Sept. 11, Sir Sandford Fleming spoke strongly in favor of a radical method of dealing with telegraphic tolls throughout the Dominion. At the close of his remarks he moved a resolution approving the action of the council, taken in connection with the proposed chain of Empire cables, favoring the nationalization of the telegraphic service and the establishment of a state Atlantic cable, all under direct Government control, and authorizing the council to memorialize the Government in connection therewith.

It is understood that the Marconi Wireless Telegraph Co. has instituted an action against the Dominion Government, so as to determine what its standing is under the agreement with the Government. The Marconi Co. claims, under this agreement, to have the option of erecting and operating of any or all wireless telegraph stations proposed or required by the Government. The Department of Marine has been advised that there is nothing in the terms of the agreement to prevent the Crown from erecting wireless telegraph stations and equipping them with instruments other than those of the Marconi Co.

The Pacific Cable Board.

The report and accounts of the Pacific Cable Board for the year ended Mar. 31, have just been issued. The report states that the Atlantic companies afforded uninterrupted cable communication throughout the year, and a rapid and efficient service. In Canada the winter was exceptionally severe, and the C.P.R. lines in British Columbia and elsewhere suffered considerable interruption. The greater security of the lines between Vancouver and the cable station at Bamfield is a matter on which the Board is in communication with the railway companies, and it is hoped that the railway extension to Alberni will secure a safer route across the island for the telegraph lines than the present one. The accounts show a total capital expenditure to Mar. 31 last, of £1,998,460 18s. 7d., compared with £1,997,707 18s. 6d. at the same period of 1906, or an expenditure on the year of only £753 0s. 1d. The total revenue from traffic receipts (less £3,401 13s. 2d. paid to the C.P.R. and the Atlantic telegraph companies in connection with messages) was £113,000 0s. 1d., or, with interest of £516 7s. 1d., a total revenue of £113,516 7s. 2d. The amount of the Parliamentary grant was £99,487 15s. 10d., bringing the total revenue to £213,004 3s. Working expenses, including £1,425 14s. 9d. contribution to provident fund and £33,000 transferred to cable repair, reserve and general renewal fund, were £90,895 1s. 4d. Adding £77,544 18s. for the replacement of capital, the total expenses came to £168,439 19s. 4d., leaving a balance of £44,564 3s. 8d. The net message revenue was £113,000 0s. 1d., against £91,814 8s. 11d. The actual expenditures £90,895 1s. 4d., against £86,963 17s. 10d. for the previous year; showing a surplus of £22,621 5s. 10d. The sum of £77,544 18s. having to be provided for interest and sinking fund, the deficiency on the year's working was £54,923 12s. 2d., against £72,556 1s. 9d. for the previous year. This deficiency is made good by the contributing countries in the following amounts: Great Britain, £15,256 11s. 2d.; Canada, £15,256 11s. 2d.; Australia, £18,307 17s. 5d.; New Zealand, £6,102 12 s. 5d.

General Telephone Matters.

The ratepayers of Whitevale, Man., have decided to start an independent telephone system

The Nova Scotia Telephone Co. is extending its lines from Lakeville to Grafton and Somerset.

The Bell Telephone Co. has placed the central energy system in operation on its lines at Brandon, Man.

The Alberta Government has taken over the lines formerly controlled by the Alebrta Telephone Co.

The Independent Telephone Co. has installed its telephones at Pickering Station, Ont., on the G.T.R.

It is reported that the Bellechasse Telephone Co. of Quebec proposes to instal an automatic telephone system shortly.

A telephone system has been installed at Hopewell Cape, N.S., and a connection is given with the long distance lines of the province.

It is understood that a company will be incorporated shortly to construct and operate telephone lines in the townships of Blenheim and Burford, Ont.

The Niagara District Telephone Co. has completed its telephone lines to Beamsville, Ont., and is commencing construction of an extension to Silverdale.

The Cornwallis, Man., Council is discussing a proposal to construct a telephone system which, when completed, will be connected with the Government system.

The ratepayers of Milton, Brampton and Acton, Ont., are discussing the advisability of promoting an independent telephone system in each of their respective townships.

The report for the year recently closed of the civic telephone system of Edmonton, Alta., shows a surplus of $7,495. The number of instruments in use during the year was 727.

The Independent Telephone Co. of Caledonia, Ont., has made considerable progress towards the completion of its system, which it hoped to have working at the end of September.

The Tisdale Telephone Co. has been incorporated with offices at Tisdale, Sask., under the provisions of the Northwest Territories ordinance respecting joint stock companies.

The joint councils of Virden and Wallace, Man., as the result of recent meetings, have decided on the installation of telephones on the system adopted by the Manitoba Government.

The Bell Telephone Co. has erected the first of its branch exchanges in Winnipeg. It is two stories high and constructed of brick and steel. It is expected to have it opened for business in October.

The following have been elected officers of the Fort Seneca, B.C., Mutual Telephone Co.: President, L. C. Umsted; Vice-President, W. C Rosenberger; Secretary, I. S. Edwards; Treasurer, F. Edwards.

The contracts relating to the erection of the proposed telephone exchange building, and the construction of the subways, at Brandon, Man., are to be placed shortly, and it is hoped that the work will be commenced this fall.

The Sechelt Brick and Tile Co., Ltd., and the British Columbia Cedar Lumber Co., Ltd., recently incorporated under the British Columbia Companies' Acts, have power, among other things, to construct telephone lines on their properties.

The following have been elected officers of the Blenheim and South Kent Telephone Co., Blenheim, Ont.: President, C. D. Laneferd; Vice-President, N. Watson; Directors, T. L. Pardon, W. J. Huffman, J. Rutherford; Secretary-Treasurer, G. Taylor.

R. L. Borden, leader of the Opposition in the House of Commons, in a recent speech advocated "the establishment, after due investigation, of a system of national telegraphs and telephones under conditions which shall be just to capital already invested in those enterprises."

A telephone line is being strung between Sackville and Cape Tormentine, N.B. The work, it is expected, will be completed early in Oct. When the line is finished there will be a trunk line, metallic circuit, between Sackville and Port Elgin, a local line to Jolicure, and another to Point de Bute.

The Premier of Saskatchewan stated recently that his Government would follow the lead given by the Governments of Manitoba and Alberta, in the establishment of a state-owned telephone system. The services of an expert have been engaged to investigate and report as to the best system to be adopted and the possibilities of a state-owned system throughout the province.

Recent reports as to the progress of construction upon the Government telephone lines in Alberta, show that the stringing of the wires on the Lacombe-Stetler line has been completed, and the Stetler-Daysland line was expected to be finished by the end of Sept. Eighty miles of the Macleod-Blairmore line have been completed, and a rural line from Vegreville north is under construction. The equipment of exchanges and the installation of instruments is being proceeded with as fast as possible. At Fort Saskatchewan the equipment is being standardized and a metallic circuit put up. The standardization of the exchange at Blairmore, taken over from a private company, has been completed.

The report of the commissioners appointed to investigate the dispute between the Bell Telephone Co. and its Toronto operators, was issued Sept. 12. The finding generally upholds the position assumed by the operators, and recommends that a commission of medical experts should be appointed to further consider the matter. Amongst other recommendations and suggestions are: A 6-hour day spread over about 8 hours; one day in the week as holiday; overtime to be prohibited; age limit at which girls are to be employed to be fixed at 18; medical examination of operators before engagement; the extension of the criminal law regarding listeners; and the appointment of a permanent Board of Conciliation, composed of officials and operators.

The second annual convention of the Canadian Independent Telephone Association took place in Toronto Sept. 4, under the presidency of A. Hoover, Green River, Ont. The morning session was principally concerned with the Secretary's report, election of officers, and other details of organization. At the afternoon meeting a number of resolutions were brought forward and discussed dealing chiefly with the position of independent telephone companies as regards other telephone companies, under the Railway Acts, exclusive contracts, public ownership, etc. The following officers were elected for the current year: President, J. F. Demers, Levis, Que.; Vice-Pr sident, W. Doan, Harrietsville, Ont.; Secretary-Treasurer, F. P. Wilson, Toronto.

The Manitoba Government has let a contract to J. M. and J. J. Kelly, Winnipeg, for the erection and equipment of a building in the city for use as a telephone exchange. The contract price is $97,172, and includes everything except plumbing and heating. A contract for the construction of 15 miles of subways and 100 miles of duct feeds in the city in connection with the telephone system has been let to Stone and Green, Minneapolis, Minn., at a minimum of $83,000. This will form a perfect network of conduits around the city. Very few of the wires will be laid on Main St. From Graham Ave. to the city hall will be the extent. Then on Portage Ave. the conduits will commence at Colony St. and run west as far as Burnell St. The principal cable will be laid on McDermott St.; but Notre Dame is exempt. A crossing under the C.P.R. tracks will be effected at King St. A line will run along Higgins Ave. as far as Louise Bridge; another will run along Charlotte and Hargrave streets to a lane south of Broadway; another up Logan to Nena; one up Sargent St. as far as Beverly; another along Osborne St. and Pembina Ave. as far as Fleet St. Branches from this later line will supply the residents of Fort Rouge. Beside these underground lines, the provincial telephone department will in all probability erect pole lines in different parts of the city.

THE PIONEER

"AXLE LIGHT"

(Trade Mark)

More cars equipped with this system than all other electric light systems combined. Being the BEST, makes it the cheapest equipment. Costs less to maintain than any other system. Installed on 75 railroads. Send for printed matter and prices. Avoid infringements by ordering "AXLE LIGHT" equipments from this company or its agents.

Consolidated Railway Electric Lighting & Equipment Company

General Offices: Hanover Bank Bldg., New York.
Western Office: 2023 S. Clark Street, Chicago, Ill.

RANK & GOODELL, Agents, 801 Pioneer Press Bldg., St. Paul, Minn.

Since January 1st, 1907, the BLISS ELECTRIC CAR LIGHTING COMPANY has sold more Axle Light equipments than all other electric car lighting companies combined, and is to-day doing more than seventy-five per cent. of the electric car lighting business on the Railways of the United States. It also has an efficient and economical train lighting system. Correspondence solicited.

Westinghouse

"ET" Engine and Tender Brake Equipment

The "ET" equipment gives **two separate and distinct means** of applying locomotive brakes, one automatic, the other independent straight-air, both always **available for instant use.** The engineer has absolute control of the train, with a breaking power **always the same for any given brake-pipe reduction,** regardless of conditions that would ordinarily make it vary on each engine, such as brake-cylinder leakage, unequal piston travel, etc.
The brakes may be graduated on and off either by the automatic or the independent straight-air system, and **applied or released in conjunction with or independently of the train brakes,** insuring manifest important advantages in traffic operation, not heretofore obtained. Its simplicity makes it easier to install, handle and maintain than any other type of locomotive brake.

C.P.R. Annual Meeting.

At the annual meeting in Montreal Oct. 2, Sir Wm. Van Horne, Chairman of the Board, presided. The President, Sir Thos. G. Shaughnessy, in moving the adoption of the report for the year ended June 30, which was published in our last issue, said:

The twenty-sixth annual report of the company, which I have the honor, on behalf of the directors, to submit for your approval, shows an increase in your gross revenue from traffic of more than eleven million dollars for the year, but the effect of an unusually severe winter and of the enhanced cost of labor and material is shown in the increased ratio of working expenses to income

You will have noticed by the statements included in the report that the works of improvement on different sections of your system, necessary to facilitate the handling of your traffic, have been vigorously prosecuted, and that the outlay for additional cars and locomotives was particularly large. I may add that since the close of the fiscal year there has been no change in the policy of your directors with reference to these matters; indeed, unless the business of the country has a serious and prolonged setback, and there are no present grounds for such an apprehension, circumstances will make it necessary to continue these expenditures year by year, but it may be on a somewhat reduced scale. To provide the requisite means, your directors will, at a future date, ask you to sanction the issue of the balance of the ordinary share capital authorized, as and when required, but there are sufficient funds on hand to meet all immediate requirements.

In Ontario, although the yield of wheat was satisfactory, the season has not been an auspicious one for other crops, and in Western Canada, where you are more largely interested, the very backward spring has resulted in a shrinkage of probably 25% in the quantity of marketable wheat as compared with last autumn. There will, however, be a very considerable increase in the quantity of oats and other grains, so that, with the higher price of wheat, the farmers of Western Canada will receive in the aggregate quite as much for their produce as they did last year.

Because of the late harvest and the consequent delay in the movement of grain, we carried to the ports on Lake Superior during the month of September only 1,381 carloads, as against 4,898 carloads in September, 1906, but notwithstanding this large falling off in that particular class of traffic, your comparative weekly earnings have thus far shown no diminution, and we anticipate an extraordinary rush of grain to the head of Lake Superior before the close of navigation.

While the comments on the report in financial papers are generally complimentary, my attention has been called to one or two articles in which it is suggested that the directors should bring before the shareholders the tangible value of the company's land assets. It is not easy to do this with any degree of accuracy, but it may be fairly assumed that, in the case of your agricultural lands, as sales are made and the area decreases, the value of the remaining lands will be enhanced, and, as a consequence, the 8,900,000 acres of the original grant still unsold will yield on the average a price per acre considerably higher than has heretofore been realized, without in any manner obstructing settlement or depriving your company of the traffic advantages resulting from the cultivation of lands tributary to your lines.

W. C. HUNTER.
Manager New Brunswick Coal and Railway Co.

Your lands in British Columbia are of a different character, their main value being in the standing timber and the possibility of large coal deposits, although there are some areas in the valleys suitable for cultivation. During the last couple of years a considerable demand has sprung up for these lands and the timber, and ultimately they will yield a handsome return.

By the end of the present season 361 miles of canals and ditches will have been completed in the western section of the irrigation block, sufficient to give water to approximately 210,000 acres out of a total of 350,000 acres to be served in that section, and the ultimate cost of the work, which should be finished next year, will be in the neighborhood of $6.50 per acre, including the expenditure on the main canal, which will be available for the central and eastern sections as well. While this expenditure gives a largely increased value to the irrigated lands themselves, the adjoining areas greater in extent, but that are above the ditches and cannot therefore be served by water, are being made available, and are now selling at prices considerably above the average of your sales. Thus your directors confidently believe that not only will your investment in the irrigation canals and ditches be profitable, but that a large tract of territory along your main line east of Calgary, that by reason of the uncertainty of the rainfall would otherwise have remained bleak and uncultivated, will be converted into a pleasing and productive district.

Your steamship lines on both the Atlantic and Pacific oceans have not only been directly profitable, but they are very substantial contributors to the revenue of the railways by bringing to it traffic that could not otherwise be secured.

It may be interesting to the shareholders to know that with the exception of the discount on the original sixty-five million dollars of common stock sold nearly twenty-five years ago, when few people had faith in the ultimate success of the enterprise, the aggregate of all the capital stock and securities of other descriptions appearing in the balance sheet has yielded to your treasury cash in excess of their face value. Government and municipal subsidies, whether in the shape of constructed railway lines or money, and the proceeds of the land sales expended on the property, amounting in the aggregate to more than one hundred million dollars, have never been capitalized, nor are they included in the balance sheet item, "railway and equipment."

As indicating how widespread is the interest in your property and the confidence in your stock that prevails with investors in Great Britain, on the continent and elsewhere, I might mention that when the books closed for the October dividend there were 11,203 ordinary shareholders whose respective holdings were fifty shares or less, and from information received through

Galena-Signal Oil Company,

Franklin, Pa., and Toronto, Ont.

Sole manufacturers of the celebrated GALENA COACH, ENGINE and CAR OILS, and SIBLEY'S PERFECTION VALVE and SIGNAL OILS.

GUARANTEE COST per thousand miles for from one to five years, when conditions warrant it.

Maintain EXPERT DEPARTMENT, which is an organization of skilled railway mechanics of wide and varied experience. Services of Experts furnished free of charge to patrons interested in the economical use of oils.

STREET RAILWAY LUBRICATION A SPECIALTY.

GALENA RAILWAY SAFETY OIL

Made especially for use in Headlights, Cab, Classification and Tail-lights, and for Switch and Semaphore Lamps. Burns equally well with the long time as with the one day burner, with or without chimney, as the burner requires.

Is pure water white in color; high fire test; low cold test, and splendid gravity.

Please write to home office for further particulars.

CHARLES MILLER,

PRESIDENT.

banking and security organizations, whose own certificates are outstanding against stock held in trust for clients, I estimate that there are 3,000 other investors of the same class, making in all upwards of 14,000 people whose individual holdings do not exceed fifty shares. Hence it would appear that practically one-third of your entire ordinary share capital is held by these small investors.

There are now in the service of the company quite 74,000 officers and employes, with a monthly pay-roll of $3,700,000, and of the whole number of employes I am safe in saying that 70,000 are located in Canada. Estimated on the ordinary basis of five persons to a family, these would represent 350,000 souls, or more than one-twentieth of the entire population of the Dominion, and if there be added the men in rail and rolling mills, lumber mills, car and locomotive manufactories, and other industrial establishments who are engaged in the manufacture of material in large quantities for the purposes of the company, I should say that one-fifteenth, if not one-twelfth, of the people of the country directly or indirectly receive their income from the company.

The dividend from land interest account will be the same in the current year as it was in the last, namely, one per cent. in nwo semi-annual instalments of ½% each.

The resolution adopting the report was seconded by R. B. Angus and agreed to.

Resolutions were then unanimously passed:

Authorizing the signing of a lease of the St. Mary's and Western Ry., when constructed, from St. Mary's to a connection at or near Embro, Ont., with the proposed extension of the Tillsonburg, Lake Erie and Pacific Ry., already leased by the C.P.R., a distance of 15¼ miles, for a term of 99 years on a basis of a rental of 40% of the gross earnings as defined in the lease, with a minimum rental of $7,930 a year, which represents 4% on $198,250 first mortgage bonds of the St. M. and W. Ry., at the rate of $13,000 a mile, and with an option in favor of the C.P.R. to purchase the whole of the capital stock of the St. M and W. Ry. at any time within twelve years for the sum of $25,000.

Approving an agreement made with the directors of the Northern Colonization Ry. for the construction of that company's railway from Nominingue to Rapide de L'Orignal, Que., about 34 miles; and authorizing the directors to acquire the bonds issued or to be issued in respect of such extension, the interest thereon at 4% being guaranteed by the C.P.R., the total bond issue not to exceed $20,000 a mile of such extension; the directors being also authorized to issue its consolidated debenture stock for the purpose of acquiring the said bonds.

Authorizing the directors to issue and dispose of 4% consolidated debenture stock not exceeding in the aggregate $40,000 a mile, being an amount of $10,000 a mile in addition to the amount previously authorized to be issued in respect of the construction of the Bolton-Sudbury branch. The original resolution was passed Oct. 5, 1904, and authorized the issue of consolidated debenture stock at the rate of $30,000 a mile in respect of the branch of 226 miles. Owing to the difficult character of the country through which the line is being constructed and the increased cost of labor and materials, parliamentary sanction was obtained to issue stock to the extent of $40,000 a mile, which the resolution of the shareholders now authorizes to be issued.

Authorizing the directors to make such arrangements and contracts as they may deem advisable, and at such time and times as they may deem expedient, for the purpose of meeting the requirements of the company's Pacific Ocean trade by providing a faster and more frequent service, and, with that object in view, to acquire by purchase or construction two additional steamships and equipment, or to transfer the steamships Empress of Britain and Empress of Ireland from the Atlantic to the Pacific service, and in the event of such transfer to make such arrangements and contracts as they may deem advisable, and at such time and times as they may deem expedient, for the acquisition by purchase or construction of two larger and faster steamships and equipment to take the places of the two so transferred, and to incur such capital expenditure as may be necessary to give effect to this resolution.

Authorizing the extension of the Moose Jaw Branch, now under construction for 50 miles, for a further distance of 100 miles in a northwesterly direction, and the construction of a branch line from Regina to a point in the vicinity of Saskatoon, Sask., 165 miles, whenever it is deemed advisable to do so; and authorizing the directors to issue consolidated debenture stock not exceeding in the aggregate £4,000 a mile.

Authorizing the issue of consolidated debenture stock for the construction and equipment of the new lake steamers Assiniboia and Keewatin, at a cost of £180,000, and of a new steamer of the Princess type for the Victoria-Seattle run, at a cost of £125 000, the total issue of stock to be £305,000.

On the motion of Sir G. A. Drummond, seconded by W. D. Matthews, the by-law respecting the executive committee was amended by increasing the membership from four to five.

The retiring directors, R. B. Angus, Hon. L. J. Forget, E. B. Osler, M.P., and Sir Wm. Van Horne were re-elected for a further period of four years.

On motion of W. H. Evans, seconded by G. W. R. Notman, a resolution thanking the directors and officers for their services was passed.

After the meeting adjourned the directors met and elected the following officers: Chairman of the Board, Sir Wm. Van Horne; President of the company, Sir T. G. Shaughnessy; Vice-President, D. McNicoll; Executive Committee: Sir Wm. Van Horne, Lord Strathcona, R. B. Angus, E. B. Osler, Sir T. G. Shaughnessy, D. McNicoll.

An application will be made at the forthcoming session of the British Columbia Legislative Assembly, for an act to incorporate a company with power to build, equip, maintain and operate a line or lines of railway of standard gauge from a point at or near Port Simpson or Work Channel, in the Coast District by the most feasible and practicable route to a point in the eastern boundary of the Province, via the southwest side of Work channel to the Skeena river, thence up the north side of the Skeena river to a point near Hazleton, from there to the junction of the Bulkley River and up its right bank for eight miles to the Suskewa River, following this river by a low divide to the head of Babine Lake, thence north to McLeod Lake and to the Misnichinca River, passing alongside this river by Summit Lake to Pine River Pass, and northwesterly to the head of Pine River, down its course to Moberly Lake, and thence by the Peace River to the easterly boundary of the Province. Power will also be sought to construct branches from the proposed main line, not exceeding in any one case fifty miles in length, and also to construct or acquire wharves, docks, steam or other vessels, telegraph and telephone lines, to transmit messages for commercial purposes and to collect tolls therefor.

November Birthdays.

Many happy returns of the day to

A. B. Atwater, Assistant to the 2nd Vice-President and General Manager G.T.R., for lines west of Detroit and St. Clair rivers, Detroit, Mich., born at Sheffield, Ohio, Nov., 1845.

W. F. Brougham, Local Right-of-Way and Lease Agent C.P.R., Vancouver, B.C., born in Westmoreland, Eng., Nov. 25, 1865.

G. B. Burchell, General Manager Canada Coal and Ry. Co., Joggins Mines, N.S., born at Sydney, N.S., Nov. 1, 1877.

M. J. Butler, Deputy Minister of Railways and Canals, Ottawa, born at Deseronto, Ont., Nov. 19, 1856.

J. R. Cameron, Superintendent District 1, Canadian Northern Ry., Port Arthur, Ont., born at Truro, N.S., Nov. 5, 1865.

F. Conway, Acting General Superintendent Kingston and Pembroke Ry., Kingston, Ont., born at Ernestown, Ont., Nov. 19, 1850.

C. W. Cooper, Assistant General Passenger Agent, Canadian Northern Ry., Winnipeg, Man., born at Montreal, Que., Nov. 16, 1868.

W. L. Creighton, Advertising Agent Intercolonial Ry., Moncton, N.B., born at Derby, Eng., Nov. 9, 1871.

W. Downie, General Superintendent C.P.R. Atlantic Division, St. John, N.B., born at Rock Currie, Ireland, Nov. 12, 1850.

L. Drago, Canadian Passenger Agent, New York Central Rd., Toronto, born in Raleigh Tp., Kent County, Ont., Nov. 7, 1860.

C. Drinkwater, Secretary and Assistant to the President, C.P.R., Montreal, born at Ashton-under-Lyne, Eng., Nov. 17, 1843.

Jos. Dubrule, Jr., Manager Canadian Pacific Car and Passenger Transfer Co., Prescott, Ont., born at Spencerville, Ont., Nov. 14, 1872.

F. W. Flanagan, General Passenger Agent C.P.R., London, Eng., born at Kingston, County Dublin, Ireland, Nov. 23, 1862.

C. R. Hosmer, director C.P.R., born at Coteau Landing, Que., Nov. 12, 1851.

J. McGillivray, Superintendent Inverness Ry. and Coal Co.'s lines, Inverness, N.S., born at Nairn, Scotland, Nov. 13, 1867.

C. Murphy, Superintendent C.P.R., London, Ont., born Nov. 20, 1865.

F. Nicholls, President Niagara, St. Catharines and Toronto Ry., director Canadian Northern Ry., born in England, Nov. 23, 1856.

P. A. Peterson, Chief Engineer Guelph and Goderich Ry., Goderich, Ont., born at Niagara Falls, Ont., Nov., 1839.

H. J. Pettypiece, C.P.R. ticket agent, Forest, Ont., born near Amherstburg, Ont., Nov. 11, 1855.

J Rennie, Master Mechanic Caraquet Ry., Bathurst, N.B., born at St. John, N.B., Nov. 1, 1858.

W. G. Roche, contracting freight agent Canadian Pacific Despatch, Detroit, Mich., born Nov 3, 1877.

J. D. Rowe, Treasurer Central Ontario Ry. at Trenton, Ont., born at Ameliasburg, Ont., Nov. 7, 1864.

H. P. Sharpe, General Agent Dominion Express Co., Toronto, born at Brockville, Ont., Nov. 24, 1864.

G. H. Shaw, Traffic Manager Canadian Northern Ry., Winnipeg, Man., born at Smith's Falls. Ont., Nov. 25, 1859

F. M. Spaidal, Superintendent Canadian Northern Ontario Ry., Toronto, born at Gananoque, Ont., Nov. 13, 1858.

J. Sparks, Assistant General Baggage Agent C.P.R. Western Lines, Winnipeg, Man., born in London, Eng., Nov. 25, 1874.

H. P. Timmerman, General Superintendent C.P.R., Eastern Division, Montreal, born at Odessa, Ont., Nov. 6, 1856.

Arthur White, ex-Division Freight Agent G.T.R., at Toronto, born at Hadleigh, Suffolk, Eng., Nov. 17, 1840.

H E. Whittenberger, Superintendent Eastern Division G.T.R., Montreal, born at Peru, Ind., Nov. 9, 1864.

Orders by the Railway Commissioners.

3436. Sept. 30—Authorizing G.T. Pacific Ry. Co. to construct its railway across certain highways from the west line of township 12, r. 12, w. of principal meridian, to the east line of section 4, township 12, range 8, w. of meridian, District of Portage la Prairie, Man.

3547 to 3554. Sept. 4—Bell Telephone Co. crossings various railways.

3555. Sept. 4—Authorizing Consumers Gas Co., Toronto, to lay main under C.P.R. tracks at Front and Beachell Sts., Toronto.

3556. Sept. 4—Authorizing the Village of Elmira, Ont., to lay a water main under G.T.R. tracks.

3557. Sept. 3—Authorizing A. L. Young, of Dunnville, Ont., to lay a gas main under G.T.R. tracks.

3558. Sept. 5—Approving location of Niagara, St. Catharines and Toronto Ry. from Thorold township to Brantford, Ont.

3559. Sept. 5—Authorizing G.T.R. to construct a branch line to W. Sutton's premises, Simcoe, Ont.

3560-3561. Sept. 4—Authorizing Canadian Northern Quebec Ry. to construct bridges over Belle Isle River, mileage 45.5 west from Quebec Bridge, and over River aux Pommes, mileage 27.3 west from Quebec Bridge, on its Garneau-Quebec division.

3562. Sept. 5—Authorizing Consumers Gas Co. to lay a pipe under G.T.R. tracks at Eastern Ave., Toronto.

3563. Sept. 5—Extending time in order of May 28, 1907, to Nov. 30, 1907, authorizing Canadian Northern Quebec Ry. to use, for construction purposes only, the crossing of its tracks with those of the C.P.R., near Lachevrotiere, Que., mileage 48.4 west from Quebec bridge..

3564. Sept. 5—Approving Alberta Ry. and Irrigation Co.'s Standard Freight Tariff C.R.C. 95, cancelling Standard Freight Tariff C.R.C. 1.

3565. Sept. 6—Bell Telephone Co. crossing of Michigan Central Ry. at Venison Ave., Tillsonburg, Ont.

3566. Sept. 10—Authorizing Brandon, Saskatchewan and Hudson's Bay Ry. to operate its branch line and connect its track with C.P.R. track between 18th and 26th Sts., Brandon, Man.

3567. Sept. 10—Authorizing Crow's Nest Southern Ry. to cross C.P.R. spur on its Crow's Nest branch, near Hosmer, B.C.

3568. Sept. 10—Authorizing Central Ontario Ry. to open for traffic its line from 1½ miles north of Bancroft Station to Maynooth, Ont., 14½ miles.

3569. Sept. 10—Authorizing Wilson Carbide Co. to carry three overhead electric transmission wires across G.T.R. tracks at Merritton, Ont., and to locate upon the G.T.R. lands two poles.

3570. Sept. 10—Authorizing Provincial Light, Heat and Power Co. to erect a 44,000 volt transmission line over the Montreal Park and Island Ry. on lot 138, near Montreal West, Que.

3571. Sept. 7—Authorizing Brandon, Saskatchewan and Hudson's Bay Ry. to operate its trains over, upon and through the Canadian Northern Ry. tracks at Minto, Man.

3572 and 3573. Sept. 7—Authorizing Brandon, Saskatchewan and Hudson's Bay Ry. Co. to operate its trains over, upon, and through the C.P.R. tracks near Carroll, Man., and in Boissevain, Man.

3574. Sept. 10—Approving location of Canadian Northern Ontario Ry. through tp. of Hope, Ont., mileage 177 to 188, west from Ottawa.

3575 to 3589. Sept. 13—Authorizing New Brunswick Telephone Co. to place its wires over C.P.R. tracks at various points.

3590. Sept. 17—Authorizing Brougham and Grattan Telephone Co. to carry wires over C.P.R. tracks at or near Douglas Station, Ont.

3591. Sept. 17—Authorizing Brougham and Grattan Telephone Co. to carry wires over G.T.R. tracks at four points in Renfrew County, Ont.

3592. Sept. 17—Amending order 3562 granting leave to the Consumers Gas Co. of Toronto to lay a gas pipe under G.T.R. tracks at Eastern Ave., Toronto.

3593. Sept. 17—Approving book of reference 4 to be used in connection with plan and profile of deviation and grade improvement of G.T.R. between St. Lambert and Ste. Rosalie Jct., Que.

3594. Sept. 13—Authorizing the City of St. Thomas, Ont., to lay a gas pipe under G.T.R. tracks.

3595. Sep. 10—Extending time within which G.T.R. may install an interlocking and derailing plant at the crossing of the G.T.R. and C.P.R. in Yarmouth tp., Ont., as provided by order 3046.

3596. Sept. 6—Authorizing Kaministiquia Power Co. to carry transmission wires over Canadian Northern Ry. tracks at West Fort William, Ont.

3597. Sept. 10—Authorizing G.T.R. to construct a branch line to Dowswell Mfg. Co.'s premises, Hamilton, Ont.

3598. Sept. 13—Authorizing Kaministiquia Power Co. to cross C.P.R. lines in Fort William, Ont.

3599. Aug. 27—Authorizing Northern Extension Ry. to carry its tracks across C.P.R. tracks (Manitoba and Northwestern branch) near Westbourne, Man.

3600. Sept. 19—Authorizing C.P.R. to open for traffic that portion of its main line known as the "Antelope Diversion," mileage 26 to 23.8.

3601. Sept. 18—Approving location of Canadian Northern Ry. through tps. 33-34, ranges 30-33, west prin. mer., and ranges 1-2, west second meridian, Saskatchewan.

3602 to 3605. Sept. 18—Authorizing Bell Telephone Co. to carry its wires over C.P.R. tracks at various points in Manitoba and Saskatchewan.

3606. Sept. 20—Authorizing C.P.R. to expropriate certain lands additional to those it now occupies in Three Rivers, Que.

3607. Sept. 20.—Authorizing C.P.R. to construct a spur line to J. A. Jamieson's premises, Grattan tp., Ont.

3608. Sept. 20—Authorizing C.P.R. to construct certain spur lines in Calgary, Alta.

3609. Sept. 20—Authorizing G.T.R. to construct and operate an additional track across East Main St., Welland, Ont.

3610. Sept. 20—Authorizing Canadian Northern Ontario Ry. Co. to operate a branch line from its main line as located across lot 12, con. F, tp. of Medora, to the shore of Lake Joseph, Muskoka district, Ont.

3611. Sept. 20—Approving revised location of G.T. Pacific Ry. through unsurveyed territory, North Alberta, mileage 83.00 to 119.635.

3612. Sept. 20—Authorizing G.T.R. to construct and operate a spur line to Argue, McColl & Son's premises, Ottawa, Ont.

3613. Sept. 20—Authorizing C.P.R. to construct spur line to East Kootenay Lumber Co.'s premises, East Kootenay district, B.C.

3614,-3615. Sept. 24—Authorizing Windsor, Essex and Lake Shore Rapid Ry. to open for carriage of traffic the portions of its line where it crosses the Pere Marquette Rd. at Pelton and Kingsville, Ont.

3616. Sept. 24—Authorizing Chatham, Wallaceburg and Lake Erie Ry. to open for traffic that portion of its railway from the south side of the G.T.R. main line at Chatham to the north side of the Michigan Central Ry. track at Charing Cross, Ont.

3617. Sept. 23—Cancelling clause j in order of July 6, 1907, and substituting therefor the following: "(j) That the rates from Canadian points on the Detroit and St. Clair River frontier to all points east to the Atlantic and north to the Ottawa River, shall in no case exceed the rates from Detroit and Port Huron." (This clause in its amended form was given in our Aug. issue, pg. 567, for which see the whole order.)

3618. Sept. 21—Authorizing A. F. Dillinger, Operating Assistant to the Chief Traffic Officer, to make inquiry and report to the Board re G.T.R. Co.'s equipment.

3619. Sept. 25—Extending time for one week from Sept. 28, 1907, subject to terms in original order of Aug. 6, 1906, authorizing C. N. Ontario Ry. to use for construction trains only the crossing of its tracks by the C.P.R. near Wahnapitae station, Ont.

3620. Sept. 26—Authorizing C.N.R. to place a diamond in the C.P.R. Wolesley-Reston branch in sec. 7, tp. 14, r. 7, west second mer.; and to operate its trains over such diamond and track for construction purposes until further order.

3621. Sept. 25—Authorizing C. N. Ontario Ry. to open for traffic the portion of its line from Parry Sound to Still River, Ont., mileage 0 to 44.3, subject to the condition that the speed of the trains shall not exceed 20 miles an hour.

3622. Sept. 26—Authorizing Manufacturers Natural Gas Co. to lay a gas pipe over G.T.R. tracks at Catherine St., Hamilton, Ont.

3623 to 3635. Sept. 26—Authorizing C.P.R. to construct spur lines from the Great West Development Co.'s spur to P. Lyall & Sons, Wilton Bros., McDonald, Dure Lumber Co., A. Black Lumber Co., Menzies & McIntyre, Robinson & Co., Dobson & Jackson, McLelland Lumber Co., D. E. Adams, R. Watson & Co., J. B. Hughes Lumber & Fuel Co., and T. Black's premises, Winnipeg, Man.

3636. Sept. 25—Authorizing Erie Telephone Co. to carry its wires across G.T.R. tracks at Nelles Corners, Ont.

3637 and 3638. Sept. 26—Authorizing Vancouver, Victoria and Eastern Ry. to construct its line between Abbottsford and Huntingdon over Riverside road and Farmer Highway, New Westminster District, B.C.

3639. Sept. 26—Approving revised location of G.T. Pacific Ry. from n.w. ¼ sec. 18, tp. 45, r. 7, west, to s.e. ¼ sec. 15, tp. 45, r. 8, west 4th mer., North Alberta, mileage 102.68 to 1.978.

3640. Sept. 26—Authorizing I. A. Sproul to lay a water pipe under C.P.R. tracks in Amaranth tp., Ont.

3641. Sept. 26—Authorizing Toronto, Hamilton and Buffalo Ry. to cross Newport and East Newport Sts., Brantford, Ont., with a branch line from a point on its line to a connection with its track in lot Q.

3642. Sept. 26—Authorizing R. E. Edgar to place a telephone wire across C.P.R. track in Amaranth tp., Ont.

3643. Sept. 20—Authorizing J. Morgan to lay a water pipe under G.T.R. tracks in Lambton tp., Ont.

3644. Sept. 26—Authorizing Ontario Iron and Steel Co. to lay a gas pipe under G.T.R. tracks in Humberstone tp., Ont.

3664. Sept. 30—Authorizing C.P.R. to construct a branch line in Huntingdon tp., Hastings Co., Ont., from a point on the center line of the main line of railway in a southeasterly direction to and into Benson & Lane's premises, west ½ lot 11, con. 8, Huntingdon tp.

3665. Sept. 30—Authorizing C.P.R. to construct three spurs on the n.e. quar. sec. 27, and s.e. quar. sec. 34, tp. 26, n.r. 20, west 5th mer., British Columbia, to Palliser Lumber Co.'s premises.

3666. Sept. 30—Authorizing C.P.R. to construct a branch line at Joliette, Que., from a point on the Joliette branch of its line in a northwesterly direction to Jos. Martel's premises, lot 175.

3667. Sept. 30—Authorizing C.P.R. to construct certain branch lines in north half and s.w. quar. of sec. 3, tp. 10, r. 16, west 4th mer., for the Reliance Coal Co.

3668. Sept. 30—Authorizing C.P.R. to construct a branch line from a point on the main line at station 4390+84.3, about one mile east of Cascade station, in an easterly direction to and into the Yale Columbia Lumber Co.'s premises, lot 349.

3669. Sept. 30—Authorizing Montreal Terminal Ry. to join its tracks with the tracks or lines operated by the Harbor Commissioners of Montreal on La Salle Ave., Montreal, Que.

3670. Sept. 30—Authorizing Consumers Gas Co. of Toronto to lay a 12-inch gas main under C.P.R. tracks at Yonge Street, north of Cottingham St., Toronto.

3671. Oct. 3—Authorizing Dominion Natural Gas Co. to lay a gas pipe under G.T.R. tracks where the same cross Norfolk St., Simcoe, Ont.

3672. Oct. 3—Authorizing that certain agreements between Grand Valley Ry. and Brantford St. Ry. and the Woodstock, Thames Valley and Ingersoll Electric Ry., dated July 2 and Aug. 27, 1907, be recommended to the Governor-in-Council for approval and sanction.

3673. Oct. 2—Authorizing C.P.R. to construct a branch line from a point on Oldfield, Kirby & Gardner's spur to and into the Sherwin-Williams Paint Co.'s premises, lot d.g.s. 35, St. John, N.B.

3674. Oct. 2—Authorizing C.P.R. to construct a branch line from a point on the North Warehouse spur across various lots owned by the Dunlop-McDonald Co., F. F. Higgs, and McLaren Bros., to and into the Alberta Biscuit Co.'s premises, Calgary, Alta.

3675. Oct. 2—Authorizing C.P.R. to construct a branch line from a point on the Oldfield, Kirby & Gardner spur in a westerly direction into the Manitoba Rolling Mills Co.'s premises, lot d.g.s. 35, St. John parish, Winnipeg; also two other branch lines commencing from a point on the first mentioned spur and extending 460 and 510 ft. respectively.

3676. Oct. 2—Authorizing C.P.R. to construct certain branch lines in Algoma district, Ont., commencing from a point on the Turnbull siding in a westerly and southerly direction to Booth & Shannon's premises, tp. 15, Algoma district.

3677. Oct. 2—Authorizing the town of Brampton, Ont., to lay a 10-inch sewer pipe under G.T.R. tracks where same cross Queen St.

3678. Oct. 2—Authorizing C. W. Hartman of Clarksburg, Ont., to place telephone wires across G.T.R. tracks on the 8th con., tp. of Collingwood, Ont.

3679. Oct. 1—Authorizing C.P.R. to open for traffic that portion of its double track between Fort William and Winnipeg, extending from Kakabeka to Kaministiquia, Ont.

3680. Oct. 1—Authorizing approval of Standard Passenger Tariff C.R.C. no. 1 of the Windsor, Essex & Lake Shore Rapid Ry. on the basis of 3c. a mile.

3681. Oct. 4—Authorizing approval of Standard Freight Tariff C.R.C. no. 1 of the W.E. & L.S.R. Ry. Co.

3682 Oct. 4—Authorizing approval of Standard Passenger Tariff C.R.C. no. 54 of the Bay of Quinte Ry., on the basis of 3c. a mile.

3683. Oct. 4—Authorizing approval of supplements 8, 9, and 10 to Passenger Tariff W-38 of the C.P.R.

3684. March 13—Authorizing Ottawa Electric Ry. to widen the bridge and approaches thereto on Somerset St. by 16 ft.; and that the city of Ottawa pay the Ry. Co. one-fourth of the expense involved in the said addition, leaving the question of apportionment of cost between the Hintonburg Village and O.E. Ry. for further consideration.

3685. Oct. 3—Authorizing Bertie Natural Gas Co. to lay a gas main under G.T.R. tracks at South Mill St., in Ridgeway Village, Ont.

3686-3692. Sept. 30—Authorizing New Brunswick Telephone Co. to place its wires across C.P.R. and Temiscouata Ry. tracks at various points in New Brunswick.

3693. Oct. 4—Approving location of proposed C.N.R. yard and shops, Fort Rouge, Winnipeg. Man.

3694. Oct. 4—Authorizing a further extension to Nov. 15, 1907, in Board's order of Aug. 6, 1906, authorizing the C.N. Ontario Ry. to cross the C.P.R. tracks near Wahnapitae station, Neelon tp., Nipissing district, Ont.

3695. Oct. 4—Approving further change in C.P.R. line west of Mountain, Ont., and authorizing C.P.R. to maintain and operate its line so deviated

3696. Oct. 5—Authorizing Transcontinental Ry. Commissioners to operate their line for construction purposes only where the same crosses C.P.R. track at St. Basile, Portneuf Co., Que.

3697. Oct. 5—Authorizing Mrs. E. Withers, Shelburne, Ont., to carry an electric light wire across C.P.R. tracks in the town of Shelburne.

3698. Oct. 4—Authorizing Bell Telephone Co. to place its wires across C.P.R. tracks at public crossing, 300 yds east of S.S. Marie Station, Ont.

3699 to 3707. Oct. 4—Authorizing the Bell Telephone Co. to place its wires across G.T.R., C P.R. and C.N.R. tracks at various points.

3708. Oct. 8—Approving amended location of C.P.R. between Woodstock and Hartland, B.C., mileage 55 to 64.

3709. Oct. 8—Authorizing Guelph and Goderich Ry. to construct bridges on its Listowel Branch at O'Grady's Creek and Linsoman's Creek.

3710. Oct. 8—Authorizing C.P.R. to reconstruct the bridges at the following points: Teeswater Branch, St. John section, over Mundy Creek, Estevan section, over Moose Mt. Creek.

3711. Oct. 8—Authorizing C.P.R. to construct a branch line in Calgary, Alta., commencing at a point on the easterly boundary of lot 27, block 64, and thence across the northerly portion of lots 26 and 25, the Cockshutt Plow Co.'s property.

3712. Oct. 8—Authorizing C.P.R. to construct certain branch lines or spurs in Cochrane Village, Alta., to C. W. Fisher's premises.

3713. Oct 5—Authorizing St. Mary's village water and fire commissioners to lay water pipes permanently across railway operated by C.P.R. in St. Mary's parish, York county, N.B., where said railway intersects the highway leading from St. Mary's to Miramichi, N.B.

3714 Oct. 4—Approving revised location of G.T. Pacific Ry. through unsurveyed territory, District of North Alberta, mileage 0 to 60.

3715. Oct. 4—Approving proposed change of C.P.R. in its main line from a point on the s.w. quar sec 19, tp. 27, r. 25, west 5th mer., thence southerly to a point on n.w. quar. sec. 6, tp. 27, r. 25, west 5th mer.

3716. Oct. 11—Authorizing Temiscouata Ry. to construct a highway crossing across its line in St. Francis, Madawaska county, N.B., and to do away with the present highway crossing.

3717. Oct. 3—Authorizing G.T. Pacific Ry. to lay its lines across the C.P.R. tracks, main line, parish lot 58, Portage la Prairie, Man.

3718. Oct. 4—Authorizing C.P.R. to reconstruct bridge no. 121.3 on the Medicine Hat section of its line.

3719 to 3724. Oct. 4—Authorizing C.P.R. to reconstruct bridges nos. 34.9 on the Owen Sound section, 129.8 on the Medicine Hat section, 111.2 and 63 0 on the Cranbrook section, 22.5 on the Sirdar section, 86.45 and 86.5 on the Sherbrooke section.

3725. Oct. 4—Authorizing C.P.R. to construct a branch line in Ingersoll, Ont., from a point on the main line to a point opposite lot 18, owned by G. G. Baron, on the north-east side of Thames St., Ingersoll.

3726. Oct. 4—Authorizing C.P.R. to construct branch line in Salter tp., Ont., from a point at mileage 58.28 from Sudbury,

in a southwesterly direction to the Spanish River Lumber Co.'s premises, on lot 25, Salter tp., Algoma district, Ont.

3727. Oct. 4—Authorizing C.P.R. to construct a branch line to Christie & Henderson's premises, lot 29, Gore of Puslinch, Ont.

3728. Oct. 4—Authorizing C.P.R. to construct branch line in tp. 31, Algoma district, from a point on Mageau-Leblanc Lumber Co.'s spur, thence in a southeasterly direction, a distance of about 650 feet.

3729. Oct. 7—Authorizing Port Hope Telephone Co. to place its wires across the Midland Division of G.T.R. tracks, Port Hope, Ont.

3730. Oct. 5—Authorizing St. John Ry. to cross C.P.R. tracks on Rodney wharf, St. John, N.B.; and also to place wires across C.P.R. tracks for the conveyance of electricity on Rodney wharf.

3731. Oct. 8—Authorizing Esquimalt & Nanaimo Ry. to maintain in its present condition the crossing known as "Old Esquimalt Road," for foot passengers only, Victoria, B.C.; and dismissing application of city of Victoria for an order directing E. & N. Ry. to construct suitable highway crossing at the point where the said line crosses lands known as "The Old Esquimalt Road."

3732. Oct. 8—Approving location of Brantford & Hamilton Electric Ry. from east side of Murray st., to Grand River, Brantford, Ont.; and that the amended location of the B. & H. E. Ry. between the westerly limit of the Mohawk Institute's property and the east side of Murray st., be approved, with the exception that that part of the north side between the west limit of the Mohawk Institute lands and the east side of Murray st., be limited to 33 feet in width.

3733. Aug. 14—Authorizing the Chief Commissioner to examine witnesses in the application of the C.P.R. for approval of location of new station at Treherne, Man.

3734. Oct. 8—Authorizing that the C.N.R. engines now in course of construction by the Locomotive and Machine Co., Montreal, be equipped with wire netting having a mesh of 2½ x 2½, no. 11 B.W.G., and that all future orders for engines provide for the equipment of the said engines with the standard netting mesh as required by regulations of the Board.

3735. Sept. 9—Authorizing St. Mary's and Western Ontario Ry. to cross with its track the Sarnia branch of the G.T.R. about 5,540 feet west of the St. Mary's Jct. station, Ont.

3736. Oct. 8—Authorizing C.N. Telegraph Co. to place its wires across the B.S. and H.B. Ry. tracks at the crossing of the latter and the C.N.R., in the s.e. part of sec. 18, tp. 10, r. 19, west of prin. mer.

3737 to 3767. Oct. 8—Authorizing the Bell Telephone Co. to cross the tracks of Pere Marquette Rd., Quebec, Montreal and Southern Ry., C.P.R., G.T.R., Michigan Central Rd., C.N.R., T.H. and B., and London and Port Stanley Ry., at various points.

3768. Oct. 10—Authorizing Guelph and Goderich Ry. to construct a bridge at Mackie's Creek, station 455, on its Listowel Branch.

3769. Oct. 9—Approving proposed deviation of C.N. Ontario Ry. through Hawkesbury, mileage 0 to 1.2, Hawkesbury West, Ont.

3770. Oct. 10—Authorizing G.T. Pacific Ry. to open for carriage of traffic certain portions of its double track main line between Fort William and Winnipeg.

3771. Oct 10—Authorizing C.P.R. to construct a branch line in Calgary, Alta., to the Sterling Co.'s premises, lots 9 and 10, block 52.

3772. Oct. 10—Authorizing the Erie Telephone Co. to place its wires across the Michigan Central Rd.'s tracks, Hagersville, Ont.

3773. Oct. 10—Authorizing the Welland Telephone Co. to place its wires across the M.C. Rd.'s tracks at Bridgeburg, Ont., north of the International bridge.

3774. Oct. 10—Authorizing Quebec, Montreal and Southern Ry. to construct its railway across several highways in St. Antoine de la Baie de Febvre, Richelieu district, Yamaska county, Que.

3775. Oct. 10—Authorizing the C.N. Ontario Ry. to construct its line across streets in Hawkesbury, Ont.

3776. Sept. 26—Authorizing T.H. and B. Ry. to construct a branch line from a point on its railway to a connection with its tracks in lot "Q," Brantford, Ont., crossing Newport and East Newport streets.

3777. Oct. 11—Authorizing the National Transcontinental Ry. Commissioners to join the New Brunswick Coal and Ry. tracks with their track at or near Chipman, Queens county, N.B.

3778. Oct. 17—Authorizing town of Richmond, Que., to lay an eight-inch water main under G.T.R. tracks at Main St., Richmond, Que.

3779. Oct. 11—Authorizing approval of G.T. Pacific Ry.'s Standard Freight Mileage Tariff C.R.C. no. 1, applying on traffic carried on that portion of the line between Portage la Prairie and Rae, Man.

3780. Oct. 11—Authorizing G.T. Pacific Ry. to carry freight traffic over the portion of its line between Portage la Prairie, mile 54.1 and Rae, mile 176, Man; and cancelling Board's order of Oct. 3, 1907.

3781. Oct. 11—Authorizing T.H. and B. Ry. to reconstruct bridge no. 60.18 over power canal, 2.37 miles east of Brantford, Ont.

3782. Oct. 11—Approving revised location of C.P.R. between Coleridge and Lethbridge, Alta.

3783. Oct. 11—Authorizing W. McGuire, Elmvale, Ont., to carry a telephone wire across C.P.R. tracks two miles north of Craighurst, Ont.

3784. Oct. 11—Authorizing Ingersoll Telephone Co. to place its wires over the G.T.R. tracks from the freight shed to its station at Ingersoll, Ont.

3785. Oct. 11—Authorizing C.P.R. to construct a branch line in Portage la Prairie, Man., from a point on west side of Lee st., thence easterly to Snyder Bros.' premises on lots 36 and 37, parish lot 69.

3786. Oct. 15—Authorizing Bell Telephone Co. to place its wires across C.N.R. tracks at Oak avenue and Goulet st., Norwood, Winnipeg, Man.

3787. Oct. 11—Authorizing C.P.R. to reconstruct 21 bridges over rivers and highways.

G.T.R. Ottawa Station and Hotel.

The plans of the Ottawa Terminals Railway Co., which is controlled by the G.T.R., for a central station and office building, and a hotel at Ottawa, have been approved by the Dominion Government, and preliminary work has been begun on the site, so that foundations for both structures may be put in this fall. The station and office building, which will be erected practically on the site of the present Canada Atlantic Ry. station, but which will, of course, occupy more space, will be approximately 150 ft. square; the main waiting-room, ticket office, concourse, etc., being located on the track level adjoining a new station plaza, 90 x 180 ft., for hacks, baggage waggons, street cars, etc., similar to the Bonaventure station plaza at Montreal. Adjoining this plaza and the station proper the train shed, 800 by 150 ft., will extend alongside the Rideau Canal, the passenger platforms being 20 ft. wide, and over 1,000 ft. long, and covering nine tracks with connection to Alexandra bridge. This train shed is designed to be used for the G.T.R., the C.P.R., the New York Central Rd., and future connections. The Rideau St. level will be approximately 22 ft. higher than the tracks. At the center of the building at this level will be a wide interior portico and lobby with a commodious stairway to waiting-room below; also ample elevator service. The wide, generous exit stairway from the train shed and concourse will be used for this purpose only, and extend to the intersection of Sapper's bridge at the Rideau St. level, as at present, from the old station. The mezzanine between grades will contain the train despatcher's and station master's offices, service rooms, etc. The upper floors will be arranged for railway offices, with all modern accommodation. The structure in all its details will be fireproof throughout, with framework of steel, and exterior of stone, a modern, up-to-date structure, with all accessories for convenience and comfort. A separate annex will be located at the axis line of Sussex St., which it is likely will be widened by the city, and will contain baggage and express rooms, also rooms for conductors and trainmen, mail, customs, power plant, etc. The area of the principal rooms will be approximately as follows: general waiting-room, 52 ft. square, with wide wings, each 50 x 50 ft. and 40 ft. high; women's room, 52 x 32 ft., with rest room, lavatory, etc.; men's smoking room, 32 ft. square; union ticket office, 52 ft. square; lunch room, 52 x 35 ft.; sleeping car and telegraph offices and information bureau, each 15 x 20 ft.; train despatcher's office, 52 ft. square; telephone booth, news stand, parcel room, etc., as required, also second-class accommodation: public concourse, 155 x 50 ft.; union baggage room, 90 x 70 ft.; express room, 50 x 50 ft., etc. The total ground area utilized for terminal station, approaches, etc., will amount to over 300,000 sq. ft. Thus Ottawa will possess, when it is completed in 1909, a union station larger in comparison than any other city of its size either in Canada or the U.S.

The hotel will be erected in the south-west corner of Major's Hill Park, overlooking the Parliament Buildings, Ottawa River, Rideau Canal, and with distant views of the Chaudiere Falls, the Gatineau Valley and the Laurentian Mountains. It will contain over 300 bedrooms and 125 baths, in addition to ample service and public rooms, private banquet halls and ballrooms, special and royal suites, etc., also terraces on the ground floor overlooking the park, with lamps similar to those on the Bois du Boulogne in Paris. It will have all modern conveniences, accommodations and furnishings which go to make up a first-class and successful hotel, and will provide what Ottawa has long needed in this respect. In keeping with the Parliament Buildings, which dominate the local architecture, also the new departmental buildings, soon to be erected, the station and hotel have been designed in a free gothic style, by B. G. Lee, of New York.

Since the opening of the C.P.R. shops at Toronto Junction, it is stated that 60 men have met with death whilst engaged in active railway work, and considering that practically 25% of the town's population is composed of railway men, the proportion is not a large one. The annual memorial service for men who have lost their lives while engaged in their duties was held there recently, and was largely attended by railway men.

G.T.R. SEMI-ANNUAL MEETING.

The following report for the half-year ended June 30, was submitted at the meeting of shareholders in London, Eng., Oct. 10.

The following summary shows a comparison of the half-year's revenue account with that of the corresponding half-year, ended June 30, 1906:

June 30, 1906.		June 30, 1907.
£3,021,681	Gross receipts	£ 3,381,259 17 4
	Deduct—	
2,184,821	Working expenses, being at the rate of 73.54%, as compared with 72.31% in 1906,	2,486,544 1 4
£ 836,860	Net traffic receipts	£ 894,715 16 0
	Add—	
16,013	Amount received from the International Bridge Co.	16,012 16 7
6,507	Interest on Central Vermont Ry. bonds	6,506 14 3
60,310	Interest on securities of controlled lines and on St. Clair tunnel bonds acquired by the issue of G. T. 4% debenture stock	60,310 11 11
25,178	Balance of general interest account	48,246 19 11
£ 944,868	Net revenue receipts	£1,025,792 18 8

NET REVENUE CHARGES FOR THE HALF-YEAR.

June 30, 1906.		June 30, 1907.
£ 77,603	Rents (leased lines)	£ 77,603 0 9
488,746	Interest on debenture stocks and bonds of the Co	489,728 18 1
45,775	Interest on debenture stock and bonds of lines consolidated with the G.T. Co.	44,371 14 9
30,296	Canada Atlantic Ry. deficit.	87,800 7 2
..	Detroit, Grand Haven, and Milwaukee Ry. deficiency	10,970 4 11
£ 642,420		£ 710,474 5 8
	Deduct—	
	Grand Trunk Western Ry. repayment of amount advanced on account of interest, June, 1901.	
£6,221		
	Detroit, Grand Haven, and Milwaukee	
1,192	Ry. surplus.	
7,413		
£635,007		£ 710,474 5 8
309,861	Leaving a surplus of	315,318 13 0
£ 944,868		£1,025,792 18 8

Adding the balance of £13,231 1s. 7d. at the credit of net revenue account Dec. 31, 1906, to the above surplus for the past half-year of £315,318 13s. 0d., the total amount available for dividend is £328,549 14s. 7d., from which the directors recommend the payment of the following dividends, viz.:

Half-year's dividend on 4% guaranteed stock	£ 165,278 14 0
Half-year's dividend on first preference stock	85,420 15 0
Half-year's dividend on second preference stock	63,210 0 4
	£ 313,909 9 4

leaving a balance of £14,640 5s. 3d. to be carried forward to next half-year's account.

Following is a comparison of the receipts for the half-years ending June 30, 1907 and 1906:

Description of receipts.	1907.	1906.	Increase.	Decrease.
	£	£	£	£
Passengers	889,281	829,893	59,388	....
Mails and express	142,202	133,955	8,247	....
Freight and live stock	2,271,948	1,980,000	291,948	....
Miscellaneous	77,828	77,833	....	5
	£3,381,259	£3,021,681	£359,578	....

TRAFFIC STATISTICS.

	1907.	1906.	Increase.	Decrease.
Passengers carried	4,936,016	4,616,957	319,059	...
Average fare per passenger	43.24d.	43.14d.	0.10d.	....
Tons of freight and live stock	8,510,574	7,598,784	911,790	....
Average rate per ton	64.07d.	62.54d.	1.53d.	....
Tons carried one mile	1,626,383,387	1,442,477,714	183,905,673	....
Earnings per train mile	80.49d.	74.37d.	6.12d.	....

The average rate per ton per mile on the entire freight business was 0.68 of a cent, compared with 0.67 of a cent in the corresponding half-year.

The working expenses, excluding taxes, amounted in the half-year to £2,445,662, or 72.33% of the gross receipts, as compared with £2,107,118, or 69.73%; an increase in amount of £338,544, an increase in the proportion to the gross receipts of 2.60%.

Following is a comparison of the revenue expenditure, including taxes, for the half-years ended June 30, 1907 and 1906:

Description of expenditure.	1907.	1906.	Increase.	Decrease.
	£	£	£	£
Maintenance of way and structures	287,671	287,671	....	....
Maintenance of equipment	653,285	564,738	88,547	....
Conducting transportation	1,387,343	1,177,307	210,036	....
General expenses	117,363	77,402	39,961	....
Taxes	40,882	77,703	....	36,821
Total	£2,486,544	£2,184,821	£301,723	....
Percentage of gross receipts	73.54	72.31	1.23	....
Expenditure per train-mile	59.19d.	53.77d.	5.42d.	....

The train mileage of the half-year compares with that for the half-year ending June 30, 1906, as follows:

Description of mileage.	1907.	1906.	Increase.	Decrease.
Passenger	4,152,908	4,063,785	89,123	....
Freight	5,619,480	5,354,923	264,557	...
Mixed trains	309,425	333,936	....	23,611
Total	10,081,813	9,751,744	330,069	....

It will be observed that the gross receipts for the half-year show an increase of £359,578, or 11.90%; the working expenses, including taxes, an increase of £301,723, or 13.81%; and the train mileage an increase of 330,069, or 3.38%.

The total charges to the capital account amounted for the half-year to £432,579 12s. 3d., but this amount was reduced by the premium on debenture stock issued in exchange for Midland bonds, less discount on 4% guaranteed stock sold during the half-year to £430,740 7s. 0d. The actual expenditure on capital account was as follows:

New works	£ 2,957 12 0
Double track	39,791 15 2
New rolling stock	360,329 8 6
Land purchased	29,500 16 7
Total	£432,579 12 3

The equipment has been increased during the half-year by the purchase of 1,000 steel coal cars, 195 furniture cars, and 785 box cars, the cost of which, amounting to £360,329 8s. 6d., has been charged to capital account. Thirty compound consolidation freight engines, 14 switch engines, and 13 first-class, 1 second-class, 500 stock, 46 refrigerator, 1,067 flat, and 300 ballast cars and 2 steam derricks were purchased, and 4 ten-wheeled passenger engines, 3 parlor, 5 first-class, 5 baggage, 34 flat, 12 caboose cars, and 4 snowplows, were built in the company's shops during the half-year on revenue account.

Owing to the large increase in the traffic it has become necessary to double the 31 miles of line between St. Lambert, at the east end of the Victoria Bridge, and Ste. Rosalie, used jointly by the company and the Intercolonial Ry. The work is in progress, and it is anticipated will be completed during the present season. The estimated cost is £166,000, and under the terms of the agreement the Dominion Government will either pay, as additional rental, interest at 4% on a proportion of the actual cost, equal to the proportion which the engine and car mileage of the Intercolonial Ry. bears to the total engine and car mileage over that portion of the line, or pay in cash such proportion of the actual cost. The completion of the double track between Lynden and Brantford, and London and Hyde Park Junction, on the line between Hamilton and Sarnia, gives to the company a continuous double track from Montreal to Chicago, a distance of 850 miles, with the exception of the St. Clair tunnel, which is single-track, and about five miles at Valparaiso, the doubling of which has been delayed owing to arrangements having to be made for crossing the tracks of other companies.

As intimated by the president at the last meeting, it has been decided to institute a pension fund for the benefit of the whole of the employes of the company, under powers conferred by an act passed during the last session of the Dominion Parliament. It was considered necessary to at once form a nucleus for the fund, and for that purpose the sum of £40,000 has been included in the general expenses of the past half-year.

The gross receipts of the Canada Atlantic Ry. for the half-year amounted to £180,646, against £189,604 in 1906, a decrease of £8,958, and the working expenses wese £206,343, against £159,375, an increase of £46,968, leaving a revenue deficiency of £25,697 in 1907, compared with a profit of £30,229 in 1906. The interest charges for the half-year were £62,103, against £60,525, so that there was a net revenue deficiency of £87,800. The number of passengers carried during the half-year was 211,020 against 223,047, a decrease of 12,027, or 5.39%; and the passenger receipts, including mails and express receipts, were £43,567, against £40,501, an increase of £3,066, or 7.57%. The quantity of freight moved was 854,967 tons, against 686,670 tons in 1906, an increase of 168,297 tons, or 24.51%; and the receipts from freight traffic were £131,330, against £143,927, a decrease of £12,597, or 8.75%. This decrease in receipts, notwithstanding the increased number of tons moved, is due to the fact that for the purpose of relieving the congestion on other portions of the system a considerable amount of traffic was diverted to the Canada Atlantic Line, and was carried a very short distance only.

The gross receipts of the Grand Trunk Western Ry. for the half-year amounted to £599,033, against £519,016 in 1906, an increase of £80,017, and the working expenses were £516,535, against £435,459, an increase of £81,076, leaving a net profit of £82,498, compared with £83,557 in the corresponding half-year. The net revenue charges for the half-year were £81,577, against £82,718, so that there was a net revenue surplus for the half-year of £921 as compared with £839 for the corresponding half-year of 1906. Adding the net revenue surplus of £17,252 for the half-year ended Dec. 31, 1906, to the above surplus of £921, and the balance of £884 carried forward June 30, 1906, the net revenue balance amounts to £19,057, which will admit of the payment of the full interest on the second mortgage income bonds for the year, and leave a balance of £6,728 to be carried forward. The number of passengers carried during the half-year was 830,242, against 840,972, a decrease of 10,730, or 1.28%; and the passenger train receipts, including mails and express receipts, were £158,018, against £147,186, an increase of £10,832, or 7.36%. The quantity of freight moved during the half-year was 1,852,607 tons, against 1,635,405 tons, an increase of

217,202 tons, or 13.28%, and the receipts from this traffic were £440,298, against £371,235 in 1906, an increase of £69,063, or 18.60%.

The gross receipts of the Detroit, Grand Haven, and Milwaukee Ry. for the half-year were £165,644, against £161,279 in 1906, an increase of £4,365; the working expenses were £139,662, against £122,284, an increase of £17,378; thus leaving a balance of £25,982, against £38,995, a decrease of £13,013, compared with the corresponding half-year of 1906. The net revenue charges for the half-year were £36,952, against £37,803 in 1906, so that there was a net revenue deficiency of £10,970 as compared with a surplus of £1,192, for the corresponding period of 1906. The number of passengers carried during the half-year was 308,622, against 292,850, an increase of 15,772, or 5.39%; and the passenger receipts, including mails and express receipts, were £48,512, against £46,788, an increase of £1,724, or 3.68%. The quantity of freight moved was 774,835 tons, against 784,522 tons in 1906, a decrease of 9,687 tons, or 1.23%; and the receipts from freight traffic were £113,978, against £110,933 in 1906, an increase of £3,045, or 2.74%.

Considerable progress continues to be made in the work of construction on the Grand Trunk Pacific Ry.; but there has been some delay, owing to the lateness of the spring, in obtaining ties in sufficient quantities to enable the laying of the rails to be carried on continuously. About 40 miles of rails have been laid on the Lake Superior branch and 135 miles on the Western Division, and sufficient grading has been completed to permit of tracklaying being carried on as rapidly as the delivery of ties will allow. It is anticipated that at least 200 miles of additional track will have been laid before the close of the season. The work on the construction of the large bridges at Saskatoon, Battle River, and Edmonton, is progressing satisfactorily.

The Chief Engineer reports that the expenditure for maintenance of the company's property for the half-year was the same as for the corresponding period of 1906. The company's permanent way and works have been maintained in good condition

The Superintendent of Motive Power reports the expenditure, mileage etc., as follows:

Half-year ended.	Total expenditure.	Train Mileage.	Rate of Expenses per Mile. Train	Engine	Car.
			Cents	Cents	Cents
June, 1907..	$4,848,724	10,081,813	48.09	36.52	3.05
June, 1906	4,347,556	9,751,744	44.58	34.92	2.77

An increase in expenditure of $501,168.00, or 11.53%, compared with an increase in train miles of 330,069, or 3.38%.

	Passenger Trains	Freight Trains	Mixed Trains.
The average number of cars moved per train was.....	4.5	24.6	7.6
And for the corresponding period.....	4.3	25.5	7.9

During the half-year 75 old light capacity engines were scrapped or set aside to be scrapped. and 27 engines were sold. Of the latter 3 were purchased by the Grand Trunk Western Ry., 3 by the Detroit, Grand Haven, and Milwaukee Ry. and 17 by the G.T. Pacific Ry. Four ten-wheel passenger engines were turned out new at the company's works, Point St Charles, and 30 compound consolidation freight engines and 14 switch engines were purchased, delivered, and put into service during the half-year. Three switch engines were purchased by the C.S. & M. Ry. from the G.T. Western Ry. The actual stock June 30, 1907, was 803 engines, against the official figure of 803 engines.

The comparative cost of repairs per train, engine and car mile was:

Cost per Mile.	Repairs and Renewals of Locomotives. 1907.	1906.	All repairing charges including shop, machinery, tools, and marine equipment, etc. 1907.	1906.
	Cents.	Cents.	Cents.	Cents.
Train	11.57	12.26	15.74	15.30
Engine	9.54	9.60	11.95	11.98
Car	0.80	0.76	1.00	0.95

The Superintendent of Car Department reports expenditure, mileage, etc., was as follows:

Half-year ended.	Total cost of Repairs and Renewals.	Total Miles run by Cars. Passenger.	Freight.	Total.	Cost per Mile. Car.	Train.
					Cents.	Cents.
June, 1907.	$1,592,300	19,237,218	139,865,332	159,102,550	1.000	15.79
" 1906.	1,259,813	18,337,506	138,660,457	156,997,963	0.802	12.92

An increase in expenditure of $332,487, or 26.39%, with an increase in car miles of 2,104,587 or 1.34%.

The revenue account was as follows:

RECEIPTS.

	£	s.	d.	£	s.	d.	£	s.	d.

The report was adopted, the resolutions respecting the payment of the dividends recommended, and the appropriation of £40,000 towards the pension fund passed. There was a good deal of criticism of the pension fund proposal, but a suggestion to move a vote of want of confidence in the directorate was voted down.

The Guelph and Goderich Railway.

The Guelph and Goderich Ry. from Guelph to Goderich, Ont., which was formally opened for traffic Sept. 12, and which has been leased to the C.P.R. Co., and will be operated as one of its branch lines, took exactly three years to construct. As this may seem an unusually long time in which to build 80 miles of railway, the permanent character of the work must be considered, together with the severe winter, and the extensive work on the Goderich end, where the line crosses the Maitland River valley. This portion of the work alone consisted of 10,450 cubic yards of concrete in bridges and retaining walls, and 265,000 cubic yards of earthwork in embankments. The distance from Guelph to Goderich is 80 miles, and with the exception of 20 miles at the Goderich end the work of location presented but few difficult engineering problems. The location of the last 20 miles, however, was repeatedly revised, leaving no doubt whatever as to the final location being the most favorable one.

The limits of grade and curvature were fixed by rules and diagrams issued by the C.P.R. for the use of velocity grades wherever practicable, such limitations being based on experiments made on an extensive scale by the Northern Pacific Ry., and from which the diagrams referred to had been prepared. The application of the diagrams to the original grade profiles eliminated much heavy work, and established on an economic basis a virtual 0.60% profile for eastbound traffic, for a minimum speed of 10 miles per hour, with a train load of 1,630 tons. In extreme cases the above limitations may have been exceeded, depending perhaps on an increased acceleration to overcome some of the higher summits. In order that the effect of such acceleration could be determined the experimental diagram had to be dispensed with and the usual theoretical rule substituted. This necessitated a comparison to be made of the data obtained by experiment with results obtained by theory, in expectation of effecting a change in the 0.60% and 10 mile per hour requirement to embrace the new conditions, but it was impossible to do so with the class of locomotion expected to be put in operation on the division. The requirement had therefore to be departed from in some cases, reducing the speed at summits to 6 miles an hour and even lower. The velocity heads given on speed diagrams were substantially those given in table 118 of Wellington Railway Location, and are derived from the formula for finding force of gravity in falling bodies, $h\frac{r^2}{2g}$, to which is added 6.14% for the rotative energy stored in the wheels.

The work of construction on the first 60 miles from Guelph was comparatively of a light character, such as is usually encountered in undulating country; the average quantity of earthwork per mile being 18,300 cubic yards. The work on the last 20 miles was much heavier, the average quantity per mile being 42,000 cubic yards. No rock had been encountered throughout the whole line. The classifications specified were "solid rock," "loose rock," and "common excavation," the latter embracing all materials which could not be classed as loose rock.

To avoid disputes and simplify questions arising from the calculation of overhaul the usual clause was annulled, and a fixed amount included in contractor's tender to cover all overhaul, such amount being previously determined by the extra cost of removing from line excavation the quantity in gullets of sufficient width to permit of the extra widening being done by steam shovel and train haul.

The structures are absolutely of a permanent character, and are built entirely of

Salary-Raising Training For Railroad Men

There is no profession in which promotion depends in any higher degree upon a man's real ability and technical knowledge than in railroading. Quick promotion then for the railroader is the result of quick and also thorough acquirement of that technical training which will qualify him to hold a higher position. In no way can the ambitious railroad employe secure this technical knowledge so quickly and yet so simply as through the I. C. S. Courses of home training. These Courses have been written by the best railroad experts on this Continent and are taught after a manner that 15 years' experience in training hundreds of thousands of ambitious men for promotion and better earnings has proved to be the most practical and efficient. These Courses include instruction in LOCOMOTIVE MANAGEMENT, LOCOMOTIVE BOILERS, STEAM CYLINDERS, and VALVE GEARS, BREAKDOWNS, COMPOUND LOCOMOTIVES, TRAIN RULES, WESTINGHOUSE and NEW YORK AIR BRAKES, CAR LIGHTING and HEATING, and ELECTRIC HEADLIGHTS.

If **YOU** wish to secure the training in your own home, in your spare time, and at an insignificant cost, that will qualify you for promotion to the highest positions in your profession, simply mark and mail this coupon and we will tell you how you can do so. The fact that we have enabled hundreds of other railroad men to secure promotion in itself warrants your careful investigation of our plan if you really wish to better yourself. Don't let a postage stamp stand between you and a better position. **Mark and mail this coupon NOW.**

concrete, the only exception being the upstream faces of cutwater piers, which are faced with cut stones. The proportions of concrete used were for piers and abutments one, four, seven, and for arch culverts and foundations under water one, three, five. The C.P.R. standard designs were adhered to as closely as circumstances would permit. The graceful form of the piers of the larger structures evolved from the application of the convexed starlings of cutwaters, it being found that a circular end above the cutwater permitted of a shorter base. This form of cutwater, in addition to being a more massive form for concrete work, is probably the only practicable one which offers least resistance to the current. There are altogether 29 bridges, with steel superstructures, and although four of these are of considerable magnitude, there are no lattice spans, plate girders being used exclusively up to 110 ft. length of girder. This feature in the design of the larger structures imparts to them the appearance of strength and stability.

The station buildings and terminals are built in conformity with the substantial character of the work already described. The entire road is laid with 80-lb. rails, and excellent ballast was available at convenient intervals along the line.

The whole work was carried out under the direction of P. A. Peterson, as Chief Engineer, the organization of the engineering staff being an assistant engineer and accountant at headquarters, one divisional engineer and two residences to each 20 miles of line. For construction purposes the work was divided into 10 mile sections. The contractors for sections 1, 4, 5 and 6 were Campbell & Folinsbell, Strathroy, Ont., and for sections 2, 3, 7 and 8, M. A. Piggott & Co., Hamilton, Ont.—J. Grant MacGregor, C.E., in Canadian Engineer.

Comparative Railway Statistics.

At the Canadian Manufacturers' Association meeting in Toronto, recently, A. Blue, Chief Census Officer, read a paper on "Some Illustrations of the Growth of Canada in the 20th Century," in which he said: "Our steam railways in operation in the Dominion in 1870 had a length of 2,617 miles, and in 1876, of 5,218 miles. At the end of the century they had a length of 17,657 miles, and in 1906, of 21,353 miles, together with 814 miles of electric railways. The earliest statistics of railway operations go back to 1875, and in the following table a few comparative figures are given to show the progress of the Dominion in this great branch of transportation:

Steam Railways.	1876	1900	1906
Train mileage....	18,103,628	52,647,684	72,723,482
Passengers... no.	5,544,814	17,122,193	27,989,782
Freight.....tons	6,331,757	35,764,970	57,966,713
Gross earnings..	$19,358,085	70,231,979	125,322,865
Net earnings.....	3,555,364	22,826,383	38,193,431

The increase of train mileage in the six years of the 20th century is 20,000,000; of passengers, 10,867,000; of freight, 22,200,000 tons; of gross earnings, $55,000,000, and of net earnings, $15,367,000; as against an increase of 34,544,000 train mileage, 11,577,000 passengers, 29,433,000 freight tons, $50,874,000 gross earnings, and $19,271,000 net earnings, in the 24 years of the 19th century. The statistics of electric railways are complete only for the six years of this century, in which they show an increase of 116,720,000 passengers carried and of $2,137,000 net earnings, being for each in a period of five years an increase of 100%. The subscribed capital of steam railways in 1876 was $317,795,468, and the paid-up capital $290,757,875. In 1900, the subscribed capital of steam and electric railways was $1,040,486,378, and the paid-up capital $998,264,405; and in 1906, the subscribed capital was $1,456,176,443, and the paid-up capital $1,396,356,675."

The Premier on the All-Red Line.

At the Canadian Manufacturers' Association's annual dinner in Toronto recently, Sir Wilfred Laurier made an important statement in reference to the all-red line. After speaking of the Japanese treaty, he said: "There is all the less inclination on the part of the Canadian Government to annul that treaty because we are in hope of establishing what is called the 'all-red line.' It is a new project, which was launched at the last conference, to have a line of connection between England and the Orient—not only to Japan, but to China and Australia, which is a British country, and which would pass over the territory of Canada. Nature has made the Canadian route the shortest route between Europe and the Orient. It is true that we are laboring under great difficulties. We have to compete with our formidable neighbors to the south. But these difficulties, though great, are not such as to deter us from the goal. I fully believe, for my part, that this project when accomplished, and accomplished it must and will be, will prove of the greatest possible advantage to Canada at large, to Ontario, and to Quebec, but still more to the Maritime Provinces, and to that Province on the Pacific, British Columbia. We must succeed in that. Canada cannot do it alone. We must have the assistance of the motherland in this. We do not want to, nor will we dictate to the people of Great Britain; we do not want to arrogate to ourselves the power to say to them: 'You must do this.' But when I reflect at this moment upon the fact that the greatest ship in the world, the Lusitania, has been built with British money, when I recall that the Cunard Line has received a heavy subsidy to build a line of steamers plying between Liverpool and New York, my hope runs high. I do not begrudge what has been done in that regard, or what may be done in the future to cultivate better relations with our neighbors in the great nation to the south. The better the relations with our neighbors, the better and friendlier the relations between Great Britain and the United States, for my part the better pleased I will be. I want to have nothing but the friendliest relations with our neighbors; but may I not say this: if the British people, the British Parliament, and the British Government have taken money out of the treasury of Britain in order to build a line between Great Britain and a foreign country, can we not expect that the British people, the British Parliament, and the British Government will do as much for a line of steamers between British territory and British territory? I have no intention, and Canada has no intention, of dictating to the people of Great Britain; but we may surely ask them if they will not do as much for those of their own kith and kin as for those who were at one time their kith and kin, but who have severed their allegiance. We have here a policy which will bind together the British Empire far more closely than armies and navies—it is a policy of trade and commerce. I notice that Mr. Blackstock quoted from Oliver Goldsmith the words, 'Honor sinks where commerce long prevails.' Well, I do not harbor that sentiment. I would rather believe that honor will arise where commerce will prevail, for after all, what is there to bind people more potent than the interests of commerce? Let two men trade together and they will be friends; let two nations trade together and they also will be friends. Let the policy of trade and commerce prevail and we shall have peace in the world as never before. It is because this principle has been forgotten in the past that we have had wars. But the moment that commerce arises among the nations, peace and honor will arise. With regard to the all-red line project, I do not know that its immediate success is assured. It is surrounded with difficulties, but difficulties have no terrors for me at all events. I have been accustomed to deal with difficulties all my life, and, indeed, a man is no good until he has difficulties to overcome and overcomes them. Difficulties we have had, difficulties we will have, but difficulties we will overcome, and this project shall and will succeed."

Canadian Northern Ry. Earnings, etc.

Gross earnings, working expenses, net profits, increases or decreases over 1906-07, from July 1, 1907:

	Earnings.	Expenses.	Net Earnings.	Increase or Decrease.
July..	$1,024,300	$ 662,300	$ 362,000	$420,500+

	$14,018,451.86	$8,941,324.05	$5,077,127.81	$242,737.53+

Approximate earnings for Sept. $6,351,000, against $6,101,000 for Sept., 1906.

DULUTH, SOUTH SHORE AND ATLANTIC RY.—Approximate earnings for Sept., $304,403, against $291,813 for Sept., 1906.

MINERAL RANGE RY.—Gross earnings for Aug., $72,294.39; net earnings, $21,719.72, against $68,217.54 gross and $24,038.42 net for Aug., 1906. Net earnings for two months ended Aug. 31, $36,801.79, against $44,573.10 for same period 1906. Approximate earnings for Sept. $68,161, against $60,140 for Sept. 1906.

MINNEAPOLIS, ST PAUL AND SAULT STE. MARIE RY.—Approximate earnings for Sept., $1,086,776 against $1,199,920 for Sept. 1906.

Grand Trunk Ry. Earnings, Expenses, etc.

The following figures give the earnings of the G.T.R., the C. A. R., the G. T. Western Ry., and the D. G. H. &M. Ry., separately, for Aug., as compared with Aug., 1906:

GRAND TRUNK RAILWAY.

	1907	1906
Earnings	$3,146,300	$2,957,000
Expenses	2,149,400	2,024,000
Net earnings	$ 996,900	$ 933,000

CANADA ATLANTIC RAILWAY.

Earnings	$ 209,300	$ 200,200
Expenses	171,600	153,600
Net earnings	$ 37,700	$ 46,600

GRAND TRUNK WESTERN RAILWAY.

Earnings	$ 595,000	$ 540,100
Expenses	469,100	440,500
Net earnings	$ 125,900	$ 99,600

DETROIT, GRAND HAVEN & MILWAUKEE RY.

Earnings	$ 191,900	$ 187,900
Expenses	134,400	115,100
Net earnings	$ 57,500	$ 72,800

Approximate earnings for Sept., $4,049,923, against $3,813,188 for Sept., 1906.

The Royal Commission investigating the causes of the Quebec Bridge disaster, having taken all the Canadian evidence, has gone to Phœnixville, Pa., where it opened its enquiry Oct. 24. After concluding the taking of the evidence from the works of the contractors, the Commission will, it is stated, re-visit the scene of the collapse before submitting its report.

An application by D. D. Mann, of Mackenzie, Mann & Co., Ltd., on behalf of the Moose Mountain Smelting Co., Ltd., for a large area of land at Ashbridge's Bay, Toronto, including Simcoe Park, for the establishment of a large smelter, and other allied works, including car shops, with wharves, docks, and railway facilities, is under consideration by the Board of Control.

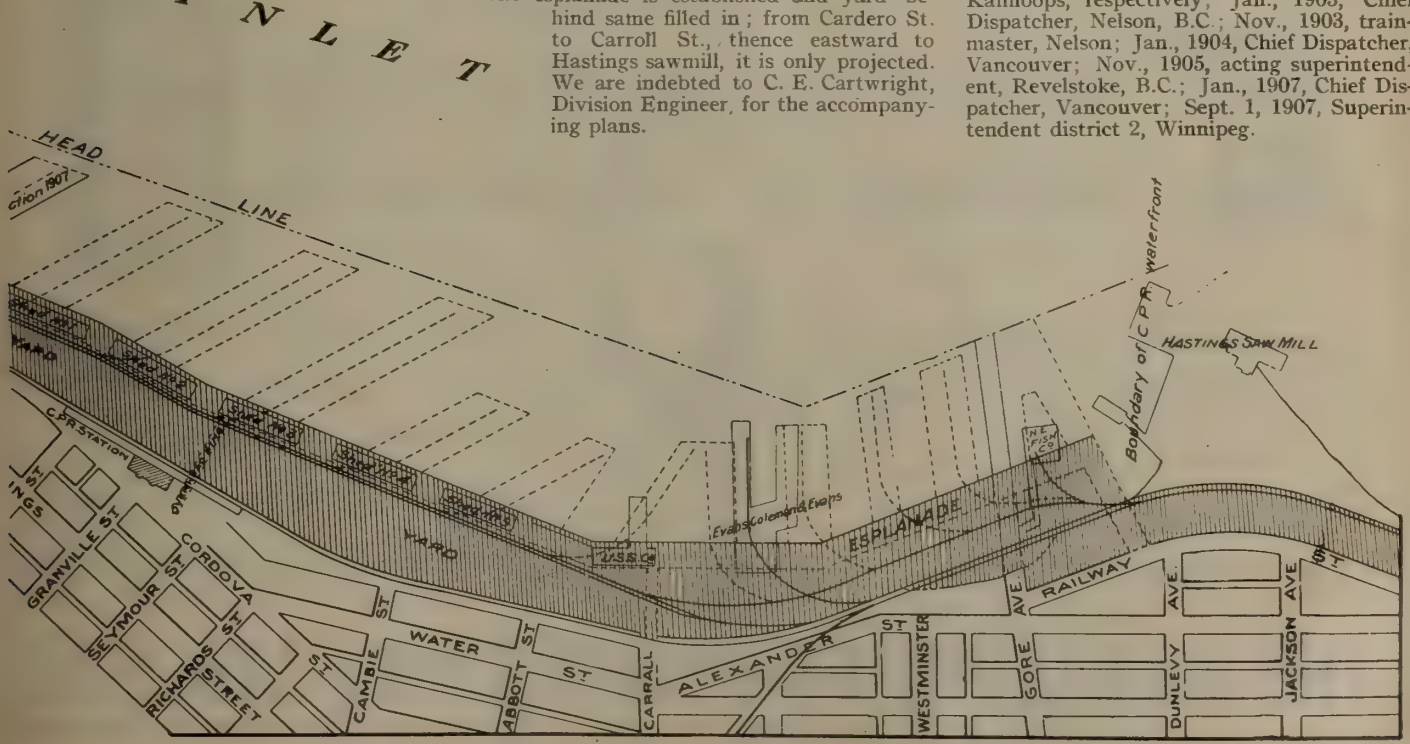
C.P.R. Terminals at Vancouver.

The C.P.R. has prepared plans for the construction of an extensive series of wharves at Vancouver, B.C. The area within which the wharves are to be constructed extends from the Pacific Coast Lumber Co.'s yards to the Hastings saw mill. The proposed construction for this year is the wharf between Thurlow and Burrard streets, and a new transfer slip taking the place of the old one west of Thurlow St. This is to enable transfer barges to be loaded at any stage of the tide. The other wharves, shown by dotted lines on accompanying plan, have yet to be constructed, and a good many of them are not likely to be built for some time. The contracts for dredging, rock filling, turpentine piles and Australian hardwood decking, for the first of the piers to be erected, have been let. The pier will be 640 ft. long by 172 ft. wide, with three depressed tracks in center, and will have two sheds 500 by 54 ft. The depth of water is from 25 to 60 ft. at low tide, and the bottom consists of sandstone rock with very little mud covering. In order to brace the structure, a rock fill will be constructed inside the sides and outer end of wharf—the top being about eight feet below low tide—the space inside being filled with dredged material. In order to protect structure from ravages of the teredo and limnoria, which act quickly in Burrard Inlet, the piling used will be Australian turpentine, which is practically proof against marine insects, for the four outside rows on each side and end. In the interior portion fir piling will be used, protected by a covering manufactured by a local company. The caps, joists, etc., will be fir, treated with carbolite carbolineum, and the deck will be Australian hardwood. The sheds will be constructed of corrugated iron. This wharf will be especially for the Oriental trade, and is the first of a series to be constructed as requirements demand. The esplanade is established and yard behind same filled in; from Cardero St. to Carroll St., thence eastward to Hastings sawmill, it is only projected. We are indebted to C. E. Cartwright, Division Engineer, for the accompanying plans.



M. R. Thompson, formerly commodore of the Head Line Steamships, died suddenly at Bournemouth, Eng., Oct. 18.

A. E. Stevens, who was appointed, recently, Superintendent district 2, Central Division, C.P.R., at Winnipeg, was born at St. John, N.B., May 1, 1864; entered railway service, 1881, with the Intercolonial Ry. at Moncton, in the Chief Dispatcher's office, remaining there until July, 1886, when he became relay operator on the C.P.R. at Donald, B.C., since which his service has been as follows, all with that company: Jan., 1887, operator and dispatcher at Donald, Vancouver and Kamloops, respectively; Jan., 1903, Chief Dispatcher, Nelson, B.C.; Nov., 1903, trainmaster, Nelson; Jan., 1904, Chief Dispatcher, Vancouver; Nov., 1905, acting superintendent, Revelstoke, B.C.; Jan., 1907, Chief Dispatcher, Vancouver; Sept. 1, 1907, Superintendent district 2, Winnipeg.

Minneapolis, St. Paul, and S.S. Marie Ry.

Following are extracts from the report of this subsidiary company of the C.P.R. for the year ended June 30, presented at the annual meeting in Minneapolis, Minn., Sept. 17:

	1906-07	1905-06
Gross earnings	$12,892,079.03	$11,574,461.99
Operating expenses	7,433,548.79	5,784,559.78
Net earnings	$ 5,458,530.24	$ 5,789,902.21
Income from other sources	52,076.86	62,965.22
Total net earnings	$ 5,510,607.10	$ 5,852,867.43
Fixed charges, taxes, etc.	2,901,921.32	2,585,181.31
Surplus income	$ 2,608,685.78	$ 3,267,686.12

The gross earnings increased $1,317,617.04, or 11.4%. The operating expenses were 57.6% as compared with 50% the previous year, and the fixed charges increased $327,628.37, or 13%. This resulted in a decrease of $331,371.97 in net and $659,000.34 in surplus earnings for the year. The increase in operating expenses was due to increased cost of labor, increased cost of almost every class of material and supplies required in railroad operations and to the fact that, during the winter, throughout Minnesota and Dakota, from November until April, there were unusually heavy snowfalls, which at times made the movement of freight and passengers almost impossible. These conditions, coupled with a general car shortage, also kept the earnings much below what they would have been under normal conditions. The movement of grain traffic for Duluth became very much congested by the inability of connecting lines to handle the business promptly and was a further serious limitation to favorable results. The company is building a line from Brooten, Minn., to Duluth, about one-half of which will be in operation this year, and will be completed in 1908. The rapid growth of business during the past three or four years has required large additions to the equipment and terminal facilities at Minneapolis, St. Paul and other principal points. The funds for these expenditures, to the extent of about $2,700,000, have been advanced, as required from time to time, from surplus earnings. In order to replace these advances and to provide funds for similar and other purposes, it is deemed advisable to increase the capital stock. For this purpose the stockholders, at their annual meeting, will be asked to authorize an amendment to the articles of incorporation, so as to increase the authorized capital from $21,000,000 to $42,000,000, one-third of which will be preferred and two-thirds common stock. It is the intention to issue only so much of this stock as may be necessary to take care of present and future requirements and will probably not exceed $4,200,000, which, before being sold, will be offered to the stockholders at par. The company's roadway, buildings and equipment have been maintained in first-class condition. There is every prospect of a bountiful harvest throughout the Northwest, so that a heavy movement of traffic during the coming year seems to be assured.

The mileage owned and operated is 629.76 miles east, and 1,617.21 miles west of Minneapolis, and 15.91 miles of spur lines, making altogether 2,262.88 miles, against 2,134.73 miles of line, and 18.60 miles of spur lines reported June 30, 1906. In addition the company has trackage facilities over 19.17 miles of terminal property in Minneapolis, St. Paul and Sault Ste. Marie.

4 observation cars	78,674.53
4 water car tanks	1,519.58
1 snow plow	18,543.12
1 steam shovel	9,845.18
1 wrecking crane	10,945.58
Cinder cars	149.79

The rolling stock owned June 30, included 252 locomotives, 200 passenger cars, 12,949 freight cars, and 176 miscellaneous cars.

The C.P.R. has reduced its transcontinental service to one train a day each way for the winter season. The Overseas Limited will run as usual.

The appeal of Coates, Son & Co., of London, Eng., against the ruling of the Master, in their claim against the Ontario Government, in connection with the sale of T. & N. O. Ry. bonds in 1904-05, came before Justice Teetzel at Toronto, Oct. 22, and the decision not to allow the appellants to amend their petition by the substitution of the word "purchasers" for that of "agents," was reversed. The claim is for $14,800.

Duluth, South Shore and Atlantic Ry.

The report of this subsidiary company of the C.P.R., for the year ended June 30, consists of tabular statements which are printed without comment. The main line owned is 517.44 miles; branch lines owned, 63.60 miles; total owned, 581.04 miles; trackage rights leased, 9.64 miles; total mileage operated, 590.68 miles. The only change from the mileage shown at June 30, 1906, is in the branch lines owned, where there is a decrease of 2.01 miles. The company owns 74 locomotives, 62 passenger cars, 2,880 freight cars, and 100 miscellaneous cars. The new rolling stock added during the financial year was one 85-ton switching locomotive, 100 gondola cars and 10 coal cars. The income account compared with the year ended June 30, 1906, is as follows:

	1906-07.	1905-06.
Gross earnings from operation	$3,311,878.06	$3,057,775 40
Less operating expenses	2,320,857 89	2,057,459.76
Net earnings	$ 991,020.17	$1,000,315 64
Other income	13,654.23	14.536.15
Net income	$1,004,674.40	$1,014,851.79

Railway Rolling Stock Notes.

The G.T.R. has placed an order for 25 first-class cars in the U.S.

The Canadian Copper Co., Sudbury, Ont., has placed an order for two locomotives in the U.S.

The White Pass and Yukon Ry. is arranging to build a number of ore cars of a special design at its own shops.

The Crossen Car Mfg. Co., of Cobourg, Ltd., has on hand orders for 20 coaches for the C.N.R., and 400 box cars and 4 conductors' vans for the Intercolonial Ry.

The Intercolonial Ry. has placed orders for 12 hopper cars, 30,000 lbs. capacity, and 70 dump cars, 80,000 lbs. capacity, with Rhodes, Curry & Co., Amherst, N.S.

The Temiskaming and Northern Ontario Ry. has received 2 second-class passenger coaches and 3 workmen's cars from the Crossen Car Mfg. Co., of Cobourg, Ont.

The G.T.R., we are advised, placed orders for 20 compound consolidation, 10 mogul, 10 switching, and 10 ten-wheel passenger locomotives, in Sept., for delivery early in 1908.

The Locomotive and Machine Co. of Montreal recently completed four 4-6-0 locomotives for the Delaware and Hudson Rd.'s Canadian line, and 10 locomotives, 2-8-0 type, for the C.P.R. During Sept. it completed five consolidation and 11 ten-wheel locomotives for the C.P.R.

The Intercolonial Ry. has purchased in the U.S. a steam motor car, for use in suburban service in the neighborhood of St. John, N.B. The car, as described in the press, has accommodation for 40 passengers, including 8 in a smoking compartment, and a baggage room, lighted by acetylene gas, and propelled by a 120 h.p. motor.

The Temiskaming and Northern Ontario Ry. has received two auxiliary boarding cars from Rhodes, Curry & Co., Amherst, N.S.; 90 steel underframe flat cars, 100,000 lbs. capacity, on an order for 100 from the Dominion Car and Foundry Co., Montreal; one Russell wing snowplow, and 80 flat cars, 60,000 lbs. capacity, completing an order of 100.

The C.P.R. between Sept. 18 and Oct. 12 has placed the following orders for rolling stock: 1 consolidation locomotive, 1 colonist car, 60 box cars, 2 refrigerators, freight; 1 refrigerator, passenger; 5 stock cars, 40 flat cars, and 1 Hart ballast car, at its Angus, Montreal, shops; 2 vans at its Farnham, Quebec, shops; and 3 steel coal cars with the Dominion Car and Foundry Co., Montreal.

The C.P.R. received the following additions to rolling stock between Sept. 18 and Oct. 12: 519 box cars, 16 first-class cars, 4 tourist cars, 7 switching locomotives, from its Angus, Montreal, shops; 89 steel ore cars from the Dominion Car and Foundry Co., Montreal; 14 freight and passenger locomotives from the Locomotive and Machine Co., Ltd., Montreal; and 147 box cars from the U.S.

The Canadian Northern Ry., between Aug. 15 and Sept. 15, received the following rolling stock: Seven 10-wheel locomotives from the Canada Foundry Co., Toronto; five consolidation locomotives from the Canadian Locomotive Co., Kingston, Ont.; 93 stock cars from the Crossen Car Manufacturing Co., Cobourg, Ont.; two passenger coaches, 10 refrigerator cars and 277 box cars from Rhodes, Curry & Co., Amherst, N.S.; and one cafe car from the U.S.

Following are the principal dimensions of the snowplow for which the C.P.R. recently placed an order with the Locomotive and Machine Co. of Montreal: Width of drum, 10 ft. outside; width of cut, 12 ft.; rotary wheel, 9 ft. 8½ in.; boiler, 60 in. diameter outside first course; firebox, 92 by 50 in.; working pressure, 190 lbs.; cylinders, 17 by 22 in.; diameter of truck wheels, 4 ft. 6 in.; center to center of trucks, 15 ft. 2½ in.; extreme length of rotary, 38 ft. 3 in.

The C.N.R. between Sept. 15 and Oct. 15 has received the following additions to rolling stock: 74 stock cars, 4 baggage cars and 4 mail and express cars, from the Crossen Car Mfg. Co., of Cobourg, Ont.; 346 box cars, 7 refrigerator cars, and 1 coach from Rhodes, Curry & Co., Amherst, N.S.; 5 10-wheel locomotives from the Canada Foundry Co., Toronto, and 2 10-wheel locomotives and 11 consolidation locomotives from the Canadian Locomotive Co., Kingston, Ont.

Following are the principal dimensions of the 30 eight-wheel locomotives for which the G.T. Pacific Ry. recently placed an order with the Locomotive and Machine Co. of Montreal, delivery to commence Mar., 1908:

WEIGHT.—On drivers, 80,000 lbs.; total, 120,000 lbs.
WHEELS.—Diameter of drivers, 63 in.
WHEEL BASE.—Driving, 8 ft. 6 in.; engine, 23 ft.; engine and tender, 54 ft.
CYLINDERS.—Diameter, 18 in.; stroke, 24 in.
BOILER.—Type, extended wagon top; working pressure, 200 lbs.
TUBES.—Number, 249; diameter, 2 in.; length, 12 ft.
FIREBOX.—Length, 96⅛ in.; width, 40¼ in.
TENDER.—Capacity, 10 tons coal and 7,000 U.S. galls. water.

Following are the general dimensions of the 20 consolidation locomotives for which the G.T.R. has placed an order with the Locomotive and Machine Co. of Montreal, delivery to commence Aug., 1908:

WEIGHT.—On drivers, 179,500 lbs.; total, 206,000 lbs.
WHEELS.—Diameter of drivers, 63 in.
CYLINDERS.—22½ x 35 x 32 in.
BOILER.—Type, extended wagon top; working pressure, 210 lbs.
TUBES.—Number, 353; diameter, 2 in.; length, 15 ft.
FIREBOX.—Length, 96⅛ in.; width, 75¼ in.
WHEEL BASE.—Driving, 17 ft.; engine, 25 ft. 9 in.; engine and tender, 56 ft. 11½ in.
TENDER.—Capacity, 12 tons of coal and 7,000 U.S. galls. water.

The Montreal Harbor Commissioners have placed an order with the Canadian Locomotive Co., Ltd., Kingston, Ont., for 3 switching locomotives, to the following specifications: gauge, 4 ft. 8½ ins.; type of engine, 2-6-2, side tank; fuel used, bituminous coal; weight, total, 140,000 lbs.; wheel base of engine, rigid, 10 ft., total, 25 ft. 3½ ins.; heating surface, firebox, 97 sq. ft.; tubes, 1,245 sq. ft.; total, 1,342 sq. ft.; diam. of driving wheels, 51 ins.; driving wheel centers, cast iron; diam. of cylinders, 18 ins.; stroke, 24 ins.; type of boiler, radial stay; working pressure, 190 lbs.; no. of tubes, 200; diam., 2 ins.; length, 10 ft. 11 ins.; brakes, Westinghouse; tank capacity, 1,200 imp. galls.

Following are some of the specifications of the 10 passenger locomotives which the C.P.R. is building at its Angus, Montreal, shops:

CLASS.—G. 2.
TYPE.—Pacific, 4-6-2.
SUPERHEATER.—Simple, Vaughan and Horsey type.
WEIGHT.—On drivers, 139,300 lbs.; total, 212,300 lbs.
CYLINDERS.—Diameter, 21 in.; stroke, 28 in.
WHEELS.—Diameter of drivers, 69 in.; centers, cast steel; tyres, Krupp crucible steel; springs, C.P.R. crucible steel.
BOILER.—Type, extended wagon top; working steam pressure, 200 lbs.; heating surface, 2,957 sq. ft.
TUBES.—Number, 22 of 5 in., and 193 of 2¼ in.; length, 19 ft. 6 in.
FIREBOX.—Length, 7 ft. 10⅛ in. inside; width, 5 ft. 9⅞ in., inside; grate area, 45.6 sq. ft.
TENDER.—Capacity, 10 tons coal and 5,000 imp. galls. water.
SPECIAL EQUIPMENT.—Westinghouse air brakes, Simplex brake beams, Tower couplers, Pyle National electric headlight, Gold steam heat equipment.

A. Mahieu, a conductor on the C.N.R., was sentenced to one month's imprisonment at Montreal, Oct. 23, for being intoxicated while in charge of a freight train.

MAINLY ABOUT PEOPLE.

W. Mackenzie, President C.N.R., sailed from New York recently for England.

H. D. P. Brady, head of the firm of Brady and Son, shipbuilders, Montreal, died there Oct. 8, aged 79 years.

H. R. Charlton, advertising agent, G.T.R. has been elected a member of the Canadian Camp Club, New York.

Mrs. Drolet, who died at St. Sauveur, Que., recently aged 58, was wife of F. X. Drolet, Master Mechanic, C.P.R.

E. Tiffin, Traffic Manager Canadian Government railways, has returned to Moncton, N.B., from a trip to London, Eng.

Mrs. Ryan, who died at Ottawa, Sept 24, was mother of P. E. Ryan, Secretary of the Commission of the Transcontinental Ry.

Jas. Conlon, Superintendent of the electrical department of the Michigan Central Rd., St. Thomas, Ont., died there recently.

R. Percival, conductor on the G.T.R., who died Oct. 10, at Cornwall, Ont., aged 64, had been in the G.T.R. service for 47 years.

Mrs. Wragge, wife of E. Wragge, C.E., formerly Local Manager G.T.R. at Toronto, died there Oct. 1, aged 63, after a long illness.

Hon. G. Graham, Minister of Railways and Canals, has been given the honorary degree of LL.D. by Queen's University, Kingston, Ont.

W. R. Hill, for many years conductor on the Toronto-Montreal run for the G.T.R., died in Toronto, Oct. 5, after two years' illness.

W. Kearney, who died at Montreal, aged 84, Oct. 2, was engaged in railway service for over half a century, principally at St. John's, Quebec.

Miss B. Crean, who died at South Quebec recently, was sister of M. W. Crean, Superintendent of the Dominion Government Telegraphs.

C. J. Booth, son of J. R. Booth, Ottawa, who built the Canada Atlantic Ry., was married at Petrolia, Ont., recently, to Miss J. L. Gibson.

J. M. Millar, civil engineer, National Transcontinental Ry., Edmundston, N.B., was married, Oct. 17, to Miss A. M. Miller, of Halifax, N.S.

G. Bawden, Secretary-Treasurer of the Thousands Islands Steamboat Co., was married to Miss F. E. Carrington, at Kingston, Ont., Oct. 2.

R. C. W. McCuaig, who occupied the position of measuring surveyor of shipping for the Dominion, died at Ottawa, Oct. 23, aged 73 years.

Sir H. Montagu Allan was elected a director of the Dominion Iron and Steel Co., Ltd., recently, in place of Sir Henry M. Pellatt, resigned.

The estate of P. Larson, of Foley Bros. & Larson, railway contractors, is reported by the appraisers at Helena, Mont., to be worth, approximately, $15,000,000.

G. M. Bosworth, Fourth Vice-President C.P.R., Mrs. and Miss R. Bosworth, left Montreal, Oct. 1, for a lengthened trip to Vancouver and Pacific Coast points.

D. W. Hatch, Travelling Passenger Agent Atchison, Topeka and Santa Fe Rd., Montreal, and Mrs. Hatch, celebrated the 47th anniversary of their marriage, Oct. 12.

C. D. Strong was presented with a travelling bag by the officials of the C.P.R. General Passenger Agents' Office, Montreal, Oct. 1, on being transferred to St. John, N.B.

J. O. Labreque, Purchasing Agent of the St. Lawrence Canadian Navigation Co., and formerly of the Richelieu and Ontario Navigation Co., died at Montreal recently.

J. R. Marlow has been presented with a gold watch, chain and locket on resigning his position as transportation officer of the Canadian Manufacturers' Association, Toronto.

W. Mackenzie, President C.N.R., has declined, owing to numerous other duties, the position of Trustee of Queen's University, Kingston, Ont., to which he was recently elected.

G. E. Drummond, of Drummond, McCall & Co., and an ex-President of the Montreal Board of Trade, has been elected a director of Molsons Bank, in place of F. C. Henshaw, deceased.

A. McMaster, for a number of years engaged in the contracting business, was formerly a master mariner and was in command successively of the steamers Virginia and Polino.

F. Thomas, architect, who died in London, Eng., aged 67, Oct. 13, was engaged as Government Inspector during the construction of what is now the C.P.R. line between Ottawa and Quebec.

W. Aldred, who was in command of the G.T.R. car ferry Great Western for fifteen years, but who retired from active work about twelve years ago, died at Windsor, Ont., Oct. 11, aged 77.

D. B. Swinton, who has been appointed assistant general foreman Dominion Car and Foundry Co., was recently presented with a cabinet of cutlery by his former associates in the Canada Car Co.'s works, Montreal.

J. A. M. Aikins, K.C., C.P.R. solicitor at Winnipeg, has been named chairman of the commission recently appointed by the Manitoba Government to investigate the university question in the province.

W. P. Fitzsimons, until recently Manager of the Lackawanna, Grand Trunk Fast Freight Line, at Chicago, is now Manager of the Detroit, Mich., Board of Commerce, Bureau of Transportation and Manufactures.

Alexander McMurray, who died recently at Bridgeport, Ont., aged 80 years, was one of the oldest Niagara River pilots, having owned and operated steamboats since 1845. He retired from the service ten years ago.

G. T. Bell, General Passenger and Ticket Agent G.T.R., was elected Vice-President of the American Association of General Passenger and Ticket Agents at the annual convention held at Washington, D.C., Oct. 16.

R. Miller, station master at the C.P.R. Windsor St. station, Montreal, is spending a two months' vacation in New Brunswick. Mr. Miller's health was not fully re-established as the result of a trip to the old country in the spring.

A report states that D. R. Proctor, who was found dead in a cheap lodging-house in Chicago, Ill., at the age of 81, made a fortune from an invention for extinguishing sparks from locomotives, thus preventing prairie fires.

J. O'Hagan, recently appointed to a position in the newly organized publicity department of the C.N.R., was presented by the editorial staff of the Toronto Globe with a tea set, on his relinquishing the post of private secretary to the editor.

L. F. Vernon-Harcourt, whose works on Rivers and Canals and Harbors and Docks are well known amongst civil engineers in the Dominion, Professor of Civil Engineering at University College, London, Eng., died there Sept. 14, aged 68.

Miss M. E. L. Osler, youngest daughter of E. B. Osler, M.P., director C.P.R., was married in Toronto, Sept. 25, to G. S. Gibbons, of London, Ont., son of G. Gibbons, K.C., chairman of the Canadian section of the International Waterways Commission.

E. Pepper, of the Niagara, St. Catharines and Toronto Ry., was presented by a number of representatives of transportation companies in Toronto with an easy chair and cut glass water set and berry bowl, on the occasion of his marriage to Miss K. McPherson, St. Thomas, Oct. 23.

Mrs. Renton, widow of G. Renton, travelling engineer G.T.R., who was killed in Feb., in a wreck at East London, Ont., is suing the company for $25,000 damages. It is alleged that the accident was caused by the company neglecting to place a competent man in charge of the switching.

Judge S. W. and Mrs. Foster celebrated their golden wedding at Knowlton, Que., Sept. 30. Mr. Foster successfully brought about the construction of the Montreal and Champlain Ry., the United States and Canada Ry., and the Orford Mountain Ry. He is president of the two latter.

Miss Van Horne, daughter of Sir William Van Horne, had a rather narrow escape from drowning recently, at her father's summer home, Minister's Island, N.B. While stepping from the yacht Covenhoven to a small boat she missed her footing and fell into the water, and was only rescued after considerable difficulty.

C. B. Foster, C.P.R. District Passenger Agent, and Mrs. Foster, and W. T. Dockrell, C.P.R. travelling passenger agent, and Mrs. Dockrell, Toronto, were each the recipient of an article of cut glass at a gathering of a number of members of the Canadian Ticket Agents' Association at the C.P.R. passenger office, Toronto, Oct. 19.

A. W. Dow was presented with a gold locket and chain by the freight staff at Bonaventure Station, Montreal, on resigning after forty-three years' service with the G.T.R. Mr. Dow, at the time of his retirement, was chief clerk in the freight department, and has since left Montreal on a trip to the Northwest and Pacific Coast points.

G. M. Jackson, who has been appointed Travelling Passenger Agent C.P.R., at Spokane, Wash., was born at Lakeland, Minn., Oct. 20, 1880, and entered transportation service in 1901, his record being: Sept., 1901, to Oct., 1903, clerk in city ticket office Oregon Ry. and Navigation Co., and Southern Pacific Ry., Tacoma, Wash.; Oct., 1903, to Nov., 1904, clerk in city ticket office C.P.R., Tacoma, Wash.; Nov., 1904, to Jan., 1906, clerk in Southern Pacific Ry. city ticket office, Seattle, Wash.; Jan., 1906, to Sept., 1907, city ticket agent, C.P.R., Seattle, Wash.

H. E. Whittenberger, who has been appointed Superintendent Eastern Division G.T.R., Montreal, was born at Peru, Ind., Nov. 9, 1869, and entered transportation service in 1885, his record being: 1885 to Feb., 1897, various positions, Wabash Rd.; Feb., 1897, to May, 1902, Trainmaster Middle Division, G.T.R.; May, 1902, to Sept., 1904, Superintendent Denver and Rio Grande Ry.; Sept., 1904, to Jan., 1906, Superintendent Cincinnati, Hamilton and Dayton Rd., Indianapolis, Ind.; Jan., 1906, to Sept. 30, 1907, Superintendent Kansas City and Southern Rd.

Lieut.-Col. Henshaw, who died in Montreal, Oct. 2, was largely interested in financial and banking circles, and was associated in an official capacity with a number of transportation and industrial companies. He was President of the Canadian Marconi Wireless Telegraph Co., and the Canadian Transfer Co.; Vice-President of the Caledonia Iron Works, and a director of the Canadian Iron and Foundry Co., Intercolonial Coal Mining Co., Montreal Park and Island Ry., Montreal Street Ry., Richelieu and Ontario Navigation Co., and Suburban Tramway and Power Co.

W. J. Flynn, who has been appointed Division Master Mechanic, Michigan Central Rd., St. Thomas, Ont., was born in Buffalo, N.Y., June 24, 1877, and entered railway service in 1899, his record being: Sept., 1899, to Sept., 1900, chief draughtsman, mechanical department C.L. and W. Ry., Loraine, Ohio; Sept., 1900, to Mar., 1902, chief draughtsman in office of Mechanical Engineer Michigan Central Rd., Detroit, Mich.; Mar., 1902, to Sept., 1904, assistant general foreman, Michigan Central Rd. shops, Jackson, Mich.; Sept., 1904, to Sept., 1907, general foreman Jackson shops, M.C.R.

G. W. Caye, who was recently appointed Assistant to the Vice-President and General Manager, G.T. Pacific Ry., at Winnipeg, entered railway service in 1882, since which he has been consecutively office boy, General Passenger Department Central Vermont Ry., St. Albans, Vt.; 1883 to 1885, stenographer same office; 1886 to 1896, chief clerk General Ticket Department, same road; 1897 to 1900, chief clerk to General Superintendent, same road; 1901 to 1903, travelling car agent, Canada Atlantic Ry.; 1903 to 1904, private secretary to General Manager same road, at Ottawa, Ont.; 1905 to 1907, chief clerk to Vice-President and General Manager G.T. Pacific Ry., Montreal; since then Assistant to Vice-President and General Manager, same road, at Winnipeg.

R. Nelson, who has been appointed Assistant Chief Dispatcher, Canadian Northern Ry., Dauphin, Man., was born at Barrie, Ont., July 6, 1864, and entered transportation service 1891, his record being: May, 1891, to Jan., 1894, telegraph operator Western Division C.P.R.; May, 1894, to Dec., 1894, telegraph operator Wisconsin Central Ry.; May, 1895, to Aug., 1898, operator, cashier and agent at various points Ashland Division, Chicago and North-Western Ry.; Aug., 1898, various positions on Northern Pacific Ry. in Manitoba, and remained on with the Canadian Northern Ry. when that company took over these lines; June, 1901, to Sept., 1904, train dispatcher C.N. Ry., Winnipeg; Sept., 1904, to Sept., 1907, train dispatcher C.N. Ry., Dauphin, Man.

W. C. Hunter, Manager of the New Brunswick Coal and Ry. Company, whose portrait appears on the first page of this issue, was born at St. John, N.B., Jan. 4, 1865. He entered the Intercolonial Ry. service there, June, 1882, as a car oiler, became in time locomotive wiper, fireman and engineman, and was appointed General Air Brake Inspector Nov. 1, 1901, resigning in June, 1904, to become Manager of the N.B.C. & R. Co. This railway was a run-down concern, about ready to close up when he was appointed. In three years it has risen to become the most important branch railway in New Brunswick. In 1906 a surplus of $2,224.73, as compared with a loss of $24,596.31 in 1904 was shown, the business of the railway increasing from 17,847 tons of freight and 10,000 passengers in 1904, to 38,731 tons and 14,000 passengers in 1906. The railway has been thoroughly repaired, and its rolling stock increased, a machine shop installed, and it is generally a going concern. Mr. Hunter is Second Vice-President of the Air Brake Association and takes a prominent part in its work.

In response to a question as to his views on the condition of the engineering trades, F. Nicholls is reported to have said, Oct. 24: "The volume of production may be curtailed, but not much. Comparatively to a far smaller extent in Canada to what may prevail in the United States, for the reason that we have a Government that is committed to the building of the Transcontinental railway, and the Grand Trunk Pacific, which have already been financed."

HUDSON HIGH POWER STEEL

Best for Locomotive and General Shop Work

Unequalled for all kinds of cutting tools. The best steel makes the best tools, that is the reason that Hudson Tools will run faster and wear longer than any other high speed tools.

PROFITS GROUND AWAY

The time your men will save in grinding alone is the practical economy of Hudson High Power Steel. Complete line of Twist Drills, Milling Cutters, End Mills, Taper Bridge Reamers, Shell Reamers, carried in stock. All steel and tools guaranteed.

SWITCH ROPES

We make a specialty of High Grade Switch Ropes, made in all diameters and any required length, fitted with our special Switch Rope Fittings.

THE DOMINION WIRE ROPE CO., MONTREAL LIMITED

Canadian Ticket Agents' Association.

The annual trip of this Association, which was held in Oct., extending to Winnipeg, while not as largely attended as some others, was one of the most enjoyable; excellent train arrangements, perfect weather, and lavish hospitality at Winnipeg, and also at Port Arthur and Fort William, combining to make it a record one in many respects. The members and their guests assembled at the Union Station, Toronto, on Oct. 10, leaving there at 10 p.m., over the G.T.R., in a special train of five C.P.R. sleeping cars and a baggage car for North Bay, Ont., which was reached about 6 a.m. Oct. 11. The party was joined there by a number of members from Montreal and other eastern points, the sleeping car in which they had travelled from Montreal being attached to the special train. Two C.P.R. dining-cars were also attached, and from North Bay the special, consisting of nine vestibuled cars, ran through solid to Winnipeg. North Bay was left on Oct. 11 about noon, Port Arthur being reached at 8 a.m., Oct. 12. The special was met by F. J. Sutton, C.P.R. agent, and others, and the whole party debarked, and after a short stroll about town were conveyed in special cars of the Port Arthur Electric Ry. through Fort William to West Fort. Returning, some of the party went on the steamboat James Whalen on the Kaministikwia River to view the harbor, mammoth grain elevators, etc. The party were divided for luncheon between Fort William and Port Arthur, being the guests of the citizens of both places. At 3 p.m. they left on a special Canadian Northern Ry. train for Kakabeka Falls, the great beauty of which was a revelation to the visitors. Additional interest was given to this portion of the trip by the opportunity afforded of seeing the Kaministikwia Power Co.'s plant, where 30,000 h.p. is being developed, which it is intended ultimately to increase to 100,000 h.p. The power is already being supplied to the dual cities, and will be a most important factor in their development.

At Fort William the party were met by a delegation of about 20, headed by C. E. McPherson, General Passenger Agent C.P.R. Western Lines, who came from Winnipeg by special car and extended a cordial welcome to the visitors. The special left Fort William at 7 p.m., Oct. 12, but owing to some delay during the night Winnipeg was not reached till shortly after noon on Sunday, Oct. 13, when the party landed in the new train shed and walked into the C.P.R.'s luxurious Royal Alexandra Hotel, the management of which had made most perfect arrangements for their reception. Chief Clerk Cummings met the special at Fort William, and saw members of the party who had reserved rooms, giving the numbers of the rooms and labelling the baggage, so that on reaching Winnipeg the members went direct to their rooms without having to register or ask for keys. The service at the hotel was most satisfactory throughout the visit, the Manager, H. W. Wills, and his staff, being unremitting in their attention.

THE TWENTY-FIRST ANNUAL MEETING

On Oct. 14 at 9.30 a m. the members assembled in a portion of the Royal Alexandra rotunda, which had been reserved for them, President McIlroy in the chair. Acting Mayor Davidson extended them a hearty welcome to the city, and was followed by Alderman Cox. President McIlroy, in responding, said the visitors had been astonished at the many signs of prosperity, and were agreed in thinking that Winnipeg was destined to be the metropolis of Canada, surpassing all other cities of the Dominion. The city was widely known for its open-hearted hospitality, and the reception to the agents was in accordance with this reputation. When they returned to the east, they would advise their friends of its attractions and would direct intending settlers to the Northwest.

The roll-call showed 61 members in attendance. Letters of regret at inability to be present were read from C. E. E. Ussher, Assistant Passenger Traffic Manager C.P.R., and W. Stitt, General Passenger Agent C.P.R. Eastern Lines. Mr. Ussher, in the course of his letter, referred to the alarmist reports that appear periodically in certain Canadian newspapers, and which do untold harm, not only to the western provinces, but to the east as well. He said: "The interests of the western provinces cannot be hurt without at the same time hurting the eastern provinces, and a great deal can be done to overcome this by the action of the members of your Association, who meet all classes of the community and especially newspaper editors and proprietors. In every way the entire sentiment and talk of a growing country like Canada should be optimistic. We have no place for the pessimist!" A telegram from J. J. McConniff, Montreal, was read expressing the regret of many Montrealers at being unable to attend. He expressed his hope that the resolution in favor of the 24 hours system of time would carry, and said that J. M. Lyons, General Passenger Agent I.C.R., suggested its adoption in schools. J. P. Hanley, Kingston, Ont., Third Vice-President of the Association, wired his regrets, and W. Whyte, Second Vice-President C.P.R., telegraphed from North Bend, B.C., regretting his inability to attend the dinner.

In introducing C. E. McPherson, General Passenger Agent C.P.R. Western Lines, President McIlroy spoke of the pleasant recollections of him in Ontario, and he was accorded a very hearty reception. Mr. McPherson said that he was the last person on earth who should be called on to make an address on such an occasion, the retiring and shy nature of his disposition being known to all his friends. He warned the agents of the danger of going through the western provinces, since those who once saw the west thoroughly could never be satisfied in the east. The movement of passengers from the east to the west continued very large, but he wished to say that this country did not want knockers, grouchers or pessimists. There should be a law to forbid the entrance of such people. He had been brought up to sell tickets, and sold them still. He had known many of the members of the Association for many years, and had had the pleasure of extending a welcome to them when the annual meeting was held in Winnipeg in 1899. A good time was had then, and he believed that as good a time would be had this year.

W. Jackson, in E. de la Hooke's absence, read the Secretary-Treasurer's report as follows:

"At our last annual meeting I had the pleasure of announcing that we had a membership of 210, a record number; this year's roll shows only 205, a shrinkage of five, and this in face of 22 new members having joined, thereby showing that no less than 27 have failed to pay up. It is a most undesirable state of affairs. There are too many agents who temporarily join the Association for the purpose of going on some particular trip that takes their fancy; having enjoyed the privileges thereof, they drop out. It often occurs, as it did this year, that members who so act desire to return to the fold that they may join in another outing and expect to be reinstated on the same terms as a new member would be admitted, viz., on the payment of $3. This, in face of by-law 4, governing the re-admission of members, cannot be done. A member who voluntarily withdraws from membership can only be restored by payment of all arrears incurred since his defaulting, I cannot say resignation, because no one ever takes the trouble to resign. The by-law was framed purposely to guard against such unfair proceedings and is being strictly enforced. How much better for an agent, once a member, to continue as such by paying his annual subscription regularly. It is only $2 a year, for which is he not only a member, but is sent monthly a copy of our official organ, THE RAILWAY AND MARINE WORLD, published at $1 a year, and which every man engaged in the transportation business can read with much profit and general enlightenment, on railway and shipping advancement. During the year, 183 members renewed their subscriptions, 22 new members joined, together realizing $434; this with a balance of $221.98 brought forward from last year, and a credit balance of $74.55 from the Mobile-New Orleans outing fund, raises the total receipts to $730.53. Expenses were $515.38, leaving a balance of $215.15 to be carried forward to 1908. Balance sheets, vouchers and accounts have been audited and certified to by Auditor Hodgens, and are open for inspection. I very much regret that circumstances prevented my being with you in this your 21st annual convention. It is my second enforced absence in that time. I hope for better luck next year."

The report was unanimously adopted.

President McIlroy read the following address: "It affords me great pleasure to greet you on this the 21st annual meeting of the Association. Eight years ago we held our yearly meeting in this the now great city of Winnipeg, and that visit has certainly helped, as you have no doubt already observed, in making Winnipeg what she is to-day. Thousands of the citizens of Winnipeg, and now prosperous farmers of Manitoba and the Territories, have been ticketed by members of this Association, and another visit such as this tends but to refresh our memories, and will no doubt again prove beneficial to Winnipeg, Manitoba and the Northwest, for who comes in touch with prospective settlers more than the ticket agents who form this Association. So we warn the people of this fertile section of our great Dominion to be on the outlook for an inrush of settlers in 1908. One and all cannot fail to note what great progress Winnipeg has made since our visit eight years ago, and to be convinced that she is destined to be the great city of the Dominion of Canada, not even excepting Montreal, which city, as one of our eastern members claims is, 'Pretty good for Quebec.'

"I would ask you all to consider carefully a motion which will be put before you at this meeting, recommending the use of the 24 hour system of notation of time, by the Canadian railways operating from Port Arthur east, such as is used by the lines operating west of Port Arthur. The adoption of such a time system would, to my mind, greatly improve the present railway time table east of Port Arthur, especially so to the understanding of the travelling public.

"I would also draw your attention to the fact that if there is a suggestion that any member of this Association can make, which might improve the passenger service on our Canadian railways, that member is neglecting his duty if he does not air his views at this meeting. We want this Association to be a useful, as well as a social, organization.

"Newspapers have severely criticised the great Canadian railways for lack of equipment, infrequency of train service, etc., especially in Ontario, and I presume it is the same in certain sections of the west, during the past season. We, being connected with the passenger business of these railways, know what the respective railway companies

are doing to keep up with the immense increase of passenger traffic in this country during the last two years. We know that they are doing all in their power to provide satisfactory transportation facilities for all sections of the country. A locomotive cannot be built at a moment's notice, neither can a passenger coach. Hundreds of locomotives and passenger cars are on order, both in Canada and the United States, and the inability of the locomotive and car building shops to turn out the motive power and rolling stock on order, is the reason why certain sections of the country have not a more frequent train service. We have it from an authority, that the locomotive and car building establishments both in Canada and the U.S. have orders on hand at the present time which will take them five years to complete. From a national standpoint the C.P.R.'s first duty is to take care of the immense emigration business to this great Canadian Northwest. Consequently most of the new motive power and passenger rolling stock received is placed on the main line to handle that traffic. We know that railways, like all other large corporations, are open to criticism; but let us have fair-minded criticism, giving due consideration to both sides of the subject under discussion.

"Let your observations be keen while here in the west. Intelligent information to a prospective passenger is a great asset to the man behind the ticket counter. I thank you for electing me your President for the year 1907, and trust that you will enjoy the balance of your trip."

A letter from G. T. Bell, General Passenger Agent G.T.R., was read, expressing regret that the Association had decided not to send a representative to the American Association of General Passenger and Ticket Agents' meeting at Washington this year, and pointing out that when the invitation was extended it was expected that each of the co-operating associations would develop some ideas within its own particular field which it would like to have presented to the G. P. A.'s at their annual meeting. This letter evoked considerable discussion. It was explained that the decision not to send a representative this year was largely owing to the expense. The concensus of opinion expressed was in favor of sending a representative in future, and it is probable that the executive committee will so arrange. M. McNamara explained that when representing the C.T.A.A. at the G.P.A. meeting he had urged the payment of commission to ticket agents, but that the G.P.A.'s simply smiled and said nothing. He was not hopeful of its reinstatement.

The question of free transportation for Canadian ticket agents on U.S. railways having been discussed, S. Burrows, M McNamara and S. B. Morris were appointed to draft a resolution on the subject, which they submitted as follows: "That it be an instruction to the representative of this Association at the next annual meeting of the American General Passenger Agents' Association to urge upon that Association the desirability of placing before the U.S. Interstate Commerce Commission, the exceptional position of Canadian ticket agents in respect to the operation of the Interstate Commerce Act, and to ask that members of the Canadian Ticket Agents' Association be exempt from the operation of said law in respect to the granting of free transportation on U.S. roads." This was adopted.

S. B. Morris, in moving that the Secretary-Treasurer's honorarium be the same as in previous years, expressed great regret at Mr. de la Hooke's enforced absence He had known him for between 30 and 40 years, having at one time relieved him as ticket agent on the old Great Western Ry. at London, Ont. The resolution was unanimously adopted.

President McIlroy moved, seconded by W. Bunton, "That whereas the anti-meridian and post-meridian system of notation of time is liable to error and to create confusion particularly with regard to train times, and in public time-bills; and, whereas the 24 hour system of notation of time, in use on the Canadian Government Ry. and the C.P.R. west of Port Arthur, has proved entirely satisfactory on these lines, and is a simple, clear and definite system, and capable of easier notation in public time-bills; therefore, be it resolved, that this Association recommend the adoption of the twenty-four hour system of notation of time by all Canadian transportation companies." After considerable discussion the resolution was carried, only two members voting against it.

Officers for 1908 were elected as follows: President, C. R. Coleman, C.P.R., Truro, N.S.; First Vice-President, R J. Craig, C.P.R., Cobourg, Ont.; Second Vice-President, Lt.-Col. E. C. Piche, C.P.R., Joliette, Que.; Third Vice-President, J. P. Hanley, G.T.R., Kingston, Ont.; Secretary-Treasurer, E. de la Hooke, G.T.R , London, Ont.; Auditor, F. R. Hodgens, G.T.R., Clinton, Ont.; Executive Committee: W. Jackson, C.P.R , Clinton, Ont.; W. McIlroy, C.P.R., Peterboro', Ont.; J. F. Dolan, R. & O.N. Co., Montreal; W. Bunton, G.T.R., Peterboro', Ont.; M. McNamara, G.T.R , Walkerton, Ont.

A special vote of thanks was passed to C B. Foster, District Passenger Agent C.P.R., Toronto, for his great assistance in arranging for the trip. Votes of thanks were also passed to the C.P.R., G.T.R., and other railway companies which had extended courtesies; to the corporations of Winnipeg, Fort William and Port Arthur, to the local reception committee at Winnipeg, and to President McIlroy and the executive committee.

In the afternoon a large number of the party attended a high-class vaudeville performance at the Dominion Theatre, and in the evening most of the ladies went to the Walker Theatre to see the "Heir to the Hoorah." Both the theatre parties were tendered by the local reception committee, who also provided carriages for the guests.

In the evening the members and a number of invited guests attended the annual dinner in the Royal Alexandra's sumptuous dining-room. The dinner, which was beautifully served, was a most enjoyable one, the tables were tastefully decorated and excellent music was provided by an orchestra, in addition to which there was some capital vocal music and several recitations. President McIlroy occupied the chair. The toast list was as follows: The King; The General Passenger Agents, responded to by C. E. McPherson, General Passenger Agent C.P.R. Western Lines, and G. H. Shaw, General Traffic Manager Canadian Northern Ry. Mr. McPherson said that in order to develop a new country he was in favor of paying a commission to ticket agents. Mr. Shaw made the important announcement that within five years the Canadian Northern would have become a transcontinental line, with termini on both the Atlantic and the Pacific. The city of Winnipeg was responded to by acting Mayor Davidson, Alderman Cox, Controllers Cockburn and Garson. "Our Association," by W. Bunton and M. McNamara. "Our Guests," by J. S. Potts and F. W. Drewry. The Travelling Passenger Agents, by B. C. Russel and J. L. Brock. The Press, by Acton Burrows and H. Stead; and The Ladies, by H. L. Brown, G. Lee and A. Philps. The healths of W. Jackson, whose attendance at the meeting was for the 21st year in unbroken succession, and of A. Calder, chairman of the Winnipeg reception committee, evoked great enthusiasm.

On Oct. 15 in the afternoon the party were taken in special cars over the Winnipeg Electric Ry. to the Ogilvie Milling Co.'s mill, Drewry's Redwood factories, old Fort Garry gate and Silver Heights. At night they were entertained by a local committee at a ball at the Royal Alexandra, which was also largely attended by Winnipeggers. The breakfast room was used for dancing, the beautiful drawing-room provided a most charming lounging place and supper was served in the main dining-room. The reception committee consisted of A. L. and Mrs. Preston, Mrs. A. C. Smith, Mrs. G. Walton, Mrs Webster, and H. L. Brown.

The party numbered 109, of whom 36 were ladies. The attendance on previous trips was: 1902, Washington, D.C., 210; 1903, Sydney, N.S., 128; 1904, St. Louis, Mo., 206; 1905, Portland, Me, 121; 1906, Mobile, Ala., considerably over 200.

The following members went on the trip, all being from Ontario, except where otherwise mentioned: G. J. Alexander, G.T.R., Richmond, Que., and wife; A. H. Baird, C.P.R., Paris; A. G. Baker, G.T.R., Leamington, and wife; W. A. Becker, M.C.R., Bismarck; E. R. Blow, C.P.R., Whitby, and wife; W. Bunton, G.T.R., Peterborough; S. Burrows, C.P.R., Belleville, and wife; A. Carscallen, C.P.R., Farnworth; B. Caswell, C.P.R., Smith's Falls; N. Campbell, P.E.I.R., Breadalbane, P.E.I.; R. Clanahan, C.P.R., Glencoe, and wife; C. R. Coleman, C.P.R., Truro, N.S.; R. Cox, C.P.R., Enterprise; R. J. Craig, C.P.R., Cobourg, and wife; F. H. Crosby, C.P.R., Uxbridge, and wife; J. Fox, C.P.R., Lucan, and wife; W. Godfrey, G.T.R., Moorefield, and wife; A. Grant, C.P.R., Perth; A. M. Hare, G.T.R. and Wabash Rd., Tillsonburg; F. M. Hawley, G.T.R., Cobourg; W. Hewson, Richelieu and Ontario Navigation Co., Niagara Falls, and wife; T. Howard, C.P.R., Hastings, and wife; D. Hoy, M.C.R., Fletcher; J. H. Jackson, C.P.R., Georgetown; W. Jackson, C.P.R., Clinton, and wife; J. Kidd, C.P.R., Goderich, and wife; Lieut.-Col. J. Knifton, C.N. Ontario Ry., Parry Sound; G. D. LaCourse, G.T.R., Berlin; F. J. Leaper, Pere Marquette Rd., St. Thomas; N. L. Lusher, London and North-Western Ry. of England, Montreal, Que.; R. Macfarlane, C.P.R., Durham, and wife; A. Malcolmson, C.P.R., Moorefield, and wife; S. Marshall, G.T.R., Dobbinton, and wife; W. Martin, C.P.R., North Bay; T. C. Matchett, C.P.R., Lindsay; W. H. McFarlane, C.P.R., Paisley, and wife; W. McIlroy, C.P.R., Peterborough, and wife; J. McMurchie, C.P.R., Blyth, and wife; P. A. McKeown, B.Q.R., Enterprise; M. McNamara, G.T.R., Walkerton, and wife; R. H. Menzies, C.P.R., Burk's Falls, and wife; S. B. Morris, C.P.R., Rodney, and wife; R. L. Mortimer, G.T.R., Shelburne, and wife; F. C. Muller, M.C. Rd., Springfield; T. B. Nairn, M.C.R., Aylmer; T. J. Nelson, G T.R., Brantford; L. Peine, C.P.R , New Hamburg; A. Philps, G.T.R., Huntingdon, Que., and wife; Lieut.-Col. E. G. Piche, C.P.R., Joliette, Que., and wife, T. B. Pringle, C.P.R., Huntingdon, Que., and wife; J. P. Rhind, I.C.R., Stewiacke, N.S.; J. W. Ridgeway, G.T.R., Brockville, and wife; J. H. Rogers, C.P.R., Moncton. N.B., and wife; A. C. Rorabeck, G.T.R., North Bay; J. H. Sherin, C.P.R., Lakefield, and wife; C. L. D. Sims, Manitoulin and North Shore Steamship Co., Manitowaning, and wife; T. C. Sims, G.T.R., Little Current, and wife; A. M. Smith, G.T.R., Listowel, and wife; D. Smith, C.P.R., Tilbury, and wife; W. L. Smith, C.P.R., Shelburne; S. Stevenson, C.N. Ont. Ry., Hawkesbury, and wife; J. W. Stockvale, C.P.R., Bolton, and wife C. F. Stone, G.T.R., Perth, and wife; Dr. H. A. Turner, C.P.R., Millbrook; E. C. Whitman, I.C.R., Canso, N.S.; E. D. Young, Pere Marquette Rd., Rodney.

"PAGE FENCES WEAR BEST"

PAGE WIRE FENCES stretch tighter—posts can be set farther apart. That saves money—fewer posts, less labor digging post-holes, quicker erecting. PAGE FENCES last longer—made of No. 9 wire. PAGE FENCES are heavily galvanized, and for a small extra charge are supplied coated WITH PERMANENT PAINT. PAGE FENCES stand wear better, give longer service, keep your maintenance account down. The PAGE KNOT LOCK cannot slip and positively does not injure the wire. PAGE FENCES do not sag.

50 THOUSAND MILES OF RAILWAYS USE PAGE FENCES

There must be a dollars-and-cents reason for the standing PAGE FENCES have with railway men the world over. It will pay your road to hear that reason before you spend another cent on fences.

The Page Wire Fence Co., Limited, Walkerville, Ont. Branches in Montreal—Toronto—St. John

The following invited guests also went on the trip: B. H. Bennett, General Agent, Chicago and Northwestern Ry., Toronto; W. T. Dockrill, Travelling Passenger Agent, C.P.R., Toronto; Dr. Shaw, Honorary Physician of the Association, Clinton, Ont., and wife; A. J. Taylor, Canadian Freight and Passenger Agent, Chicago, Milwaukee and St Paul Ry., Toronto; H. G. Thorley, Passenger Agent for Ontario, International Mercantile Marine Co., Toronto; J. A. Yorick, Canadian Freight and Passenger Agent, Chicago, Burlington and Quincy Rd., Toronto; Acton Burrows, Managing Director THE RAILWAY AND MARINE WORLD, the official organ of the Association.

The special train for the return journey left Winnipeg Oct. 16 at 4 p.m., reaching Toronto Oct. 18 at 10 p.m. Of the original party 35 returned by the special, some of the others returning via St. Paul and Chicago, and a number availing themselves of the Canadian Northern and Canadian Pacific Railways' invitation, and going west to Edmonton, Calgary and British Columbia points.

Perfect arrangements were made for the trip. President McIlroy took charge of the location of the party in the sleeping cars and also the dining-car service. For the first time the Association chartered the dining-cars from the C.P.R Co., and provisioned them through the company's dining-car department. The service was excellent throughout the trip, the menu being a most liberal one, the cooking excellent, and the attendance prompt. Very general satisfaction was expressed, and the improvement over having to get out for meals at uncertain hours was most marked. Secretary-Treasurer de la Hooke had attended to the other details for the trip in his usual systematic and thorough way, so that there was not the slightest hitch. Very great regret was expressed that he was unable to take part in the trip. In his absence, W. Jackson, of Clinton, acted as Secretary, and was most indefatigable in attending to the multifarious duties. He received hearty congratulations on having attended 21 meetings of the Association in yearly succession.

The weather for the trip was most satisfactory. With the exception of Oct. 11 at and west of North Bay, it was very fine, and in Winnipeg it was most perfect, overcoats not being required in the day time there. The train service was excellent, the meals on the dining-cars everything that could be desired, and the heartiness of the reception in Winnipeg will long be remembered by those who were present.

The Winnipeg reception committee comprised: A. Calder, chairman; C. E. E. Ussher, G. H. Shaw, C. E. McPherson, C. W. Cooper, R. L. Daly, G. A. Walton, B. G. Rutley, A. C. Smith, W. C. Dodds, T. Stockdale, W. Stapleton, H. Crossland, H. Corrigan, W. P. F. Cummings, A. E. Duff, W. H. McCallum, W. J. Quinlan, W. J. Wells, H. Swinford, R. McNeillie, W. Cullum, A. L. Preston, A. Brostedt, H. Dunn, D. T. Cummings, J. E. Dougherty, R. Crawford, G. A. Lee, J. Lenfesty, J. I. Gillick, W. M. McLeod, D. Parker, H. L. Brown, R. Bullen, Geo. H. Anthony. The committee did splendid work, and aided by a grant from the City Council provided a most enjoyable programme of entertainment.

H. J. Lambkin, son of J. B. Lambkin, Assistant General Passenger Agent, I.C.R., Halifax, N.S., was in charge of the sleeping cars, and was assiduous in his attention to the comfort of the party.

The following presentations were made n connection with the trip: A. Calder, chairman Winnipeg reception committee, cut glass bowl and silver-mounted flask; H. L. Brown, W. J. Quinlan, A. Brostedt and R. L. Daly, of the Winnipeg reception committee, gold cuff links; C. B. Foster, District Passenger Agent C.P.R., Toronto, cut glass water jug; Mrs. Foster, cut glass vase; W. T. Dockrill, Travelling Passenger Agent, C.P.R., cut glass decanter; Mrs. Dockrill, cut glass bowl.

Manitoba Reminiscences.

From the Manitoba Free Press, Oct. 15.

In replying to the toast of the press, at the Canadian Ticket Agents' Association dinner last night, Acton Burrows, Managing Director of THE RAILWAY AND MARINE WORLD, said: "I think this Association has taken a retrograde step. Two or three years ago the committee having charge of the dinner arrangements decided to omit the perfunctory toasts, such as the Press, and putting them back on the list is hardly in line with the progressive policy of the Association as exemplified in its emphatic resolution of to-day in favor of the 24-hour system of time. I have the opportunity of addressing the members so frequently through the columns of what my good friends Messrs. Shaw and McPherson affectionately call 'the great family journal that no home should be without,' that I am sure the members hear quite enough from me in that way without having to listen to me at the annual dinner, and especially at such a late hour.

"I notice that one of the papers of this marvellous city—and here let me say that no city in Canada has better or more progressive papers than this metropolis of the great west—referred to me as a veteran newspaper man, so perhaps I may be pardoned for becoming reminiscent. It was 28 years ago last spring that I landed in Winnipeg, or rather in that sister city which has been immortalized by Whittier in that beautiful poem, 'The Bells of St. Boniface,' trudged through the soapy, black, argillaceous mould which enabled the venerated Archbishop Taché to say that the country would stick to you even if you did not stick to it—stood on the east bank of the great Red River of the North till Robert Tait's ferry got up steam on the west side, and came across for us, and then trudged again up to the Grand Central hotel, which was then the hotel-de-luxe of Winnipeg. The contrast of that journey from Toronto and the charming trip we made a few days ago over that wonderful pioneer and still the only actual transcontinental railway in America—though there will soon be two more in Canada—landing in a huge train shed, and walking into this luxurious hotel, is certainly a marvellous and a very pleasant one.

"The western papers appear to have been having a little difficulty about the price of their telegraphic dispatches. In those days we were glad to get them at any price. When President Garfield was assassinated, we got a telegraphic bulletin via St. Paul stating the bare facts, and though I stayed at the old Free Press office—where I was then night editor—until after eight in the morning, we did not get another line, and no particulars were available until the St. Paul papers arrived the next day. Frequently we had to print without any dispatches at all, and to head the column usually devoted to telegrams with the words, 'Wires Down,' and occasionally wicked people intimated that it was not the telegraphic service which was at fault, but that the staff had departed from their usual beverage—the sparkling water of that limpid stream which, contrary to the usual practice, insists on running north and losing itself in Hudson Bay, that great sheet of water which in the not distant future will be plowed by a fleet of grain-laden steamships carrying the unrivalled no. 1 hard wheat of these great grain fields to the European markets.

"When I first came here the C.P.R. between Lake Superior and Winnipeg was only partially under construction, and railway building had not been started west of the Red River. It was a great day in Winnipeg when the first locomotive crossed over from St. Boniface on a temporary track built across the river on the ice.

"Many factors have combined in the efforts to develop the great territory tributary to Winnipeg extending west to the Rockies and north and northwest to the Arctic sea. The papers of this territory have done their part well, and irrespective of politics they have displayed a steadfast loyalty to the country and a never wavering faith in its great potential wealth that should never be forgotten.

"I fear I have digressed too much from the topic of the Press, but under the circumstances I hope you will pardon me. It has been a great pleasure to me to take part in the trip. It seems to me like coming home. Sixteen of the happiest years of my life were spent here. I was married here, my children were all born here. I always point to them with pride as being Manitobans and my earnest prayer is that they will never be anything but a credit to the province of their nativity. Fate ruled that I should return east to live, but I have never lost my love for Manitoba, nor has my faith in the future of the great west ever wavered. My deepest regret is that I can hardly hope to be here to see it reach the commanding position in the Dominion confederation which it will undoubtedly occupy within the next quarter of a century."

G.T.R. Subsidiary Companies.

The annual meetings of the shareholders of the various subsidiary companies of the G.T.R. in the United States, were held Oct. 5 and 9, with the exception of the International Bridge Co., the meeting of the shareholders of which was postponed. These companies do not print any annual reports and the proceedings are largely formal. The meetings of the shareholders of the Grand Trunk Junction Ry., and of the Grand Trunk Milwaukee Ferry Co., were held at Chicago, Ill., Oct. 5, the retiring directors were re-elected, with C. M. Hays as President, E. H. Fitzhugh as Vice-President, and G. W. Alexander as Secretary and Treasurer.

The Detroit and Toledo Shore Line Rd. re-elected its directors, the officers being: President, T. P. Shonts; Vice-President, E. H. Fitzhugh; Secretary and Treasurer, G. W. Alexander.

The Grand Rapids Terminal Co. re-elected its directors, the officers being: President, A. B. Atwater; Secretary and Treasurer, G. W. Alexander.

The shareholders of the Grand Trunk Western Ry., Detroit, Grand Haven and Milwaukee Ry., Toledo, Saginaw and Muskegon Ry., Chicago, Detroit and Grand Trunk Junction Rd., Michigan Air Line Ry., and the St. Clair Tunnel Co., met at Detroit, Mich., Oct. 9. All of the old directors were re-elected with the exception of F. H. McGuigan, who was replaced on the boards of the G.T. Western Ry., the Detroit, Grand Haven and Milwaukee Ry., by W. G. Brownlee; and on the board of the Toledo, Saginaw and Muskegon Ry. by A. B. Atwater; while F. E. Ranney, of Greenville, Mich., was elected a director of the Toledo, Saginaw and Muskegon Ry., to fill the vacancy caused by the death of C. J. Church. The officers of these several companies are: President, C. M. Hays; Vice-President, E. H. Fitzhugh; Secretary (of the G.T. Western Ry.; Detroit, Grand Haven and Milwaukee Ry., and Toledo, Saginaw and Muskegon Ry.) G. W. Alexander; Secretary (of the Chicago, Detroit and Canada Grand Trunk Junction Rd.; Michigan Air Line Ry., and St. Clair Tunnel Co.) F. Scott, Montreal.

TRADE AND SUPPLY NOTES.

The matter which appears under this heading is compiled, in most cases, from information supplied by the manufacturers of, or dealers in, the articles referred to, and in publishing the same we accept no responsibility. At the same time we wish our readers to distinctly understand that we are not paid for the publication of any of this matter, and that we will not consider any proposition to insert reading matter in our columns for pay or its equivalent. Advertising contracts will not be taken with any condition that accepting them will oblige us to publish reading notices. In other words, our reading columns are not for sale, either to advertisers or others.

The Safety Car Heating and Lighting Co. has issued pamphlet 683, describing its system of electric lighting for cars by axle-driven dynamos.

A paper on Walschaert Valve Motion was read at the last meeting of the Canadian Railway Club, Montreal, Oct. 1, by C. J. Mellin, Designing Engineer, American Locomotive Co.

The Canadian Iron and Foundry Co.'s new works at West Fort William, Ont., are nearing completion. It is expected that the establishment will be in full working order before the commencement of winter.

The actions recently instituted against the Dominion Car and Foundry Co., Ltd., for an alleged breach of the Alien Labor Act, have been dismissed, the judgment holding that the provisions of the Act do not hold good where a new industry was started in the country where no experienced men could be found.

F. H. Hopkins & Co., Montreal, have issued an up-to-date catalogue of railway and mining contractors' supplies handled by them. It contains descriptions, with illustrations of steam shovels, dump cars, concrete mixers, rock crushers, locomotives, rock drills, hoisting engines, derricks, track supplies, and all other details required for railway and general construction work.

S. F. Bowser & Co., Ltd., Toronto, issues a pamphlet describing its system of oil storage as adopted to the requirements of railway storehouses, terminals, signal towers, etc. The different styles of tanks, pumps and accessories manufactured by the company are illustrated by half-tones, and the particulars given emphasize the safety, economy and cleanliness of the system. The company will supply copies of the bulletin on application

The Canadian Westinghouse Co., Hamilton, Ont., has issued the following circulars: 1092, The Westinghouse Multiple Alternating Arc Lamp; 1102, Westinghouse Direct Current Multiple Arc Lamp; 1128, Small Power Motors for Alternating and Direct Current Circuits; 1143, Regulating and Reversing Controllers for Direct Current Motors in Crane Hoisting and Similar Service; 1144, Westinghouse Mill Motors for Direct Current Service; and a general pamphlet dealing with Electric Machinery for the Operation of Mines.

The McGregor Banwell Fence Co., Ltd., manufacturers of Ideal woven wire fence at Walkerville, Ont., whose factory was destroyed by fire on Mar. 16 last, and who have since been operating in a temporary factory, have almost completed the erection of their new building, which is of reinforced concrete throughout, the floors being reinforced with Ideal fencing specially made for that purpose. The factory will have 24,000 sq. ft. of floor space, the ground floor being used for the storage of wire and for the manufacture of woven wire fencing and the upper story for the manufacture of gates, lawn fencing and fence supplies. Every up-to-date appliance for the manufacture of these goods will be installed and on completion it will be a model factory in this line. The company will also erect a fireproof storage building 200 by 100 ft. It is expected that the looms will be in operation Nov. 15, and in the meantime the trade is being supplied from the surplus stock made up just before the temporary factory was taken down.

Canadian Northern Ry. Construction, Etc.

W. Mackenzie, President, recently completed a trip of inspection over the company's western lines. D. D. Mann, Vice-President, has also been over the lines, and in the course of an interview prior to his visit to Vancouver and Victoria, B.C., he is reported to have said since the beginning of the present year the company had expended over $8,000,000 upon improvements to the line, rolling stock and other equipment. The work of improvement upon the company's various lines was to be proceeded with, and the industries established at Port Arthur were to be developed. The project to construct a line to Hudson Bay had not been lost sight of, although construction was not being proceeded with.

Canadian Northern Ontario Ry.—Work is being rapidly proceeded with on the line between Toronto and Sudbury, Ont. The grading has been completed from Parry Sound to the French River, and track was reported to have been laid to Shell River, 15 miles south of the French River, Sept. 30. The bridge over this river, which is 300 ft. long and 100 ft. above the water level, was completed Oct. 2, and the steel laying gang commenced work laying the track over it Oct. 3. It was expected to have the steel laid to French River by Oct. 31.

Canadian Northern Ry.—D. D. Mann, Vice-President, recently stated at Port Arthur, Ont., that it was the company's intention to carry out considerable improvements upon the main line west. The heavy grade into Stanley is to be evaded; and by means of a cut-off, starting at Slate River, and striking the main line again near Kaministikwia, the line will be shortened by nearly eleven miles between Port Arthur and Winnipeg.

A new station is being built at Beaudette, Minn., to replace the one recently burned. The contract has been let to A. Johnston, Spooner, Wis.

In connection with the erection of the new workshops at Fort Rouge, it is proposed to erect a pumping station 30 by 40 ft., to contain engines capable of pumping 500 gals. of water per minute. Pipe lines are being laid to all the new shops to be connected with the pump station. The water will be obtained from the Red River, and will be available in cases of fire, as well as for the ordinary purposes of the shops

Speaking about the joint station for the C.N.R. and the G.T. Pacific Ry. at Winnipeg, W. Mackenzie, President, said, Sept. 26, that he looked for the commencement of the work of excavation for the foundations about a month thereafter. The plans for the station at the foot of Broadway on the C.N.R. property, bounded by Main St. and the two rivers, are practically decided upon. The main entrance to the station will be on Main St. The plans of the proposed station show the entrances and exits to the station as leading under the tracks, the platforms for trains being reached by staircases and elevators, thus making it unnecessary to cross the many tracks within the station. A bridge over the Assiniboine east of the Main St. bridge will be constructed. Between the tracks of the great railway yard there will be wagon roads which lead to a main road east of the passenger tracks. This road will cross Water St. on the north and Main St. near the Main St. bridge. The driveways will lead towards Water St., the main driveway widening towards Water St. Along the banks of the Red River from the present C.N.R. bridge will be utilized for through traffic and the passenger traffic will be independent of the freight lines. W. Warren and C. D. Wetmore, the architects for the building, spent some days in Winnipeg in consultation with M. H. McLeod, General Manager C.N.R., and O. Winter, Superintendent G. T. Pacific Ry., early in Oct. The contract for the excavation for the foundations of the new building has been let to S. Brown, Winnipeg, and a start made. The work is to be completed by Jan. 1.

The work includes the removal of 45,000 cubic yards of material. The station will have a frontage of 400 ft. on Broadway, and a depth of 230 ft.

A contract was reported to have been signed by the C.N.R. and the G.T. Pacific Ry., Oct. 14.

The company is going on with the construction of the lines into the Goose Lake district, at Disley Hill near Lumsden, and on the Brandon-Regina branch. It is reported in Battleford, Sask., that the company proposes to construct at an early date a line from a point east of Saskatoon into Battleford, Sask., at which point an area of 40 acres has recently been purchased by one of the company's officials.

The bridge building gang arrived at Prince Albert, Sask., Sept. 28, and began preparation for the construction of the substructure of the new railway and traffic bridge across the Saskatchewan River. A track is being laid from the company's yard in Prince Albert to the bridge site. Work will be gone on with on the bridge during the winter.

Westerly from Edmonton, D. D. Mann recently stated there had been graded 40 miles towards the Rocky Mountains, and 25 miles of steel had been laid.

C.N.R. Rolling Stock.—The following statement shows deliveries of locomotives and other rolling stock ordered and delivered to the C.N.R. and subsidiary lines during 1907:

	No. ordered.	Deliv'd to C.N.R.	Deliv'd to east lines.	Yet to deliver.
Locomotives	140	57	24	59
Box cars	1500	1100	300	100
Stock cars	200	167	25	8
Flat cars	150	155	180	..
Refrigerators	20	15	2	3
Composite cars	150	140	60	..
Steel ore cars	50	11	..	39
Cabooses	15	13	7	..
Day coaches	32	7	19	6
S.D. and P. cars	8	6	2	..
B.M. and Ex.	20	12	4	4

The G.T.R. freight sheds at Toronto Junction, Ont., were destroyed by fire Oct. 18, the value of the buildings being placed at about $4,000.

W. G. McLean, at one time in the Great Northern Ry. (U.S.A.) service in Toronto and Montreal, died in Chicago, Ill., Oct. 25, and was buried at Sarnia, Ont.

F. B. Polson, President and General Manager Polson Iron Works, Ltd., Toronto, died Oct 28, suddenly. He had suffered somewhat from acute indigestion and had been slightly unwell for a couple of days, but no serious result was expected. He was born at Port Hope, Ont., Feb. 10, 1858, his father, W. Polson, being Mechanical Superintendent of the Grand Trunk Junction Ry. at Belleville. F. B. Polson studied engineering and was in the service of the Cobourg and Peterboro' Ry. and Mining Co., and of the Peterboro' Ry. and Mining Co., subsequently being Mechanical Superintendent of the Victoria Ry., at Lindsay, resigning in 1883 to join his father in founding the Polson Iron Works. The firm built, at Owen Sound, the S.S. Manitoba for the C.P.R., the first steel vessel constructed in Canada, and has developed into the present company, which does a large business in ship, dredge and boiler building, etc. Mr. Polson was a member of the Toronto Technical School Board, and an Associate of the Canadian Society of Civil Engineers. He was at one time chairman of the Employers' Association arbitration board, and took part in several arbitrations, notably one between the Toronto Ry. Co. and its employes.

DOMINION IRON AND STEEL CO.

Canadian Northern Ontario Railway

CANADIAN NORTHERN ONTARIO

HUNTING TRIPS

Deer—Moose—Bear—Partridge—Duck

The Canadian Northern Ontario opens up a new country—the best hunting on the Continent. Beside Muskoka Lakes, Georgian Bay, innumerable water-ways north of Parry Sound, including the Shawanaga, Magnetawan and Still Rivers, hitherto almost inaccessible, more Deer come out of this section than from the rest of Canada. Partridge, Duck and small game in abundance.

REDUCED RATES; costs no more to go where game abounds than to where it has been hunted out. Write C. PRICE GREEN, Passenger Agent, Toronto, for "Big Game Hunting," illustrated with best maps.

WM. PHILLIPS, GENERAL PASSENGER AGENT, TORONTO

The Hudson's Bay Company

HUDSON'S BAY COMPANY INCORPORATED 1670

THE COMPANY OFFERS FOR SALE

Farming and Grazing Lands in Manitoba and the Northwest Territories

ON EASY TERMS OF PAYMENT

Town Lots for sale at Winnipeg, Ft. William, Edmonton, Prince Albert, etc.

The Company has General Stores at Winnipeg, Vancouver, Calgary, Edmonton, and other places where purchasers will find the best of goods at moderate prices.

Transportation by the Company's Steamers, brigades of boats and canoes throughout the Territories not traversed by railways.

Full information at the Company's Offices, Winnipeg, or 1 Lime St., London, E.C.

C. P. R. Betterments, Construction, Etc.

Northern Colonization Ry.—Contract has been let to the Orillia Construction Co., for the grading, etc., upon an extension from Nominingue, Que., towards Maniwaki, Que., for a distance of 10 miles, and work is in progress. Surveys are in progress upon the remaining 35 miles of the extension, and we are advised that it is expected to let a contract for the work shortly.

Hull Improvements.—In connection with the improvements which the C.P.R. is carrying out at Hull, Que., it is reported locally that a project for the construction of a second track under the C.P.R. property via Little Farm, is under consideration.

Kingston and Pembroke Ry.—Traffic was suspended for some days recently at Wilbur station, about 30 miles south of Renfrew, Ont., by the sinking of about 125 ft. of track in a bog.

The Campbellford, Lake Ontario and Western Ry. will apply next session of the Dominion Parliament for an act extending the time for the commencement and completion of its projected railway.

In a letter addressed to the Mayor of Oshawa, Sir T. G. Shaughnessy, President C.P.R., said: "We have not lost sight of the proposed line through Oshawa to Toronto, but the Sudbury extension and the Guelph and Goderich Ry. have not only cost a great deal more money than we anticipated, but the time occupied in their construction has exceeded the estimate by a year or more. Present conditions of the money market do not encourage much railway construction, but I trust that another year there will be improvement. Meantime I have not changed my views as to the desirability of the connection with which you are specially interested."

Lindsay, Bobcaygeon and Pontypool Ry.—Application will be made next session of the Dominion Parliament for an act extending the time within which it may construct the extension of its railway branches which it has been authorized to construct. The notice is signed by C. Swabey, Toronto, Secretary.

South Ontario Pacific Ry.—The Dominion Parliament will be asked next session to pass an act extending the time within which it may construct the railways and bridge authorized.

West Ontario Pacific Ry.—An extension of time for the construction of this railway will be applied for at the next session of the Dominion Parliament.

Guelph and Goderich Ry.—The extension of the branch, now under construction from Linwood to Listowel, Ont., as far as Stratford, is under consideration. P. A. Peterson, Chief Engineer, is quoted as stating that the work upon this branch would engage his attention in the future; while no definite decision had been reached with respect to the extension from Listowel to Stratford, the work might be commenced early in 1908.

The plans prepared for the station at Listowel show a building 77 by 30 ft., of red pressed brick, on stone foundations, with a slate roof. A new station at Guelph will be constructed in the spring.

St. Marys and Western Ry.—In connection with the construction of this line between Embro and St. Marys, local reports state that it is proposed to start a branch from near Harrington and run it to Stratford, effecting a junction there with the projected extension of the Linwood-Listowel branch of the Guelph and Goderich Ry.

Owen Sound to Meaford.—On a recent visit to Owen Sound, J. W. Leonard, Assistant General Manager Eastern Lines, discussed with merchants and others the possibilities of line from Owen Sound to Meaford, Ont. A local report states that a proposal is under consideration for the construction of such a line, with an extension via Beeton to the company's Toronto-Sudbury line, and to the new Georgian Bay-Seaboard Ry.

Toronto-Sudbury Line.—In connection with the development of traffic on this line the company is taking out curves and gradients between Weston and Bolton, Ont., on its Toronto-Owen Sound line. A new right-of-way is being acquired at several points, and there will be a considerable amount of heavy work, particularly at Woodbridge.

The erection of stations and freight sheds on the section of the line north of French River has been completed, and the contractors—Woolrich and Leslie—have transferred their plant to the Muskoka section, where they are engaged in putting up various buildings.

Improvements at Port Arthur.—Nothing definite has been decided as to the improvements which it is proposed to undertake at Port Arthur, Ont. The plans which are being considered form part of the general plan for improvements at the company's terminals at the head of the Great Lakes. What is being aimed at is to provide facilities to fill the company's requirements for many years to come.

St. Boniface Station.—Work was commenced at the end of Sept. upon the new station at St. Boniface, Man. The new building will be a two story one, and is to be completed by the end of the year.

Teulon to Icelandic River.—A contract has been entered into between the Dominion Government and the C.P.R. for the construction under subsidy of a railway from a point at or near Teulon to a point on the Icelandic River, Man., 35 miles, upon the usual terms. This subsidy is in lieu of that granted by chap. 57 of the statutes of 1903, which was for a railway from Winnipeg Beach or Teulon to a point on the Icelandic River by way of Gimli, not exceeding 35 miles.

Manitoba and Northwestern Ry.—The Dominion Parliament will be asked next session for authority to construct a branch line from Theodore, 25 miles from Yorkton, Sask., southeasterly to connect with the Russell branch in tp. 20 or 21, range 28, west of the principal meridian.

Mowbray, Man.—The C.P.R. has a branch line extending from Glendale to Mowbray, Man., near the International boundary. A report from Langdon, N.D., states that C.P.R. officials have been making investigations there as to the possibility of extending the line a few hundred yards from Mowbray across the International boundary. The object of the extension, the reports state, is to secure the shipment of grain in bond. Under the Canadian law wheat hauled across the boundary in wagons cannot be shipped in bond, but if cars are loaded and sealed south of the line it can be done. Langdon is a station on a branch of the Great Northern Ry., U.S., extending from Grand Forks to Hannah, N.D.

Regina-Bulyea Line.—We are advised that a contract has been let to J. Bradley for the construction of a line from Regina northerly to Bulyea, Sask., 43.2 miles. Bulyea is a station on the company's Pheasant Hills branch, now completed to Lanigan, where a junction is effected with the Manitoba and Northwestern Ry.'s line, which runs into Saskatoon, Sask.

Killam to Strathcona.—Application will be made next session of the Dominion Parliament for an act authorizing the construction of a branch line from Killam, or some point in tp. 44, ranges 13 and 14, west of the 4th principal meridian, northwesterly to Strathcona, Alta.

Weyburn to Lethbridge.—We are advised that consideration has been given to the proposal to construct a line from Weyburn, Sask., to Lethbridge, Alta., but no definite decision has been reached in regard to it.

MacLeod Roundhouse.—Orders have been received for the addition of twelve stalls at the roundhouse at MacLeod, Alta.

Hector-Field Grade Reduction.—The contract for this work has been let to the McDonell and Gzowski Co., Vancouver, B.C., as reported.

British Columbia Southern Ry.—Application will be made next session of the Dominion Parliament for an act extending the time for the commencement and completion of the railway authorized from Fort Steele to Golden, B.C., which it is duly authorized to construct.

Grand Forks, B.C.—Press reports state that it is proposed to commence the construction of a roundhouse, repair shops and other buildings at Grand Forks, B.C., at a cost of $100,000, early in 1908.

Nicola, Kamloops and Similkameen Ry.—A survey party in charge of H. Carry, C.E., is going over the route surveyed last year from Nicola up Quilchena Creek to Aspen Grove, B.C. The party will also go through the Douglas Lake country with a view of ascertaining whether a satisfactory route can be obtained for an extension of the line with the Midway-Vernon line.

Esquimalt and Nanaimo Ry.—An act will be applied for next session of the Dominion Parliament extending the time within which it may commence and complete the railway and branches as follows: An extension of the main line to Comox, B.C., from Comox to a point near Campbell River; from near Duncans to Alberni, via Cowichan Valley; from near Englishman's River to the Alberni River; from near Comox, via Cumberland, southwesterly to the Alberni Canal.

H. E. Beasley, assistant to R. Marpole, General Executive Assistant, is engaged in securing the right-of-way for the extension of the line from Wellington to Nanoose. It is expected that the work of clearing the right-of-way will be started at an early date.

Minneapolis, St. Paul and Sault Ste. Marie Ry.—The Wisconsin Railroad Commission has issued a certificate permitting the company to construct an extension from the Wisconsin-Minnesota State boundary through Douglas county to South Superior, to connect with the proposed line of the Wisconsin and Northern Minnesota Rd.

The American Association of General Passenger and Ticket Agents has decided that its convention in Sept., 1908, be held in Toronto.

The aggregate value of Canadian securities listed on the London, Eng., stock exchange, is $1,181,000,000, of which $867,000,000 represents steam railway shares and bonds, and $46,000,000 shares and bonds of street railway, light and power companies.

The Permanent Construction Society of Quebec will apply next session of the Quebec Legislature for an act giving the Society more extensive powers to carry on financial operations than it possesses at present. C. N. Hamel, Quebec, is solicitor for the Society.

The Quebec Transportation Club's annual trip took place recently. The party left Quebec, Oct. 14, visiting Portland, Boston, Philadelphia, Atlantic City and Washington, and returned Oct. 27.

Catalogues and Circulars Cheerfully Furnished. Edison Storage Battery for Railway Car Lighting.

Largest Manufacturers in the World of Car Heating Apparatus

RAILWAY DEVELOPMENT.

Projected Lines, Surveys, Construction, Betterments, Etc.

Ashcroft, Barkerville and Fort George Ry.—Application will be made next session of the Dominion Parliament for an act extending the time for the commencement of the company's projected railway in British Columbia. Eberts and Taylor, Vancouver, are solicitors for the applicant. (Aug., 1906, pg. 449.)

Boundary, Kamloops and Cariboo Ry.—Application will be made next session of the Dominion Parliament for an act extending the time for the construction of this projected railway. Pringle and Guthrie, Ottawa, are solicitors for the company.

British Yukon Ry.—Application will be made next session of the Dominion Parliament for an act authorizing the company to construct a line from its present railway at or near White Horse in the Yukon territory, northwesterly to a point on the Tahkeena River. Power is also asked to issue bonds upon the line of railway so constructed. The Yukon Council at a special session has under consideration the proposal of the company to construct 12 miles of line through the White Horse copper fields.

We are advised that the B.Y. Ry. contemplates the construction of a track to leave the company's present main line some five or six miles south of White Horse, Yukon Territory, and to proceed in a generally northwesterly direction to tap all the copper properties in the district of White Horse. The development of these properties has now reached such a stage as to warrant serious consideration of the construction of this track. The surveys, we are informed, have not yet been completed. (See White Pass and Yukon Ry. Oct., pg. 743.)

Burk's Falls and French River Ry.—Following are the officers and directors for the current year: President, R. J. Watson, Burk's Falls, Ont.; Vice-President, V. Ratz, Parkhill, Ont.; Secretary-Treasurer, H. W. Cooper, Montreal; Solicitor, D. R. McLean, Burk's Falls; other directors: A. A. Agar. Burk's Falls; R. Cook, South River, Ont,

The company was organized in June last, the act of incorporation having been passed by the Dominion Parliament in 1906. The company is authorized to construct a railway from Burk's Falls to a point at or near where the C.P.R. crosses the French River. H. W. Cooper, the Secretary-Treasurer of the company, is in the G.T.R. offices at Montreal. (Aug., 1906, pg. 451.)

Calgary and Fernie Ry.—The Dominion Parliament will be asked next session for an act extending the time for the commencement and completion of construction. Pringle and Guthrie, Ottawa, are solicitors for the applicant. (Aug., 1906, pg. 451.)

Crow's Nest Southern Ry.—The line now under construction from Fernie to Michel, B.C., is an extension of the C.N.S. Ry., and the route to be followed is along the Elk River valley and the Michel creek. The Elk River will be crossed at four points. A. Guthrie & Co., Fernie, are the contractors, and —. Taylor, is engineer in charge.

Debert Ry.—A regular freight service is being operated over this short line, extending from the Intercolonial Ry. to the Debert coal fields.

Detroit River Tunnel.—The first section of the tunnel was placed in position in the Detroit River at Windsor, Ont., Oct. 1. The first section is 260 ft. long, and contains two steel tubes each 23 ft. 4 in. in diameter. The tubes, supported in timber caissons, were sunk in a trench dredged in the bottom of the river, and the caissons are to be filled with concrete. After the concrete has been placed the water will be pumped out of the tubes, a moderate air pressure put on, and the work of putting in a reinforced concrete lining 20 inches thick begun from the inside. The tubes are built of boiler plate, strongly braced, and have a temporary bulkhead on each end which will be removed when the work of lining is commenced. There will be ten sections of similar size sunk in the river to form the tunnel.

Duluth, Rainy Lake and Winnipeg Ry.—This line has its southern terminus at Virginia, Minn., with which town the Duluth, Missinabie and Northern Ry., Great Northern Ry., and the Duluth and Iron Range Ry. connect. The D.R.L. and W. Ry. runs in a northwesterly direction to Ranier, Minn., which place is located where Rainy Lake empties into Rainy River, and is about 2½ miles east of International Falls on the U.S. side, and Fort Frances on the Canadian side. A railway bridge across Rainy River is now under construction and the Canadian Northern Ry. is constructing about 1½ miles of track to connect the Canadian end of the bridge with its line. By this means trains will be able to be run through between Duluth and Winnipeg and Duluth and Port Arthur over the two lines by an arrangement with one of the existing lines terminating in Virginia. The D. R. L. and W. Ry. has completed surveys for an independent line from Virginia to Duluth, about 63 miles, where connection will be made with all roads entering that city. The country between Virginia and Ranier is heavily timbered, and it is estimated that the lumbering business will provide plenty of traffic for the line for the next twenty-five years. There is a lot of good agricultural land along the line, which is being rapidly taken up; in fact, there is but little land left within five miles of the line. The settlement will also bring a good deal of traffic, as will also the traffic moving to and from the Canadian border. The track has been laid to Ranier, but we are advised that about 16 miles of ballasting is required, and some other work has to be done. This it is expected to have completed by Dec. 1. (Sept., pg. 663.)

Fort William Bridge and Terminal Ry.—The question of the location of the projected terminal station and railway in Fort William, Ont., was before the Board of Railway Commissioners at Fort William, Sept. 27. The C.P.R. protested against the allowing of level crossings, while the city contended they should be 1,000 ft. from the shore.

Great Northern Ry. (U.S.) in Canada.—Nothing is being done at Winnipeg, Man., in connection with the project to construct extensive terminals in that city. The property which was purchased by the company is being repaired and the tenants of the Ross Ave. property have not been given notice to leave. It is not expected, therefore, that anything will be done in the matter until early in 1908.

A contract has been let to R. N. Willoughby for the erection of freight sheds at Brandon, Man., at a cost of about $12,000. The sheds are to be located between Thirteenth and Fifteenth Streets. Work is already in progress.

Halifax and Northeastern Ry.—W. A. Harper, an English engineer, has been looking over the route of this projected railway between Halifax and Sunny Brae, Country Harbor, via the Musquodoboit River Valley. The Provincial Government last session voted a guarantee of bonds for the construction of this railway, but the company in which Sir H. M. Allan is interested has declined to take up the matter, and it is reported that an English syndicate is now looking into the project.

Hudson's Bay Pacific Ry.—Col. May, who represents this company which proposes to construct a railway from Hudson Bay to Port Simpson, is visiting Victoria, B.C., in connection with the project. He states that a contract has been let for the construction of a wharf and a hotel on Work channel, to the north of the Tsimpsean peninsula. Somers and Musgrove are the contractors.

A. W. Johnson, of Toronto, who is associated with Colonel May in the promotion of this railway, said at Vancouver, Oct., that application for a charter would be made next session of the Dominion Parliament. The capital stock will be $100,000,000, and the proposed road will be 1,700 miles in length. It will run northwest from Port Simpson, B.C., traverse the Omineca River valley, descend the Peace River to Lake Athabasca, and then run in an almost direct line to Fort Churchill on Hudson Bay. The company has secured land for terminals on Work channel near Port Simpson, and is now negotiating with the Provincial Government for an additional area of 3,000 acres. In connection with the railway a line of steamers to run between Fort Churchill and British ports is projected.

Interprovincial Bridge—Quebec-New Brunswick.—The proposal to construct a railway and general traffic bridge across the Restigouche River from Campbellton, N.B., to the Quebec side, is again being considered. T. Malcolm, who is the general contractor for the International Ry. of New Brunswick, says that the arrangements for construction have been completed. The bridge will be 3,300 ft. in length, and will cost about $600,000.

Kamloops and Yellowhead Pass Ry.—Application will be made next session of the Dominion Parliament for an act extending the time within which the company may construct its projected railway. Tupper and Griffin, Vancouver, are solicitors for the applicants. (Aug., 1906, pg. 453.)

London and Port Stanley Ry.—The new steel bridge over the Thames south of London, erected by the Pere Marquette Rd., lessees of the line, was opened for traffic Oct. 8.

Minnesota and International Ry.—The last rails have been laid on the extension of this line from Little Falls to International Falls, opposite Fort Frances, Ont. E. W. Backus, of Minneapolis, Minn., President of the company which is developing the power plant at International Falls, drove the last spike. The line has been completed by stages, first to Bemidji, then to Black Duck, Northolme, Big Falls, and now the section of 33 miles to the International Falls. G. M. Huss is chief engineer in charge of construction. The train service is being operated by the Northern Pacific Ry. (Sept., pg. 663.)

New Brunswick Coal and Ry. Co.—The Commissioners appointed by the New Brunswick Government to manage the N.B.C. and Ry. Co.'s line, which includes the old Central Ry. of New Brunswick, invited a party of the members of the Dominion Parliament, the Provincial Legislature and others, to inspect the line Oct. 8. The trip was arranged with a view of showing what had been done on the line since the Commission took it over, and to make an examination of the collieries of the Grand Lake district, which provide the principal traffic for the line.

New Brunswick Southern Ry.—Application will be made next session of the Dominion Parliament for an act declaring it

W. S. CALVERT, President *T. H. HAMILTON, General Manager*

CANADIAN OIL COMPANY

LIMITED

MANUFACTURERS OF

The Renowned Sterling Brands of Locomotive, Cylinder, Engine, Coach and Signal Oils, and Hot Box Greases.

Works: L'ISLE PERROT, NEAR VAUDREUIL, P.Q.

to be a work for the general advantage of Canada, and for authority to construct a bridge across the St. Croix River at or near Milltown or St. Stephen, N.B. The erection of such a bridge would enable connection to be made with the Washington County Ry. Weldon and McLean, St. John, N.B., are solicitors for the company.

Niagara-Grand Island Bridge Co.—Application will be made next session of the Dominion Parliament for an act extending the time for the commencement and completion of the company's projected undertaking. This is one of the Michigan Central Rd. projects in Canada.

North-West Pacific Ry.—Application will be made next session of the Dominion Parliament for an act incorporating a company with this title, with power to construct a railway from Fort Churchill on Hudson Bay, southwesterly to the Beaver River, thence to Peace River Pass by way of Lac la Biche and Lesser Slave Lake, thence by way of Hazleton to some harbor on the Pacific Coast. Power is also sought to construct the following branch lines: From Lac la Biche to Edmonton, Alta.; from Lac la Biche to Fort McMurray, and from Green Lake to Prince Albert, Sask. Murphy and Fisher, Ottawa, are solicitors for the applicants. (See Port Simpson and Eastern Ry., May, pg. 327.)

Owen Sound and Meaford Ry.—The proposal to connect these places by rail is again being revived by the Owen Sound Board of Trade. There is a special charter owned by local interests who are desirous that the line be constructed either by the G.T.R. or the C.P.R., and there is also a proposal that the two places be connected by a line to be constructed by the Huron and Ontario Ry., an electric railway company.

Port Simpson to Peace River.—The British Columbia Legislature will be asked next session to pass an act incorporating a company to construct a line or lines of railway from Port Simpson by the most feasible route to a point on the eastern boundary of the province. The projected route is along the southwest side of Work channel to the Skeena River, the north side of this river to Hazleton, and to the junction of the Bulkley River, up the right bank of this river for eight miles to Suskewa River; on to the head of Babine Lake, Stuart Lake, McLeod Lake, Misnichinca River and Summit Lake to Pine River pass, along Pine River to Moberley Lake and thence by Peace River to the eastern boundary of the province. Power is also asked to construct branch lines and for other incidental purposes. J. P. Walls, Victoria, B.C., is solicitor for the applicants.

Quebec and Lake St. John Ry.—D. B. Hanna, President, and Z. A. Lash, K.C., one of the directors, completed a trip of inspection over the La Tuque branch, Sept. 30. The Government Inspector went over the branch subsequently, and it was expected that a regular train service would be placed in operation by the end of Oct. The branch leaves the main line at a point from Quebec and extends to the La Tuque Falls of the St. Maurice River.

Saskatoon, Saskatchewan, Peace River and Dawson Ry.—Application will be made next session of the Dominion Parliament for an act incorporating a company with this title for the purpose of constructing a line of railway from Saskatoon northerly, crossing the Canadian Northern Ry. near Langham, Sask., and crossing the North Saskatchewan River in tp. 40, range 7, west of the third meridian, thence northerly to near Redberry Lake, then northwesterly passing near Frog Lake to the crossing of the Athabasca River near Athabasca Landing, Alta.; thence northwesterly to the crossing of the Peace River near Peace River Landing, thence northwesterly by the most direct and feasible route to the crossing of the Dease River, B.C., about 15 miles westerly from its outlet into the Liard River, thence to the Nisutlin River in the Yukon Territory, and on to Dawson City by way of the Big and Little Salmon Rivers, Stewart River, Flat Creek and Klondike River. It is also desired to carry on a general navigation business on any of the rivers and lakes reached by the railway, to develop water powers and to utilize the same for the operation of its railway, or for sale. Smith and Britton, Toronto, are solicitors for the applicants.

Tanana Valley Ry.—This railway extends from Chena and Fairbanks on the Tanana River to the mouth of Cleary Creek on the Chatamka River, a distance of 40 miles. Fairbanks and Chena are connected by rail, and the main line to the end of the line at Chatamka extends from the junction half way between Fairbanks and Chena. The railway was constructed for the purpose of supplying transportation to the miners operating on the different creeks in the vicinity. At present the company has four locomotives, four passenger coaches and 25 freight cars, and is operating two trains a day each way to the end of the creeks, and two trains a day between Chena and Fairbanks. It is intended to extend the lines wherever it is possible to serve the miners with transportation, and in opening up the interior of Alaska. All the material, rolling stock, equipment and supplies have to be brought to Fairbanks by steamer from the mouth of the Yukon River, or via Skagway and Dawson, Yukon Territory, consequently railway building is very expensive. The officers of the company are: President and Manager, F. Joslin; Superintendent, C. Moriarty; Traffic Manager, J. H. Rogers; Auditor, R. W. Taylor; Storekeeper, A. P. Tyson. Office, Fairbanks, Alaska.

Temiskaming and Northern Ontario Ry.—Work on the extension northwards of this line is being delayed owing to the non-arrival of the steel for the bridges. The principal of these bridges is at Watzberg, Wabie, and Driftwood. Some difficulty is being experienced at mileage 1.51, or 37 miles north of New Liskeard, Ont., owing to the sinking of a portion of the line in a ravine This ravine had been filled in, and the rails have sunk twice, on the first occasion 10 ft., and on the second 15 ft. The extension of the line to a port on Hudson Bay is being generally urged upon the Ontario Government, which is building the line.

Vancouver, Victoria and Eastern Ry.—The line between Oroville, Wash., northwest to Keremeos, B.C., 38 miles, is reported to have been completed and a train service has been placed in operation. A contract is reported to have been let to J. H. Stewart, Grand Forks, B.C., for the construction of the line from Keremeos to Hedley, B.C., 40 miles

Western Canada Ry.—It is proposed to apply next session of the Dominion Parliament for an act incorporating a company with this title to construct the following lines of railway, and to operate the same by steam, electricity or other motive power: From the International boundary between range 23 and 28, west 4th principal meridian, to the C.P.R. Crow's Nest Pass Line, between Pincher Creek and Cowley, and by the Old Man River, Livingstone Mountains and the Livingstone and High River to Calgary; and from near Livingstone River to the valley of the Elk River, and thence to a junction with the C.P.R. Crow's Nest Pass Line and the Crow's Nest Southern Ry., near Michel. It is also desired to have authority to make traffic arrangements with other companies, including any line of railway in the state of Montana. Hough, Campbell and Ferguson, Winnipeg, Man., are solicitors for the applicants. (See Great West Ry., Oct., pg. 741.)

White Pass and Yukon Ry.—See British Yukon Ry.

Winnipeg City Power Line.—Tenders have been asked for 500 tons of relaying rails, to be delivered before the close of navigation, and for 1,500 tons to be delivered by Feb. 1. A report to the Board of Control shows that over a mile of track has already been laid.

G.T.R. Betterments, Construction, Etc.

Kingston, Smith's Falls and Ottawa Ry.—Surveys are reported completed in the vicinity of Smith's Falls, Ont., for this projected railway. The party is now working in the vicinity of Richmond.

Port Hope Subway.—Considerable progress has been made with the construction of the subway under the G.T.R., on the Lake Shore road, Port Hope, Ont. The work is being done by the company, W. Pengelley being in charge.

Tracklaying.—Two gangs are reported to be at work relaying the track between Acton and Stratford, Ont., with heavier rails. The work is being gone on with from each end and the two gangs are expected to join ends at Guelph.

London Improvements.—C. M. Hays, Second Vice-President and General Manager; E. H. Fitzhugh, Third Vice-President; W. G. Brownlee, Transportation Manager; U. E. Gillen, Superintendent; and W. Loud, Freight Traffic Manager, were in London, Ont., Oct. 10. Speaking of the question of the raising of the tracks and other work in the city, Mr. Hays said he could not say anything in regard to re-opening negotiations with the city of London. The company had completed a great work in eliminating the grade west of the city, and the results were proving most satisfactory. It is likely that the attention of the officials would be taken up with the east for some time now, as a number of changes were contemplated there. Subsequently Superintendent Gillen stated that as soon as the new coal chutes east of Adelaide St. were completed the old ones would be moved half a mile further east. It was then proposed to straighten the line, and as soon as possible the dangerous double crossing at Egerton St. will be replaced with two tracks only. The work of straightening the line to Pottersburg was not pressing, and would probably not be commenced until 1908. The present yards at the east end were to be enlarged, and other improvements made.

London Car Shops.—The additional buildings to be constructed in connection with the shops at London, Ont., are: freight car erecting shop, 536 ft long by 50 ft. wide; and wheel shop 80 ft. by 66 ft. 1½ in. The foundations will be of cement, and the sidewalks of brick, covered with trussed roofs of slate fitted with skylights. The freight car shop is to have two tracks running the full length of the shop for erection purposes, holding 30 cars; service tracks will be provided with the necessary turntables connecting the present shops, store, etc. The wheel shop will be equipped with the usual lathes, presses, etc., for the handling and finishing of car wheels. Both shops will be provided with fire protection, water service, drainage, electric lighting, and all the conveniences of the most modern car plant.

St. Clair Tunnel Electrification.—The installation of the plant for the haulage of trains by electrical power through the tunnel has been completed. The official inauguration of the plant took place recently.

The ratepayers of Lachine, Que., voted in favor of granting a bonus of $50,000, and exemption from taxes and water rates for 20 years, to a proposed locomotive company. It is intended to erect a plant at a cost of about $3,000,000, employing 500 men at the close of the first year, 1,000 the second year, and 1,500 the third year.

TRANSPORTATION APPOINTMENTS.

Canadian Northern Ry.—A. Brunton, heretofore Trainmaster at Dauphin, Man., is now engaged as conductor in the passenger service between Winnipeg and Prince Albert, Sask.

W. A. Brown, who until recently was General Superintendent, Winnipeg, Man., has been appointed Superintendent, Fourth District, with headquarters at Edmonton, Alta., succeeding C. Carey, resigned.

Canadian Pacific Ry.—T. Collins, heretofore acting Trainmaster Guelph and Goderich Ry., has been transferred to the Eastern Division.

J. K. McNeillie, heretofore of the Car Service Department, Montreal, has been appointed Assistant Superintendent of the Toronto Terminals, succeeding F. G. Martyn, transferred to London, Ont. All communications respecting matters in the Toronto Terminals should be addressed direct to Mr. McNeillie, whose office will be in the Toronto Union Station.

F. G. Martyn, heretofore Acting Superintendent Toronto Terminals, has been appointed Assistant Superintendent, district no. 2, Ontario Division, with office at London, Ont. He will have special jurisdiction over train service.

A. J. Forrest has been appointed Assistant Storekeeper at Winnipeg, vice W. H. Hesketh, deceased.

Delaware and Hudson Rd.—W. H. Williams, heretofore assistant to the President, has been elected Third Vice-President in charge of the Treasury and Accounting Departments.

W. D. Schofield has been appointed Assistant to the President, succeeding W. H. Williams.

Duluth, Rainy Lake and Winnipeg Ry.—M. A. Murphy, heretofore Superintendent, is reported to have been appointed General Manager. Office, Virginia, Minn.

Erie Rd.—T. J. English, heretofore Superintendent at Youngstown, Ohio, has been appointed assistant to the General Manager.

T. Rumney, heretofore Mechanical Superintendent, has been appointed General Mechanical Superintendent, succeeding E A. Williams, who resigned some months ago.

Grand Trunk Pacific Ry.—A. A. Tisdale, heretofore Assistant to the General Transportation Manager G.T.R., Montreal, has been appointed Assistant to the Vice-President and General Manager, G.T.P. Ry. Office, Montreal.

R. Watchborn, heretofore a U.S. Immigration Commissioner at Montreal, is reported to have been appointed Purchasing, Fuel and Labor Agent G.T.P. Ry. at Montreal.

Grand Trunk Ry.—M. S. Blaiklock, heretofore Superintendent Eastern Division, has been appointed Engineer of Maintenance of Way, with office at Montreal. Superintendents will hereafter address to Mr. Blaiklock all reports and communications heretofore forwarded to the office of the General Transportation Manager in matters pertaining to maintenance of way.

H. E. Whittenberger, heretofore Superintendent Kansas City Southern Rd., Pittsburg, Kan., has been appointed Superintendent, Eastern Division, G.T.R., succeeding M. S. Blaiklock, promoted.

D. Crombie, heretofore Master of Transportation at London, Ont., has been appointed Assistant to the General Transportation Manager, succeeding A. A. Tisdale, transferred to the G.T. Pacific Ry.

G. Beckingham, heretofore acting General Roadmaster, Eastern Division, has been placed in charge of the double-track work between St. Lambert and Ste. Rosalie, Que.

J. C. Crombie, heretofore Chief Dispatcher at London, Ont., has been appointed Master of Transportation there, succeeding D. Crombie, promoted.

C. Forster, heretofore Night Chief Dispatcher at London, Ont., has been appointed Chief Dispatcher there, succeeding J. C. Crombie, appointed Master of Transportation.

Walter White has been appointed Night Chief Dispatcher at London, Ont., succeeding C. Forster, promoted.

G. Martyn, heretofore accountant for the G.T.R. and Wabash Rd. at St. Thomas, Ont., has been appointed Auditor of Expenditures at Montreal.

The following agents were appointed during Sept.: Barrington, Que., C. McGinnis; Ste. Annes, Que., J. H. Hebert; Anson Junction, Ont., L. Pearce; Markham, Ont., W. J. Smith; Stouffville, Ont., W. T. Byam; Sundridge, Ont., J. R. Hunter (Acting); Canfield Junction, Ont., W. Hockin: Burgessville, Ont., W. Norman; Whitechurch, Ont., W. H. Lyons; St. Polycarpe Jct., Que., W. Hardy; Whitney, Ont., J. W. Berlanquet; Edgington, Ont., E. H. Gallagher. Outside Ticket Agent, Smith's Falls, Ont., J. J. Gardiner.

Great Northern Ry. (U.S.)—F. E. Ward, General Manager, is reported is have resigned.

Lackawanna-Grand Trunk Line.—W. Craigie has been appointed Acting Manager, W. P. Fitzsimons, Manager, having resigned on his appointment as Manager of the Bureau of Transportation and Manufactures, Detroit, Mich., Board of Commerce. Office 1003 Ellsworth Building, 355 Dearborn St., Chicago, Ill.

Michigan Central Rd.—J. F. Farrell has been appointed Purchasing Agent, succeeding S. B. Wight, appointed to a similar position on the N.Y. Central and Hudson River Rd.

M. B. Snow, Superintendent of the Chicago Division, has been appointed Assistant General Superintendent at Detroit, succeeding J. H. Snyder, transferred to Chicago as Superintendent.

W. H Flynn has been appointed Division Master Mechanic at St. Thomas, Ont., in charge of the Mechanical Department of the Canada Southern Division, succeeding G. J. Duffey, resigned.

Minnesota and International Rd.—The officers of this line are: President, H. Elliott. St. Paul, Minn.; Vice-President, J. N. Hill, New York City; General Manager, W. H, Gemmell, Brainerd, Minn.; Secretary, W. F. Brooks, Minneapolis, Minn.; Assistant Secretary, R. H. Relf, St. Paul; Treasurer, C. A. Clark, St. Paul; Auditor, M. W. Downie, St. Paul; Superintendent, W. H. Strachan, Brainerd.

New York Central and Hudson River Rd.—Reports state that A. H. Smith, Vice-President and General Manager in charge of operating, has had his jurisdiction extended over the Boston and Albany Rd.

S. B. Wight, heretofore Purchasing Agent Michigan Central Rd., has been appointed Purchasing Agent N.Y.C. and H.R. Rd., succeeding D. Fairchild, resigned.

J. H. Heustis, heretofore General Superintendent Western District, Syracuse, N.Y., has been appointed Assistant General Manager Boston and Albany Rd. Office, Boston, Mass.

L. H. Van Allen, heretofore Superintendent Buffalo Terminals, has been appointed General Superintendent Western District, at Syracuse, succeeding J. H. Heustis.

J. P. Bradfield, heretofore Assistant General Manager, has been transferred from New York to Buffalo, subject to duties assigned by the Vice-President and General Manager.

T. W. Evans, Assistant Division Superintendent at Jersey Shore, Pa., has been appointed Superintendent of the Rochester division, with headquarters at Rochester, N.Y., in place of S. R. Payne, who has been transferred to the superintendency of the Buffalo division, with office at Buffalo, N.Y., succeeding L. H. Van Allen.

Pennsylvania Rd.—W. H. H. Willis, heretofore acting Canadian Freight Agent, Toronto, has been appointed Canadian Freight Agent there, succeeding E. D. Mackenzie who was granted three months' leave of absence in Aug. Prior to coming to Toronto, Mr. Willis was Special Agent of the Traffic Department at Pittsburg, Pa.

Tanana Valley Rd.—J. H. Rogers, heretofore Traffic Manager White Pass and Yukon Route, has been appointed Traffic Manager T. V. Rd. Office, Fairbanks, Alaska.

The C.P.R. has contributed $5,000 to the Anti-Tuberculosis Fund being raised in Vancouver, B.C.

J. D. McArthur Co., Ltd, railway contractors, has been registered at Regina, Sask., under the Northwest Territories Ordinance respecting foreign companies.

We are advised that while the C.P.R. has not, as yet, altogether abandoned the use of acetylene gas for car lighting purposes, it has been decided to substitute Pintsch gas in its stead.

The Continental Cobalt Mines Co., Ltd., of the United States, has been licensed under the act respecting extra-provincial companies to carry on its business in the Province of Ontario, and amongst other things to acquire and operate private railways, private tramways, and telegraph and telephone lines. A. G. Slaght, Haileybury, Ont., is its attorney.

Railway Finance, Meetings, etc.

Baie des Chaleurs Ry.—The Exchequer Court has ordered the sale upon a date and conditions to be hereafter settled, of the B. de C. Ry., upon the application of the Royal Trust Co., of Montreal, as representatives of Gallindez Bros., bankers, London, Eng., creditors to the amount of £217,400. This railway has had a very chequered financial history, and this decision will enable the tangle to be cleared up.

Boston and Maine Rd.—At the annual meeting held Oct. 9, the shareholders approved of an issue of $6,000,000 of bonds for the purpose of taking up the floating debt of the company. The B. and M Rd. owns over 50% of the capital stock of the Maine Central Rd., which has a line from Portland, Me., through the Crawford Notch of the White Mountains, to a connection with the Quebec Central Ry., just south of Lime Ridge, Que. The Hereford Ry. from the International boundary to Dudswell, 48.50 miles, and the Dominion Lime Co.'s line from Dudswell to the lime quarries, 4.80 miles. The M.C. Rd. also owns the Somerset Ry., extending from Oakland to Moosehead Lake, Me.; and through ownership of the Portland and Rumford Falls Rd., it has acquired control of the Indian River Ry., a company organized to construct a line from the Maine-Quebec boundary line to Megantic, Que., on the Quebec Central Ry., and C.P.R. The B. and M. Road operates under lease the Massiwippi Valley Ry., extending from the International boundary to Lennoxville, Que., 31.95 miles, with a branch from Stanstead Jct. to Stanstead, Que., 3.51 miles. Total, 35.46 miles. The Washington County Rd., which is also owned by the same interests, owns the Princeton branch at St. Croix, N.B., 5.10 miles in length.

Buffalo and Lake Huron Ry.—The report of the directors for the half-year ended June 30 sets forth that after providing for the interest on the first and second mortgage bonds, the available balance, including the amount brought forward from the Dec. half-year, was £14,536, 6s. 6d., enabling the directors to pay the usual dividend of 5s. 3d. per share, and leaving a balance of £751, 13s. 3d. to be carried forward, as against £705, 11s. 4d. The line is leased to the G.T.R. at £70,000 a year. The outstanding securities are: 52,513 ordinary shares, £525,130; first mortgage 5½% bonds, £297,600; second mortgage 5½% bonds, £466,158.

Canada Atlantic Ry.—The meeting of shareholders called for Sept. 24, for the purpose of passing a resolution amalgamating the company with the G.T.R., was adjourned to Oct. 24.

Cape Breton Coal, Iron and Ry. Co.—A meeting of holders of 5% gold bonds was called to be held in London, Eng., Oct., for the purpose of passing resolutions authorizing the issue of $2,000,000 of 6% first mortgage bonds, and redeemable in 30 years at a premium of not exceeding 7%; the conversion of the 5% gold bonds into income bonds; and renouncing and releasing the claims of such 5% gold bonds until the first mortgage gold bonds shall have been retired.

Cincinnati, Hamilton and Dayton Rd.—At the meeting of the shareholders held in Cincinnati, Oct. 8, a resolution was passed ratifying the several agreements which have been worked out in the settlement of the troubles of the company growing out of the merger with the Pere Marquette Rd., and other lines. The resolutions included the repudiation of the agreement with the Pere Marquette Rd., which again becomes an independent line.

The Pere Marquette Rd. owns the Lake Erie and Detroit River Ry. in Canada, and operates the London and Port Stanley Ry. under a lease.

Columbia and Western Ry.—F. A. Heinze has given notice of appeal against the decision of Justice Clement, directing a partition of the 600,000 acre land grant in B.C., belonging to the C. and W. Ry., which the C.P.R. bought under an agreement. Heinze claims that under the agreement the partition is not to take place until 1912

Cuba Ry.—At the annual meeting held recently in New York, the report of the directors showed that the railroad owned and operated 426 miles of road, whose gross earnings for the year amounted to $1,953,309, with operating expenses of $1,294,955, leaving net profits of $658,354. After deducting $325,930 for interest on bonds, this left the company with a net income of $332,424 for the year, and a general surplus of $698,031. It is expected that within a short time the road will be on a dividend paying basis. Sir W. Van Horne is President.

Great Northern Ry., U.S.—At the annual meeting held in New York, Oct. 9, the following were elected directors for the ensuing three years: H. W. Cannon, W. B. Dean, and S. Thorne.

Intercolonial Ry.—The earnings of the Intercolonial Ry. for Aug. were reported to be $886,000, the largest on record for any one month in the history of the line.

Lake Superior Corporation.—The report for the year ended June 30, contains the following figures:

	1907	1906
Interest on investment securities	$527,982	$1,102,044
Miscellaneous net income	150,029	36 700
Total income	$678 011	$1,138.744
Coupons outstanding 1st mortgage bonds	500,000	452,200
Interest accrued 1st mortgage bonds	.....	37,683
Balance	$178,011	$648,861
General expenses, taxes, etc.	148,381	91,981
Surplus	$29,630	$556.880

Balance brought forward on June 30, 1906, was $591,683, which, added to surplus for the year, makes a total surplus of $621,313, less 5% paid on income bonds Oct., 1906, $150,000, the balance of undivided surplus on June 30, 1907, was $471,313. In addition to interest and dividends paid as stated, the subsidiary companies have reserved $342,000 from net earnings for the year to increase their working capital.

The Ontario Government has granted a six months' extension of the guarantee on the $1,000,000 loan now outstanding. The guarantee was originally on a loan of $2,000,000, and relief was given in respect of one-half of this in April.

The annual meeting of shareholders will be held Nov. 6.

Minneapolis, St. Paul and Sault Ste. Marie Ry.—The shareholders authorized the issue of $14,000,000 of additional common stock and $7,000,000 of preferred stock, by resolution passed at the annual meeting recently held. Of this it is proposed to issue to shareholders of record, Sept. 27, $1,400,000 of preferred and $2,800,000 of common stock at par in the proportion of one share of preferred and two shares of common stock for each five shares now held by preference shareholders, and a half share of preferred and two shares of common stock for each five shares of common stock held.

Phillipsburg Ry. and Quarry Co.—A meeting of shareholders was held at Montreal, Oct. 24, for the purpose of ratifying a resolution passed by the directors selling the quarries, mills and all other of the company's assets, except the railway and railway rolling stock to the Missisquoi Marble Co.

Temiskaming and Northern Ontario Ry.—The gross receipts for the six months ended June 30, amounted to $402,629 and the working expenses to $284,796, against $250,042 earnings and $143,734 working expenses for the same period, 1906. Adding to the net earnings of $117,853, the amount of $14,692 received from mining royalties, the surplus for the half-year amounts to $132,525.

In the action brought by the Larose Mining Co. against the T. and N.O. Ry. Commission, the Court of Appeal has decided that the Commission had power to sell to the Right of Way Mining Co. the right to mine on the railway right-of-way.

Toronto, Hamilton and Buffalo Ry.—Approximate earnings for Sept., $71,521.58, against $69,157.83 (actual) for Sept. 1906

Michigan Central Railroad Fined.

In the case against the Michigan Central Rd., on a charge of criminal negligence in the explosion of a car of dynamite at Essex, Ont., Aug. 9, to which the company pleaded guilty, a fine of $25,000 was inflicted. In delivering judgment, Oct. 25, Justice Riddell said: "In my view, it is not too much to require of a railway company, if it persists in carrying explosives, to do so only in cars made for the express purpose, in a train on which no other freight or passengers are carried and accompanied by a person who understands how to deal with such explosives, if by any chance there should be a leaking or should other trouble ensue. The sentence of the court is that the Michigan Central Railroad Company do pay, as and for a fine for the indictable offence of which they have admitted their guilt, and for the use of our Sovereign Lord the King, the sum of $25,000, upon the second count (omitting to perform their duty by taking reasonable precautions). If this sum be paid to the sheriff of Essex within 30 days from this date, the Attorney-General will be requested to direct that nofurther proceedings be taken. If not, I shall deliver judgment upon the first count at the opening of the next Sandwich Assizes, to which time this court will stand adjourned after the delivery of this judgment."

The Intercolonial-G.T.R. Arbitration.

The Board of Arbitrators to which was referred a number of matters in dispute between the G.T.R. and the Intercolonial Ry., has announced its decision respecting the question of the entrance into Montreal of the Intercolonial Ry. over the G.T.R. In 1898 the Dominion Government purchased the Drummond County Ry. as an extension of the Intercolonial Ry., and entered into an agreement with the G.T.R. by which an entrance into Montreal was secured over that company's line from Ste. Rosalie Junction, Que. It has been claimed from the outset that the terms and conditions of the contract were not being fulfilled by the G.T.R., and that traffic on the G.T.R. west of Montreal, destined for points on the Intercolonial Ry., or reached by the latter's connections, were being forwarded elsewhere than via Montreal. The award of A. C. Killam, chairman; G. F. Shepley, Government arbitrator, and Justice Davidson, G.T.R. arbitrator, maintains the views advanced by the Intercolonial Ry. as to the meaning of the agreement. It has been decided that in entering into arrangements with any carriers, other than the Intercolonial, covering the traffic in question, the G.T.R. committed breaches of agreement. A general accounting has therefore been ordered on all branches of the Intercolonial's claim to ascertain the damages that have been suffered by reason of the G.T.R. breaches of contract from the date of its execution to the present time.

REMOVAL OF OFFICES.

About the middle of November the offices of this paper will be removed from 33 Melinda Street, Toronto, where they have been located for a number of years, to 157 Bay Street, where we have leased suite 701, Continental Life Building, which comprises spacious, well-lit and thoroughly up-to-date offices in every way suited to the requirements of our rapidly expanding business, which has outgrown its present quarters.

After Nov. 8 correspondence for THE RAILWAY AND MARINE WORLD should be addressed to 157 Bay Street, Toronto, instead of to 33 Melinda Street as heretofore.

National Transcontinental Railway.

A despatch sent out from Ottawa states that in 1903, when the project for the construction of this railway was introduced, the cost of the eastern section, extending from Moncton to Winnipeg, 1,800 miles, was estimated at $100,000,000. It is now estimated that the cost will be at least 25% in excess of this amount owing to the increased cost of labor, materials and supplies of all kinds. It is stated that this increased cost of construction, and the inaccessibility of the section of the country through which the line will pass between Abitibi and the junction with the Lake Superior Branch, is responsible for the delay in putting this portion of the line under contract. Another despatch from Ottawa states that on the 660 miles of the Eastern Division of the line under contract there are over 18,000 men at work, and that the monthly pay roll is over $1,000,000.

Justice McLeod of the New Brunswick High Court has decided that the N.T. Ry. is a Government railway, and that the provisions of the Railway Act requiring a deposit to be put up before taking possession of land did not apply, and that all the Commission had to do was to file with the Registrar of Deeds a plan of the lands required for railway purposes. This decision was given upon an application of the Commission for an order putting it in possession of lands required for the railway in Madawaska county.

An immediate start is to be made upon the grading of the 50 mile section from Moncton westerly to Chipman, N.B., the contract for which was let to the G.T. Pacific Ry. The company has sublet the work to J. H. Corbett, of Franklyn, Pa., who will have his headquarters at Chipman.

We are advised that the contract which the J. W. McManus Co. is carrying out on the National Transcontinental Ry. is for an eight mile section from a point about 1½ miles east of Chipman, N.B., westerly, mileage 50 to 58. The contract is direct with the Commissioners of the Transcontinental Ry., and not a sub-contract under the G.T. Pacific Ry., as previously reported.

The G.T. Pacific Ry., which secured the contract for the section of 150 miles easterly from the Abitibi River, has sublet the work to the J. H. Reynolds Construction Co. This company proposes to get in supplies, form camps, and perfect arrangements for starting grading work in the spring.

J. W. Fitzgerald, Ontario Land Surveyor, who has returned to Peterborough, Ont., after a summer spent in making surveys in the Matagami district, is reported as saying that the principal feature of the construction of the line in northwestern Ontario will be a tangent of 70 miles, on which there is no obstruction whatever except rivers.

GRAND TRUNK PACIFIC RY.

C. M. Hays, President G. T. Pacific Ry.; F. W. Morse, Vice-President and General Manager, accompanied by A. Smithers, of London, Eng., Vice-President G.T.R., Senator Cox, and others interested in the construction of the line, spent a month in inspecting the work in progress. They visited Prince Rupert, the Pacific Coast terminal point, and on returning to Vancouver, Sept. 30, Mr. Hays said the company would construct a line from Fort George to Vancouver, but for the present attention would be confined to the construction of the main line. The growth of Prince Rupert since his visit a year ago had surprised him. On returning to Montreal, Oct. 14, he said he expected that his next visit to Edmonton would be made over the G.T. Pacific Ry. from Fort William. While the company had the right to construct branch lines the company's first care would be to complete the main line through to the coast. As regards steamships the company would operate two fleets of steamers, one on the Atlantic and one on the Pacific. It was too early to discuss details, but he might say that the company would work in connection with allied lines of steamships, especially the Allan Line, but if necessary, it would construct its own fleet.

It was reported Oct. 8, that about 40 miles of track had been laid on the Lake Superior Branch from Fort William, Ont., and that construction trains were running daily. A drawbridge is to be constructed across the Kaministikwia River at Fort William, the contracts for which have been let to Wylie & Balfour for the substructure, and to the Canadian Bridge Co. for the steel work. The bridge will accommodate not only the railway tracks, but an electric railway, vehicles and foot passengers.

An inspection of the line from Portage la Prairie, mileage 54, to Rea, mileage 176, was made by H. A. K. Drury, Inspecting Engineer for the Board of Railway Commissioners, Winnipeg, and an order was issued Oct. 3, authorizing the operation of freight trains over this mileage. The stations are as follows: Portage la Prairie, mileage 54; Arona, mileage 59; Barr, mileage 63; Caye, mileage 70; Deer, mileage 76; Exira, mileage 84; Firdale, mileage 91; Gregg, mileage 99; Harte, mileage 106; Ingelow, mileage 112; Justice, mileage 121; Knox, mileage 129; Levine, mileage 136; Rivers, mileage 142; Myra, mileage, 151; Norman, mileage 158; Oakner, 158; Pope, mileage 164; Quix, mileage 170; Rea, mileage 176. The line crosses at grade the C.P.R. near Red Deer and Justice, and the Canadian Northern Ry. near Gregg.

Steel has been laid to the Assiniboine River, 150 miles west of Portage la Prairie, and is being pushed forward as rapidly as possible. A second gang has started working eastward from Saskatoon, Sask. The grading is almost completed between Portage la Prairie and Saskatoon, some few small gaps being reported remaining Sept. 30. It is expected that this portion of the line will be completed and in operation by the end of the year.

Westerly from Saskatoon, Sask., to Edmonton, Alta., the contractors are pushing the work as rapidly as possible. C. Schrieber, Consulting Engineer of the Department of Railways, left Ottawa Sept. 28, for the purpose of inspecting the work done and in progress as far as Edmonton.

The Canadian White Co. has started work on a contract for a fill of 200,000 cubic yards, at the western end of the bridge over the Saskatchewan River at the Clover Bar crossing. The piers and abutments for this bridge are being put up by the May-Sharpe Construction Co. The work done by the firm during the summer includes the erection of a concrete pier 95 ft. above low water mark, with a double row of piers on one side of the river and the anchor pier.

The question of letting a contract for 200 miles from Edmonton, westerly towards the Yellowhead Pass, is under consideration, and it is expected tenders will be called for shortly.

In connection with the construction of the line from Kitamaat easterly, J. W. Stewart, of the firm of Foley Bros, Larson & Co., the contractors, says that active work is in progress on the 10 mile section from Kitamaat summit to Kitselas canyon, where the Copper River joins the Skeena River. The rock work there is the heaviest on the entire 180 miles between Kitamaat Arm and Hazleton. The right-of-way from Kitamaat to the Kitselas canyon, 45 miles, is being cleared, and a wagon road is being constructed. When this section has been completed it will be possible to go ahead rapidly with the construction of the upper section of the line to Hazleton. Progress will be slow at first owing to the limited transportation afforded by the river. Reports from Kitamaat state that there is every probability that a port will be established there for handling G.T. Pacific Ry. business before the development of Prince Rupert is proceeded with.

A map showing the complete transcontinental system is issued as a supplement to this number of THE RAILWAY AND MARINE WORLD.

Montreal Street Railway Company.

Following is a comparative statement of earnings, expenses, etc., for the years ended Sept. 30, 1906 and 1907:

	1907						1906	
Gross earnings	$3,503,643.43						$3,100,486.88	
Operating expenses	2,104,653.42						1,850,719.97	
Net earnings	$1,398,990.01						$1,349,786.91	
To which add:								
Received from M.P. & I. Ry. on account of interest	55,104.44							
Total net revenue	$1,454,091.45						$1,249,766.91	
From which deduct:								
City percentage on earnings		$214,840.36			$178,408.38			
Interest on bonds and loans		195,833.64			163,599.68			
Contingent account for renewals		171,517.04			179,055.79			
Rental of leased lines		3,059.64						
			585,250.68			521,063.85		
Surplus	$ 868,840.77						$ 728,703.06	
From this there have been paid four quarterly dividends of 2½% each		$768,100.00			$700,000.00			
Placed to credit of fire insurance fund		25,000.00			25,000.00			
			793,100.00			725,000.00		
Transferred to surplus account			$75,740.77			$3,703.06		

The Board of Railway Commissioners has approved of C.P.R. standard mileage tariff at the rate of 3 cents a mile for its line between Strassburg and Govan, Sask.; Govan and Nakomis, Sask.; and Teulon and Komarno, Man.

Sir C. Rivers Wilson, President G.T.R., who headed a deputation to the President of the British Board of Trade, in favor of the establishment of a ferry scheme across the Dover Straits to France, said Oct. 25, that there were 78 of such ferries in America, that the G.T.R. ferries on Lake Michigan worked exceedingly well, and an accident, even on a passage of 85 miles, under the severest conditions of fog, had not occurred.

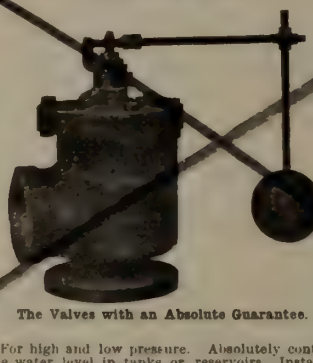
THE ANDERSON AUTOMATIC VALVES AND WATER COLUMNS FOR RAILROADS

Anderson Patent Altitude Valve
Connected to Tank ... **No Waste of Water. No Freezing of Floats**
... maintains a uniform supply of water in tank or reservoir, doing away with the annoyance of floats or fixtures in the tanks. Is ... Accessible and protected from frost. Adapted for Buildings regardless of height.

Anderson Patent Float Valve "Simply Has No Equal."
Cushioned in opening and closing. Float swivels to any angle desired.
"Angle or St. Way."



The Valves with an Absolute Guarantee.

For high and low pressure. Absolutely controls the water level in tanks or reservoirs. Instantly adjusted to operate quick or slow, as desired. "No waste of water." The upper portion of body being lined with bronze, also the valve or piston being solid bronze, makes the valve indestructible. Railroad men that use them say, "Their equal is not made."

"Angle or St. Way"

The Anderson Cushioned Non-Return Valves

"Life and Property Insurance Valves"

Why! endanger your power plant by using the regular angle, globe or gate valves at the boilers when you can get the Anderson Cushioned Non-Return Valve, which is an AUTOMATIC STOP VALVE, also a HAND-STOP VALVE, all in one?

The Heaviest Line OF AUTOMATIC VALVES AND TRAPS
For High-Pressure Steam and Water Service ever Presented to Users.

GOLDEN-ANDERSON VALVE SPECIALTY CO.

Offices: 1001 Fulton Bldg., Pittsburg, Pa.

THE BAKER HOT WATER FIRE-PROOF CAR HEATERS

Double Coil Jointless Fire-proof Steel Heater

Attention is especially called to the only Fire-proof and Break-proof Heaters on the market, made of ¼ in. jointless steel casings. Single and double coils. Steam Attachments to circulate the water of the Baker Heater by steam from the locomotive; or will circulate hot water independently of any Heater. Pipe and pipe fitting for Baker Heater work. Avoid infringements by ordering direct from the makers.

Single Coil Jointless Flexible Steel Fire-proof Heater.

ELECTRIC RAILWAYS.

Projects, Construction and Betterments.

British Columbia Electric Ry.—Hon. Maurice Gifford London, Eng., a director of the company, accompanied by R. H. Sperling, General Manager, and F. R. Glover, Assistant General Manager, made a tour of inspection over the company's lines recently, paying particular attention to the New Westminster-Chilliwack route, construction of which has been commenced. He said that the company was thoroughly in earnest in the matter, and had full confidence in the future of the route. The work would be pushed on and he had no doubt the construction work would be completed within the time stipulated. A deviation of the originally proposed line, so as to include Fort Langley on the route, has been suggested.

Preparations are being made by the company for taking over the line constructed by the C.P.R. between Eburne and New Westminster.

The extension of the Powell St. line in Vancouver to Hastings is under consideration, but nothing has, as yet, been decided upon.

Calgary St. Ry.—Tenders are under consideration by the city public works committee, for the construction of about 13 miles of street track with overhead trolley work, and for six semi-convertible cars, with electrical equipment. In connection with this construction a steel bridge is to be built, with concrete abutments, over the Elbow River.

Edmonton St. Ry.—A press report states that with the object of placing the street railways of Edmonton and Strathcona, Alta., under one management, the Edmonton Commissioners will apply for a Strathcona franchise. A further report states that a proposal to purchase and operate the line already completed in Edmonton has been made by P. Cronin, of Toronto, on behalf of an English firm, and it is probable that it will be favorably entertained.

Grand Valley Ry.—The Brantford City Council has received an application for the right to extend the lines along several streets in the city, and to lay double tracks in some of them. It is proposed to practically double the mileage in the city. The company agrees to pave the streets in which it desires to lay tracks to the entire width. The company proposes making considerable extensions and improvements on this line and the others recently absorbed. The old road between Brantford and Galt is to be reconstructed, and new 80-lb. rails laid, and the distance decreased by the elimination of curves where possible. The extension to St. George, via Blue Lake, is to be pushed to completion; and it is intended to commence work on the Port Dover extension, via Simcoe, a distance of 34 miles, including switches. On the road to Woodstock, where the old Woodstock and Ingersoll line will be re-constructed, work is to be started, and eventually the line extended to London. When these projects are carried out, the company will operate about 142 miles of track. It is intended to carry freight over the lines, and switches will be established in connection with factories where desired. On cars constructed for freight purposes, each will be supplied with four 75 h.p. motors. (Oct., pg. 759).

Hamilton Radial Ry.—Application is to be made at the forthcoming session of Parliament to amend the company's charter by providing for an extension of its line of railway from Mimico to some point within the limits of Toronto, and for authority to purchase, lease or amalgamate with the Brantford and Hamilton Electric Ry., the Hamilton, Grimsby and Beamsville Electric Ry., and any other electric railway running into Hamilton; and to construct a line from Brantford through the counties of Brant, Oxford, Elgin, Kent, and Essex, to Detroit River, at or near Windsor; or to enter into an agreement, or agreements, with the Windsor, Chatham and London Ry., and the Windsor, Essex and Lake Shore Rapid Ry., or either of them, for any of the purposes specified in sec. 361 of the Railway Act; and to build and operate ferry steamers across the Detroit River, to construct an international bridge over the Niagara River, or to enter into a contract for the use of any bridge, already or hereafter constructed, over the Niagara River; also to extend the time for the completion of the construction of its various branches, and for power to construct branches in different directions in Wentworth county, and for power to interchange traffic and freight, and freight cars, with all steam and other railways crossed by or crossing, or connecting with its railway, and to be declared a railway for the general advantage of Canada. The Toronto Board of Control has instructed the City Solicitor to oppose the application, as far as the proposed entrance to the city is concerned, unless before coming in the company secures the consent of the city.

Hamilton, Waterloo and Guelph Ry.—Surveys of the various routes proposed by this company are being made, and it is anticipated that the work of construction will be commenced early in 1908. (Oct., pg. 759).

Kenora-Keewatin Electric Ry.—A company has been formed to promote an electric railway from Kenora to Keewatin, and thence along the Winnipeg River, connecting up with the G.T. Pacific Ry. We are advised that the line may be constructed either by the town of Kenora or the company, and that it is hoped to commence the work in the spring.

London St. Ry.—The city council at its recent meeting decided to arrange a meeting with the directors of the company to consider the extension of the lines in various parts of the city.

Montreal St. Ry.—A statement of the terms and conditions on which the M.S. Ry. is prepared to take up the freight carrying business over its lines, was submitted to the city council Oct. 18. The company agrees to lay lines and pave and keep in repair the streets utilized for the space occupied by its tracks and eighteen inches on each side. The city is to be relieved of all claims for damages arising from the construction of the tracks; and freight depots are to be erected in different parts of the city. In return for the privilege the company agrees to water the streets occupied by its tracks, the water to be supplied by the city, and to pay a percentage upon its gross earnings from the carriage of freight, from 4% on all receipts up to $200,000, to 15% on all receipts in excess of $1,500,000. The company desires power to run freight cars 24 hours a day, but agrees that its operations will not be allowed to interfere with the operations of the passenger service.

Montreal and Southern Counties Ry.—At a special meeting of the committee appointed to consider the application for power to enter the city, it was decided to report to the city council, recommending that the application be granted. The company claimed that it already had power to use Mill St., and now desired permission to run along Grey Nun and Wellington streets, and connect with Youville St. For this privilege it will pay the city on a basis of $1,600 a mile, pave the streets and remove snow. (Oct., pg. 761).

Mount McKay and Kakabeka Falls Ry.—Grading and tracklaying operations have been commenced on this line, which will run from Kakabeka Falls to Fort William, and connect with Port Arthur.

Nipissing Central Electric Ry.—A survey of the proposed route of this line along the Haileybury road has been completed, and a report submitted. (Oct., pg. 759).

Puget Sound International Ry. and Power Co.—This company, which was incorporated in Maine early in the year, with a capital of $200,000, to build an electric railway from Seattle, Wash., northwards to Bellingham, via Everett, has acquired a lease of the Everett St. Ry., which it is understood is to form a part of a through line from Seattle to Vancouver, B.C.

Quebec and Island of Orleans Ry.—At the meeting of shareholders, Oct. 8, it was decided to survey the proposed line, which will run along the turnpike trust road between Quebec and Montmorency Falls, before the winter.

Quebec Ry., Light and Power Co.—On account of its increasing business, the company has erected a new siding about 500 ft. long at Limoilou Junction.

Sandwich, Windsor and Amherstburg Electric Ry.—The Ontario Railway and Municipal Board has approved of the lease of the Windsor and Tecumseh Electric Ry., for a term of 99 years at $100 a year, to the S., W. and A.E. Ry.

Shawinigan Falls Terminal Ry.—This company owns and operates 6.25 miles of railway and does the local switching business at Shawinigan Falls, Que. It operates on the tracks of the Canadian Northern Quebec Ry., and the St. Maurice Valley Ry., as well as on its own tracks. The rolling stock consists of two electric locomotives, a snowplow and a number of dump cars. It does not do any passenger business at present. The officers of the company are: President, J. E. Aldred; Vice-President, R. Mackay; Secretary-Treasurer, H. Murray, all of Montreal; and the operating is under the charge of S. L. Smith, Superintendent, Shawinigan Falls.

St. John (N.B.) St. Ry.—Work has been progressing in the double tracking of the line in Union St., but it is understood that an injunction is being sought to prevent the company from proceeding, owing to the narrowness of the street. It is stated that the permission to undertake the work was granted by a sparsely attended meeting of the Board of Works, and has not been ratified by the Council.

Southwestern Traction Co.—An application has been made to the Ontario Railway and Municipal Board for permission to open for traffic the St. Thomas and Port Stanley section of its line.

Toronto Ry.—A census is being taken of all passengers travelling on each route, at all times of the day, and of transfers at the various intersections, for the purpose of re-arranging the routes, and of ascertaining where, and in what manner it may be deemed advisable to increase trackage.

Toronto and York Radial Ry.—The question of the entrance to Toronto is still under discussion, but, as yet, no definite move has been taken by either of the parties concerned. The city contends that though it is ready and willing to permit an entrance upon terms mutually beneficial, the termination of any franchise granted for such purpose should be coincident with the termination of that granted to the Toronto Ry. A suggestion has been made that the city construct the lines, and enters into a contract with the T. and Y. R. Ry. to supply the service. The proposition which the city has made in the matter has been declined by the company, and it is anticipated that an application to enter the city with its cars will be made, at an early date, to the Ontario Railway and Municipal Board.

Woodstock Electric Ry., Light and Power Co.—The company's system has been changed from direct to alternating current.

A SAFEGUARD TO ECONOMY

The Soule Dust Guard wearing surface is protected by what is known as SINGAPORE BUFFALO HIDE. Friction polishes, but DOES NOT WEAR THE SURFACE. INVESTIGATE. TRY THEM and we feel confident YOU WILL ALWAYS SPECIFY THEM.

SOULE RAW HIDE LINED DUST GUARD CO.

113 Devonshire Street - - BOSTON, MASS.

THE RUGGLES FLUE CLEANER

The best production for this purpose ever put on the market. Does the work cleaner, with greater ease and with better results, than any other flue cleaner. **Absolute guarantee.**

THE CELEBRATED PARMALEE WRENCH

Built on natural principles, can be used on greased shafting without slipping, on nickel-plated pipe without injury from scratching. No difficulty in getting into corners as each joint can be set in place separately. This is without doubt the greatest pipe wrench ever manufactured.

WORKS & OFFICE - - - ST. THOMAS, ONTARIO

Electric Ry. Finance, Meetings, Etc.

British Columbia Electric Ry.—Gross earnings for Aug. $152,426, against $112,223 for Aug., 1906. Working expenses, $80,518; renewal fund, $10,470; net earnings, $61,438; approximate income from investments, $11,036; net income, $72,474, against working expenses, $57,781; renewal funds, $9,652; net earnings, $44,790; approximate income from investments, $9,536; net income, $54,326, for Aug., 1906.

Guelph St. Ry.—The annual statement of accounts shows that the earnings of the railway were $30,304.01, and the expenses $21,286.07. There was a net gain on the year's working of $7,017.94. A dividend of 4½% was declared, the amount payable to the city being $4,860.

Halifax Electric Tramway Co.—Earnings for Sept. $17,984.60, against $19,895.20 for Sept., 1906.

Hamilton Radial Ry.—At the forthcoming Parliamentary session application will be made to increase the bonding powers of the company, with special bonding powers in respect of proposed Toronto terminals, a bridge over the Niagara river, and ferries over the Detroit river.

Montreal Street Ry.—The annual meeting of the company was held Oct. 22, when the directors' report was submitted and approved. The usual quarterly dividend of 2½%, making 10% for the year, has been declared and paid.

Ontario and West Shore Electric Ry.—A by-law to guarantee the bonds of the company was defeated at Leeburn recently.

Quebec and Island of Orleans Ry.—The following officers and directors were elected at the annual shareholders' meeting, Oct. 8: President, Hon. C. E. Dubord; Vice-President, D. O. Lesperance; Directors: S. H. Dunn, N. Morin, A. Lefebvre, R. Rochon, N. Pelletier; Treasurer, F. Turcotte; Secretary, P. Corriveau.

Quebec Ry., Light and Power Co.—At the annual meeting held at Quebec, Oct. 10, the report of the directors was adopted, and the retiring officers and directors were re-elected. In connection with the option given to Hanson Bros. of Montreal by a large body of the shareholders, a letter was sent by that firm, dated Oct. 2, stating that the option to purchase would not be exercised. It was generally understood that the option was obtained on behalf of the C.P.R

Toronto Ry. Co.—The statement for the financial year ended Aug. 31, shows that the receipts of the company have increased about 11%, while the city's percentage has increased 21%. The gross receipts for the year were $3,349,819.94; city's percentage, $409,964; against $2,977,539.09 gross earnings and $336,630.86 city's percentage, for year ended Aug. 31, 1906.

Car earnings for Sept. $331,495.87, against $308,213.75 for Aug., 1906. Approximate car earnings for nine months ended Sept. 30, $2,532,164, an increase of $257,000 over those of same period 1906.

Electric Railway Notes.

The Amalgamated Association of Street and Electric Railway Employes of America will hold its next biennial convention at Toronto, in 1909.

The City of Toronto has been given leave to appeal from the adverse decision in its case against the Toronto Ry. Co. on the question of removing snow from the streets.

Petitions for and against the running of street cars on Sundays were submitted to the London City Council, Oct. 18, and on the advice of the city solicitor, no steps were taken in the matter, as under the present acts such a proceeding would not be legal

The writ of prohibition issued by the Quebec Ry., Light and Power Co. against the decision of the Quebec Recorder, by which it was fined $40 for a breach of agreement regarding a five-minute service on its Palace Hill route, was dismissed with costs against the company, Oct. 21.

The Montreal St. Ry. has placed twenty of its new "pay-as-you-enter" cars on its Notre Dame St. route, and an additional fifteen will be placed when completed. The company already has similar cars running on other routes, and the initial prejudice to them appears to have been overcome.

A deputation of the employes of the London St. Ry. waited on C. B. King, manager, Oct. 18, and submitted a request for increase of pay, from 16, 17 and 18 cents an hour for the first, second and third years respectively, to an all round 20 cents an hour. It was promised that the matter would be laid before the directors at their next meeting.

It is reported that the employes of the St. John, N.B., Street Railway have asked for an increase of 4c. an hour, and time and a half for Sunday work. W. Z. Earle, manager, and H. M. Hopper, secretary of the company, have stated to the press that they had heard nothing of the request for such increases, and seeing that the men were granted liberal increases two years ago, could offer no opinions as to what would be done in the matter.

W. Mee, a laborer, was awarded $2,000 damages against the Toronto Ry. Co., Oct. 22, for an electric shock sustained, it is said, when grasping the metal hand rail, in leaving a car during wet weather. A witness stated that there was no electrical connection with the hand rail, but at times during damp weather there was a leakage of current which would be harmless were the rails made of wood. An electrical expert giving evidence in the case suggested the advisability of fixing an additional wire to carry off any escaping electricity.

The Amherstburg, Ont., Town Council complains that suitable freight sheds and passenger waiting-rooms are not provided; freight rates are excessive; passenger cars are unsuitable; single instead of double truck cars are being used; fares charged between Amherstburg and Windsor are too high, and the ballasting of the road is insufficient, and has made application to the Ontario Railway and Municipal Board to issue an order compelling the Sandwich, Windsor and Amherstburg Electric Ry. to make a specific performance of its contract with the municipality.

Grain Elevator Notes.

The Pacific Grain Co., Ltd., has started a business in Calgary, Alta.

The Imperial elevator at La Salle, Man., was destroyed by fire Oct. 21.

An elevator is being erected at Tyvan, Man., with a capacity of 30,000 bushels.

The Western Canada elevator at Lyleton, Man., was burned Oct. 21 with 23,000 bushels of wheat.

The Alberta Pacific Elevator Co. has made extensive improvements and alterations at its Daysland elevator.

McIntosh & Son are applying to their elevator at Toronto an automatic scale to weigh one bushel per discharge.

The Northern Elevator Co. has announced that it will not build an elevator at Pipestone, Sask., this year, as stated.

The C.P.R. returns show that between Sept. 1 and Oct. 8, 3,268,000 bushels of wheat had been received along its lines.

G. W. Lamson, formerly a travelling auditor on the C.P.R., has been appointed C.P.R. grain agent at Winnipeg, Man.

The elevators at Fort William, Ont., are all working at high pressure. Wheat is coming in at the rate of 150 carloads a day.

The Canadian Grain Commission has appointed an inspector of export grain going in bond through the elevators at Superior, Wis.

The grain receipts at all points on the C.P.R. during Sept. amounted to 692,000 bushels of wheat, and 75,000 bushels of other grains.

The new consolidated elevator at Fort William, Ont., loaded 90,000 bush. of wheat into the steamboat Fairmount, from two spouts, in four hours recently.

E. A. Partridge, formerly President of the Grain Growers Grain Co., Sinterhita, Man., had his left foot amputated Sept. 29, as the result of an accident.

The Lake-of-the-Woods Milling Co.'s elevator at Arrow River, Man., was burned to the ground Oct. 8. About three carloads of new wheat were in the elevator at the time

A suggestion is under consideration for the towing of a floating elevator from Montreal to St. John, N.B., for use in loading vessels during the winter season of navigation.

A press report states that the C.P.R. is securing sites for the erection of elevators at Vancouver, B.C., in case the Panama Canal is completed and becomes a grain route.

A grain elevator at Carberry, Man., and owned by G. W. Murphy, containing about 20,000 bush., was destroyed by fire Oct. 21. It is stated that the outbreak was caused by a hot box on the shafting in the pit.

The Port Arthur, Ont., elevators are working night and day to accommodate the wheat that is coming in. It is said that on account of the present high prices, that farmers are rushing the grain to the elevators as speedily as they can obtain cars.

It is reported that a new dock, about 1,500 ft. long, will be constructed this winter, between the Aberdeen elevator and the G. T. Pacific terminal elevator, now being erected at Tiffin, to be worked in conjunction with the G.T. Pacific Ry.

On account of the fact that wheat hauled across the boundary in wagons cannot be shipped in bond, the C.P.R. contemplates constructing a short line at Mowbray, N.D., so that cars may be loaded and sealed there and then transferred in bond.

The decision in the case of the Montreal Grain Elevating Co. against the Harbor Commissioners of Montreal, whereby the plaintiff company was awarded $13,500 for the loss of the elevator St. Lawrence in the harbor, has been set aside on appeal.

The Colonial Grain Co., Ltd., has been incorporated under the Northwest Territories Ordinance, with a capital of $150,000 and offices at Winnipeg, Man. The provisional directors are: J. C. Gage, K. B. Stottard, T. H. Hanhard, W. C. Leistikow, and A. Reid, Winnipeg.

Press reports state that the McCabe Elevator Co., Minneapolis, Minn., has secured a site from the G.N.R. (U.S.) at Brandon, Man., on which it will erect a 50,000 bushel elevator. The company is building elevators on the Brandon, Saskatchewan and Hudson's Bay, and Midland Rys.

The following scale of charges has come into force at the terminal elevators at Fort William and Port Arthur, Ont.: Elevation, cleaning, spouting, including 15 days free insurance against loss by fire, ¾c. a bushel; storage for each succeeding day or part thereof, after the first 15 days, 1-30c. a bushel.

Extensive alterations and improvements are to be made at the C.P.R. steel elevator

at the eastern end of West Fort, Fort William, Ont. Modern hopper bottoms are to be fitted to the tanks, replacing the present flat bottoms, and the other improvements to be made will enable the elevator to handle 300 cars of grain a day

Referring to a paragraph in our Oct. issue regarding the quick unloading of the steamboat Iroquois at the Montreal Transportation Co.'s elevator at Kingston, Ont., we are advised that the vessel arrived at 11 a.m., the elevator leg was lowered at 11.15, and the actual time occupied in discharging the cargo of 102,000 bush. was 4¾ hours.

The Battleford Milling and Elevator Co., Ltd., has been incorporated under the Northwest Territories Ordinance, with offices at Battleford, Sask. The following officers and directors have been elected: President, H. G. Adams, Secretary-Treasurer, F. G. Atkinson; W. R. Latimer, W. W. Livingstone, R. J. Coulter, D. T. Clink, and J. B. Macgregor, directors.

J. Love and C. R. Tryon have sold their interests in the Winnipeg Elevator Co. to E. C. Warner, F. G. Piper, F. E. Kenston, W. Douglas, of Minneapolis, Minn., and W. H. McWilliams, of Winnipeg, Man., all of whom are interested in the Canadian Elevator Co. The paid-up capital of the Winnipeg Elevator Co. is $375,000, and it owns over 60 interior elevators; and the Canadian Elevator Co. has a capital of $500,000. W. H. McWilliams will manage the Winnipeg Elevator Co.

The Ogilvie Flour Mills Co. shows a profit for the year ended June 30, of $630,685.57. It owns four elevators at Montreal, having a capacity of 1,150,000 bush.; one elevator at Fort William, Ont., 600,000 bush; three elevators at Winnipeg, of 550,000 bush.; elevators at 96 points in Manitoba, Saskatchewan and Alberta, having a capacity of 3,005,000. The total capacity of the company's elevators is 5,335,000 bush. Following are the officers and directors for the current year: President, C. R. Hosmer; Vice-President and Managing Director, F. W. Thompson; other directors: Sir G. A. Drummond, Sir H. M. Allan, E. S. Clouston, H. S. Holt, S. Ogilvie; Treasurer, S. A. McMurtry; Secretary, T. Williamson; General Manager, Western Division, W. A. Black.

MARINE DEPARTMENT

William Petersen & Co., Limited.

The Official Receiver has declared a fourth and final dividend of 1½d. in the £, making a total distribution of 3s. 5½d. in the £, in the estate of William Petersen, Limited, of Newcastle-on-Tyne, Eng. The total amount ranking for dividend was £63,625, 1s. 3d., and the estate realized £14,903, 4s. 3d. The remarks of the Official Receiver upon the final winding-up of the estate contain the following: Considerable difficulty was experienced in dealing with the shed at Montreal, and the total amount realized after deducting the expenses of recovery and realization in Canada was only £22, 18s. (The company's estimate of the value of this shed was £500). Enquiries having been made why one-fourth (£3,750) of the proceeds of the action against Armstrong, Whitworth & Co., in respect of the establishment of a steamship line between France and Canada, was paid to W. Petersen, it may be explained that for a period of nearly eighteen months Mr. Petersen, whose co-operation was essential, gave the greater part of his time to matters connected with the action. In addition, the company had in many respects been practically indistinguishable from Mr. Petersen himself, and amongst other things which followed from this he was under personal liability in respect of a portion of the company's indebtedness. The proportion was, of course, a mere matter of arrangement approved by the Committee of Inspection, but in the result there is no reason to think that Mr. Petersen has been unduly favored at the expense of the company's creditors. Of the book debts, £666, 13s. 4d. was finally received from the liquidation of the Toronto Trading Co., which, with £2,500 received from the debt owing by the Canadian Ocean and Inland Navigation Co., represents the bulk of the realization under this head. Of the surplus from securities (£12,196, 7s. 2d.), £9,785 of this amount was deemed to be the value of the company's interest, subject to mortgage in the Canadian Lake and Ocean Navigation Co. Although special efforts have been made to realize this asset nothing has been recovered for the liquidator's interest, and it does not appear that there were ever any good grounds for assuming such a value as was done by the officers of the company in the statement of affairs. The disappearance of this asset seems to remove any doubt which may have remained as to the serious insolvency of the company entirely apart from the difficulties with Armstrong, Whitworth & Co. The estimated surplus of £2,411 from the Columbia Wharf (in London, Eng.,) has proved equally valueless.

Atlantic and Pacific Ocean Marine.

The new cold storage buildings built by the C.P.R. at its dock in Liverpool, Eng., were opened Oct. 4.

The Mersey bar lightship at the entrance to the harbor at Liverpool, Eng., has been equipped with submarine signal bells, which were in operation Sept. 23.

Reports are current that the establishment of a line of steamships between Germany and Canada is under the consideration of German traders in Berlin.

A Montreal press despatch states that the Dominion Line Steamship Co. will inaugurate a passenger and freight service on the Pacific, in conjunction with the G.T. Pacific Ry., as soon as that railway is completed.

The Thomson Line steamship Hurona, which was recently damaged in collision with the Allan Liner Mongolian, had her damages, which were comparatively slight, repaired, and sailed again for Glasgow, Scotland, Oct. 3.

The Salvation Army Emigration Department has charter d ten vessels for carrying immigrants from Great Britain to Canada next season. The charters have been arranged with the Allan and the Dominion Lines.

It is reported that the Cunard Steamship Co. has accepted an offer recently made, and that in the near future theatrical performances will take place on certain of its vessels running between New York and Liverpool, Eng.

The International Mercantile Marine Co. during its past fiscal year, with a fleet of 123 vessels, having a tonnage of 1,015,761, earned $35,931,412 gross, and $8,032,631 net, or an average of $292,125 per vessel gross, and $65,206 net.

The contract between the C.P.R. and the Imperial Government, for the carrying of the mails between Great Britain and Hong Kong, expires in April, 1908. The renewal of the contract is being asked for and negotiations are in progress.

The Allan Liner Corsican, which arrived at Montreal, Oct. 15, reported encountering very heavy weather, during which a child received injuries from which it died, and two other passengers sustained a broken wrist and three broken ribs, respectively.

It is reported that the Cunard Line mail port will be moved, in the near future, from Queenstown, Ireland, to Holyhead, North Wales, on account of the non-removal of the obstruction at the entrance to the former harbor, known as Turbot Bank.

Sir Jas. Mills, chairman of the Union Steamship Co., is on a visit to Australia to consult the Government there in connection with a proposed service to Vancouver, B.C., as part of the Halifax-Blacksod Bay trans-Atlantic project for an all-British service.

The task of bringing the "all-red" route officially before the Dominion Government at the next Parliamentary session, has been entrusted to C. R. Devlin, M.P. for Nicolet, who, it is stated, will advocate the adoption of Galway as the terminal port for the United Kingdom.

A press report states that La Compagnie Generale Transatlantique of France, has the intention of placing two vessels, La Bretagne and La Gascogne, on the route between Marseilles and Montreal, and that the Dominion Government will grant a subsidy for a satisfactory service.

It was discovered that the C.P.R. steamship Empress of China, while lying at her wharf at Vancouver, B.C., Oct. 23, had sprung a leak, and was rapidly filling with water. She was quickly pumped out, the chief damage being to the cargo, with which she was partially loaded.

It is reported that the General Trans-Atlantic Steamship Co. of France will shortly inaugurate a direct line of vessels for passengers and freight between the Dominion and France. The attempt to establish a line between the two countries has been made before, but has not met with any success.

In the agreement made between the Imperial Government and the Cunard Line, at the time of the building of the Mauretania and Lusitania, it is prescribed that all the officers, and three-fourths of the crew, shall be British subjects, and that a certain proportion shall be men in the Royal Naval Reserve.

Forty years ago the Allan Line was being operated as the Montreal Ocean Steamship Co., and the biggest vessels engaged in the trade were: Austrian, 2,700 tons; Nestorian, 2,700 tons; Moravian, 2,650 tons; Peruvian, 2,600 tons; Hibernian, 2,434 tons; Belgian, 2,400 tons; Nova Scotian, 2,300 tons; North American, 1,784 tons; Damascus, 1,000 tons.

The directors of the C.P.R. have been authorized by the shareholders to build or acquire for its trans-Atlantic service two steamers of the Empress type, but to be larger and faster than the Empress of Britain and the Empress of Ireland. These steamers will, in all probability, be transferred to the Pacific Ocean, to run between Vancouver and Hong Kong.

At the annual meeting of the shareholders of the Manchester Liners, Ltd., at Manchester, Eng., Sir Christopher Furness, M.P., as President, stated that the profits for the year

amounted to £48,672, an increase of £10,500 over those of the previous year. He estimated that the losses sustained by the company by strikes at various ports where its vessels traded, of which Montreal is one, at £10,000.

For the five months ended Sept. 30, the passengers arriving in Quebec by the various trans-Atlantic lines, have been as follows:

	First	Second	Third	Total
C. P. R.	2,832	6,100	36,518	45,450
Allan	3,300	13,221	24,000	40,521
Dominion	3,657	4,793	9,828	18,278
Donaldson	....	1,424	2,991	4,415
Totals	6,789	25,538	73,337	108,664

It is reported that an order has been placed in Belfast, Ireland, for a new vessel for the Hamburg-American Line. She will be 800 ft. long, 50,000 tons, and driven by turbines and reciprocating engines at a speed of 18½ knots an hour. It is also stated that she is to be fitted with a theatre, tennis court, Turkish baths and several other features which have not as yet been installed in ocean liners.

A member of a firm of shipbuilders, speaking at Edinburgh, Scotland, recently, favored the building of 18-knot steamships for the Canada-Australia section of the "all-red" line, as they were cheaper and better fitted to carry a profitable deadweight than vessels of the Lusitania class, although he anticipated that eventually 25-knot boats would be placed on the route.

The new Allan Line steamship Grampian arrived in Montreal, Sept. 30, on her initial trip. She carried 40 saloon, 322 second cabin, and 204 steerage passengers. She sailed from Glasgow, Scotland, Sept. 21, at 6 p.m., and reached Quebec, Sept. 29, at 2.30 p.m., thus creating a new record for the Glasgow-Quebec route. She is a sister ship to the Corsican and was fully described in our Sept. issue, page 699.

Capt. Braes, of the Allan Line steamship Tunisian, will, it is understood, retire from the service after the last trip of the vessel to Quebec this season. He has been a commander for 40 years and was for some time captain of one of the State Line vessels, which were purchased by the Allan Line Steamship Co. Capt. Braes was transferred to the St. Lawrence route in 1899, and has been, successively, captain of the Mongolian, Parisian and Tunisian.

The Cunard S.S. Lusitania arrived in New York on her second trip Oct. 11, having completed the voyage from Queenstown to Sandy Hook in 4 days, 19 hours, 52 mins., reducing the time taken on her maiden trip by 5 hours, and creating a three-fold record, for the shortest time between a European port and New York, for the highest average daily speed, 23.99 knots an hour, and for the longest daily run, 617 nautical miles.

The launch of the new bow for the White Star S.S. Suevic took place at Belfast, Ireland, Oct. 5. The new part is 200 ft. long, fitted with deckhouses, captain's bridge, etc., and will be towed to Southampton and fitted to the other part of the vessel. The Suevic ran on the rocks at the Lizard, Cornwall, Eng., Mar. 17. Several unsuccessful attempts were made to float her, after which it was decided to cut away the fore part, and float the remainder.

At a recent meeting of the St. John, N.B., Board of Works, a communication was read from W. Thomson & Co., regretting that in allocating the winter berths at the port, the Allan Line steamships had not been allotted accommodation at any of the berths at West St. John, where they could load grain, and intimating that the large cargo-carrying non-mail vessels of this line will probably be withdrawn from the port, as it is impossible to load grain without proper facilities.

An official of the Allan Line Steamship Co., which controls the only steamship line at present running between Canada and France, is reported to have said that no alarm was felt by the company in regard to the reports that a French company would commence a service next year; the company was fully aware of the possibilities and requirements of the service, and was prepared to meet any demand that any increase of trade may make. The Allan Line, at present, runs three vessels between Montreal and Havre on a fortnightly service.

The steel screw steamship Vadso, purchased by the Boscowitz Steamship Co., arrived at Victoria, B.C., recently from Liverpool, Eng. She is to be put into the northern British Columbia service. She was built in 1881 at Gothenburg, Sweden, and has compound engines with cylinders 23 and 44 inches diameter by 30 inch stroke, 120 h.p., giving a speed of 10 knots an hour. Her dimensions are: length, 190.2 ft.; breadth, 28.9 ft.; depth, 21.6 ft. from the spar deck, 7.3 ft. between decks; gross, 914 tons; register, 699 tons, with a deadweight capacity of 1,150 tons. She was thoroughly overhauled and new boilers, steam winches, and derricks installed at Liverpool, and occupied about 80 days on the voyage.

The Thomson Liner Hurona and the Allan Line steamship Mongolian collided in a fog off Armour Point in the Lower St. Lawrence, Sept. 24, both vessels receiving sufficient damage as to render their return to port advisable. The bow of the Hurona was badly smashed, and the Mongolian had a large hole in her side from the water line up. Although there was little danger, the passengers on the Mongolian, numbering about 40, were transferred to the Hurona for the return journey, which was accomplished at slow speed. On arrival at Quebec, the passengers were transhipped to the Allan Line steamship Corinthian sailing for Glasgow. The Hurona returned to Montreal. By mutual consent the official enquiry into the causes of the accident is to be transferred to the British Courts, and the investigation will take place in Glasgow, Scotland.

A London, Eng., press dispatch, dated Oct. 20, states that an experiment is being carried out in England, which, if successful, will

mark a new era in marine propulsion, and achieve results which will leave present speed records far behind. The plan, of which practical tests are to be made, is that turbine engines should drive high speed electrical generators, supplying current to motors which drive the propellers, instead of as now, when the turbines are coupled up direct to the propellers. It is said that a vessel of the Lusitania class would be equipped with six turbo-generators of 20,000 h.p. each; each of the four propellers being provided with six motors of 5,000 h.p. each, five of which would do the work, the sixth being in reserve, the whole equipment being controlled from the bridge by means of a keyboard and switches. It is estimated that a speed of 30 knots could be maintained without difficulty.

The wrecked Allan Line steamship Bavarian, while undergoing repairs preparatory to being taken to New York, owing, it is stated, to an accumulation of compressed air under a temporary wooden deck, rose suddenly in the water and left the sandbank, in which she was grounded, with such force as to break the cables. Continuing in her course, she struck a salt shed, and finally ran into the steamship Carrogan Head, without, however, doing any serious damage. When ready for towing she will be removed to some dock, probably New York, for full repairs. A press report states that the steamship Carrogan Head has taken action against the steamship Bavarian, at Quebec, for $10,000 damages from collision. It is also stated that the North American Wrecking Co., Ltd., who purchased the wreck from the underwriters for £12,000, has decided to sell the vessel, as she now lies at Point Levis, Que., by public auction, before the close of navigation.

Additional particulars have been received at Montreal respecting the engines of the new S.S. Alberta, now under construction at Belfast, Ireland, for the Dominion Line. The Alberta, which will have a speed of 18 knots an hour, will be fitted with three propellers. Each of the wing propellers will be driven by a four-crank triple expansion engine, balanced, using steam at a pressure of 215 lbs. They will each have a high pressure cylinder of 30 in. diameter, an intermediate cylinder of 46 in. diameter, and two low pressure cylinders of 53 in. diameter each; the piston stroke being 54 in. The exhaust steam from the four low-pressure cylinders will pass into the turbine, which in turn drives the central propeller. In this turbine the steam will be expanded down to two pounds absolute pressure before exhausting into the condensers, of which there are two, each supplied with independent air pumps. When the ship is required to go astern the exhaust steam from the reciprocating engines will go direct to the condensers, so saving the complication of the astern turbine, while for manœuvring in and out of port the reciprocating engines only will be used, which will be more than sufficient, as under such conditions they will develop over three-fourths of the total combined horsepower of the turbine and reciprocating engines. The full speed of the reciprocating engines at sea will be about 83 to 85 revolutions, and of the turbine about 230 revolutions.

The Quebec Transport Co., Ltd., is being wound up, A. Colston being the liquidator. The liabilities are said to be about $8,000 and are being paid in full. The company was incorporated under a Dominion charter, Oct. 23, 1905, the provisional directors being: T. Harling, Montreal; J. G. Scott, General Manager, Quebec and Lake St. John Ry.; W. Power, J. T. Ross and A. E. Doucet, C.E., Quebec; the authorized capital being $100,000. The company was authorized to carry on a general freighting business; to charter or otherwise acquire vessels for the conveyance of freight, passengers and mails between ony ports in Canada or elsewhere; to carry on a general marine brokerage business; act as stevedores, etc. T. Harling was appointed Manager, and arrangements were made with the Quebec Harbor Commission for the use of wharves, warehouses, grain elevators, and other terminal facilities there. The company chartered some freight steamers in Great Britain and voyages were made in 1905. The Quebec Central Ry. and Mackenzie, Mann & Co. subsequently became interested in the venture, but difficulties were experienced in obtaining cargoes, and there were troubles with longshoremen, the result being that it was decided to abandon the project of establishing a direct freight line between Quebec and Great Britain for the present. About two-thirds of the capital of the company is stated to have been subscribed, but calls are only being made to cover the indebtedness of the company.

Marine Statistics.

The statistics of trade and navigation, recently issued, for nine months of the fiscal year ended Mar. 31, include the following figures:

Vessels entered inward, from sea:

	Number	Register Tons	Tons of Freight
Canadian	2,093	448,943	172,974
British	1,414	3,177,671	864,290
Foreign	1,754	1,224,029	627,619
All countries, in ballast	5,413	2,270,825	.....
Totals	10,674	7,121,468	1,664,883

Vessels outward, for sea:

	Number	Register Tons	Tons of Freight
Canadian	2,468	867,845	416,844
British	1,766	3,234,655	1,974,085
Foreign	2,653	1,521,770	1,037,358
All countries, in ballast	2,914	1,159,136	.....
Totals	9,801	6,783,406	3,428,287

Vessels trading on lakes and rivers, exclusive of ferries:

	Arrived at Ports		Depart'd from Pts.	
	Numb'r	Reg. Tons	Numb'r	Reg. Tons
Canadian	11,719	5,117,860	11,055	4,565,408
U. S.	8,341	3,485,551	8,815	3,522,198
Totals	20,060	8,603,411	19,870	8,087,606

Vessels (British and foreign) engaged in coasting trades:

	Number	Register Tons
Arrived	36,512	14,325,165
Departed	38,198	13,272,803

Vessels built and registered:

	Built	Tonnage	Regist'd	Tonnage
Steam	118	22,955	139	17,818
Sailing	111	10,250	118	13,817
Totals	229	33,205	257	31,635

The number of vesels sold to other countries is given as 17, having a register tonnage of 3,855, and were valued at $68,190.

THE Canadian Pacific Railway Company will apply to the Parliament of Canada, at its next session, for authority to construct a branch line from Killam, or some point in Township 44, Ranges 13 and 14 west of Fourth Meridian north-westerly to Strathcona, Alberta.

C. DRINKWATER,
Secretary.

Montreal, 8th October, 1907.

Maritime Provinces and Newfoundland.

F. McLeod, Black River, N.B., has been appointed wharfinger at that place.

By an order of the Governor-in-Council, Exploits Burnt Island, Nfld., has been made a port of entry for the colony.

The schooner Martello was driven ashore at Souris, P.E.I., Oct. 8, during a strong gale, and was completely wrecked.

W. L. McLellan, retired master mariner, of Truro, N.S., died of heart failure, at Vancouver, B.C., recently, while on a visit to some relatives.

The steamboat Island Belle is in dry dock at Kingston, Ont., undergoing repairs, after which she will go to Alexandria Bay for the winter.

The barque Wildwood, built at St. John, N.B., has been sold to the Gypsum Plaster Co., Ltd., Windsor, N.S. She is to be converted into a barge.

The Plant Line steamship Halifax is undergoing a thorough overhauling at Halifax, N.S., in preparation for her winter service in the south.

The death was reported, recently, of R. Dart, a well-known deep-sea captain, at Maitland, N.S. He retired from active service a short time ago.

The schooner Cumberland of Portland, Me., was driven ashore at the mouth of the Goose River, N.B., recently, and with her cargo is declared a total loss.

The Pickford and Black Line steamship Beta, which has been undergoing extensive alterations and repairs, was again placed on the West Indies route recently.

G. Borgal, while piloting schooner out of Pleasant Harbor, N.B., was killed through being entangled in ropes, when the vessel was struck by a squall, Oct. 10.

The wreck of the steamship Senlac was sold recently by the underwriters by public auction, and realized $9,000. C. B. Robinson, of St. John, N.B., was the purchaser.

A new 70-ton schooner was launched at Shelburne, N.S., Oct. 1. She is owned by Longmire & Sons, Bridgetown, N.S., and will run between Bridgetown and St. John, N.B.

As a result of a survey of the wrecked bark Guldrin, at Sydney, N.S., the cargo of lumber has been removed, after which it is probable the wreck will be condemned.

The schooner Atlantic, from Buenos Ayres to Sydney, N.S., reported considerably overdue, arrived at St. John, N.B., recently, having occupied over eighty days on the voyage.

Tenders have been received and are under consideration at the Public Works Department, Ottawa, for an extension to the breakwater at Great Salmon River, St. John County, N.B.

It is stated that a service will be inaugurated by the Consolidated Steamship Co., Ltd., between Fredericton and St. John, N.B., next year in connection with the Eastern Steamship Co.

A schooner of 250 tons, length, 120 ft.; breadth, 29½ ft.; depth, 12½ ft., was launched at Shelburne, N.S., recently. She has been named Roseway and was built for the West Indies trade.

The Admiralty surveying steamship Ellinor called at St. John's, Nfld., Oct. 11, on her way to Charlottetown, P.E.I., where the crew are to be paid off and the vessel berthed for the winter.

The steamship Cacouna, in entering port at Sydney, N.S., Oct. 26, collided first with the schooner Conductor, and afterwards with the wharf. The schooner was badly damaged as was also the steamer.

A report from Sydney, N.S., Oct. 21, states that three schooners, Francois Reve,

Submarine Signal
COMPANY
BOSTON, MASS.

Beulah, and Katie S., have been driven ashore and wrecked during a strong easterly gale in Sydney Harbor.

It is reported that a survey is being taken for the construction of a wharf at Sydney Mines, N.S. This was being done last year, but ice conditions then prevailing, the work was abandoned.

It is understood that the two damaged steamships, Oscar II and Universe, at present in the Halifax dry dock, will be removed to New York for repairs, owing to a strike of the workmen at the former place.

A new schooner, to be named Evelyn Berry, is nearing completion at Granville Ferry, N.S. Her net tonnage is 286, and when completed she will go under the management of F. W. Pickels & Co.

The schooner Baden Powell, from New York to Chatham, N.S., went ashore in Dover Bay, Oct. 3. An attempt to tow her off was unsuccessful, so her cargo had to be removed to enable her to float with the tide.

The Newfoundland schooner Alma is reported to have been wrecked and completely broken up at Little Triton, Nfld. No trace of the crew has been discovered, and it is feared that they have been drowned.

The C.P.R. ferry steamboat Henry Plumb, running between Ogdensburg and Prescott, collided with the Montreal Transportation Co.'s barge Montreal, Oct. 7. The ferry's stern and deck were rather severely damaged.

The schooner Brilliant Star was wrecked at Cape Dolphin, N S., Oct. 8. She was built at Jeddore, N.S., in 1886, and her dimensions were: length, 46½ ft.; breadth, 18 ft.; depth, 7 ft., with 32 as her registered tonnage.

Referring to the proposal made recently by W. Thomson & Co., St. John, N.B., to the Interprovincial Navigation Co., to manage the steamship Lady Eileen, we are advised it was not accepted by the directors of the company.

The Charlo, N.B., schooner Jessie was carried up the river at Moncton Oct. 8 and grounded, where she is regarded as a total loss. Much difficulty was experienced in getting out the cargo on account of the tides washing over her.

The steamship Margaret, recently built for the eastern shore trade, has arranged to call at L'Ardoise, St. Peter's, Poulamond, Descousse, and Petit de Grat, neither of which places have until now had direct connection with Halifax.

The bark Abeona, built at Mahone Bay, N.S., in 1893, was sold recently by public auction, to A. R. Morash, of Eisenhauer & Co., for $6,500. Her dimensions are: length, 143.9 ft.; breadth, 32.2 ft.; depth, 13 ft., and 499 tons register.

The tug Rosemary brought into Lunenburg, N.S., Oct. 15, the schooner Ralph Russell, which struck on Round Rock recently, tearing away her keel and doing other damage. She was only kept afloat by continued pumping.

J. Fleming, a pilot, has retired from active service at the age of 98. He became well known some years ago, when he piloted the blockade runner Tellahassee through the southeastern passage while a fleet was waiting at the mouth of the harbor.

J. Kelly, inspector of lights and lighthouses for New Brunswick, inspected the lighthouse now in course of erection at Cape Tormentine, and the range lights which are being installed, recently, and reported that the work would probably be completed by the end of Oct.

The Newfoundland Marine Department has issued a notice to the effect that in the recent storm, the building on the end of the public wharf at Twillingate, from which the harbor light was shown, was destroyed with the wharf, and that the light will not be replaced until further notice.

The steamboat Volunda, which went on the rocks at Blomidon, N.S., recently, has been towed off by the tug Springhill, and taken to Parrsboro, N.S., for temporary repairs, after which she will proceed to New York to be thoroughly overhauled.

The schooner Empress, bound from Bridgewater, N.S., to Boston, Mass., arrived at her destination, Oct. 2, without sails, and with spars broken and planks wrenched, and her crew completely exhausted, through having been kept at the pumps for four days.

The U.S. fishing schooner Fannie E. Prescott, which was seized last spring for fishing inside the three mile limit, and taken into Halifax, N.S., and dismantled, has been released by order of the Admiralty Court, the owners having pleaded guilty and paid a fine of $200.

The Norwegian steamship Universe, which has been lying at the wharf at Halifax, N.S., since July, after being towed from White Head, where she went ashore, has been drydocked for repairs. She is 299 ft. long, and is 2,600 tons gross. An extension of 40 ft. had to be put on the cradle to accommodate her.

J. H. Longmire & Sons' new schooner was launched at Shelburne, N.S., recently, and named Frances. Her dimensions are: length, 85 ft.; breadth, 20.8 ft.; depth, 8 ft., with a tonnage of 72 gross. She is fitted with twin screw gasoline engines, and will be placed on the run between Bridgetown, N.S., and St. John, N.B.

During the storm which swept over the province about Oct. 8, the wrecked schooner Mary E. Smith was broken in two at Whitehead, N.S., the forward part being held down by chains at the eastern entrance to the harbor. It is regarded as a menace to navigation. Attempts to remove her were unsuccessful.

A Montreal despatch states that a steamship service is to be established between Montreal and Newfoundland next spring. Two boats, it is said, will be placed on the route, calling at P.E.I. and Cape Breton ports, with accommodation for all classes of passengers, and having a speed of 18 knots an hour.

One of the four new wharves which are to be constructed at St. John, N.B., is almost completed, a second is in course of construction, and dredging contracts have been awarded for the remainder. It is anticipated that in about two years accommodation will be found for three times as many vessels as there is to-day.

The schooner Agility, owned by I. Porrier, West Arichat, N.S., went ashore on Cape Dauphin at the entrance to the Bras d'Or lakes recently, and it is thought to be impossible to re-float her. She was built at Port Medway, N.S., in 1858, and her dimensions are: length, 75.6 ft,; breadth, 21.8 ft.; depth, 8.2 ft.; registered tonnage, 72 tons.

The St. John, N.B., city treasury board has adopted increased winter port tariffs as follows: Cattle, 3c. each; general goods, 10c. a ton; lumber, 10c. a thousand. This is the same as the summer rates, the former winter rates being 2c. each for cattle and 5c. a ton for general goods. For lumber, the rate formerly was charged only on that loaded over the wharf.

A London press despatch stated recently that prior to his departure from England, Hon. L. P. Brodeur said that tenders would shortly be requested for a new icebreaker to work between Prince Edward Island and the mainland of Newfoundland. It was also stated that the price would probably be about $450,000, and the speed 17 knots an hour.

The schooner Mary E. Smith struck a sunken rock at Whitehead, while bound from Boston, Mass., to Sydney, N.S., recently, and sank in deep water. She was built at La Have, N.S., in 1903, and was owned by her captain and his brother, who purchased her from her original owners last winter. Her dimensions were: length, 93.2 ft.; breadth, 25.2 ft.; depth, 10 ft., and 99 tons register.

The C.P.R. is not prepared to accept the schedule of winter port rates recommended to the St. John, N.B., council, recently. W. Downie, Superintendent, says that the company felt that the rates should remain as they were last year as regards general freight and cattle, and that he understood that a schedule was to be submitted to the transportation companies before any action was taken.

A resolution embodying their belief in the advantages to be gained by the construction of a tunnel between the mainland and Prince Edward Island, and impressing on the Government the desirability of taking prompt steps for the commencement of the work, was passed at a meeting at Charlottetown, P.E.I., Oct. 9, by no less a body than the Maritime Funeral Directors' Association.

All attempts at floating the steamship Turret Bell, which stranded some time ago at St. Peter's Bay, P.E.I., have been abandoned for this year. After lightening her by about 900 tons, thus lessening the draft 3 ft., and being made watertight and pumped out, it was found impossible to float her owing to insufficient rise of tide. She has been made secure, and further attempts to get her afloat will be made in the spring.

Hon. W. Pugsley, Minister of Public Works, speaking to the St. John, N.B., Board of Trade, said he would not be satisfied until the whole of Canadian grain was exported from Canadian ports. At present, he said, 60% is shipped from other ports, and to overcome this, Canadian Atlantic ports should be equipped to handle the business; and he had ordered the dredge Fielding to come to St. John, making three dredges at work in the harbor.

The steamship Isaac N. Veasey, which has been lying under water off Kelley's Beach, N.S., for nearly a year, was sold by auction recently, to Larder Bros., Sydney, N.S., for $1,900. Her registered number was 116,742; dimensions: length, 96 ft.; breadth, 17½ ft.; depth, 7½ ft.; 89 tons gross, 60 tons register, with engine of 7½ h.p. driving a screw. She was built at Pocomoke, Md., in 1888, and was owned by R. G. Roach, Bay of Islands, Nfld.

The Halifax, St. John and Jamaica Steamship Co.'s service, inaugurated Oct. 18, between Halifax, St. John and Jamaica, will be a fortnightly one. Two vessels named Senator and Amanda have been chartered, and are already on the route, and a third will be added if found necessary. Both vessels have been specially constructed for the fruit carrying trade, and the holds are steam heated throughout for winter service. There is also first-class passenger accommodation.

The Magdalen Islands Steamship Co.'s steamship Amelia, on the route between Souris, P.E I., and the Magdalen Islands, left the former place, Oct. 7, on the trip which usually occupies about eight hours, and grave fears are entertained for the safety of the passengers and crew, as she has not since been heard of. The Amelia was built at Ayr, Scotland, in 1894, is a 70 h.p. screw steamer of the following dimensions and tonnage: length, 145 ft.; breadth, 22.8 ft.; depth, 9.9 ft.; 357 tons gross, 103 tons register.

The death has occurred at Yarmouth, N.S., of J. Powell, at the age of 85. He was a well-known shipbuilder in the old days of wooden vessels, and often related his connection with what was considered a remarkable feat at that time. In 1858, the bark Caroline was cut in two, and lengthened by 40 ft. In hauling up the vessel, the services of all the local shipwrights, Trinity servicemen, and 100 of the 9th Regiment, were requisitioned, and while working the capstan, a fiddler was engaged to encourage them in their efforts.

The steamship Cabot, which arrived at Sydney, N.S., recently, brought, as part of her cargo, a complete wrecking outfit, with pumps, for the wrecking plant about to be established by the Dominion Coal Co. Capt. Holmes, formerly of the Cacouna, went to Grangemouth, Scotland, to bring her out, and the voyage occupied sixteen days. The Cabot is owned by the Steamship Cabot Co., Ltd., formed in connection with the Dominion Coal Co., and will be used in the coal carrying trade. A full description of the vessel was given in our issue of July.

D. J. Purdy, St. John, N.B., has purchased from the Sincennes-McNaughton Line, Ltd., Montreal, the steamboat Sincennes, to replace the Crystal Stream destroyed by fire in June, on the Washademoak route. The Sincennes, register number 100,725, is a paddle steamer of 34 h.p., and was built at Montreal in 1893. Her dimensions are: length, 142¼ ft.; breadth, 24¼ ft.; depth, 8¼ ft.; tonnage, 228 gross, 129 register. She has been used as a tug on the Richelieu route for several years. The price given is stated to be $25,000.

The steamship Borgestad, chartered by the Dominion Coal Co., Sydney, N.S., for the coal trade with Montreal, was built at Middlesbrough, Eng. Her dimensions are: length, 372 ft.; breadth, 51 ft.; depth, 29 ft. She is capable of carrying 7,000 tons of coal on a draft of 23 ft. 1 in., at an average speed of 11 knots. Being a perfect self-trimmer, no coal trimmers are required, either in loading or discharging, which is done at the rate of about 1,000 tons an hour. Outwardly, her appearance is similar to the vessels employed on the Great Lakes, her engines being placed right aft, but the general rig is conspicuous by its absence. In place of the usual masts she is fitted with 10 derrick posts in pairs, which, although not necessary for the coal trade, will be made use of when the vessel is placed in the general trade during the winter. The boat is constructed on the cantilever system, which is probably the best yet conceived for general lake service, and she has a large capacity suitable for grain, coal or iron ore. Her engines have cylinders 26, 42 and 70 inches diam., by 48 ins. stroke, of 2,200 i.h.p., supplied by one boiler, 11 ft. 6 ins. long, by 15 ft. diam., and one 10 ft. 6 ins. long, by 11 ft. diam., working at 180 lbs. pressure, with forced draught.

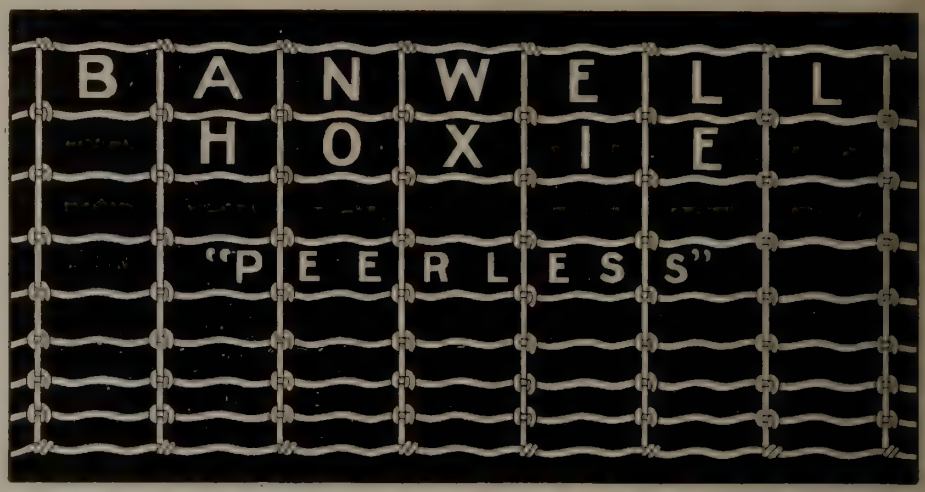
THE Manitoba and Northwestern Railway Company will apply to the Parliament of Canada, at its next session, for authority to construct a branch line from Theodore on its main line south-easterly to connect with the Russell branch in Township 20 or 21, Range 28 west of the principal meridian.

H. C. OSWALD,
Secretary.

Montreal, 8th October, 1907.

THE WASHBURN STEEL CASTINGS & COUPLER CO.

Minneapolis, Minn.



PEERLESS WOVEN WIRE FENCING

Made from uniformly heavy hard steel wire, well galvanized.
Made in large rolls ready to stretch up.
Requires but few posts; costs very little to erect.
Conforms perfectly to any surface, no matter how rough.
Reduces the cost of fence maintenance to a minimum.

BANWELL HOXIE WIRE FENCE COMPANY LIMITED
HAMILTON, ONTARIO

C.P.R. LANDS

THE CANADIAN PACIFIC RAILWAY COMPANY have 10,000,000 acres of selected lands for sale in Manitoba, Saskatchewan and Alberta.

Map No. 1—Winnipeg to Second Meridian	$ 8.00 to $15.00 per acre.
Map No. 2—South-Eastern Saskatchewan, 2nd to 3rd Meridians	10.00 to 25.00 per acre.
Map No. 3—Main Line, 3rd Meridian to Range 10 W., 4th Meridian (generally)	8.00 " "
Map No. 5—Calgary District	8.00 to 10.00 per acre.
Map No. 6—Part of Alberta—Edmonton, Battle and Saskatchewan Rivers Districts—Range 11 West, 4th Meridian to Range 7, West 5th Meridian	10.00 to 25.00 per acre.
Map No. 7—Part of Western Saskatchewan and Eastern Alberta, 3rd Meridian to Range 10 West, 4th Meridian	10.00 to 25.00 per acre.

Maps showing these lands in detail will be sent free on application.
All prices are subject to change without notice.

TERMS OF PAYMENT

An actual settler may purchase not more than 640 acres on the ten instalment plan by paying a cash instalment at time of purchase, interest at six per cent. on the unpaid purchase money at the end of the first year, and the balance of the principal, with interest, in nine equal instalments annually thereafter, as shown in the following table:

160 Acres	at	$ 8.00	per acre,	cash payment	$191.70	first year's interest	$65.28	and nine instalments of	$160.00
"	"	9.00	"	"	215.70	"	"	"	73.46	"	"	180.00
"	"	10.00	"	"	239.70	"	"	"	81.62	"	"	200.00
"	"	11.00	"	"	263.60	"	"	"	89.78	"	"	220.00
"	"	12.00	"	"	287.60	"	"	"	97.96	"	"	240.00
"	"	13.00	"	"	311.55	"	"	"	106.10	"	"	260.00
"	"	14.00	"	"	335.60	"	"	"	114.32	"	"	280.00
"	"	15.00	"	"	359.50	"	"	"	122.44	"	"	300.00

Purchasers who do not undertake to go into residence on the land are required to pay one-sixth of the purchase money down, balance in five equal annual instalments with interest at the rate of six per cent. per annum.

Interest at six per cent. will be charged on overdue instalments.

F. T. GRIFFIN, Land Commissioner, Winnipeg.

CANADA NORTH-WEST LAND CO.

This Company has 550,000 acres of selected lands in Manitoba and Assiniboia which offer excellent opportunities to settlers and investors who desire to secure good lands in well-settled districts. These lands are on sale at the Company's Office at Winnipeg, and at the various land agencies of the Canadian Pacific Railway Company.

F. T. GRIFFIN, Land Commissioner, Winnipeg.

"SPEEDICUT" HIGH SPEED STEEL, TOOL STEEL, AXE STEEL, SAW STEEL, FILES, ETC.

A large stock carried in our warehouse.

51 St. Patrick Street, MONTREAL

Province of Quebec Marine.

The Quebec Transportation and Forwarding Co.'s barge F. L. Danforth was lost in a gale recently near the mouth of the Pentecost River.

The dredge Beaujeu, built at the Government yards at Sorel, has been on trial in Lake St. Peter, and when completed will be used on the St. Thomas flats, where there is a dangerous shoal.

The Government steamship Arctic, in charge of Capt. Bernier, who undertook a voyage amongst the islands within the Arctic circle, reached Quebec, Oct. 19, after an absence of fifteen months.

The Montreal Harbor Commissioners have deposited with the Dominion Minister of Finance, debentures amounting to $125,000, to cover advances on account of expenditure on the new steel sheds erected on the harbor.

A channel has been cut through the obstruction in the Lievre River, caused by a landslide at Poupore, Que. The steamboat Agnes passed through to High Falls, Oct 6, and will continue on the route until the end of the season.

The Montreal harbor revenue from the opening of navigation to Sept. 30, of this year, amounts to $231,830, as compared with $227,913 for the corresponding period last year. The amount for Sept. was $49,079, against $47,425 for Sept., 1906.

The Montreal Transportation Co.'s barge Jet, in tow of the tug Olive, bound from Prescott to Montreal, was run down by the steamboat Norwalk, from Quebec to Detroit, Oct. 23, in Lake St. John. The barge immediately sank, the crew reaching another vessel in safety.

Col. Gourdeau, Deputy Minister of Marine, accompanied by F. W. Cowie, Engineer, returned recently from a trip of inspection of the dredging fleet working above and below Quebec. The work carried out by the dredgers Tarte and Galveston, in Lake St. Peter and on Beaujeu Bank, respectively, is satisfactory.

Hon. L. P. Brodeur, Minister of Marine, accompanied by Col. Gourdeau, Deputy Minister of Marine, F. W. Cowie, Engineer, and members of the Montreal and Quebec Harbor Commissions, and Boards of Trade, Pilotage Association, and Shipping Federation of Canada, conducted the annual official inspection of the St. Lawrence ship channel, Oct. 17, 18 and 19.

In view of the increasing size of vessels coming up the St. Lawrence, and the greater height of their masts and funnels, a question as to the height of the Quebec bridge has arisen. A letter on the subject from the chairman of the Montreal Harbor Commissioners was read at a recent meeting of the Board of Trade there, and left over for future consideration.

T. Harling, who is prominently identified with the shipping interests of Montreal and Quebec, and who was director and manager of the Quebec Transport Co., Ltd., at present in liquidation, has been appointed head of the Port of Bristol Agency for the Dominion, the object of which is to call the attention of shippers and merchants on this side to the advantages of Bristol, Eng., as a port for general trade with Canada.

The Richelieu and Ontario Navigation Co.'s steamboat Montreal, and the St. Lawrence Canadian Navigation Co.'s steamboat Colonial, collided as the latter vessel was leaving the dock at Sorel recently. The damage was slight, neither vessel having to discontinue her trip. Misunderstanding of signals was said to be the cause of the accident, and as the matter has been settled privately between the companies concerned, no official enquiry is deemed necessary.

George Hall Coal Co., of Canada, Ltd., has been incorporated under the Companies Act of the Revised Statutes of Canada, with a capital of $200,000 and offices at Montreal, to carry on the business of coal merchants, and also the business of carriers by water of passengers, goods and other freight, and to build, acquire and operate steam and other vessels in connection therewith. The provisional directors are: G. Hall, J. C. Howard, Ogdensburg, N.Y.; A. G. Yates, Rochester, N.Y.; G. G. Foster, and C. G. MacKinnon, Montreal.

A Montreal press despatch states that the Quebec Ferry Co. is about to establish a railway ferry across the St. Lawrence at Quebec, owing to the time it will be neceesary to take before the Quebec bridge can be completed. Even after the bridge is open for traffic, it is claimed that there will be a considerable car ferry business to do opposite the city. The ferry, it is stated, will be in operation in June, 1908. It will have propellers at each end, so that it may run in and out of the wharves without the necessity of turning. The terminal points have not as yet been decided upon.

An additional scheme for the development of water power by a coalition of Canadian and U.S. companies, at Mille Roches, on the River St. Lawrence, which has been placed before the International Waterways Commission, has been objected to by the Montreal Board of Trade and the Dominion Marine Association, on the ground that it would, if carried out, interfere with the navigation of the river. It is, however, claimed by the companies, that the navigation would be improved by doing away with lock 21 in the canal, thus making a saving of four hours to vessels on the round trip, and vessels being able to run at full speed up the river.

The Shipping Federation of Canada intends shortly to petition the Dominion Government to make Montreal a free port. Complaint has been made that the cost of operating a line of steamships to Montreal is increasing each year, and that something should be done promptly, or the various companies using the port may withdraw. Excessive pilotage fees, and a high rate of insurance on both hull and cargo, high harbor dues, and rentals inconsistent with the facilities offered, are amongst the points brought forward The matter is to be brought before the Minister of Marine at the earliest possible opportunity.

A continued increase is shown by the statistics for Sept. in the trade passing through the Lachine canal. The greatest increase is in grain, but there is also a general increase in all merchandise as well as in passengers and tonnage of vessels. The figures for the month's trade are as follows: Canadian vessels, 190 steam, 279 sailing; American vessels, 31 total; total registered tonnage, 98,092, against 67,956 tons for Sept., 1906. Passengers carried up, 7,313; general merchandise of all kinds, carried up, 18,655 tons; lumber, 3,395 million feet; hard coal down to harbor, 15,633 tons; hard coal unloaded in canal, 37,726 tons; soft coal up, 20,929 tons; grain, 3,442,014 bushels, against 1,576,060 for Sept., 1906. Other items also show considerable increases over the figures shown for the same period last year.

The Quebec Steamship Co.'s steamship Guiana, built by Sir J. Laing & Son, Ltd., Sunderland, Eng., for the West Indian service, is fitted with accommodation for 65 first-class passengers, berthed in a steel house on the spar deck, the accommodation for steerage passengers being at the forward end of the spar deck and also on the main deck. The saloon on the bridge deck, accommodating 70 persons, has a large entrance hall with lounges; the smoke room and music room being on the boat deck. The life-saving apparatus meets all the regulation requirements and includes six lifeboats and two cutters. There are four cargo hatches, with all the latest arrangements for the quick handling of cargo, including six winches and steam windlass. The boat is lighted throughout by electricity. The engines are triple expansion, with cylinders 26, 43 and 71 inches diam., by 45 ins. stroke, supplied by three single-ended boilers, each 11½ ft. long by 14 ft. diam., working at 180 lbs. pressure under forced draught. Her dimensions are: length, 345 ft.; breadth, 44 ft.; depth, moulded, 27½ ft., and she is capable of carrying 5,000 tons on a draught of 23 ft., at an average speed of 13 knots an hour. She is classed at Lloyds 100 A1, is provided with an English Board of Trade passenger certificate, and has been built to pass the U.S. survey.

NOTICE—The West Ontario Pacific Railway Company will apply to the Parliament of Canada, at its next session, for an Act extending the time within which it may construct the railway and branches which it has been authorized to construct, and for other purposes.

CHARLES DRINKWATER,
Secretary.

Dated 1st day of October, 1907.

NOTICE—The Campbellford, Lake Ontario and Western Railway Company will apply to the Parliament of Canada, at its next session, for an Act extending the time within which it may construct the railway which it has been authorized to construct, and for other purposes.

H. CAMPBELL OSWALD,
Secretary.

Dated 1st day of October, 1907.

NOTICE—The Lindsay, Bobcaygeon and Pontypool Railway Company will apply to the Parliament of Canada, at its next session, for an Act extending the time within which it may construct the extension of its railway branches which it has been authorized to construct, and for other purposes.

THOS. STEWART,
Secretary.

Dated 1st day of October, 1907.

NOTICE—The British Columbia Southern Railway Company will apply to the Parliament of Canada, at its next session, for an Act extending the time for the commencement and completion of the railway from Fort Steele to Golden in British Columbia which it has been duly authorized to construct, and for other purposes.

H. C. OSWALD,
Secretary.

Dated 1st day of October, 1907.

THE Esquimalt and Nanaimo Railway Company will apply to the Parliament of Canada, at its next session, for an Act extending the time within which the company may commence and complete the railway and branches, the construction of which was authorized by section 2 of chapter 92 of the Dominion Statutes of 1906, and for other purposes.

W. F. SALSBURY,
Secretary.

Dated at Vancouver, 26th September, 1907

NOTICE—The South Ontario Pacific Railway Company will apply to the Parliament of Canada, at its next session, for an Act extending the time within which it may construct the railways and bridge which it has been authorized to construct, and for other purposes.

Ontario and the Great Lakes.

H. M. Burk, who died at Bowmanville, Ont., Oct. 13, aged 85, was for many years owner and master of vessels trading on the Great Lakes.

The steamboat Edmonton, chartered by J. J. O'Connor, Port Arthur, brought the first shipment of pig iron from Port Arthur to Toronto, Oct. 9.

Supplementary letters patent have been issued authorizing the increase of the capital of the Dominion Dredging Co., Ltd., from $145,000 to $500,000.

Capt. Fitzgerald, of the steamboat Alaska, was accidentally drowned at Driftwood Cove, by the capsizing of a boat in which he was going ashore, recently.

The Midland Navigation Co.'s steamboat Midland Prince grounded near the Sault recently. She was repaired temporarily, and proceeded on her journey.

During a recent gale, the Knapp roller boat broke adrift from her moorings at the Polson Iron Works wharf, Toronto, but was captured without having caused any damage.

It is expected that the hull of the Quebec Transportation and Forwarding Co.'s steamboat Orion, recently wrecked on Calf Island, in Lake Ontario, will be converted into a barge.

The Amherstburg tug boat Christian was burned to the water's edge in the lower Detroit River, Oct. 16, the captain and crew escaping on a raft. The boat was valued at $10,000.

Tenders were received Oct. 24 and 25, for the construction of a wharf and stone approach at Colborne, Ont., and an extension to the wharf at Southampton, Ont., respectively.

The St. Paul Fire and Marine Insurance Co. has been granted a license to transact in Canada the business of fire insurance and inland marine insurance, with R. J. Dale, of Montreal, as chief agent.

The work of raising the wreck of the barge Resolute, which went down near the western entrance to Toronto harbor last year, has been commenced, and two scows and a diver are engaged thereon.

Tenders have been received and are under consideration by the Dominion Public Works Department, for the construction of a dam across the Montreal river at Latchford, in the district of Nipissing, Ont.

The sand pump in use at Hamilton, Ont., took fire Oct. 2, and considerable damage, the amount of which has not been estimated, was done. The cause of the outbreak was said to have been an overheated boiler.

Reports that the Canadian Shipbuilding Co.'s Toronto yard would be closed, pending the settlement of the machinists' and plumbers' strikes, on the completion of the G.T.R. car ferry under construction there, were denied Oct. 24.

The Carleton, the new steamboat built by the Greenock and Grangemouth Dockyard Co., on the Clyde, Scotland, for F. E. Hall & Co., Montreal, arrived in Quebec recently, and loaded her first cargo of pulpwood for Green Bay, Mich.

The Northern Navigation Co. has, according to reports, invited tenders for a passenger and freight vessel, 259 ft. long, to take the place of the Monarch which was wrecked recently. It is intended that the vessel be ready for the opening of navigation next year.

Application has been made by the Toronto General Trusts Corporation for the administration of the estate of A. Poirier, a mariner formerly employed by the Calvin Co., Garden Island, Ont., and who is presumed to be dead, not having been heard of for fifteen years.

J. Budds, lighthouse keeper, who died at Oswego, N.Y., Sept. 30, sailed in the first vessel that carried coal on Lake Ontario, in 1838. He was also present at the burning of the steamboat Robert Peel, and was one of the two members of the crew of the Antelope rescued from the wreck in 1857.

The steamship Bermuda, which grounded in Lake St. Francis and was floated again Oct. 3, in proceeding up the river, broke her rudder chain at Cat Island, near Farrans Point, and swung round with the current and again grounded. She was bound from Quebec to Wisconsin with pulpwood.

The Richelieu and Ontario Navigation Co.'s steamboat Picton, which was burned out and sank at her slip in Toronto harbor some time ago, was raised Oct. 14, but it is not known, as yet, what is to be done with her, though it is understood that the company have abandoned her to the underwriters.

The steamboat Cyprus, owned in Cleveland, Ohio, sank at Deer Park, near Whitefish, in Lake Superior, Oct. 11. The cause of the disaster was the shifting of the cargo during a storm. She carried 8,000 tons of iron ore, and of the entire crew, only one reached the shore. The number of lives lost is given as 22.

The Montreal and Great Lakes Steamship Co.'s steamboat Bickerdike, while bound from Montreal to Toronto, put into Kingston recently with a fire, due, it is stated, to spontaneous combustion, in her hold. The fire was speedily extinguished, and apart from comparatively small damage to cargo, everything was uninjured.

The U.S. steamboat Sevona, which sank two years ago on a reef near Sand Island, Apostle Islands, in Lake Superior, is to be removed as soon as the weather permits. The crest of the wreck is about 6 ft. below the surface of the water, and is considered dangerous to navigation. The place is marked by two unpainted spar buoys.

Leave to appeal to the Supreme Court of Canada has been granted the Hamilton Steamboat Co. in its case against R. O. and A. B. Mackay, Hamilton. In the lower court judgment was originally given for the plaintiff company, and in an appeal by the defendants, the judgment was reversed. It is now sought to have the original judgment restored.

Water was turned into the new channel of the St. Mary's River on the Michigan side, Oct 14. The channel is 300 ft. wide with a depth at the minimum stage of water of 22 ft. The old channel will be used solely for upbound boats, the heavily laden downbound boats using the new channel. The project has cost upwards of $3,000,000.

Dunelm, Ltd., has been incorporated under the Ontario Companies Act, with a capital of $100,000 and office at Hamilton, Ont., to carry on in all its branches the operation and business of a navigation and transportation company. The provisional directors are: R. O. Mackay, W. Southam, J. P. Steedman, T. Ramsay and G. Somerville, Hamilton, Ont.

Notice has been filed that at the next session of the Ontario Legislature, application will be made on behalf of the municipality of Collingwood, Ont., for an Act to ratify an agreement dated May 13, 1907, conveying certain land between Hurontario and Pine Streets, Collingwood, together with water frontage, to the Collingwood Shipbuilding Co., Ltd.

The steamboat Metamora struck a shoal in Shawanaga Bay recently, and subsequently took fire and was completely destroyed. She was owned by Playfair & Co., Collingwood, and was built at Cleveland, O., in 1864, her dimensions being: length, 115 ft.; breadth, 39¼ ft.; depth, 10¾ ft.; tonnage, 239 gross, 152 register; with engine 94 h.p., and screw propeller.

The schooner Ontario finding difficulty in entering the harbor at Southampton, Ont., Oct. 8, owing to the disablement of the North range light, attempted to make the Saugeen River harbor, and struck on the bar at the mouth of the river, becoming a total wreck. She was built at Goderich, Ont., in 1867, and her dimensions are: length, 105 ft.; breadth, 23 ft.; depth, 9½ ft.; 150 tons register.

The schooner Erie Stewart from Chatham to Parry Sound, while endeavoring to make the harbor at Southampton, Ont., Oct. 7, struck the north breakwater on Chantry Island, disabling the North range light, and sank, becoming a total loss. She was built at Port Dover, Ont., in 1874, and her dimensions were: length, 117½ ft.; breadth, 23½ ft.; depth, 10½ ft.; 230 tons register.

The U.S. Lake Survey reports the stages of the Great Lakes for Sept. as follows:

	Ft. above tide water in New York
Lake Superior	603.13
Lake Michigan	581.39
Lake Huron	581.39
Lake Erie	572.77
Lake Ontario	246.52

With the exception of Lake Superior, which made an unusual rise during the month, all the lakes have lowered. During October, it was stated, Lake Superior should hold its level, while the others should fall as follows: Lakes Michigan and Huron, 2¾ ins.; Erie, 3½ ins.; and Ontario, 4½ ins. Lake Ontario is 8½ ins. above the average Sept. height, 6 ins. above last year and 2½ ft. above that of Sept., 1895.

The Ontario Government has, it is stated, acquired from J. H. Walker, of Walkerville, Ont., for $10,000, his private yacht Lurline for use in the fishery protection service. The Lurline, registered number 90,780, was built at Windsor, Ont., in 1888, and is a screw steamer with engines of 100 h.p. Her dimensions are: length, 78.8 ft.; breadth, 16.3 ft.; depth, 7.8 ft.; tonnage, 66 gross, 40 net.

Hon. W. Pugsley, Minister of Public Works, received a deputation from Toronto, Oct. 11, in reference to harbor improvements there. Complete plans for the new entrance, giving safe admittance to vessels drawing 21 ft., were submitted and explained by J. G. Sing, engineer. Mr. Pugsley assured the deputation that a work so necessary as this was shown to be, would have his hearty co-operation.

The Haileybury Brick and Tile Co., Ltd., has been incorporated under the Ontario Companies Act, with a capital of $50,000 and office at Haileybury, to manufacture and sell tile, brick and clay products, etc., and in connection therewith to operate freight and other boats. The provisional directors are: A. J. Murphy, B. C. Beach, Haileybury; C. F. McArthur, D. McArthur, and E. E. Wilson, Kenmore, Ont.

The Delaplante Lumber Co., Ltd., has been incorporated under the Ontario Companies Act, with a capital of $400,000 and office at Toronto, to carry on the business of lumber manufacturers, and in connection therewith to acquire and operate boats, barges, vessels, etc. The provisional directors are: A. J. Delaplante, Buffalo, N.Y.; C. W. Wilkinson, D. McLaren, H. T. Kelly, Toronto; and L. A. Delaplante, East Toronto, Ont.

The steamboat being constructed by the Polson Iron Works, Ltd., Toronto, for Government service on the Trent Valley Canal, was launched at Peterborough, Ont., Oct. 2, and named Bessie Butler, as a compliment to the daughter of M. J. Butler, Deputy Minister of Marine. The vessel is 80 ft. long, with 17 ft. beam, and 18 ft. deep, and when completed will be capable of carrying 100 tons, with a speed of about 15 miles an hour.

A deputation of those interested in the Georgian Bay Canal project visited Duluth, Minn., recently, it is stated, for the purpose of inspecting locations for proposed dock constructions there in connection with the

canal scheme. Reports are current that a direct line of steamships is contemplated between Duluth and European ports, and that the Duluth, Rainy Lake and Winnipeg Ry. will be utilized as the outlet for the Northwest grain territory.

The breakwater at Port Stanley, Ont., which the Dominion Government is constructing in Lake Erie will, when completed, be 35 ft. wide, and extend 1,000 ft beyond the present Pere Marquette Ry.'s pier, 200 ft. in a southwesterly direction, and 800 ft. southeasterly Two cribs have been sunk in position with their surfaces 1 ft. below the level of the water. Other cribs will be placed shortly, and mariners are cautioned when approaching the harbor, on account of the obstructions.

The Montreal Transportation Co. is having built at Grangemouth, Scotland, a tug, 135 ft. long, 25 ft. broad, and with 14 ft. depth of hold. The engines will be of the triple expansion surface condensing type, with cylinders 17, 27, and 43 ins. diam. She will be equipped with electric light, steam windlass and capstan, and will be sufficiently seaworthy to go out in practically all weathers on the Great Lakes, and being supplied with salt water condensers, could, if necessary, trade below Quebec.

The Kingston Shipping Co., Ltd., has been incorporated under the Ontario Companies Act, with a capital of $100,000 and offices at Kingston, to carry on the business of forwarders, carriers, wharfingers, ship and vessel builders and owners, and also to run and own steam and other vessels, and to charter and hire such for the purposes of its business. The provisional directors are: H. A. and S. C. Calvin, Garden Island, Ont.; D. D. Calvin, H. W. Richardson, Kingston, Ont.; S. H. Dunn, J. T. Ross, W. A. Marsh, Quebec, Que.

In response to a deputation to urge the importance of pressing on with the construction of the island breakwater in Toronto harbor, the contract for which was let a considerable time ago, Hon. W. Pugsley, Minister of Public Works, stated that the contractors had already been notified to begin the work at once, but that some changes in the plans had been desired by them. A promise had, however, been given that the work would be promptly commenced, and rushed through so that any further demolition of the island beach would be prevented.

The U.S. Bureau of Census has issued a report on the traffic of the River St. Lawrence and the Great Lakes, comparing the particulars as taken at 1889, and in 1906, from which the following have been taken:

	1889	1906
No. of vessels	2,737	2,965
Gross tonnage	920,294	2,391,042
Valuation	$48,580,174	$130,722,040
Gross revenue	$35,463,852	$65,278,487
No. of passengers	2,235,993	13,761,014

In addition to these, there were 206 vessels, valued at $690,450, and 3,170 boats and gasolene launches valued at $317,060, engaged in the fishing industry in the Great Lakes.

The Merchants Steamship Co., Ltd., has been incorporated under the Ontario Companies Act, with a capital of $150,000 and office at Toronto, to build, operate, and deal in ships, vessels and boats of every nature, together with all appliances entering into the construction or equipment thereof; to transport merchandise and passengers by land and water; to build wharves, docks, machinery and other equipment, and to carry on the business of colliery proprietors, etc. The provisional directors are: A. G. Ross, J. F. H. McCarthy, B. Osler, and J. M. Ewing, of Toronto.

The work of cutting the steamboat Assiniboia in two, to allow of her passage through to the Upper Lakes, was successfully accomplished Oct. 3, having occupied only four working days. The contract stipulated that no part of the steel or woodwork of the vessel be injured in the operation, and no damage of any kind is reported to have occurred. After the correct adjustment of ballast, the parts were taken in tow by the tugs Lord Strathcona and Cruiser, and started on the trip to Buffalo, N.Y., where they will be pieced together again, under the superintendence of her designer, H. Calderwood. The Keewatin, sister ship of the Assiniboia, has been placed in the dry dock at Levis, Que., to undergo a similar operation. It is stated that the Keewatin touched bottom in coming into port, and is somewhat damaged, but the extent cannot be ascertained until after examination in the dry dock.

The steamboat Empress of Midland, specially designed and constructed for trade on the Upper Lakes by Swan, Hunter & Wigham Richardson, Wallsend-on-Tyne, Eng., arrived at Montreal after discharging cargo at Halifax en route, Oct. 2, and proceeded through to Midland, Ont., where she has joined the service of the Empress Transportation Co. of Midland. Her dimensions are: length, 260 ft.; breadth, 43 ft.; depth, 28¼ ft.; and tonnage about 3,840. She is equipped with triple expansion engines, extra large boilers, and is constructed with only one deck, but with floor beams for a second deck, so that the change can be made when desirable. There are seven cargo hatches, each 29 by 8 ft., with steam winches, etc.; she has a mean draught of 19 ft., and a coal capacity of 293 tons. In her general lay-out, the vessel is equipped with every modern convenience for the quick handling of cargo, and with ample accommodation for officers.

The Northwest Navigation Co.'s steamboat Idell is in the dry dock at Selkirk, Man., undergoing repairs.

The Dominion Fish Co.'s steamboat Premier arrived at Selkirk, Man., Oct. 9, from Snake Island, and left again for Warren's Landing. This is the last trip of the season from Norway House.

R. Hoersetgen and G. Shark, who left Edmonton, Alta., in June, in the endeavor to reach the Gulf of Mexico in a rowing boat, arrived in Winnipeg, Man., recently. They travelled down the Saskatchewan River to Lake Winnipeg, reaching Winnipeg by the Red River. The party intends to follow the Red River to its source, or as far as possible, make a portage to the head waters of the Mississippi and then descend to the Gulf. The most difficult part of the journey has, it is claimed, been completed.

B.C. and Pacific Coast Marine.

A. Munn, New Westminster, has been appointed a measuring surveyor of shipping for that port.

The C.P.R. steamboat Otter, which struck a rock in the Ladysmith harbor, was recently towed to Victoria for repairs.

London, Eng., press despatches deny the statement that the Imperial authorities intend to re-establish a naval base at Esquimalt.

It is reported that the Wallace Shipyards, Vancouver, B.C., have decided to erect shipbuilding ways having a capacity of 2,500 tons, with machine shops attached.

The Lieut.-Governor of British Columbia has by an Order-in-Council approved of the change of name of the British-American Dredging Co., Ltd., to that of the British Columbia Electric Mining Co., Ltd.

A press report states that a Norwegian company, which at present has two vessels under charter to the Mackenzie Steamship Co. engaged in the B.C.-Alaska trade, will next year establish its own fleet at Vancouver, in a similar service.

The Norwegian steamship Tellus, 2,522 tons gross, bound from Nanaimo, B.C., to Portland, Ore., with coal, went ashore on North Spit, at the entrance to Gray's Harbor, Sept. 21, and broke in two, and with her cargo became a total loss.

The steamship Newington has arrived at Vancouver from Hull, Eng. She is a small 61-ton vessel and was formerly engaged in the North Sea fishing industry. She left Hull June 23, and called at Plymouth, St. Vincent, Montevideo, Coronel, Callao, and San Francisco for coal.

The Watkins Logging and General Contract Co., Ltd., has been incorporated under the British Columbia Companies Act, with a capital of $100,000, amongst other things, to charter, build or otherwise acquire and operate steamboats and other vessels for the purposes of the company.

Press reports state that a new steamship service between Vancouver and Queen Charlotte Islands will be inaugurated shortly, in conjunction with a Japanese mining company. It is stated that the intention is to purchase three steel vessels, and that $140,000 has already been subscribed

The British Columbia Transportation and Commercial Co. has deposited with the Minister of Public Works, Ottawa, and the Registrar-General, Victoria, B.C., plans for a wharf which it is proposed to construct at Telegraph Passage, Skeena River, opposite lot 112, range 5, Coast Division, B.C.

The C.P.R. steamship Tartar collided with the C.P.R. ferry steamboat Charmer, during a fog, between Vancouver and Victoria, Oct. 17. The Charmer reached Vancouver, Oct. 18, with her bow smashed, and the Tartar, which was outward bound, had to be beached on the southern point of English Bay.

Following on the loss of their barge Richard III, which it is alleged was cut loose in Clarence Strait, when in tow between Ketchican and Niblack, Alaska, R. Dunsmuir & Sons have entered action in the U S. District Court, Seattle, Wash., to recover $12,000 damages from the owners of the steamboat Alaskan for negligence.

Alvo von Alvensleben, Ltd., has been incorporated under the British Columbia Companies Act, with a capital of $50,000, to carry on the business of broker and financial agent, and to purchase, build or otherwise acquire and operate steam or other vessels and to carry on the business of general carriers by land and water.

A proposal has been submitted to the Chief Commissioner of Lands and Works, as required under the Rivers and Streams Acts of British Columbia, by C. D. Emmons, Eugene, Ore., U.S.; V. Vigelius, Ketchikan, Alaska; and B. H. John, Victoria, B.C., to clear and remove obstructions from the Yakoun River, Queen Charlotte Island, and the mouth of the same river.

The B.C. Boat and Engine Co., Ltd., has been incorporated at Victoria, under the British Columbia Companies Act, with a capital of $10,000, to purchase, charter, build or otherwise acquire, steamers, tug boats, launches, lighters, barges, and other vessels, or any share or shares therein, to manage, sell or hire any vessel of the company, and to acquire—warehouses, wharves and other buildings necessary for the objects of the company.

W. J. Stewart, hydrographic surveyor of the Dominion Department of Marine, has returned to Ottawa, after an inspection of the Prince Rupert harbor, at the G.T. Pacific Ry., western terminus. He states that the largest steamships at present in use could pass right into the harbor without difficulty or danger even at night. The Government has spent about $100,000 in surveying the harbor, building a lighthouse and placing buoys.

The Canadian-Mexican Development Co., Ltd., has been incorporated under the Revised Statutes of Canada, with a capital of $1 000,000, and offices at Victoria, B.C., amongst other things to construct, operate, hire and dispose of all kinds of steam and sailing vessels, boats, barges, etc., also wharves, docks and elevators, and generally to carry on the business of an elevator, navigation and transport company; to construct and operate tramways, telegraph and telephone lines for the purposes of the company. The provisional directors are: J. S. Lovell, W. Bain, R. Gowans, E. W. McNeill, H. Chambers, J. S. Bisgrove, R. M. Coates, Toronto.

A company has been registered at Victoria, under the British Columbia Companies Act, with the name of the Adams River Improvement Co., Ltd., with a capital of $50,000. The objects of the company are, to improve the navigation of the Upper Adams River from its source to the head of Adams Lake, and to improve the navigation of the Lower Adams River from the foot of Adams Lake to Shuswap Lake, by blasting and removing all natural obstructions, and to build dams, chutes and other works for driving and sorting logs and timber; to avail itself of all rights and immunities conferred by the Rivers and Streams Act, relating to the improvement of lakes and rivers, and to collect tolls, from such persons using the works of the company.

The Western Transport Co., Ltd., has been incorporated at Victoria under the British Columbia Companies Act, with a capital of $10,000, to purchase or otherwise acquire the steamship Alert and the barge Rainbow, and to employ same in the conveyance of passengers and merchandise; to purchase, hire or build other vessels, to carry on the business of carriers by water, shipowners, etc. The Alert, register number 94,807, was built at Victoria in 1889; dimensions: length, 62 ft.; breadth, 15.4 ft.; depth, 6.5 ft.; tonnage, 44 gross, 26 registered, and has an engine of 80 h.p. The barge Rainbow, register number 116,936, was built in Victoria 1905, dimensions: length, 70 ft.; breadth, 26.3 ft.; depth, 3.4 ft.; tonnage 54 registered. Both vessels are entered in the names of C. G. Stromgren, Nanaimo, and A. A. Sears, Victoria, as joint owners.

The following companies have been licensed under the British Columbia Companies Act regarding extra-provincial companies, to carry on their businesses within the Province of British Columbia, included in which are, powers to construct and operate canals, waterways, railways, and telegraph and telephone lines: T. J. How Land Co., Ltd.,

The Dominion Marine Department has published in book form a report on the currents in the straits of Belle Isle from investigations of the Tidal and Current Survey in 1894 and 1906 by W. Bell Dawson, Engineer in charge.

At the second annual convention of the Lakes to the Gulf Waterways Association, at Memphis, Tenn., Oct. 5, a resolution was adopted calling upon Congress to authorize work to be commenced for a 14 ft. channel from the Great Lakes to the Gulf of Mexico.

A reprint from the Royal Astronomical Society's Journal, on the variation in the leading features of the tide in different regions, by Dr. W. Bell Dawson, has been published in pamphlet form; it contains considerable information of use to navigators of both oceans.

Tenders were received Oct. 14 by the P.E.I. Public Works Dept., for the running of a steamship of 200 tons register, capable of carrying 250 passengers, and of maintaining a speed of not less than 12 knots an hour, from Charlottetown to Crapaud, twice a week; to Orwell, to East River, and to West River, once a week, for a period of five or ten years from the opening of navigation 1908.

No. 41. Oct. 12—1852. St. Mary's river, Little Mud lake, buoy moved. 1853. Detroit river, Windmill point range light station, change in lights.

The Cassandra-John Lambert Enquiry.

A formal investigation was held at Montreal September 12, before Commander O. G. V. Spain, Dominion Wreck Commissioner, assisted by Capt. J. Riley, assessor, into a complaint made by Capt. J. Mitchell, of the Donaldson Line S.S. Cassandra, against the captain of the S.S. John Lambert, of Duluth, U.S., for having nearly caused a collision, by improper navigation of the said steamship John Lambert, in the harbor of Montreal. The following judgment was delivered:

It appears from the evidence adduced that the steamship John Lambert was berthed on the up-stream side of the Alexandra pier, Montreal, at 11.20 p.m., May 23; at about 7.00 in the morning of May 24, she left this berth, in order to go into the basin, inside of the Victoria pier, where, according to the evidence, she was to unload into the S.S. Nordstjernen; the John Lambert was moored at the Alexandra pier, with her bow towards the city, and the captain, in his evidence, says that, as she was being swung round in the basin, above the said pier, in order to enable him to head down-stream, the Cassandra was noticed coming out of Windmill Point basin, manœuvring, in order to turn, and go downstream also. It is very clear, from the evidence, that both ships were, therefore, proceeding down the river, the John Lambert being some short distance ahead of the Cassandra, and on her port bow, the vessels proceeding at a moderate rate of speed. The master of the Cassandra gave one short blast with his whistle, and ported his helm, in order to enable him to take up his proper position, on the starboard side of the channel. The evidence of the crew

Gen. Man. Western Canada, Toronto.

of the John Lambert, at this point; was, that they had not heard this first blast, given by the Cassandra; however, whether this signal from the Cassandra was heard or not by the John Lambert, the master of the latter vessel gave two short blasts with his whistle, signifying to the vessel astern according to Article 28 of the Act respecting the navigation of Canadian waters, that he was directing his course to port, but, instead of carrying out the manœuvre, as indicated by his signal, he did exactly the opposite, that is to say, he ported his helm, going to starboard, and running directly across the bows of the Cassandra. The evidence, at this point, in regard to the distance the two vessels were apart, is very conflicting, the evidence of three of the witnesses for the John Lambert contradicting the evidence of seven of the witnesses for the Cassandra, the John Lambert's witnesses saying that the vessels were so far apart that, at no time, was there danger of collision. The court, however, attaches great importance to a disinterested witness, that is to say, the master of the tug Lucia, who says that he was ahead of the Cassandra, and connected with her by one hundred and fifty feet of a tow line, and that he had to let go his tow line, as otherwise, if he had not done so, the Lucia would have struck the John Lambert.

The master of the Cassandra immediately took prompt action to avert what he considered would be a collision with the John Lambert. He reversed his engines, let go both anchors, and sounded three blasts of his whistle, to signify that he was going full speed astern. The court considers that, by this action, a collision was averted, and the John Lambert passed safely across the Cassandra's bows, proceeding up-stream, and into her berth.

The master of the Cassandra had no intimation of the intention of the John Lambert to deviate from the course he was pursuing down stream, and, when he was misled by the signal of this vessel, a collision was imminent, and he took every means to prevent it.

The master of the John Lambert does not offer any valid reason for his serious and dangerous breach of the rules of navigation, and his excuse, that he thought the rules of navigation on the Great Lakes applied to the harbor of Montreal, does not exonerate him in any way, as the rules of the road for the Great Lakes, sec. b, art. 28, distinctly state that two short blasts mean "I am directing my course to port."

The court is, therefore, of the opinion that the master of the John Lambert was in grievous fault, and that a serious disaster might have occurred, owing to his action, and would have occurred, if it had not been for the prompt means which the master of the Cassandra took to avert it.

The court desires to bring to the notice of the authorities that D. T. Sullivan, of Duluth, Minn., master of the steamship John Lambert, holds a U.S. license as master of steam vessels for the Great Lakes, and tributaries, and as first-class pilot, between Chicago and Duluth, which bears an endorsement, extending the license to the St. Lawrence river as far east as Ogdensburg; therefore, this vessel, not having a branch pilot on board, was absolutely without an officer of any sort whose certificate or license would entitle her to navigate the waters where the casualty nearly occurred, the mate's license reading only as far east as Ogdensburg also. This, the court considers a very serious matter, and it is not an isolated instance, as in most cases which have been brought to the attention of the court, U.S. vessels of this description, navigating Canadian waters east of Ogdensburg, are in the same category.

In addition to the above, the court is of the opinion that the John Lambert was liable for compulsory payment of pilotage, and in moving without a pilot, contravened one of the Harbor Commissioners' by-laws, which makes it compulsory on all vessels to pay dues, for the services of a branch pilot, when moving into, or out of, the harbor of Montreal.

The master of the John Lambert, holding a U.S. license, is outside the jurisdiction of this court, even if his license were good east of Ogdensburg; and the court suggests, in this case, that some action should be instituted against the master of the John Lambert, under sec. 924, chap. 113, of an Act intituled "An Act respecting shipping in Canada."

Among the Express Companies.

A. Sharpe, heretofore in the money department, Dominion Ex. Co., has been transferred to the customs department in place of J B. Sutherland.

D. Stephens has been appointed day depot agent for the Dominion Ex. Co., at London, Ont., and is succeeded as night depot agent by John Patterson.

J. B. Sutherland, heretofore customs clerk Dominion Ex. Co., Toronto, has been appointed agent of the foreign department for Ontario, a new position just established.

The Canadian Ex. Co. as one of the departments of its business undertakes the carrying of thoroughbred horses from place to place for show purposes or race meetings. For this work the G.T.R. has just completed the construction of 10 new horse cars. They are each 60 ft. in length, equipped with patent buffers, high speed air brakes, steam heating apparatus, and are mounted on regulation passenger trucks. Sixteen horses can be carried on each car, together with the necessary fodder, and the attendants with their baggage.

An action by the Dominion Ex. Co. against the Town of Niagara was tried at Toronto, Sept. 25, and judgment entered for the plaintiffs, with costs. The action was for a declaration that the business assessments attempted to be made against the plaintiffs for the years 1905 and 1906 are void and illegal, and for an injunction restraining defendants from levying or otherwise seeking to collect taxes claimed by them in respect of such business assessments. An agreement was on foot before 1905 between plaintiffs and the Niagara Navigation Co. whereby the agent of the latter at Niagara acted during the navigation season as the agent of the plaintiffs, each paying one-half of his salary from May to November. During the remaining months of the year he was paid by the Navigation Co., and his clerk was paid in the same proportion, except that he was not in the employ of the Navigation Co. when the boats were not running. Goods to be carried by express were received at Niagara by the agent acting for plaintiffs, who used part of the office of the Navigation Co. The great bulk of the goods consisted of fresh fruit in transit from Niagara to Toronto. Under 4 Ed. VII, ch. 23, sec. 10, an express company carrying on business in connection with steamboats and occupying or using land may be assessed for a sum to be called "Business Assessment" where "such land is occupied or used mainly for the purpose of its business." The plaintiffs were assessed under this head at $1,800 for 1905 and 1906. Judge Maybee held that it is clear from the evidence, the use of the wharf and premises of the Niagara Navigation Co. at Niagara during the season is mainly for the purpose of the business of the Navigation Co. and not for the business of the plaintiffs

Telegraph and Cable Matters.

A. P. Darrell, of the Bermuda Cable office, Halifax, N.S., has been transferred to the company's office at Kingston, Jamaica.

Considerable damage was done to telegraph and telephone wires throughout Nova Scotia Oct. 8, by a storm which broke over the province.

The steamship Chippewa on the route between Victoria, B.C., and Seattle, Wash., is to be equipped with apparatus for wireless telegraphy.

Application is being made to the Governor-in-Council, Nfld., for letters patent for improvements in transmitters for wireless telegraphy, by Guglielmo Marconi.

It is reported that the Dominion Government will probably erect a wireless telegraph station at Port Essington, B.C., as a part of its system along the Skeena River.

A committee of the C.N.R. telegraph operators has been formed to lay the question of an increase in wages before C.W. Spencer, General Manager of the company's Eastern Lines.

At recent meetings of the G.T.R. telegraphers, a memorial was prepared asking for an increase of 20% in wages, and the abolition of the present system of deducting amounts from pay for the superannuation fund.

A press dispatch from London, Eng., dated Oct. 24, states that the Marconi Wireless Telegraph Co. is considering the question of erecting its own land lines in Canada to avoid the delay at present existing in the transmission of messages.

The Dominion Government cable steamer Tyrian has raised the 3¼ miles of cable connection with Anticosti Island. The stations on the island will connect with the mainland by the Marconi wireless telegraph station. The cable raised is being sent to Victoria, B.C., for use there.

A special telegraph line has been completed recently, and is now in operation, between Montreal and New York, to facilitate the transmission of messages between Canada and Havana by the submarine cable between New York and Havana, which was opened for business Oct. 15.

The Yale-Kootenay Telegraph Co., which is the title under which the Spokane Falls and Northern Ry. System, a subsidiary of the Great Northern Ry., U.S., carries on business in British Columbia, has re-elected its retiring directors. W. H. Fortier, secretary and auditor of the S.F. and N. Ry., is secretary of the telegraph company.

The C.P.R. Telegraph Department has opened offices at Colley, Hardesty, Killam, Pincher Creek and Sedgewick, Alta.; Nicola, B.C.; Bradwardine, Ebor, Man.; Auburn, Bala, Beaucage, Blyth, Coldwater, Credit Forks, Canickle, Eady, Glencoe, Hobart, James Bay Jct., McGaw, Midhurst, Walton, Weissenburg, West Moncton, Ont.; Conception, Shawinigan Falls, Que.

The telegraph operators employed on the G.T.R. and the C.N.R., it is stated, recently prepared a statement of their claims for increased pay, etc., on the basis granted to the C.P.R. telegraphers, and laid it before their respective employers for consideration. W. G. Brownlee for the G.T.R. has declined the request for advance. The C.N.R. operators who had stated they would resign have withdrawn the threat.

At the recent annual general meeting of the Great North-Western Telegraph Co., the following officers and directors were re-elected for the current year: President, H. P. Dwight; Vice-President, A. Brown; Vice-President and General Manager, I. McMichael; Directors, J. Hedley, W. C. Mathews, H. N. Baird, Hon. J. K. Kerr, Toronto; Col. R. C. Clowry, J. B. Van Every, New York; Sec.-Treasurer, G. D. Perry; Auditor, A. C. McConnell.

Notice was served on the Dominion Deforest Wireless Telegraph Co. that a wind-

WATERLOO - - ONTARIO

ing-up order would be asked for in the Superior Court, by F. W. Humphrey, formerly president of the company, who secured judgment against it some time ago for $35,513. A meeting of shareholders has been called to consider the financial position. An order for the winding up of the company was made Oct. 25. The company was incorporated Feb. 28, 1905, with a capital of $1,200,000, with headquarters at Montreal. A station was erected some months ago at Toronto Junction, but was subsequently closed.

F. G. Cross, connected with the Marconi Wireless Telegraph Co., was a passenger on the S.S. Moana, sailing from Vancouver, B.C., Oct. 16. It is said that he is on his way to the Fiji Islands to erect a wireless telegraph station there to form a link in a girdle round the world. The route from Great Britain is mapped out as follows: from the present station at Clifden, Ireland, to Glace Bay, N.S.; thence across Canada to Fanning Islands, Fiji and Australia, on to British Borneo, Hong Kong, Ceylon, South Africa, and to Great Britain again via St. Helena, or Aden, Cyprus, Malta and Gibraltar.

We are advised that the rates for Marconi wireless messages between ships and shore stations, from Oct. 1, are as follows: Quebec, Grosse Isle and Father Point, 50c. for 10 words, and 3c. each additional word; Clarke City, Fame Point, Heath Point, Whittle Rocks, Point Rich, Point Amour, Belle Isle, Cape Ray and North Sydney, $1.00 and 6c.; and Cape Race, $3.00 and 18c.; Sable Island and Cape Sable, $4.00 and 24c.; and Halifax and St. John, $2.00 and 12c. It has been stated that the rates to Clifden, Ireland, are 10c. a word, with 5c. a word for press messages, land charges at either end being additional.

The Board of Conciliation recently appointed to investigate the differences between the C.P.R. telegraph operators and their employers has issued its award, and in conjunction with the officials of both sides has reached an agreement which is mutually satisfactory. An advance of wages is conceded the operators of 14%, together with overtime allowance for Sunday work, and they are also granted holidays without stoppage of pay. The hours of labor are not reduced, but compensation for that is to be made in salary. The board suggests that operators be not compelled to instruct students in telegraphy, and that provision be made for their protection during inclement weather when accidents have occurred. The agreement is signed by the members of the Board of Conciliation, by D. McNicoll, Vice-President and General Manager C.P.R., and D. Campbell and E. Goulet, Executive officers of the Order of Railway Telegraphers.

Notices were recently issued advising an increase in rates to be charged for press messages over the C.P.R. telegraph lines in Manitoba, Alberta, Saskatchewan, and British Columbia. Press reports stated that in an interview on the subject, Sir Thos. G. Shaughnessy, President C.P.R., had said that he was entirely ignorant of such a notice. A meeting of owners and editors of daily papers in the four provinces was held at Regina, Sask., Oct. 10, and a telegram dispatched to the Dominion Premier, bringing the matter to his notice and requesting a remedy. The Premier wired in response that he had communicated with the head officials of the C.P.R., who assured him that they had no previous knowledge of the affair, but would take immediate steps to adjust any differences which may have arisen between the press and the telegraph department. On Oct. 11 the C.P.R. telegraph department notified the newspapers affected that all the conditions which governed the transmission of messages prior to Aug. 1, would take effect at once.

The Marconi Wireless Telegraph.

The station erected at Port Morien, Glace Bay, N.S., by the Marconi Wireless Telegraph Co., for the purpose of transmitting and receiving wireless messages across the Atlantic, in conjunction with a similar station at Clifden, Ireland, was opened Oct. 17, and the system inaugurated as a commercial practicability. There was no formal opening, and although a number of press representatives were at the station, neither the interior arrangements nor the methods of transmitting and receiving were open to their inspection. Messages from Earl Grey and Sir Wilfrid Laurier were despatched in the course of the day to the King, to which His Majesty responded on the following day. A message was also received in Toronto from Lord Strathcona, which is said to be the first paid message by this system. Marconi's first experiments in wireless telegraphy took place on his father's estate in Bologna, where he succeeded in transmitting electrical waves a distance of two miles. In 1895 he went to England, where he interested Sir W. H. Preece, Government Telegraph Engineer, in his proposals, aad subsequently demonstrated the utility of his system by sending messages across the Bristol Channel between Penarth and Weston-super-Mare. This was followed up by communications across the English Channel with France; between a point in Dorsetshire and a station erected at Poldhu, Cornwall, a distance of 152 miles, 109 being over sea and 43 over land; and between the station at Poldhu and St. Catharines, Isle of Wight, a distance of 183 miles. The success attending these experiments encouraged him to attempt the transmission of messages across the Atlantic, and more powerful machinery than had hitherto been used was installed at Poldhu. In 1901 a temporary receiving station, consisting of a vertical wire 400 ft. long suspended from a kite, and connected with a detector, was arranged at Signal Hill, near St. John's, Nfld. The distance between the two stations was about 2,200 miles. The signal, previously arranged, was transmitted from Poldhu and received at regular intervals, but no regular message passed at the time. In 1902, further experiments were made between Poldhu and the S.S. Philadelphia, equipped for the purpose, en route to New York, and reports in connection with this show that readable messages were received at a distance of 1,551 miles from Poldhu, and indications were received as far as 2,099 miles distant. Later, in 1902, at the invitation of the Italian Government, Marconi conducted experiments from the warship Carlo Alberto, and messages were transmitted overland to near Kronstadt, Russia, 1,400 miles; at Gibraltar, across Spain, about 1,000 miles, and across France, also about 1,000 miles, over the Alps. The vessel was placed at Marconi's service by the Italian Government, to assist him to establish a similar communication between England and Canada. On Oct. 20, 1902, Marconi sailed from England for Sydney, N.S., and maintained communication with the Poldhu station during the whole voyage, a distance of 2,500 miles. After some work had been done at Glace Bay, several messages of congratulation passed between the Kings of England and Italy, and Marconi. Another station was later erected at South Wellsfleet, Mass., and in Jan., 1903, messages were exchanged between King Edward and President Roosevelt. Having demonstrated beyond question the utility of the system, and the commercial advantages to be gained from its use, Marconi devoted himself to the work of perfecting the apparatus, and of overcoming several difficulties which had shown themselves during the lengthy series of experiments he had conducted. During the five years which have intervened, much work has been done in regard to the trans-Atlantic system, of which the public knows nothing, but the company's energy has not been confined to that alone. Many vessels and shore stations have been equipped in Canada, on both coasts, and a contract has been made between the company and the Government regarding the erection and equipment of stations in the Dominion, about which there is a dispute at the present time.

The station at Port Morien, consists of four wooden towers, each 250 ft. high, surmounted by a mast 35 ft. high, making a total height of 285 ft. At regular distances there is a series of 24 masts (eight of which only are used) each 180 ft. high, for the purpose of holding up the aerials, comprising 51 wires. The condensing houses, consisting of two buildings 200 ft. by 60 ft. by 33 ft. high, erected in the form of a T, are placed in the center of the four towers, and there the wires from the towers converge. The power houses and workshops are situated near by, and a considerable staff is engaged in the manufacture of the apparatus.

The apparatus consists of an oscillator and a vertical wire for transmitting, and a magnetic detector, relay, tapper and vertical wire for receiving. The oscillator, in addition to the ordinary induction coil, consists of two metal balls, about one inch diameter. These balls and the spark-gap are immersed in oil to secure a sharper break and a more efficient spark. The actual transmission of the messages is effected by a key similar to, but larger than, the one employed in ordinary telegraphy. This is rendered necessary by the heavy currents and high pressure used in the oscillator circuits. The key has front and back contacts insulated from each other, the front contacts are shunted by the condenser, and the lower contact is in an earthed metal cup, by which device high potential charges are diverted from the key. When the key is closed the vibrator is put into operation, with the result that oscillations are set up in the aerial wire circuit and electric waves are emitted. The opening of the key causes a cessation of the oscillations, and in this manner the duration of the waves or oscillations is regulated so as to correspond to the dots and dashes of the Morse code. The sensitive relay is in a local shunt circuit with the detector and one cell of the battery. The armature lever of the relay controls the local circuit of the tapper, and also of the ink recorder. While oscillations are being received, the tapper keeps up a hum, which stops when the oscillations cease, and the Morse inker is actuated, and the dot and dash impressed on the paper strip, which is started and stopped automatically by the device customarily used in the ordinary telegraph instrument. The general means by which long distance communication has been accomplished are, increased electrical energy at the transmitting end, and more sensitive apparatus at the receiving end, together with high towers, or masts, and a multiplicity of aerial wires. Details of the power used and of other matters at the station, are not obtainable, but the machinery used must be much more powerful than that employed at the earlier stations. At Poldhu, a 20-kilowatt generator, developing 200 volts, was used. This voltage was raised by step-up transformers to about 100,000 volts on the aerial wires. It is understood that the Continental Morse (officially termed the Universal) code will be used. A difficulty has been experienced in receiving and transmitting at the same time, but it is promised that this will be overcome shortly.

General Telephone Matters.

A telephone company is being organized at Creston, B.C.

The Saskatchewan Telephone Co. has installed a telephone exchange in Rouleau, Sask.

The construction of a telephone line between Toledo and Smith's Falls, Ont., is in progress.

The Innerkip Rural Telephone Association has installed eleven telephones at Bright, Ont.

The Bell Telephone Co. has extended its long distance connections from Glencoe to Kilmartin, Ont.

The Nova Scotia Telephone Co. has extended its line from Lakeville to Somerset, via Grafton, N.S.

It has been suggested that the T. & N.O. Ry. should purchase the Temiskaming Telephone Co.'s property.

A movement is on foot at Sheho, Sask., to inaugurate a telephone system to connect with Yorkton and Theodore.

It is reported that a large factory is to be erected shortly in Toronto for the manufacture of telephone supplies.

It is reported that the Alberta South-Eastern Telephone Co. contemplates an extension of its line to Havre, Mont.

A new telephone system on the automatic principle is expected to be in operation at Lindsay, Ont., early next year.

The Prairie Farmers Telephone Co., Ltd., has been registered under the Northwest Territories Ordinance, with offices at Claresholm, Alta.

The ratepayers of St. Felicien, Que., have decided to take a vote on a by-law relating to the establishment of a municipal telephone system.

The Farmers' Mutual Telephone Co. No. 1, Ltd., has been incorporated under the Northwest Territories Ordinance, with offices at Milestone, Sask.

The Mott-Boulton Lumber Co., Ltd., Vancouver, has been incorporated for the purpose of preparing and dealing in telegraph and telephone poles, etc.

The Victoria Telephone Co. is being formed at Burnt River, Ont., for the purpose of constructing a telephone line between Burnt River and Fenelon Falls.

An estimate to the Victoria, B.C., City Council has placed the cost of putting the electric light and telephone wires underground approximately at $17,000 a mile.

The Bell Memorial Fund is approaching $40,000. Amongst recent contributors are the City of Toronto, $500; and the Canadian Machine Telephone Co., Ltd., Toronto, $100.

The Bell Telephone Co. has practically completed the installation of new switchboards of the common battery type at its exchanges in Regina, Sask., and Calgary, Alta.

The Winnipeg Board of Control instructed a sub-committee, at a meeting held Oct. 8, to prepare an agreement to cover the erection and use of poles for the Government telephone system.

A co-operative rural telephone system has been established at Merivale, Ont., supplying about a dozen farmers, each paying $20 a year. Connection is given with the Bell Co. at Ottawa.

The Northwestern Telephone Co., formerly the Saskatchewan Telephone and Electric Supply Co., Ltd., is making preparations for an extended service throughout the province.

A resolution was passed recently by the Nelson, B.C., Board of Trade, requesting the municipal authorities in the vicinity to construct a series of long distance telephone lines.

By the end of the year, it is estimated that the Alberta Government will have erected about 500 miles of lines, and installed about fifteen exchanges in connection with its telephone system.

In regard to the proposed telephone system to be put in at Acton, Ont., connections will probably be made with Limehouse, Silver Creek, Ballinaford, Ospringe, Crewson's Corners, Knatchbull, and Speyside.

R. de la Sablienne and H. Moreau, of Paris, France, visited Peterborough, Ont., recently, for the purpose of inspecting the automatic telephone system installed there, with a view to the adoption of the system in France.

It is stated that the policy hitherto pursued by the Bell Telephone Co., in declining to place its instruments on the open market, is to be changed, and that in the future the company will be prepared to sell to any buyers.

A company has been organized under the name of the Dominion Telephone Mfg. Co., Ltd., with a capital of $250,000, for the purpose of manufacturing telephone instruments and accessories, for the use of independent companies.

The work of installing the new automatic telephone system at Brantford, Ont., is being proceeded with. The conduits are being laid, and poles erected, and the fireproof exchange building, 72 ft. by 35 ft., two storeys high, has been commenced.

The Chilliwack Telephone Co. has been granted a franchise by the town of Chilliwack, B.C., to erect poles along its highways. The company expect to instal about 300 instruments, at $1 and $2 a month, for residences and businesses respectively.

Press reports state that several of the independent telephone systems in operation in Ontario have been looked over on behalf of the Independent Telephone Co. of the U.S., with a view to purchase, and that negotiations are in progress and will shortly be concluded.

The enquiry, conducted by F. Dagger, the telephone expert engaged by the Saskatchewan Government to investigate and report as to the desirability of establishing a Government telephone system, has been completed, and his report will be presented in due course.

Hon. W. H. Cushing, Minister of Public Works for Alberta, who was in Toronto recently, also visited Peterborough, Ont., for the purpose of inspecting the working of the machine telephone system installed there, with a possible view to its adoption by his Government

The council of the Montreal Board of Trade has passed a resolution favoring the placing of all electric wires in the city in conduits, and asking the city council to take such action as would compel proprietors on those streets already provided with conduits to make the necessary connections.

The C.P.R. has equipped its telegraph wires between Regina and Moose Jaw, Sask., and Macleod and Calgary, Alta., to enable them to be used for telephonic communication. It is also putting in a telephone line on the track between Fort William, Ont., Brandon and Winnipeg, Man.

The telephone line between Leduc and Edmonton has been taken over by the Alberta Government, and will be thoroughly overhauled. The prices for telephones for business purposes will be $24, and for private residences $15, and it is expected that these will be reduced as soon as the revenue permits.

By supplementary letters patent, the capital of La Compagnie Co-operative Telephonique du Comte Lac Saint Jean et Chicoutimi (Quebec) has been increased to $100,000, and additional powers have been granted to the company as regards the supply of electricity, etc., in the counties of Chicoutimi, Lake St. John and Saguenay.

The Nova Scotia Telephone Co. has completed the purchase of the stock of the Central Telephone Co., which built and operated the line between Bridgewater and Middleton. The plant consisted of 70 miles of poles and 90 miles of wires. It is understood that the line will be thoroughly overhauled, new poles being put in, and a metal circuit adopted.

Officers have been elected for the recently incorporated Princeton and Drumbo Rural Telephone Co., as follows: President, F. J. Daniel; Vice-President, T. Convay; Secretary, G. S. Smyth; Treasurer, W. H. Wells. The company proposes to instal instruments in the villages of Princeton, Drumbo, Eastwood and Gobles, with possible extensions southerly to Cathcart, and easterly to Paris.

C. F. Sise, Jr., recently stated that owing to the exceptionally favorable weather, the Bell Telephone Co. had got through its outside construction for the year more speedily than usual, which accounted for the reduction of the construction staff. This reduction gave rise to press reports that the company had entered on a policy of retrenchment in Ontario and Western Canada.

The Bell Telephone Co. has arranged to instal a large switchboard for the C.P.R. at Winnipeg, Man., to take the place of the one now in use at the Royal Alexandra, which will in future be used only for hotel connections. It is stated that the new switchboard will be located behind the telegraph office at the station, and will require seven operators. All the offices and departments connected with the system will have direct connection.

The Dunnville Telephone Co. is reported to have purchased the business and outside plant, except what is required for long distance lines, of the Bell Telephone Co. in Caistor, Gainsborough, a portion of Wainfleet, a township in Brant county, and the whole county of Haldimand, Ont. There will be no change in the rates, but subscribers will have the advantage of the long distance connections with the Bell Co., who will construct a new long distance line to Dunnville.

An agreement between East Toronto Council and the Independent Telephone Co. was discussed at the Council meeting, Oct. 28. The company is to provide five free telephones with unlimited service, and free interchange of service between the companies operating in East Toronto and Scarborough, for a 25 years' franchise. The charge for instruments is to be $24 and $18 with unlimited service, for business and private use, respectively, and where there are party lines, $21 and $15 respectively. As a penalty in case of unsatisfactory service, the agreement provides that the charges by the company be reduced to $18 and $12, respectively.

The British Columbia Car Service Bureau has been changed to the Canadian Car Service Bureau, B.C. Lines. E. J. Travers, Nelson, B.C., is Manager. He is also Manager of the B.C. Lines Freight Inspection Bureau of the Canadian Freight Association. H. R. Patriarche, Manager of the Canadian Car Service Bureau, Western Lines, formerly had jurisdiction over freight inspection in British Columbia, but this has been transferred to Mr. Travers.

Westinghouse

"ET" Engine and Tender Brake Equipment

The "ET" equipment gives **two separate and distinct means** of applying locomotive brakes, one automatic, the other independent straight-air, both always **available for instant use.** The engineer has absolute control of the train, with a braking power **always the same for any given brake-pipe reduction,** regardless of conditions that would ordinarily make it vary on each engine, such as brake-cylinder leakage, unequal piston travel, etc.
The brakes may be graduated on and off either by the automatic or the independent straight-air system, and **applied or released in conjunction with or independently of the train brakes,** insuring manifest important advantages in traffic operation, not heretofore obtained. Its simplicity makes it easier to install, handle and maintain than any other type of locomotive brake.

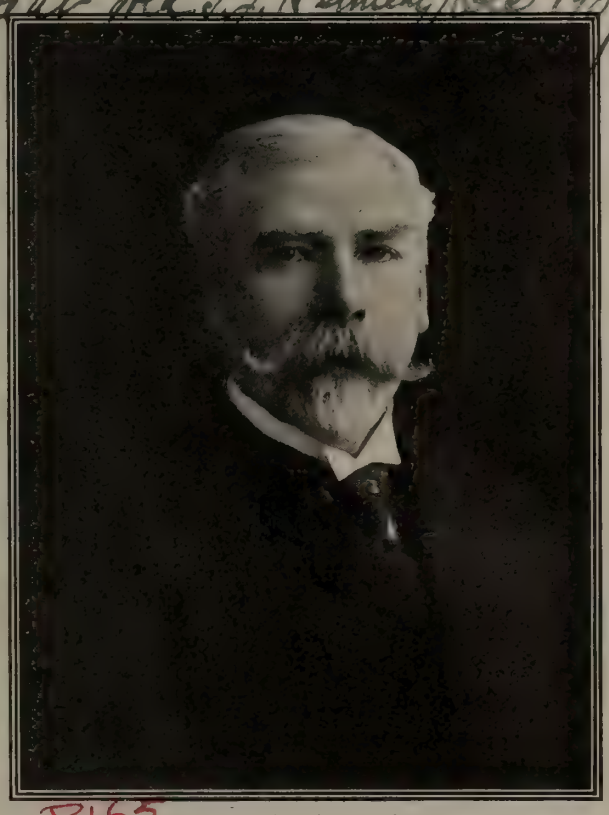
G.T.R. Semi-Annual Meeting.

The President, Sir C. Rivers Wilson, at the half-yearly meeting of shareholders in London, Eng., Oct. 10, gave a general summary and analysis of the accounts and statistical tables published in our last issue. He said: We have again a considerable increase of gross revenue, accompanied, unfortunately, by a considerable accretion of expenses, but also accompanied by a record of large improvements in the general condition of your road. The gross receipts during the past half-year were £3,381,259, compared with £3,021,681 in the corresponding period of 1906. Of this increase £59,388 was derived from passenger traffic, £8,247 from mails and express traffic, and £291,948 from freight and live-stock traffic, but there was a trifling decrease in the miscellaneous receipts. The number of passengers carried was 4,936,016, compared with 4,616,957 in 1906, accompanied by a slight increase in the average fare received per passenger. The tons of freight and live-stock moved were 8,510,574, compared with 7,598,784, and the average rate received increased from 62.54d. per ton in 1906 to 64.07d. per ton in 1907. In connection with the movement of freight traffic, it is interesting to note the effect of the increased capacity of the freight cars during the last few years. I find on making a comparison with the June half-year of 1903, that although the ton mileage has increased by 200 millions, or more than 14%, the freight car mileage has decreased by five million miles, or 3½%, or going back a further five years to 1898, when we were beginning to improve the equipment the ton mileage shows an increase of 72%, whilst the car mileage only increased by 12%. The freight and mixed train mileage—the mixed being principally freight—showed a decrease of 3% compared with 1903, and notwithstanding the enormous increase of ton mileage compared with 1898, the train mileage only increased by a little over 4%. The average train load has increased compared with 1903 by 17%, and compared with 1898, by over 60%. It is only by improving the facilities for moving the traffic that we have been able to meet the constantly increasing expenditure of all kinds, and it is only by continuing the process that we can hope for continued improvement.

The working expenses were £2,486,544, or 73.54% of the gross receipts, compared with £2,184,821, or 72.31%, an increase of 1.23% in proportion to the gross receipts. The expenditure on the maintenance of way and structures is exactly the same as for the corresponding half-year, although there are slight variations in the different items of the account. The cost of the maintenance of equipment was £653,285, compared with £564,738, an increase of £88,547, of which £19,557 was in respect of locomotives, and £68,990 in respect of cars. The necessity of proceeding as rapidly as possible with the replacement of the older engines and cars by modern engines and cars of increased capacity, is the cause of, and fully justifies, this increase. Considerable progress has been made in this direction, 48 new engines have been put into service during the half-year, and as 75 engines were put into service during the previous half-year, out of our official stock of 803 locomotives, 123 are practically new, and, of course, of far greater hauling capacity than those which they replaced.



P165

T. J. KENNEDY, C.E.
General Superintendent Algoma Central & Hudson Bay Railway.

The cost of conducting transportation shows an increase from £1,177,307 in 1906, to £1,387,343 in the past half-year. A portion of this increase is, of course, due to the increase in the business done, but a large proportion is also due to the increases we have had to make in the wages of all classes of employes, and also to the increases in the cost of all materials and stores used in the working of the traffic, with the important exception of fuel for locomotives which, fortunately, has remained at practically the same figure as in the corresponding period. The other items in the accounts generally show increases, attributable to a great extent to the causes I have mentioned, but there is one item, and a very important one, the increase in which arises from other causes, and that is the item of car mileage, which shows an increase of £47,539, which is the balance we have had to pay to other companies for the use of their cars on our railway in excess of the amount we have received for the use of our cars on other railways. In the autumn of last year the majority of the railways increased the per diem charge of 25c. to 50c. a day, or double that which was paid during the June half-year of 1906. Based on our experience of 1906, as we own a large number of freight cars, our present stock being 29,000, and are ordinarily a large lender to other roads, this increased charge would have worked to our advantage, but, as illustrating the difficulties attending the working of a railway in this northern climate, the past winter proved more severe than the previous one, and a continuation of heavy business brought about a congestion at our terminals, with the result that the balance ran very heavily against us, principally in respect of coal cars, of which, owing to our insufficient supply, we had to use a large number belonging to other companies. You will see from the capital account that we have added an additional 1,000 coal cars to our stock, and the Board have decided to purchase a further 1,000 to be delivered next year, so that we shall be in a position to handle more of this traffic in our own cars, and so avoid this heavy charge for the use of other companies' cars, and at the same time obtain payment for the use of ours. Before leaving the question of cost of transportation, it is only right to point out, in justice to our officers, that notwithstanding the great increase in wages, and the loss in car mileage to which I have just referred, the proportion of these expenses to gross receipts, although higher than last year, is less than for the half-year ending June, 1905. The general expenses show an increase of £39,961, which is entirely due to the contribution of £40,000 to form a nucleus of a pension fund for employes. The remaining items on balance show a slight reduction. Taxes show a decrease of £36,821, owing to the arrears of Michigan taxes for 1902-3-4, amounting to £48,600, having been charged in the corresponding period of last year, but there was an increase in current taxation of £11,800, as compared with 1906.

The net traffic receipts were £894,716, which is considerably in excess of any amount previously earned in the June half-year. The net revenue credits were £131,077, and adding this to the net traffic receipts, we have £1,025,793 available for the payment of in-

Galena-Signal Oil Company,

Franklin, Pa., and Toronto, Ont.

Sole manufacturers of the celebrated GALENA COACH, ENGINE and CAR OILS, and SIBLEY'S PERFECTION VALVE and SIGNAL OILS.

Made especially for use in Headlights, Cab, Classification and Tail-lights, and for Switch and Semaphore Lamps. Burns equally well with the long time as with the one day burner, with or without chimney, as the burner requires.

Is pure water white in color; high fire test; low cold test, and splendid gravity.

Please write to home office for further particulars.

CHARLES MILLER,

PRESIDENT.

terest and dividend as the result of the working of the G.T.R. proper. The fixed charges, that is the rentals and interest on bonds and debenture stocks, absorbed £611,704, leaving a surplus of £414,089, but, unfortunately, this amount has been considerably depleted by the deficiencies which had to be met in respect of the working of the Canada Atlantic and Detroit, Grand Haven and Milwaukee railways, which amounted together to £98,770, and reduced the surplus actually available for dividends to £315,319, as compared with £309,861, and adding this to the amount of £13,231 brought forward from last half-year, we get £328,550, out of which we recommend you to authorize the payment of the full dividends for the half-year on the 4% guaranteed stock and first and second preference stocks. The expenditure on capital account has been somewhat heavier than usual, and amounted to £432,579, of which the principal item was £360,329 for 1,975 cars, part of the 2,500 cars the purchase of which I referred to at our meeting a year ago.

Before leaving the accounts, I should like to say one word on the general question of expenditure. The surprise that is sometimes expressed at the continual and heavy increases of outlay on the road by those who have imperfect means of information is quite intelligible, but I venture to think that some figures I will lay before you will show, in form of comparison, how absolutely impossible it is to escape from the consequences of the enormous rise of wages and increased cost of material. The ratio of working expenses to gross receipts on the G.T.R. rose for the June half-year, as compared with 1906, from 72.31% to 73.54%. In the case of the great Pennsylvania system the ratio rose from 72.37% to 74.56%, and in the case of the New York Central system the ratio rose from 75.94% to 78.76%. So you will observe that not only are the ratios of both those great railways higher than that of the G.T.R., but that their expenses during the last half-year increased in greater proportion. The Canadian Pacific, whose ratio, on account of higher rates and longer haul, is normally less than ours, shows on the half-year an increase of 4.77%, against our 1.23%, bringing the ratio up to 69.16%.

I alluded just now to the large increases we have been compelled to make in employes' wages. The labor question is, indeed, one of the most serious with which we have to contend. Owing to the great prosperity of the country, and the insufficient supply of labor to meet the demands of the numerous growing industries, and of the extensive railway construction throughout the country, there is great difficulty in retaining men in our employment. The increase of the payrolls of the system in the half-year ended June 30 last, was £200,000, the larger portion of which is due to additions to wages, irrespective of increased business, and further advances have been made in the current half-year. The Dominion Parliament last session passed the Industrial Disputes Investigation Act, establishing machinery for the adjustment of trade disputes. It contains some useful and practical provisions which appeal likely to simplify the settlement of differences between employers and employed. Its principal features are that on application of either party the Minister of Labor may appoint a board of three persons to hear the questions in dispute, one nominated by each party, with a third agreed upon by these two, or, in case of difference, appointed by the Minister. The act includes no compulsory provision for the enforcement of the Board's award, relying only upon the pressure of public opinion. On the other hand, there is a very useful provision which inflicts penalties for any strike or lockout pending the reference to the Board. The act has already been applied to two cases of dispute between our company and their machinists and engineers, and although the Board awarded increases of pay, amounting in the case of the machinists to between £20,000 and £25,000 a year, and in that of the engineers to about £23,000 a year, our officers express themselves satisfied with the action of the Board, and believe that the act may be the means of simplifying and assisting materially in the settlement of trade disputes. At the present time, no doubt, the tendency of these adjudications may be to increase wages, but it will be open to the company, when we fall upon bad times, to have recourse to the act to obtain reductions which it might otherwise be difficult to enforce. Now, of course, advance of wages is an obvious, and, no doubt, a powerful means for holding the men, but there is another, probably, in the long run, equally, if not more efficacious, namely, the inducement of a pension assured to the workman at the end of his service with the company. This principle has been now adopted by nearly all railway companies in Canada and the United States, and it seemed to receive the approval of our own shareholders when I recommended to them at our last meeting in April its application to our own company. In fact, its adoption by the G.T.R. has become an urgent necessity. And now I come to the item of £40,000 included in the half-year's accounts for the commencement of the proposed pension fund, as to which we have been exposed to a good deal of criticism. I have said that the matter is one of urgency. The scheme of pensions will come into effect on Jan. 1 next, and a good many retirements will take place at that date. We have thought it prudent, following the example of other companies who have established similar pension funds, to appropriate at once a substantial sum as a nucleus of the fund, to be afterwards supplemented by annual contributions, which will probably not exceed £14,000 or £15,000 a year. An act has been passed by the Dominion Parliament empowering the creation of this pension fund, which has now become practically obligatory. Had we not adopted it, and adopted it in a generous spirit, we should, without doubt, have lost many of our best men, who would contrast our treatment of them with that of other companies, and we should have placed ourselves in an invidious and unpopular position as regards both the public and the Railway Commission. It is imputed to us that the appropriation of this £40,000 has inflicted an injustice on the third preference shareholders. Very few complaints have reached us from our registered shareholders, and I may even add that of these a fair proportion smack much more of the speculator than of the real investor. But some of our financial advisers and critics are good enough to say that we are wanting in consideration—to whom? To the market operators. I appeal from the market operators who do not concern us, and who care nothing for the permanent interests of the company, and who look upon our securities as mere gambling counters in the game of speculation, and who by their operations in the market cause those fluctuations which are a source of disturbance and anxiety to our shareholders; I appeal from them to our own 48,000 proprietors, the vast majority of whom understand and approve the policy which the directors have pursued consistently ever since by your favor we have occupied our present position. The objects of that policy, which, I may claim, and claim with confidence, has up to the present time been attended with conspicuous success, have been the preservation, the improvement, and the consolidation of your property as a sound and well-assured investment for you and your children after you; and so long as I am President, and my friends here are directors, we shall never swerve from that policy, nor be deterred from continuing it by the clamor of persons who only have a transient and unreal interest in the company. In the present instance the directors would be unfaithful in their duty if they yielded to pressure from outside, and left this liability undischarged in the pretended interest of one class, whose interest, as a matter of fact, is bound up with all the others, and whose position has been so rapidly and so materially improved of late. It is our constant endeavor to reconcile the improvement of your property, and its maintenance at the highest standard of efficiency, with the natural desire of the shareholders to receive the largest possible return on their investments, and if the present good traffics are maintained between now and the end of the year, I see no reason why the rate of dividend which was paid upon the third preference stock for 1906 may not be improved upon when the accounts for the current half-year are made up.

The accounts of our subsidiary companies contained in the report show, that while the Grand Trunk Western Ry. continues the course of prosperity which has resulted from the reorganization of 1900, and the subsequent improvement of the road, the Detroit, Grand Haven and Milwaukee and Canada Atlantic Railways present less satisfactory results. The Detroit, Grand Haven and Milwaukee is about £12,000 worse off than last year, but returns about exactly the same net revenue as in 1905. The work of improvement on the Canada Atlantic Ry. has not yet reached the point where the anticipated financial results can be realized. One troublesome work, which is still in progress, but far advanced, of an expensive character, and not properly chargeable to capital, is the filling up of numerous timber trestles, covering about 12 miles, which has been the cause of serious interference with traffic, and contributes largely to the falling off of receipts. On the other hand, the expenditure required for bringing the road up to standard has proved greater than was originally contemplated. Mr. Hays assures us, however, that we have seen the worst of these extraordinary expenses chargeable to revenue, and alluding to the supreme importance of not allowing this road to fall into the hands of competitors, which, you will remember, was one of the reasons for its acquisition by the Grand Trunk, the General Manager writes to me: "Any deficit we make in the net earnings from the operation of the line is a bagatelle compared with the injury that might have been inflicted upon us had one of the other interests acquired the road." One incidental, but important, advantage obtained by the acquisition of the Canada Atlantic Ry. has been the possession of terminals in the centre of Ottawa, a circumstance greatly enhancing the position and prestige of the company. Arrangements have lately been concluded for the erection of a new union station at Ottawa, and in connection with it an hotel, by an issue of bonds of a terminal company created for the purpose. The erection of the hotel has been strongly urged upon us by the Government of Canada. At present Ottawa, the metropolis of the Dominion, the seat of the Government and the Legislature, rapidly increasing in population and wealth, is entirely devoid of any decent hotel accommodation. Sir Wilfrid Laurier has taken a warm interest in the matter, and at his instance a beautiful site in the best part of the city has been sold to the terminal company by the Government for a reasonable sum, on which the hotel will be erected, communicating directly with the station. We have every reason to believe that both directly and indirectly the existence of the hotel will be of signal advantage to our company.

If progress on the construction of the G.T. Pacific Ry. has been less rapid than was anticipated, mainly owing to considerations of weather and labor, and the difficulties of obtaining material, it is satisfactory to know

that the work performed has been of the highest order, and that in the history of railway building in America or Canada no great road will ever have been, at its first opening, completed under such conditions of perfection as will be the case with the G.T. Pacific Ry. The authority of the Railway Commission is being asked, in anticipation of the official opening of the road, for permission to carry freight and effects for the accommodation of settlers over the portion of the road completed west of Portage la Prairie, and a considerable amount of wheat of this year's harvest will be forwarded from the territory adjacent to the line between that point and Miniota, a distance of about 140 miles. When the original conception of this great undertaking first presented itself to us—nay, was forced upon us—your directors convinced themselves, after giving the matter their most earnest consideration, and for the reasons which I laid before you at the time, that neglect of the opportunity then offered would be the signal for the decay of your company; while, on the other hand, its adoption under proper conditions offered the certain prospect of a great eventual accretion of prosperity to the G.T.R. We obtained those conditions, and I for one have never faltered in my conviction of the wisdom of the decision taken at that time, and which received the approval of the shareholders. You have the reversion of a great property. The scheme which we are carrying through is full of promise, but we must not disguise from ourselves that we must expect to encounter difficulties before it reaches its final consummation; therefore, I ask you to strengthen the hands of your directors and officers, thereby facilitating their task of preparing for the time when the new road will be completed, and while exercising your legitimate and useful function of criticising our actions, not to be too careful to question or object to the expenditure now being incurred, large as it may appear, which you may rely upon our using every endeavor to conduct with good judgment and with the utmost economy which circumstances will allow, but of which you will undoubtedly reap the benefit when the new road is brought into connection and operation with the old G.T.R.

The President then moved that the report of the directors and the accounts for the half-year ended June 30, 1907, now presented, be and the same are hereby approved and adopted, and that the following dividends be paid, viz: To the holders of the 4% guaranteed stock of £2 %. To the holders of the first preference stock of £2. 10s.%. To the holders of the second preference stock of £2. 10s. %.

After some criticism of the monthly statements of earnings and expenditures by J. Costello, an amendment to the effect "That it is desirable that greater vigilance be exercised over the expenditure in the management of the company's business," was submitted on motion of Mr. Seal, seconded by Mr. Jackson. A suggestion was made that a local board should be created in Canada, and in reply to the remarks of shareholders the President said: "I have only to say that if our 48,000 proprietors are unwise enough to contemplate such a thing as that for one single moment, I shall receive that announcement with the utmost astonishment. The whole of the securities of the G.T.R. are held, with a trifling exception, on this side of the Atlantic, and the vast majority in this country. Here every six months, every day if you like, you are face to face with your directors, and you can call them to account. We are here under your control. What would it be if you had got a set of gentlemen sitting in Canada whom you cannot get at, and whom you are not in touch with? If you remove the control to Canada, what will be the result? Canada has hardly one cent of interest in the finances of this company, and how do you suppose such a board would be able to resist pressure put upon them on all sides for the expenditure of more money? I contend the organization of this company is admirably adapted to English shareholders, and if any illustration is wanted, look at the success with which several of the great South American railways are controlled from this country, and where we never hear of such complaints. However, I do not think for a single moment such an arrangement would ever be adopted by the G.T.R. shareholders.

"A gentleman who spoke last wanted to know whether we should have any claim for compensation against the Canadian Government on account of their slackness in carrying out their portion of the new road, and also as against their action in imposing a heavy duty on steel rails. I do not know whether a claim for compensation would actually lie in a court of justice, but I may say this, that we have, in my judgment, a moral claim in respect of both these matters against the Canadian Government."

The resolution was then adopted, the amendment having previously been defeated.

American Locomotive Company.

The sixth annual report for the year ended June 30, shows gross earnings of $49,515,486.33, an increase of $6,967,609.93 over those of the preceding yeaf. The expenses were $42,744,381.30, an increase of $6,659,010.56 over those of the year preceding. In addition to liberal disbursements for the upkeep and replacement of the plants, included in expenses, there has been expended for improvements and additional property the sum of $1,692,858.82, which has been paid for out of the fund of $2,000,000 created June 30, 1906. The interest on the bonds of the several constituent companies, the short-term debenture notes of the American Locomotive Co. and other outstanding loans, together with minor miscellaneous interest and discount charges, amounted to $412,898.10. Out of the resulting profit, the regular dividend of 7%, or $1,750,000, has been paid to the holders of the preferred stock, as have also dividends aggregating 5%, or $1,250,000, to the holders of the common stock. In the fiscal year just closed the company has secured the largest output and transacted the heaviest volume of business in its history. Moreover, its capacity for handling future business has been substantially increased by the erection of new shop buildings, power plants, machinery, equipment, etc., principally at Schenectady, Dunkirk, Richmond and Montreal. To still further increase the capacity and efficiency of the plants there has again been created an extraordinary additions and betterment fund of $2,000,000. During the year, the outstanding bills payable, amounting to $3,300,000, have been paid off, and in their stead the company has issued a series of short-term gold coupon notes aggregating $5,000,000, bearing interest at the rate of five per cent. and maturing annually in sums of $1,000,000, on Oct. 1, from 1907 to 1911; thus providing an additional cash capital of $1,700,000, which was urgently needed, notwithstanding the large increase in working capital which has accumulated since the formation of the company in 1901. In April, 1907, the structural steel department, established at Montreal, was sold to the Structural Steel Co. As a necessary feature of the agreement of sale, the structural shop buildings and equipment at Montreal were leased to the new company for the term of two years, with an option for one additional year. The Montreal company will, therefore, devote its attention hereafter exclusively to the business of producing and selling locomotives, steam shovels and rotary snowplows, for all of which the rapid development of transportation and industrial enterprises in Canada offers a field of exceptional promise. On October 16, 1906, R. J. Gross was elected a director of the company, to fill the vacancy caused by the resignation of E. C. Converse. On March 1, 1907, the resignation of J. E. Sague as Vice-President in charge of engineering and manufacturing, became effective. H. F. Ball was elected Vice-President in charge of engineering and D. Van Alstyne, Vice-President in charge of manufacturing.

CONDENSED GENERAL BALANCE SHEET.

Cost of property		$46,925,096.20

Appended is the following note:

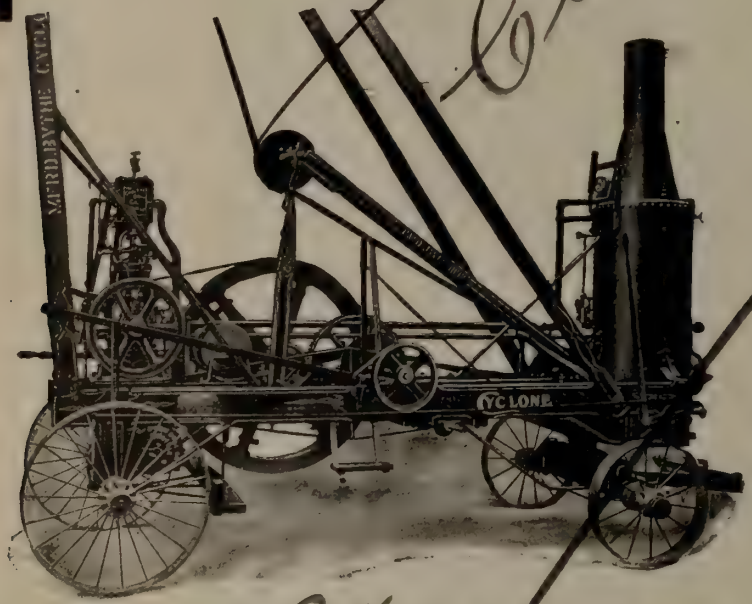
Prepared solely for the purposes of information, to show the combined assets and liabilities of the ten (10) plants controlled by the American Locomotive Company as the balance sheet would appear if the assets of the Rogers and Montreal Companies had been taken over by the American Locomotive Company and their debts assumed.

The bonded debt of the constituent companies includes bonds on the Richmond Locomotive Works, the Dickson Works, the Rogers Locomotive Works, and $1,500,000 of 4% gold bonds of the Locomotive and Machine Co. of Montreal, which will mature Mar. 1, 1924.

At the annual meeting of the stockholders held in New York city the report was adopted and J. Bryan, C. A. Coffin, S. L. Schoonmaker and G. R. Sheldon were elected directors for the term of three years. The meeting of directors for the election of officers has not been held.

A proposal is under consideration at St. Thomas, Ont., for the formation of a social club for railway officials. A committee consisting of representatives of the C.P.R., G.T.R., Wabash Rd., Michigan Central Rd., Pere Marquette Rd., Southwestern Traction Co., St. Thomas St. Ry., and of citizens interested in railway industries, has been appointed to consider the proposal and report at a future meeting.

CYCLONE
BLAST HOLE DRILLS



operating with the hollow rod system, are unexcelled for rock cutting work.

Any formation is drilled at a cost far less than any other method.

To those interested in rock cutting we will be glad to mail catalogues on any of the following equipment:

Blast Hole Drills
Blast Hole Loaders
Safety Blasting Fuse
Drill Steel
Steam Shovels
Dump Cars, Etc., Etc.

Central Vermont Ry. Co.'s Report.

The eighth annual report of the directors of this company, which is controlled by the G.T.R., for the year ended June 30, presented at the annual meeting Oct. 8, gave the following particulars:

Gross receipts	$3,833,088.49
Operating expenses	3,041,513.12
Balance	$ 791,575.37
Taxes	103,194.57
Net earnings	$ 688,380.80
Other income, interest on securities held by the company	13,840.00
Total income	$ 702,220.80
Interest on bonds and rental of leased lines	700,407.38
Net surplus over fixed charges	$ 1,813.42

REVENUE.

Receipts from all sources....decrease,	$ 3,887.67

EXPENDITURE.

Maintenance of way and structures....decrease,	$ 12,364.38
Maintenance of equipment....decrease,	103,478.85
Conducting transportation....increase,	109,853.25
General expenses....decrease,	1,051.19
Total operating expenses....decrease,	7,041.17
Taxes....increase,	1,401.07
Fixed charges....increase,	4,455.27
Improvements included in operating expenses....decrease,	140,985.16

The property has been well maintained, and improvements to the extent of $200,962.01 have been made during the year, and included in operating expenses. Five hundred large capacity flat cars have been purchased at a cost of $295,000. The cars were acquired under an equipment trust agreement, providing for a cash payment of $29,500.00, and the balance to be paid in twenty equal semi-annual instalments, with interest at 4½% per annum.

The report is signed by C. M. Hays President, and the reports of various officers are appended.

E. H. Fitzhugh, Vice-President, in his report shows the improvement and extraordinary expenditures, included in operating expenditures, for the year to have been $200 962.01. This amount was distributed as follows: New bridges, $62,476.44; new tracks, sidings and spurs, $9,533.76; new fuel and water stations, engine houses and turntables, $13,937.78; new stations and warehouses, $4,074.52; new steel rails (difference of value between old rails taken up and new rails laid down), $3,980.38; new tools and machinery, $6,830; ballasting, $4,702.11; new locomotives, $20,000; new passenger cars, $45,715.77; new cabooses, $3,962.98; new freight cars, $15,243.89; new air brakes, $10,484.38. The train mileage was: Passenger, 1,131,763, increase, 65,060; freight, 1,341,322, decrease, 31,723; mixed, 133,733, decrease, 50,061; miles earning revenue, 2,606,818, decrease, 16,724; piloting, switching, light running, and work trains, 770,301, increase, 40,700; total engine miles run, 3,377,119, increase, 23,976. The car mileage was: Passenger, 5,007,522, increase, 59,321; freight, 28,174,011, decrease, 4,219,102; total car mileage, 33,181,533, decrease, 4,159,781. The percentage of expenses to earnings was 79.35 per cent. as compared with 79.45% in the preceding year, a decrease of .10%.

The percentage of improvements included in operating expenses to the earnings, was 5.24%, as compared with 8.91% in the preceding year. The percentage of ordinary expenses to the earnings, was 74.11%, as compared with 70.54% in the preceding year. The number of tons carried one mile was 263,692,229 a decrease of 16,379,257; the earnings per freight train mile were $1.74, an increase of 2 cents, and the earnings per ton per mile, 0.95 cent, an increase of 0.03 cent. The number of passengers carried one mile, 48,658,961, shows an increase of 3,196,769; the earnings per passenger train mile, $1.06, same as previous year, and the earnings per passenger mile 2.22 cents, a decrease of 0.06 cent.

Ten miles of track between Brattleboro and South Vernon have been ballasted with gravel and surfaced, and two trestles, 120 and 285 ft. in length respectively, on the Second District have been filled in. Extensions aggregating 2,584 ft. have been made to passing tracks, and 7,353 ft. of industrial sidings have been laid. New 80-lb. steel rail, releasing 75-lb. rail, has been laid in track as follows: 4.4 miles between West Hartford and White River Junction; 2.1 miles from Montpelier Junction south; 6.5 miles between Georgia and Colchester; .2 miles from Province Line south; and 2.3 miles of 75-lb. released rail have been relaid on the Southern Division. The stations at Stanbridge and Highgate Springs, burned Feb. 1 and Oct. 17, 1906, respectively, have been rebuilt, and a new station erected at Chambly Canton. A new drop pit has been constructed in the engine house at New London, and stalls in the engine houses at Brattleboro and White River Junction have been extended to accommodate the larger engines now running into those stations. New 70-ft. turntables have been installed at New London, Brattleboro and White River Junction, and the shorter tables released, placed at Barre, Burlington and Williamstown. A new 100,000 gallon water tank has been erected at St. Albans; a 44 ft. track scale installed at Bethel; and new stock yards built at Sharon, Northfield, Richmond and Williston. Five new steel bridges have been erected, two pile trestles rebuilt and extensive repairs made at five bridges.

Ten new compound consolidation freight engines, purchased in June, 1906, have been received during the year and placed in service. During the year, 76 engines have received heavy repairs, and 64 light repairs. Three new tenders have been built and five new tenders purchased. A number of machines have been purchased and added to the engine repair shop equipment at St. Albans.

Five hundred flat cars of 60,000 lbs. capacity have been purchased and added to the equipment. In addition to the regular maintenance and repair work, one sixty foot mail car, one flat car, seven refrigerator cars and six cabooses have been constructed in St. Albans shop. Air brakes have been applied to 187 freight cars, and the work of equipping all serviceable large capacity cars with air brakes is now in progress.

The winter was unusually severe. Protracted periods of exceedingly low temperature, together with the difficulty experienced in obtaining coal of good quality, impairing the efficiency of engines, resulted in congestion from which we did not recover until May; and the large number of foreign cars on the line in excess of Central Vermont equipment on other roads, caused an exceptionally large debit car mileage balance.

The total mileage operated is 701.6 miles, made up as follows: Main track (including 6.2 miles of double track), 203.2 miles; second main track, 6.2 miles; branch lines, 173.4 miles; yard tracks, sidings and spur tracks, 109.9 miles; making a total of 492.7 miles of track owned by the company. The leased lines consist of 123.5 miles of main line, 36 miles of branch lines, and 49.4 miles of yard tracks, sidings and spur tracks. The condensed balance sheet is as follows:

ASSETS.

Cost of road and equipment	$13,899,471.06
Bonds deposited with trustee	1,000,000.00
Materials and supplies on hand	288,307.84
Cash on hand and in transit	187,971.61
Investment in bonds	342,779.68
Equipment renewals	722,755.67
Carried forward	$15,941,285.86
Brought forward	$15,941,285.86
Sundry accounts collectible:	
Due from agents	131,867.57
Due from U.S. and Canada, carrying mails	22,548.58
Due from sundry railroads and individuals	314,114.50
Advances fast freight line, account working fund	9,950.00
	$16,919,766.51

LIABILITIES.

First mortgage bonds	$12,000,000.00
Common stock	3,000,000.00
Interest due	12,339.10
Interest accrued not due	78,637.07
Taxes accrued not due	60,485.05
Sundry accounts payable:	
Vouchers and pay rolls	763,531.90
Sundry railroads and individuals	126,662.72
Notes payable	175,000.00
Equipment trust notes	681,000.00
Profit and loss	22,110.67
	$16,919,766.51

Following are the officers and directors for the current year: President, C. M. Hays, Montreal; Vice-President, E. H. Fitzhugh, Montreal; General Manager, G. C. Jones, St. Albans, Vt.; other directors: E. C. Smith, St. Albans; W. S. Webb, Shelburne, Vt.; J. W. Stewart, Middlebury, Vt.; J. G. McCullough, Bennington, Vt.; E. H. Baker, H. B. Day, Boston, Mass.; A. Tuttle, Fair Haven, Vt.; C. P. Smith, Burlington, Vt.; S. E. Kilner, E. L. Marston, New York City. Treasurer and Clerk, W. H. Chaffee, St. Albans; Auditor, W. G. Crabbe, St. Albans.

C. P. R. Lands and Bonds.

During the fiscal year ended June 30, the C.P.R. sold lands amounting to 994,840 acres, realizing $5,887,377, or an average of $5.92 an acre. Portions of these sales were at a rate between $4 and $5 an acre, under terms of contracts made previous to the commencement of the year, and this tended to keep down the average. Apart from this, the average price for lands actually sold during the year was $8.09 an acre.

At the incorporation of the company in 1881 a grant was made by the Dominion Government of 25,000,000 acres of land, in addition to a cash subsidy of $25,000,000. Other land grants brought the total up to 32,000,000 acres. At that time, the land was of practically no market value, and has only been made so by the opening up of the country by the company. With the extension of its lines the value of the land has risen rapidly, and it is of interest to note a comparison between the value of the remaining lands at the average price realized last year, and the total bonded debt of the company.

The total bonded debt is as follows:

1st mortgage 5% bonds	$34,998,633
Canada Central Ry. 6% bonds	973,333
Algoma Branch 1st mortgage bonds	3,650,000
North Shore Ry. 1st mortgage bonds	616,119
	$40,238,085

Of unsold lands the company still holds 8,905,823 acres of the original grant, in addition to 3,419,673 acres in British Columbia, and 2,500,000 acres which it is to receive through the Columbia and Western Ry., making a grand total of 14,825,496 acres. This, at the average of $8.09 an acre, would produce, approximately, $120,000,000; and it is only reasonable to expect that the average price per acre obtained last year will be increased in the near future.

The Montreal Y.M.C.A. railway branch has a membership of 400, and through the generous co-operation of the G.T.R. a building has been erected for its use. The building contains gymnasium, bowling alleys, baths, social rooms, reading room and library, class rooms, dormitories and restaurant. The educational work is outlined to meet the special requirements of the membership.

Canadian Northern Railway Report.

The following directors' report, over the signature of W. Mackenzie, President, was submitted at the annual meeting of shareholders in Toronto, Oct. 16.

The result of the company's operations for the fiscal year ended June 30, 1907, are as follows:

GROSS EARNINGS.

Passenger traffic	$1,464,256.18
Freight traffic	5,741,729.25
Express, mail, telegraph, dining and sleeping cars, interest on deferred land payments, and profits from elevators and other subsidiary comp'nies	1,144,212.65
	$8,350,198.08
WORKING EXPENSES (including taxes)	5,424,163.65
Net earnings	$2,926,034.43
Fixed charges	1,882,489.14
Surplus for the year	$1,043,545.29

The gross earnings show an increase over the preceding year of $2,446,442.47, or 41.44%, and net earnings a gain of $697,011.67, or 31.27%. The increases are gratifying both in passenger and freight receipts. New settlers have been brought into all the districts served by the railway. The tonnage of grain, lumber and general merchandise hauled has been much heavier than in previous years, owing to the increased mileage in operation, and especially to the larger areas of land brought under cultivation along the older portions of the line. The directors invite attention to the high percentage of increase in the quantity of flour handled, as showing how quickly industries allied to agriculture are being founded in Western Canada. The working expenses were 73.49% of the gross earnings of the railway proper, and 64.96% of the gross earnings from all sources, compared with 66.49% and 62.24% respectively last year. The large increase in working expenses is due to the unprecedented character of the winter and the greater cost of labor and materials. The winter was the severest ever known in Western Canada, in persistence of low temperature, depth of snow, and duration into the spring season. In Dec., Jan., Feb. and March the operating department was obliged to devote itself to keeping communications open; this made it impossible for the traffic to earn expenses. During all the years in which the company has been in operation, no such winter has been met with, and it is but reasonable to expect that a repetition of it will not occur for many years to come. These difficulties of operation were not singular to this line, but were common to all lines in the Northwestern States as well as Western Canada. The crop following these adverse conditions, though not equal to those of some recent years, is much better than had been anticipated, and is more favorable than the crops in many other parts of the world, where the spring and summer were also unpropitious. The fertility of the soil and the character of the climate have been put to an extreme test and the results have been such that the directors regard the future with every confidence.

It was stated in the press during the winter that the company's equipment was insufficient to handle the traffic offered. While the extremely rapid development of the lines, and the unexampled growth of traffic upon them, have necessitated orders for equipment which have kept the car builders continuously behind in the delivery of rolling stock ordered by the company, the delays of last winter were primarily due to weather conditions. In a normal season the traffic would have been handled without inconvenience to shippers; but the facts just cited imposed upon the railway all the disadvantages of congestion, without its compensations in revenue. As soon as spring came the congestion was expeditiously relieved. The increased cost of labor and supplies has been common to all enterprises in Canada, but the directors have employed every reasonable safeguard against undue expenditure, and will continue to do so. In the Provinces of Manitoba, Saskatchewan and Alberta, the needs of the districts served by the railway are so widespread that additional equipment of all kinds, and other facilities for the speedy handling of business must be provided. New lines are under construction to meet the demands of farmers who are already producing immense quantities of grain for remunerative shipment. Other lines are contemplated that will not only serve new localities, but, by acting as feeders, will protect the enormous revenue-producing areas which the railway has been the means of opening up. The development of these comparatively new districts during the current year has required the expenditure of large sums on structural and mechanical improvements. The roadbed has been further improved by extensive ballasting. Many stations have been built; and others enlarged. New sidings have been laid and others lengthened. At divisional points the engine-houses have been furnished with more machinery for engine and other repairs, and up-to-date plants for handling coal have been installed. Water stations have been increased and enlarged, freight sheds have been erected in many towns, and at Port Arthur particularly new accommodation for freight has been provided to keep pace with the needs of the port. At various points stockyards have been constructed. The growth of business has necessitated, in addition to these improvements, the purchase of a great deal of new rolling stock, and attention is invited to the statement of equipment, which shows the character and extent of the additions made during the year. Delivery has been constant and will continue during the current year.

The directors desire to draw attention to the land accounts, which are incorporated for the first time in the general balance sheet. In respect of lands sold, over $3,000,000 has been collected, and is held in trust by the National Trust Co. to retire the land grant bonds, amounting to $2,000,000, now outstanding. Deferred payments on land sales still to be collected amount to $4,871,038.94. The company also has a stock interest in the Canadian Northern Prairie Lands Co., which shows a substantial profit on the market value of the stock taken into the railway company's accounts. Of land still unsold there are 1,828,251 acres, so that even if present land values do not advance—and the directors have no doubt that they will advance in the immediate future—a very substantial asset will accrue to the railway company. While it is especially gratifying to the directors that the company's lands have proved so attractive to settlers from the Middle and Western States, because they are thoroughly experienced in prairie farming, and, besides, being good judges of land, bring it rapidly into cultivation and thus create traffic for the railway, it is more desirable than ever to encourage the immigration of families of good British stock. The Dominion Government is doing admirable work in this direction, and a large proportion of the arrivals of recent years are settled near the railway. During August a party of British journalists travelled from Edmonton to Port Arthur over the railway, and investigated for themselves the progress made by their countrymen. The directors have observed with satisfaction, in the papers represented, very favorable accounts of the country travelled and the conditions examined, and hope to see an even larger immigration from the British Isles.

The directors are glad to call attention to the greatly enhanced value of the company's terminals at Winnipeg, Port Arthur, Edmonton and other divisional points, arising from the general expansion of commerce in Western Canada, as well as from the development along the company's own lines. An estimate of an increase of over $3,000,000 in this respect is quite conservative, and is not based on such high values as those at which contiguous property in the cities and towns referred to have changed hands. The number of industries actually established in Winnipeg and elsewhere, together with large extensions of wholesale trade, are excellent indications of the permanence of business arising from the growth of settlement along the older railways, and the opening up of new territory by your own lines. The increase of urban population has been healthy and not dependent on the more speculative enterprises which sometimes accompany, but do not really affect, the filling up of a vast fertile territory.

The directors note with special gratification the establishment of blast furnaces at Port Arthur, which, from ore brought over the railway from the Atikokan mines, have, since July, been producing first-class pig-iron. Steps are being taken to double the output, and with the assured development at Port Arthur of manufactories using iron and steel the western market will naturally be supplied from Port Arthur, to the great advantage of the railway. Other mines, rich in iron, and tributary to the main line west of Port Arthur, are being opened up, and arrangements are now being completed which will insure heavy shipments of ore immediately navigation opens in 1908. The iron ranges tapped by the main line are similar to those in the adjoining State of Minnesota, which have furnished the railways serving them with unprecedented revenues; and there is every reason to anticipate that the movement of ore from the Atikokan and Mattawin ranges will ultimately be such as to earn large revenues. Several new industries have recently been secured by the cities of Port Arthur and Fort William, which will contribute still further to the noteworthy expansion which has already taken place in connection with the company's terminals. The coal docks are without a superior in equipment. They already handle 600,000 tons in a season; and do it so expeditiously as to effect a material saving in the cost of waterborne fuel, for which there is an enormously increased demand in the Western Provinces year by year.

The direct water connection via Parry Sound and the Canadian Northern Ontario Ry. with Toronto and other Ontario points, which was established this year, has, by considerably increasing the traffic through Port Arthur to all western points, not only enhanced the value of the company's terminal property there, but has begun the diversion to the Canadian Northern Ontario Ry. of a large proportion of profitable traffic to and from the Western Provinces.

The City of Edmonton has continued to progress rapidly. Several new industries are being established, for which there is ample scope, and coal mining in the immediate vicinity has been greatly extended. As your terminals are immediately adjacent to the business centre of Edmonton, there is a corresponding gain to the company.

The lines of the Canadian Northern Quebec Ry. necessary to give the company the full advantage of connection with this system have not yet been completed. They are, however, under construction, and will be finished next year. The increase in gross earnings has been well maintained since the close of the fiscal year, the reported figures for the months of July, August and Sept. being $2,618,200, compared with $1,823,100 for the same period in 1906, an increase of $795,100.

The accounts and statistical tables appended to the report are submitted by D. B. Hanna, Third Vice-President, as follows:

DESCRIPTION OF FREIGHT CARRIED.—The figures in brackets are those for the year ended June 30, 1906: Flour, 844,500 sacks (483,819); grain, 19,853,142 bush. (16,192,502); live-stock, 32,960 head (41,588); logs and lumber, 189,455,000 ft. (171,636,000); firewood, 109,685 cords (175,675); fish, 3,402 tons (3,175); immigrants' effects, 4,647 cars (2,614); building materials, 9,046 cars (8,955); miscellaneous, 628,521 tons (559,022).

The summary of equipment shows the following, the figures in brackets being those for the year ended June 30, 1906: Locomotives, 190 (141); sleeping and dining cars, 29 (18); passenger coaches, 108 (77); baggage and mail and express cars, 48 (35); business cars, 6 (5); freight, refrigerator and stock cars, 6,868 (5,437); conductors' vans, 97 (69); boarding, tool, auxiliary cars, steam shovels and snow equipment, 123 (83).

MILEAGE OWNED AND OPERATED.—The total number of miles of railway owned and operated, including leased lines, was 2,639.4 miles, located as follows: Ontario, 353.7 miles; Minnesota, U.S., 43.7 miles; Manitoba, 1,427.2 miles; Saskatchewan, 600.6 miles; Alberta, 214.2 miles. This mileage is operated in four districts: Lake Superior, 578.2 miles; Central, 498.7 miles; Northern, 961.9 miles; Western, 600.6 miles. The average mileage operated for the fiscal year was 2,509 miles.

The report was unanimously adopted at the annual meeting and the directors re-elected. Following are the directors for the current year: President, W. Mackenzie; Vice-President, D. D. Mann; other directors, Z. A. Lash, F. Nicholls, Toronto; R. M. Horne-Payne, London, Eng.

The La Tuque branch of the Quebec and Lake St. John Ry. was opened for traffic Nov. 18.

The C.P.R. has entered into an agreement with the Pacific Cartage Co. for the cartage of freight to and from the freight sheds at Calgary, Alta.

The C.P.R. has announced that it will offer two scholarships in the railway department of McGill University, for competition among sons of its employes, at the matriculation examinations in June, 1908.

The Board of Railway Commissioners has approved of the tariff of tolls for freight upon the G.T. Pacific Ry. between Portage la Prairie and Rae, Man., about 130 miles. The rates are approximately the same as those charged by other railways in Manitoba.

The Dominion Government fisheries protection cruiser Lurline, recently purchased from J. H. Walker, Walkerville, Ont., on her way to Georgian Bay ports, ran on the partially constructed breakwater at the mouth of Goderich harbor, Oct. 26. Attempts were made to get her off, but without success, and it was decided to remove the fittings and abandon her. She, however, broke up during the night.

Investigation of G.T.R. Facilities.

Order 3618 passed by the Board of Railway Commissioners Sept. 21, recites that numerous complaints have been received by the Board respecting the G.T.R. Co., and orders: "That A. F. Dillinger, Operating Assistant to the Chief Traffic Officer of the Board, be directed to make inquiry and report to the Board—

"Whether the G.T.R. Co. has, at any time within the period of 12 months next preceding the issue of this Order, failed, and whether the said company does now or at any time up to the making of A. F. Dillinger's final report, fail to furnish at any place or places of starting on its railway, or at the junction or junctions of its railway with any other railway or railways, or at any stopping place or places established for such purpose, adequate and suitable accommodation for the receiving and loading of all traffic offered for carriage upon its railway; or to furnish adequate and suitable accommodation for the carrying, unloading, and delivering of all such traffic; or without delay, and with due care and diligence, to receive, carry, and deliver all such traffic; or to furnish and use all proper appliances, accommodation, and means necessary for receiving, loading, carrying, unloading, and delivering such traffic.

"In what particulars the company has so failed or does fail, as aforesaid, and to what causes any such failure has been or is due.

"Whether the company is possessed of all proper appliances, accommodation, and means necessary for receiving, loading, carrying, unloading, and delivering the traffic which will probably be offered immediately or within the two years next succeeding the issue of this Order, at all places of starting on its railway, at all junctions of its railway with other railways, and at all stopping places established by it for such purpose, for carriage upon its railway, and, if not, in what particular respects the said company is not possessed of any such appliances, accommodation, or means.

"If the company is not possessed of all proper appliances, accommodation, and means necessary as aforesaid, what preparation the company has made, and what steps it has taken to furnish itself with the same, and whether such preparation and steps are adequate and sufficient for the purpose of furnishing to the said company all further proper appliances, accommodation, and means necessary as aforesaid in respect of which its supply is now defective, and, if not, whether it is within the power of the company to obtain the same within a reasonable time, and if so, within what time.

"In the event of the company having failed, or failing, as aforesaid, or of its being furnished with all proper appliances, accommodation, and means necessary as aforesaid, whether any, and if so what, specific works should be constructed or carried out, or property acquired, or what property, cars, motive power or other equipment should be acquired, or what steps, systems, or methods should be taken or followed by the company so as to enable it, without delay, and with due care and diligence to receive, carry, and deliver all traffic offered for carriage upon its railway.

"What is or would be the effect upon the power of the company to receive, carry, or deliver traffic, without delay, or compliance with the provisions of the Lord's Day Act.

"And the Board further orders that A. F. Dillinger report from time to time to the Board upon any of the matters aforesaid, as he may think desirable or as may be directed by the Board."

3864. Oct. 30—Approving revised location of G.T. Pacific Ry. through unsurveyed territory, from Hardisty Creek to Rocky River, Alberta, mileage 60 to 90, etc.

3865. Oct. 30—Approving revised location of Canadian Northern Ry. through tps. 42 and 43, r. 5, west of 3rd mer., mileage 20.08 to 28, Saskatchewan.

3866. Oct. 30—Amending order 2891, of Feb. 8, granting leave to the Kaministikwia Power Co. to cross the C.P.R. opposite the Ogilvie flour mills and elevator in Fort William, Ont.

3867. Nov. 4—Authorizing C.P.R. to cross Toronto Ry. tracks on Queen St., Toronto.

3868. Nov. 11—Authorizing C.P.R. to construct and operate spurs to R. Bigley's and the Dominion Bridge Co.'s premises in Toronto.

3869. Nov. 11—Authorizing Canadian Northern Ontario Ry. to open for traffic its line from the end of the Canadian Northern Quebec Ry. track at Hawkesbury, Ont., to near the west limit of the town of Hawkesbury.

3870. Nov. 11—Authorizing the C.P.R. to open for traffic the portion of its second track of main line between Ft. William and Winnipeg, mileage 79.7 to 84 in Manitoba.

3871. Nov. 11—Authorizing the C.P.R. to construct tracks across certain streets in Regina, Sask.

3872. Nov. 11—Authorizing the C.P.R. to construct a spur to the Ontario Nickel Co.'s premises, Drury tp., Ont.

3873. Nov. 11—Authorizing Canadian Northern Ontario Ry. to open for traffic its spur line in Hawkesbury, Ont , to the G.T.R. tracks in Riordan's mill yards.

3874. Nov. 11—Authorizing the C.P.R. to open for traffic the diversion of its line near Cummings, Medicine Hat section.

3875. Nov. 11—Authorizing the C.P.R. to open for traffic its line between Kincorth and Cummings, Medicine Hat section.

3876. Nov. 11—Authorizing the London Township Telephone Co. to place its wires across G.T.R. tracks near Denfield station, Ont.

3877. Nov. 11—Dismissing application of town of Claresholm, Alta., for an order directing the C.P.R. to construct a suitable highway where its railway intersects Third avenue.

3878. Nov. 11—Authorizing Blenheim and South Kent Telephone Co. to place its wires across Canada Southern Ry. tracks near Mull and Fargo stations.

Salary-Raising Training For Railroad Men

There is no profession in which promotion depends in any higher degree upon a man's real ability and technical knowledge than in railroading. Quick promotion then for the railroader is the result of quick and also thorough acquirement of that technical training which will qualify him to hold a higher position. In no way can the ambitious railroad employe secure this technical knowledge so quickly and yet so simply as through the I. C. S. Courses of home training. These Courses have been written by the best railroad experts on this Continent and are taught after a manner that 15 years' experience in training hundreds of thousands of ambitious men for promotion and better earnings has proved to be the most practical and efficient. These Courses include instruction in Locomotive Management, Locomotive Boilers, Steam Cylinders, and Valve Gears, Breakdowns, Compound Locomotives, Train Rules, Westinghouse and New York Air Brakes, Car Lighting and Heating, and Electric Headlights.

If **YOU** wish to secure the training in your own home, in your spare time, and at an insignificant cost, that will qualify you for promotion to the highest positions in your profession, simply mark and mail this coupon and we will tell you how you can do so. The fact that we have enabled hundreds of other railroad men to secure promotion in itself warrants your careful investigation of our plan if you really wish to better yourself. Don't let a postage stamp stand between you and a better position. **Mark and mail this coupon NOW.**

3889. Nov. 12—Authorizing Bell Telephone Co. to place its wires across G.T.R. tracks near Lawrence station, Ont.

3890. Nov. 12—Authorizing Guelph and Goderich Ry. to construct a bridge over Raccoon Creek, on its Listowel branch.

3891. Nov. 12—Authorizing Bell Telephone Co. to place its wires over G.T.R. tracks at Hensall, Ont.

3892. Nov. 12—Authorizing C.P.R. to operate its trains over the crossing of the G.T.R. in Milton, Ont., without being brought to a stop.

3893. Nov. 1—Extending time for filing and approval of North American Telegraph Co.'s tariffs of tolls to Mar. 1, 1908.

3894 to 3898. Nov. 5—Authorizing Bell Telephone Co. to place its wires across the Michigan Central Rd. and G.T.R. tracks at various places.

3899. Nov. 2—Authorizing Okotoks Electric Co. to place its wires over the Calgary and Edmonton Ry. at Okotoks, Alta.

3900. Nov. 2 — Authorizing Ingersoll Electric Light and Power Co. to re-erect five wires across C.P.R. Co.'s Port Burwell branch in town of Ingersoll, Ont.

3901. Nov. 5—Authorizing Knight Sugar Co. to erect electric light wires across Alberta Ry. and Irrigation Co.'s tracks at Raymond, Alta.

3902. Nov. 2—Authorizing London County Telephone Co. to place its wires across G.T.R. tracks near Ilderton station, Ont.

3903, 3904. Nov. 2—Authorizing Ingersoll Electric Light and Power Co. to re-erect three wires across C.P.R. siding, and three wires across C.P.R. Ingersoll branch in Ingersoll, Ont.

3905. Nov. 4 — Authorizing Manufacturers' Natural Gas Co. to lay a main under Toronto, Hamilton and Buffalo Ry. tracks in Hamilton, Ont.

3906. Nov. 4—Authorizing C.P.R. to construct a spur to the Nipissing Planing Mills Co.'s premises, Widdifield tp., Ont.

3907. Nov. 4—Authorizing C.P.R. Co. to construct a spur to the Moose Jaw Brewing and Malting Co.'s premises, Moose Jaw, Sask.

3908. Nov. 4—Authorizing the G.T.R. to construct bridge over the Huron River near Ste. Madeline, Que.

3909. Nov. 4—Authorizing C.P.R. to construct a bridge over Bras Est River, on its Nomining section.

3910. Nov. 4—Authorizing C.P.R. Co. to open for traffic the portion of its second track between Ft. William and Winnipeg, extending from Kaministikwia and Sunshine, mileage 23 to 28.8.

3911 to 3914. Nov. 5—Authorizing Bell Telephone Co, to place its wires across Michigan Central Rd. tracks at various points.

3915. Nov. 12—Authorizing Bell Telephone Co. to place its wires across G.T.R. tracks near Stevensville station, Ont.

December Birthdays.

Many happy returns of the day to—

A. H. Anderson, Cashier, Paymaster and Purchasing Agent, Quebec Central Ry., Sherbrooke, Que., born at Cookshire, Que., Dec. 19, 1859.

J. H. Barber, Engineering Department C.P.R., Montreal, Que., born at Cobourg, Ont., Dec. 20, 1856.

N. E. Brooks, C.P.R. Division Engineer, Calgary, Alta., born at Sherbrooke, Que., Dec. 25, 1866.

J. C. M. Buntzen, Managing Director British Columbia Electric Ry. Co., London, Eng., born at Copenhagen, Denmark, Dec. 16, 1859.

T. C. Burpee, Engineer of Maintenance of Way. Intercolonial Ry., Moncton, born at Sheffield, N.B., Dec. 11, 1852.

W. W. Butler, 1st Vice-President Dominion Car and Foundry Co., Ltd., born at Danville, Ohio, Dec. 9, 1862.

Capt. G. C. Coles, of F. W. Churchill & Co., C.P.R. Ticket Agents, Collingwood, Ont., born at Biddlestone Rectory, Wiltshire, Eng., Dec. 15, 1859.

P. E. Demers, Trainmaster Central Vermont Ry., Farnham, Que., born there Dec. 10, 1859.

W. N. Dietrich, Electrical Engineer C.P.R., Montreal, born at Perth, Ont., Dec. 23, 1872.

J. W. Donald, District Passenger Agent, Chicago and Alton Rd., Detroit, Mich., born at St. John, N.B., Dec. 22, 1857.

H. P. Dwight, President Great Northwestern Telegraph Co., Toronto, born at Belville, Jefferson Co., N.Y., Dec. 23, 1828.

R. Forget, M.P., President Richelieu and Ontario Navigation Co., Montreal, born at Terrebonne, Que., Dec. 10, 1861.

H. H. Gildersleeve, Manager Northern Navigation Co. of Ontario, Collingwood, born at Kingston, Ont., Dec. 15, 1865.

A. J. Gorrie, General Superintendent Canadian Northern Quebec Ry., Montreal, born at Raith, Kirkcaldy, Scotland, Dec. 10, 1868.

D. B. Hanna, President Quebec and Lake St. John Ry., Third Vice-President Canadian Northern Ry., Toronto, born at Thornliebank, Scotland, Dec. 20, 1858.

S P. Howard, General Freight Agent Eastern and Lake Superior Divisions C.P.R., Montreal, born there Dec. 30, 1865.

R. R. Jamieson, General Superintendent Western Division C.P.R., Calgary, Alta., born at Westover, Ont., Dec. 12, 1856.

B. B. Kelliher, Chief Engineer Grand Trunk Pacific Ry., Montreal, born in Ireland, Dec. 26, 1862.

W. Kennedy, Superintendent of Motive Power, Central Vermont Ry., St. Albans, Vt., born at Belleville, Ont., Dec. 23, 1869.

L. Macdonald, Division Freight Agent G.T.R., Toronto, born at Montreal, Dec 10, 1871.

J. T. McGrath, Master Mechanic G.T.R., Fort Gratiot, Mich., born at Toronto, Dec. 6, 1869.

L. McLean, Superintendent Sydney and Louisburg Ry., Glace Bay, N.S., born there, Dec. 10, 1867.

J. Niblock, Superintendent C.P.R., Calgary, Alta., born in York county, Ont., Dec. 21, 1849.

A. Price, General Superintendent Central Division, C.P.R., Winnipeg, born at Toronto, Dec. 6, 1861.

C. Schrieber, C.M.G., Consulting Engineer Department of Railways and Canals, Ottawa, Ont., born at Bradwell, Essex, Eng., Dec. 14, 1831.

F. P. Smith, Secretary Richelieu and Ontario Navigation Co., Montreal, born there, Dec. 23, 1873.

C. E. E. Ussher, Assistant Passenger Traffic Manager, C.P.R. Western Lines, Winnipeg, Man., born at Niagara Falls, Ont., Dec. 29, 1857.

H. H. Vaughan, Assistant to Vice-President C.P.R., Montreal, born at Forest Hill, Essex, England, Dec. 26, 1868.

W. Wood locomotive foreman, C.P.R., Megantic, Que., born at Montreal, Dec. 6, 1863.

C.P.R. Directors' Inspection Trip.

Sir T. G. Shaughnessy, President C.P.R., returned to Montreal Oct. 24, having completed his annual trip of inspection over the railway. Sir Thomas, accompanied by R. B. Angus, one of the directors, left Montreal Oct. 5 on a special train, and was joined at North Bay by E. B. Osler, M.P., and W. D. Matthews, two other directors resident in Toronto. The party was joined at Fort William by W. Whyte, Second Vice-President, and G. J. Bury, Assistant General Manager Western Lines. The whole of the main line and the terminal facilities were given a thorough inspection, and the new work in progress at the different points was gone over. In an interview at Montreal on his return Sir Thomas said the physical condition of the line from the Atlantic to the Pacific was excellent. With regard to the report of the contemplated acquirement of the Spokane International Ry., the matter, he said, was in the hands of the Soo people. It was not true that he had visited Spokane, as had been stated in press despatches. The talked of extension from Edmonton through the Yellow Head Pass also had never seriously been considered by the C.P.R., and nothing was being done in this connection at the present time, reports from the west to the contrary notwithstanding.

The Grand Jury at the recent Court of General Sessions in Toronto in their presentment expressed regret that they were unable to indict the civic officials whose duty it was to carry out the orders of the Railway Commissioners, as well as the railways, for the Bay St. crossing accident of May 24.

The C.P.R. is receiving a supply of water at the rate of 2,500,000 galls. a day at Winnipeg, with the completion of the first unit of the civic high pressure system. The company has had its own main from the high pressure plant, and has made all the necessary fittings. It pays 6½c. a thousand galls. for the water.

The American Railway Association's committee on car efficiency, report car surpluses and shortages as follows on Oct. 16 and 30: United States and Canada, Oct. 16, surpluses 4,258, shortages 85,764; Oct. 30, surpluses 3,946, shortages 90,757. Canadian lines alone, Oct. 16, surpluses 0, shortages, 5,452; Oct. 30, surpluses 43, shortages 8,091.

Works: TURCOT

RAILWAY DEVELOPMENT.

Projected Lines, Surveys, Construction, Betterments, Etc.

Algoma Central and Hudson Bay Ry.—The Superior Copper Co., Sault Ste. Marie, Mich., is constructing a three mile spur from Superior Mine station, mileage 38.4, to its mining property. Reports state that owing to the assignment, Nov. 5, of F. Perry, who is the largest stockholder in the Superior Copper Co., the work of construction will be suspended temporarily. (Sept., pg. 663).

Atlantic, Quebec and Western Ry.—About 500 men are engaged in the construction of the extension of this line from Port Daniel to Gaspe, Que. There is considerable difficulty, however, in getting a sufficient number of men on the work and the completion of the hundred miles from Paspebiac to Gaspe is not expected for a couple of years. C. B. K. Carpenter, Managing Director of the English construction company which is carrying out the work, has been inspecting the work done. (Oct., pg. 741).

Crow's Nest Southern Ry.—The extension under construction from Fernie to Michel, B.C., is 23 miles long. A recent report from Fernie stated that 51 cars of plant had been delivered and 200 men were at work upon the right-of-way. Another report states that it is intended to construct a line running northerly from Michel, through the valley of the Elk River, and Kanakas Pass to Calgary, Alta. (Nov., pg. 829).

Rapid progress is being made with construction on the extension from Fernie to Michel. At a point six miles from Fernie a new channel has been cut for the Elk River, and the old channel used as a roadbed, thus saving the necessity for two bridges. There are four crossings of the river on the line. Ties and rails are on hand for 20 miles of track, and this work will be proceeded with as fast as possible.

Erie, London and Tillsonburg Ry.—The Dominion Parliament will be asked at its current session for an act extending the time for the commencement and completion of the proposed line, and for other purposes. Dowler & Sinclair, Tillsonburg, Ont., are solicitors for the applicants.

Great Northern Ry. (U.S.) Lines in Canada.—Winnipeg press reports state that it is unlikely that anything will be done for some considerable time in the way of constructing terminals for this company in that city. Meantime the land purchased for terminal purposes and for a right-of-way into the city is lying idle.

The company has arranged to give up certain fore shore rights at Vancouver in order that the dredging which the city purposes to carry out at False Creek at a cost of $1,000,000 can be gone on with. (Nov., pg. 829).

Tracklaying is being proceeded with on the extension of the branch terminating at Walhalla, Minn., to Morden, Man., and it is expected to have a train service in operation early in Dec. The line is being constructed under the charter of the Midland Ry. of Manitoba.

Hudson's Bay-Pacific Ry.—The London, Eng., correspondent of an Edinburgh, Scotland, paper says the possibilities of the Hudson Bay route are attracting a great deal of attention, and a group of London financiers is understood to have a scheme in view to test the feasibility of the strait and bay route as a commercial outlet to Europe. The prospective port on Hudson Bay is Fort Churchill, and it is to that point that this and other railway companies planning railways to connect existing lines in Canada with Hudson Bay are being surveyed. (Nov., pg. 829).

Intercolonial Ry.—Tenders are under consideration for the construction of the following buildings: Sand house at Chaudiere Jct., Que.; car cleaners' building, Riviere du Loup, Que.; brick oil house, car inspectors' building, switchman's shanty and car cleaners' building, Ste. Flavie, Que.; coaling pockets and sand house, Campbellton, N.B.; coaling pockets, Newcastle, N.B.; car cleaners' building, coaling pockets and sand house, St. John, N.B.; car cleaners' building, Moncton, N.B.; car cleaners' building, Pictou, N.S.; sand house, Stellarton, N.S.; diversion of Leper Brook, bridge masonry, sand house and car cleaners' building, Truro, N.S.; 80,000 gal. water tank, sand house, car cleaners' building, fitters' and carpenters, shop and store building at Halifax, N.S.

The men employed on the second track work between Moncton and Painsec Junction, N.B., have given up work owing to their wages being in arrear, and it was reported that the contractors, J. B. MacManus Co., Limited, intended abandoning the work. The wet summer and the increased cost of labor, etc., is said to have interfered with the carrying out of the work, and to have cost the contractors a lot of money.

The freight shed at Campbellton, N.B., was destroyed by fire, together with its contents, Nov. 1, the total loss being put at $30,000. (Oct., pg. 741).

International Ry. of New Brunswick.—Tracklaying is reported to be in progress at the St. Leonard's end of the line, and grading is going on from both ends. About 600 men are reported to be at work on the line. (Sept., pg. 663).

Interprovincial Ry. Bridge Co. of New Brunswick.—Application will be made next session of the Dominion Parliament for an act amending the act of incorporation of 1904, so as to extend the time for the commencement and completion of the bridge and other works authorized to be constructed. J. McAlister, Campbellton, N.B., is solicitor for the applicants. The company was incorporated in 1904, and a proposal was made to the Dominion and Provincial Governments with a view of obtaining subsidies towards the cost of construction of a combined railway and traffic bridge. Nothing, however, has been done in the way of construction. The proposed bridge will be 3,300 ft. long, in addition to the approaches, and will cross the Restigouche River at Campbellton. There will be 16 piers and abutments, which will be of concrete, the superstructure being of steel. The bridge when constructed will connect the Atlantic, Quebec and Western Ry. (originally the Baie des Chaleur Ry., and latterly operated as the Atlantic and Lake Superior Ry.), and the International Ry. of New Brunswick. Three sites have been examined by a committee of engineers, and a report will be made to the Department of Railways at an early date. (Nov., pg. 829).

Kent Northern Ry.—The season's work on the roadbed has been completed, and the line is reported to be in an excellent condition. A large number of new ties have been put in, and much ballasting done. The roundhouse at Richibucto, N.B., has been given a general overhaul.

Little Nation Ry.—A meeting of shareholders was held at St. Andre Avelin, Que., Nov. 7, when directors were elected, and preliminary steps authorized with a view to the construction of the projected line. J. P. Belanger is President, and J. A. Gadoury, Secretary of the company, and its offices are at Cheneville, Que. (Aug., pg. 561).

Minnesota and International Ry.—A regular train service is being operated to International Falls, Minn., opposite Fort Frances, Ont. The work of ballasting and otherwise completing the line is being gone on with rapidly. (Nov., pg. 829).

Moncton and Buctouche Ry.—G. Brown, C.E., and T. M. Burns, M.L.A., the commissioners appointed by the New Brunswick Government to inspect the branch railways in the province, went over the line Nov. 8. They found the line in good condition, and will make a lengthened report to the Government. The commissioners have been authorized to inspect all the branch lines in the province with a view to the Dominion Government being asked to take them over from the local companies.

Newfoundland Short Line.—H. C. Thomson, J. C. Bruce, and H. V. Mostyn, are engaged in making a survey across Newfoundland from the south-west arm of Green Bay, for a railway in connection with the project for a fast steamship line across the Atlantic ocean, with a connecting steamship line to Canada. The possibilities of Bonne Bay as the western terminus of the line are being investigated. (July, pg. 495).

The Pere Marquette Rd. Co. is considering plans for the enlargement of its yards in London, Ont. The proposal includes the construction of a large roundhouse in the southern part of the city, and the throwing of the site of the present one into the yards. (July, pg. 481).

Prince Edward Island Ry.—Tenders are under consideration for the erection of an 80,000 gal. water tank and a pipe house at Charlottetown. (Aug., pg. 563).

Saskatoon, Saskatchewan, Peace River and Dawson Ry.—A U.S. press report says this enterprise is backed by U.S. capital, and that work will be started as soon as the charter is granted by Parliament. The present plans include the obtaining of running rights over the Canadian Northern Ry. from Winnipeg to Langham, Sask., at which point construction of the new line would start. (Nov., pg. 831).

Temiskaming and Northern Ontario Ry.—The commissioners have decided that tracklaying and other work, usually suspended at the beginning of Dec., will be carried on this year as long as possible. The building of a new station and a spur line at the south end of Haileybury, Ont., are under consideration.

Vancouver Island and Eastern Ry.—The Dominion Parliament will be asked at its current session to pass an act incorporating a company with this title to construct a railway from Victoria to or near Seymour's Narrows, Vancouver Island, and from near Seymour's Narrows on the mainland of B.C., easterly through the Yellowhead or some other pass to Edmonton, Alta., with authority to establish a railway ferry service across Seymour's Narrows, and to construct the necessary wharves, docks, etc. It is also desired to have authority to develop electrical energy and to distribute the same within British Columbia and to effect junctions with any other line of railway. R. C. Lowe, Victoria, B.C., is solicitor for the applicants.

Winnipeg City Power Line—Tenders are under consideration for one second-hand, single track, through truss, steel railway bridge, 155 to 165 ft. single span. The bridge is required to carry a 10-wheel locomotive having a rigid wheel base of 14 ft. 10 in., and followed by a rolling load of 3,000 lbs. per lineal foot of track. C. B. Smith, the consulting engineer, has recommended the acceptance of the bulk tender of the Anglo-Canadian Engineering Co., of London, Eng., for the construction of the power plant, and the matter is under consideration. (Nov., pg. 831)

The council decided to accept the tender of the Anglo-Canadian Engineering Co., but the Mayor vetoed the proposition. In explanation of his stand the Mayor says that the council will secure legislation to enable it to place the city's bonds on the London, Eng., market, where a better price could be obtained than that offered by the contracting company.

POLSON IRON WORKS LIMITED, TORONTO

Alberta Ry. and Irrigation Company.

Following is the 3rd annual report presented at the shareholders' meeting in London, Eng., Nov. 6:

The accounts for the year ended June 30, 1907, show the following:

REVENUE.

Balance from July 1, 1906		$37,495.35
Revenue from colliery, railways, canals, profit on land sales, etc.		247,435.37
		$284,930.72
Deduct interest on prior lien debenture stock	$44,673.44	
London expenses (including directors' fees, London and Canada)	16,855.31	
Interim payment of 2% on the 5% debenture stock made July 1, 1907	65,000.00	
Final payment of 3% on the 5% debenture stock made Oct. 21, 1907	97,500.00	
		224,028.75
Surplus		$60,901.97

The coal sales were 122,947 tons, against 199,824 tons for the previous year, the decrease of 76,877 tons being due to the strike, which ended in Dec. The gross earnings of the railway were $197,608.09, as compared with $182,796.51 for the previous year. During the year the land sales aggregated 213,845 acres and realized $1,114,776.45, the average price being about $5.21 an acre. The sales comprised 33,076 acres covered by the trust deed for debenture stockholders and 180,769 acres, formerly the property of the Canadian North-West Irrigation Co., and free from the trust. Of the lands sold, 2,228 acres were irrigable and 211,617 non-irrigable; the average price for irrigable lands being $18 an acre and for non-irrigable lands $5.08 an acre. The company also sold during last year 25,120 acres in which it has an interest with the C.P.R. Co., the company's proportion of profit on the 25,120 acres being equal to about $2.23 an acre. The estimated net profit resulting from all the above sales and from town lots sold during the year, amounts to $349,523.35, but only the profit received in cash from sales of lands free from the trust (after deducting all the commissions and land expenses for the year), viz., a net sum of $8,640.72, is included in the present revenue account, the balance being placed to reserve to be dealt with as the outstanding instalments are received. The total amount in reserve in connection with sales of the company's lands is now $609,792.58, and in connection with the sales of C.P.R. lands $166,552.00; total, $776,344.58. On June 30 last, the company had 548,347 acres remaining unsold. It also owns many lots in the city of Lethbridge and in the town of Raymond. The receipts for the year from water rentals were $18,969.78, against $16,062.87 for the previous year.

During the past year the company's business was very seriously affected by the miners' strike. Now that this is happily ended the coal sales should improve, as the demand for the company's coal exceeds the present supply, but the prevailing scarcity of labor renders it very difficult to increase and maintain the output at a satisfactory figure. The railway earnings, which were also adversely affected by the strike, should, with everything going smoothly, show a marked increase in the future. The land business for the past year, as shown by the figures given above, was very satisfactory. Since the end of June the company has completed further sales of considerable importance. The demand for lands wholly depends upon immigration and on the crops raised, and in both these particulars the results have been very gratifying. Since the C.P.R. has made Lethbridge a divisional point, the importance of the city has greatly increased. Notwithstanding the strike, which has deprived the common stock of any dividend for the past year, the directors consider the company's affairs to be in a most satisfactory condition. In accordance with the Railway Act of Canada, the directors retire from office, and offer themselves for re-election, viz.: E. T. Galt, Col. K. R. B. Wodehouse, A. M. Nanton, W. Burdett-Coutts, M.P., E. S. Clouston, J. H. Dodgson, J. Galt, W. M. Ramsay, and E. Waterhouse.

ASSETS.

PROPERTY ACCOUNT—			
Colliery, railw'ys, lands, canals, etc., as at June 30, 1906		$7,212,138.01	
Add expenditure on canal extension, colliery betterm'nts, etc., during the year		133,911.60	
		$7,346,049.61	
Less cost of land and amount realized from narrow gauge equipment sold during the year		909,775.89	
			$6,436,273.72
Stores on hand			70,902.39
Amounts owing to the company—			
For land		2,533,201.62	
Less mortgages sold with the company's guarantee..$120,448.16 C.P.R. land agency a/c..168,826.03		289,274.19

REVENUE ACCOUNT—			
Bal. at June 30, 1906	$144,725.35		
Less final payment of 3% on 5% debenture stock for the year ending June 30, 1906	97,500.00		
	$47,225.35		
Less direct'rs' fees for year ended June 30, 1906	9,730.00		
		$37,495.35	
Add balance of revenue account for the year		185,906.62	
		$223,401.97	
Less interim payment of 2% on the 5% debenture stock, declared May 27, 1907, and made on July 1, 1907		65,000.00	
			158,401.97
			$9,493,534.15

REVENUE ACCOUNT.

Net revenue from colliery, railways, canals, land sales, etc	$247,016.55
Interest, transfer fees, etc	418.82
	$247,435.37
To London expenses (including directors' fees, London and Canada)	$ 16,855.31
Interest on prior lien debenture stock	44,673.44
Balance carried to balance sheet	185,906.62
	$247,435.37

The President, E. T. Galt, in moving the adoption of the report, dealt with the principal balance sheet items, and said: On the debit side there is Dominion Government $533,373, which is owing to the purchase some years ago of 500,000 acres of land for $500,000, payable in 10 equal annual instalments with interest at 5% per annum. The next sundry creditors, $397,164, consists principally of debenture interest since paid and outstanding accounts and wages. Land suspense account, $776,344, is a profit account to be realized as purchasers of land pay their annual instalments. Everything above $4 an acre, the inventory price, has been taken as profit. The property account appears at $6,436,273. This account last year showed $7,212,000, the reduction having been caused by land sales principally. The $2,243,927 owing to the company is from purchasers of land, and payable in annual instalments with interest at 6% per annum. Revenue account, $247,435. But for the miners' strike the profit would have been not less than $375,000, this estimate being based up on last year's volume of business. The prosperity of the company depends upon immigration and good crops, and in both respects last year was a satisfactory year for us; in fact, the crops were better last year than they have ever been before. The yield was larger, and the price paid for the grain was higher. The interests on amounts owing by land purchasers now amounts to over $130,000 a year, which is equal to over 60% of our fixed charges on the interest we have to pay on our debenture stock, which is now about $200,000 a year. That leaves only $70,000 a year to be earned by the railway, colliery and other properties. The financial position of the company is in very satisfactory shape.

As to the present business of the company, owing to the scarcity of labor, the colliery output is only about 800 tons a day, while our maximum capacity is 1,400. The management hope to be able to raise the output to the maximum figure before Christmas, when we hope to have a ready sale for that quantity; in fact, we could sell more if we had it. In connection with the increase of our output, which is absolutely necessary for the best interests of the company, we are now testing our coal lands with a diamond drill, and so far the tests have been very satisfactory. We hope that we shall be in a position to commence the sinking of a new shaft by next spring. It will take a year or a year and a half to finish it, and the cost complete will be about $250,000. The principal labor difficulty we have to contend with is not the getting of ordinary labor, but the securing of skilled labor to operate our coal-cutting machines. We cannot get men who are already trained for that work; we have to educate new men to it, and it takes a lot of time, but we are increasing the output gradually. As the report shows, the land sales last year were very satisfactory, and I may say that between July 1 last and the end of October, according to advices which we have received by cable, we have sold 100,000 acres of additional land, which will bring in about $550,000 further—that is, in addition to the figures which appear in the printed account. I do not expect, however, that the sales will continue at this pace in the immediate future, because money has become very scarce in the United States, and it is from there that we derive our settlers. I do not think that the sales of land will be so active until things improve a bit. The net profits of the company, exclusive of land sales, from July 1 to October 31, are estimated at $116,660—that is exclusive of land sales for four months. That is at the rate of $448,000 a year, exclusive of land sales. If that goes on, as we have every reason to believe and expect it will, we will hope to place the shares of the company on a dividend paying basis this time next year, or before that time. I have very little doubt about that at all. On the whole, I think the position of the company may be regarded as being very satisfactory.

As I have not had the pleasure of meeting you for two years, I will give you my per-

sonal ideas with regard to the value of the capital investment of the company based upon the present conditions. We will take first of all the land part of the business of the company. We have mortgages, or rather amounts due by purchasers of land, to the extent of $2,250,000. We have 50,000 acres of irrigable land saleable at, say, $20. That is our minimum selling price for irrigable land; in fact, we are getting far more than $20 at present. That would make $1,000,000. Then we have 500,000 acres of farm lands, which we have put down at our minimum selling price of $5 an acre. That is $2,500,000; and then we have a great variety and an immense number of town lots in Lethbridge and other towns, besides property adjoining Lethbridge, which is most valuable. That property, together with our interest in the C.P.R. lands, we put down as being worth perhaps $450,000. The items that I have mentioned will sum up approximately to $6,200,000, against a debenture interest outstanding—prior liens and 5% of $4,250,000. That would leave a surplus from our land assets only of approximately $2,000,000, besides our railways, colliery, coal lands, canal system, and last, but not least, our irrigation franchises, to represent our share capital outstanding, which is $3,250,000. I am not going to place a specific value on those assets; I am merely going to say that beyond all question they are worth far more than the par value of our stock which is outstanding. More than that, I may say that in so far as our capital investment is concerned, it is an improving property, both as regards capital value and also as regards revenue. In making these estimates I have assumed that our cash liabilities in the accounts before you are offset by our bank balances, liquid inventories and things of that kind. I do not think I am very far astray in making that computation. Before concluding my remarks I wish to refer to the death of Alex. Young, which has occurred since we last met, and to say how much the original proprietors owe to that gentleman for having been instrumental in reorganizing the affairs of the company some years ago, when it was a question of life or death to our interests. I take pleasure in testifying to the valuable services rendered by Mr. Naismith, general manager, and by our colliery superintendent, Mr. Hardie, during the miners' strike. On the other hand, I regret to have to say that we have lost the services of our land commissioner, Mr. Magrath, who has resigned his position. He has been in charge of the company's lands and irrigation since 1885, and to judge by present results his management has proved very satisfactory.

The directors were re-elected, the composition of the board for the current year being as follows: President, E. T. Galt, Montreal; Vice-President, Col. K. R. B. Wodehouse, London, Eng.; Managing Director, A. M. Nanton, Winnipeg; other directors: W. Burdett-Coutts, J. H. Dodgson, E. Waterhouse, London, Eng.; E. S. Clouston, W. M. Ramsay, Montreal; J. Galt, Winnipeg.

Quebec and Lake Huron Ry. Promotion.

An action has recently been tried in London, Eng., in which Viscount Frankfort de Montmorency claimed to recover £200 from J. F. W. B. Taylor, a financier. The plaintiff's counsel stated that his client's services were desired in connection with the Quebec and Lake Huron Construction Co. It seemed to have been suggested that the plaintiff should become a director of the company and apply for 250 shares as a qualification. Plaintiff agreed and gave Taylor a cheque for £200 in respect of deferred shares. The £250 for qualifying shares was repaid to the plaintiff when the company failed to be formed. Plaintiff said he paid £200 for deferred shares, but never got them. For the defence, it was said defendant was to have one-third of 8,000 of the deferred shares, and plaintiff was to participate to the extent of a half, and if the scheme did not go through the £200 would be lost. Defendant said it was arranged that plaintiff should go to Canada to assist in obtaining subsidies, as the crux of the whole thing was that to be made attractive to the English public the subsidies should be confirmed by the Dominion Government. He had seen Sir Wilfrid Laurier on the matter; but, like other Prime Ministers, when you get to close quarters, he was very wary as to what he said. Justice Darling, in delivering judgment, said it seemed to him it was something in the nature of a gamble. There must be judgment for the defendant.

Canadian Northern Ry. Earnings, etc.

Gross earnings, working expenses, net profits, increases or decreases over 1906-07, from July 1, 1907:

	Earnings.	Expenses.	Net Earnings.	Increase or Decrease.
July..	$1,024,300	$ 662,300	$ 362,000	$420,500+
Aug..	835,600	619,200	216,400	240,700+
Sept..	758,300	549,200	209,100	133,900+
	$2,618,200	$1,830,700	$ 787,500	$ 795,100+

Approximate earnings for Oct., $931,200, against $815,100 for Oct., 1906.

C.P.R. Earnings, Expenses, etc.

Gross earnings, working expenses, net profits, increases or decreases over 1906-7, from July 1, 1907:—

	Earnings.	Expenses.	Net Profits.	Increase or Decrease.

Approximate earnings for Oct., $7,036,000, against $6,918,000 for Oct., 1906.

DULUTH, SOUTH SHORE AND ATLANTIC RY.—Gross earnings for Sept., $309,792.43; net earnings, $92,551.89; against $291,707.73 gross and $108,009.30 net for Sept., 1906. Net earnings for three months ended Sept. 30, $308 837.56, against $349,666.46 for same period 1906. Approximate earnings for Oct. $296,007, against $294,288 for Oct., 1906.

MINERAL RANGE RY.—Gross earnings for Sept., $67,869.95; net earnings, $13,758.68, against $62,217.72 gross and $15,526.90 net for Sept., 1906. Net earnings for three months ended Sept. 30, $50,560.47, against $60,100.00 for same period 1906. Approximate earnings for Oct., $71,910, against $69,340 for Oct., 1906.

MINNEAPOLIS, ST. PAUL AND SAULT STE. MARIE RY.—Gross earnings for Sept., $1,049,133.65; net earnings, $400,643.64; against $1,293,528.63 gross and $742,460.48 net for Sept., 1906. Net earnings for three months ended Sept. 30, $1,175,335.52, against $1,772,083.00 for the same period 1906. Approximate earnings for Oct. $1,346,090 against $1,274,743 for Oct., 1906.

Grand Trunk Ry. Earnings, Expenses, etc.

The following figures give the earnings of the G.T.R., the C. A. R., the G. T. Western Ry., and the D. G. H. & M. Ry., separately, for Aug., as compared with Sept., 1906:

GRAND TRUNK RAILWAY.

	1907	1906
Earnings	$3,091,100	$2,928,000
Expenses	2,231,700	1,998,000
Net earnings	$ 859,400	$ 930,000

CANADA ATLANTIC RAILWAY.

Earnings	$ 207,200	$ 192,800
Expenses	191,200	162,000
Net earnings	$ 16,000	$ 30,800

GRAND TRUNK WESTERN RAILWAY.

Earnings	$ 591,300	$ 539,200
Expenses	478,150	454,800
Net earnings	$ 113,150	$ 84,400

DETROIT, GRAND HAVEN & MILWAUKEE RY.

Earnings	$ 160,300	$ 152,600
Expenses	125,200	109,500
Net earnings	$ 35,100	$ 43,100

Approximate earnings for Oct., $4,168,500, against $3,892,357 for Oct., 1906.

Railway Finance, Meetings, etc.

Algoma Central and Hudson Bay Ry.—There is some discussion at Sault Ste. Marie, Ont., as to the future of this railway, and the suggestion is made that the Ontario Government take over the line and complete it as a Government undertaking as far north as a junction with the G.T. Pacific Ry.

Atlantic and Lake Superior Ry.—A special meeting of the holders of certificates of participation in the A. and L.S. Ry. Trust Fund, was held in Montreal, Nov. 6, for the execution of the agreements prepared by the management for the acquisition of certain claims against the Baie des Chaleurs Ry., and the A. and L.S. Ry., and to issue certificates of participation as may be stipulated in such agreements.

Canada Atlantic Ry.—Following are the officers and directors for the current year: President, C. M. Hays; Vice-President, E. H. Fitzhugh; Secretary and Treasurer, F. Scott; other directors: W. H. Biggar, K.C.; W. Wainwright, J. W. Loud, R. S. Logan. The annual meeting of shareholders was held at Ottawa Oct. 24, and was of a formal character. One of the objects of the meeting according to the notice was to pass a resolution amalgamating the company with the G.T.R.

The action of H. S. Sprague, of New York, against J. R. Booth, to recover $2,250,000 for alleged breach of contract in connection with sale of the Canada Atlantic Ry., was heard at the assize court at Ottawa, Nov. 5, and judgment has been reserved. The amount is made of $250,000 deposit paid on the contract, and $2,000,000 damages for the breach. The plaintiff is the assignee of the original contract, which was made in 1902 with A. Meyer, of New York, who subsequently assigned the contract to Dr. W. Seward Webb, who later assigned it to Sprague. The deposit of $250,000 was paid Mar. 15, as security that the agreement would be carried out, the purchase money $10,000,000 was to be ready June 2, but it was not forthcoming, and the railway was subsequently sold to the G.T.R. for $14,000,000. Mr. Booth in his evidence stated that he told the solicitor for the original holder of the agreement on June 3, 1902, that if he could show evidence of means he would be given time and opportunity to carry out the contract. Mr. Regemsburger, the solicitor referred to, denied this. The contention of the plaintiff is that time was not the essence of the contract.

Crow's Nest Coal Co.—G. G. S. Lindsay, K.C., heretofore General Manager, has been elected President, succeeding Hon. G. A. Cox, and is succeeded as General Manager by J. D. Hurd, Mining Engineer, Duluth, Minn. R. M. Young has been appointed Secretary.

Cumberland Ry. and Coal Co.—It is understood that negotiations are in progress with the Dominion Iron and Steel Co., for the sale by the C.R. and C.C. of its coal areas at Port Morien, N.S. The coal lands cover an area of thirteen square miles, and some amount of development work has been done.

Application will be made next session of the Dominion Parliament for an act increasing the borrowing powers of the company, and its powers of holding real and personal property, and confirming a mortgage in favor of the Royal Trust Co., as trustee for bondholders, and the securities issued or to be issued thereunder.

A meeting of shareholders has been called for Dec. 13, for the purpose of approving of the application to Parliament for power to increase the company's borrowing powers, confirming a mortgage to the Royal Trust Co., and for other purposes.

Esquimalt and Nanaimo Ry.—Action is being taken against three settlers on the E. and

355 Carlton Street, Winnipeg; J. F. Porter, Manager.

N. Ry. lands to prevent them taking out coal. The question of the right of the settlers on these lands was in the courts for some years, and it was understood that the recent decision of the Imperial Privy Council had effectually settled the matter in favor of the settlers. The Dunsmuir estate, which is part owner with the C.P.R. of a portion of the lands, is raising the point of the right to mine coal. This point appears to arise principally on account of actual settlers transferring their lands to other owners or companies for mining purposes.

Great Northern Ry., U.S.—The St. Paul, Minneapolis and Manitoba Ry., which has been operated by the G.N.R. since 1890, under a lease for 999 years, has been purchased, the consideration being $35,000,000. The properties in Manitoba will be taken over subject to encumbrances. Deeds have also been filed at St. Paul, covering the sale to the G.N. Ry. of the other subsidiary lines of the company in Minnesota.

Guelph Junction Ry.—Total revenue for three months ended Oct. 31, $12,569.28; operating expenses, $7,541.58; net earnings, $5,027.70.

Intercolonial Ry.—The Minister of Railways in a speech at Campbellford, Ont., recently said the Intercolonial Ry. had not been built as a business proposition, but he might say that the present year would show a profit of hundreds of thousands of dollars. If he found upon inquiry that the branch lines in the Maritime Provinces, at present owned by separate companies, would be better run by the Government, he would suggest that they be leased, and although millions of dollars had been expended by the Government upon transportation, it would be necessary to spend millions more in order to afford the transportation facilities demanded by the people.

The report of the Minister of Railways for the nine months ended Mar. 31, contained statistical information as to the operations of the Intercolonial Ry. for that period. The gross earnings amounted to $6,248,311, exclusive of $45,440 received from the Dominion Atlantic Ry. as rental for the Windsor branch. The expenses were $6,030,171 for the Intercolonial Ry., and $15,425 for the Windsor branch. The Intercolonial Ry. produced a profit of $218,139.17 and the Windsor branch a profit of $30,015.20. There was added to the capital account during the nine months $1,506,209.26, making the total expenditure on account of capital $82,744,937.89. The accounts for the line are now kept according to the practice of the C.P.R., the G.T.R., and the principal lines in the U.S., consequently the usual comparisons with the figures of the previous year are not given. The revenue account shows: Passenger earnings, $1,952,438.88; freight earnings, $4,032,745.00; mail and express earnings, $235,039.88; miscellaneous earnings, $28,087.24; total, $6,248,311.00. The expenditure was distributed under the following heads: Maintenance of ways and structures, $1,111,886.68; maintenance of equipment, $1,180,521.16; conducting transportation, $3,485,224.83; general expenses, $147,537.16; rental of leased lines, $105,000; total, $6,030,171.83; leaving net earnings of $218,139.17. Engine mileage, 6,810,418 miles; train mileage, 5,069,575 miles; car mileage, 61,236,603 miles; gross earnings per mile of railway, $4,313.29; per engine mile, $0.91.75; per train mile, $1.23; per car mile, $0.10.20; passengers carried, 2,044,847, of whom 391,721 were through passengers; freight carried, 2,606,073 tons, of which 1,996,869 tons was local and 609,204 tons through freight. Eight locomotives were condemned; 23 locomotives were purchased on capital account, and two on revenue account. Attention is called to the cost of special train service for the European mails which for the nine months under review cost about $50,000. The Deputy Minister expresses an opinion that in the future Post Office Department should defray the cost, as an item which it would certainly have to meet were the Intercolonial a private instead of a national road.

Merchants' Dispatch Transportation Co.—This forwarding company, which was organized in 1856, it was announced at Milwaukee, Wis., Oct. 30, had been acquired by the New York Central and Hudson River Ry. Co. The company's offices were at 350 Broadway, New York City, the officers being: Vice-President and General Manager, W. B. Pollock; Traffic Manager, Carl Howe; Manager Car Shops, R. H. Parks, Despatch, N.Y.; Auditor, R A White; Freight Claim Agent, W. Goepfert; Cashier, T. Keese; Car Accountant, C. O. Munn; General Foreign Agent, H. Gee; General Eastern Agent, R. J. Menzies. The company owns 5,994 box and refrigerator cars. Since the foregoing was written, Mr. Howe has received another appointment. See page 907.

Montreal Warehousing Co.—The entire issue of $1,000,000 first mortgage 4% gold bonds, dated April 1, 1906, and due April 1, 1936, has been listed on the Montreal Stock Exchange. The bonds are in coupon form in denominations of $1,000 or £205, 15s. 3d., and semi-annual interest is payable at the G.T.R. fiscal agency in London, Eng., or at Montreal. This issue forms the only lien upon all the G.T.R. terminal storehouses and elevators, by which company the principal and interest are unconditionally guaranteed.

Ontario and Quebec Ry.—The regular interest for the half-year, due Dec. 1, on the 5% debenture stock, and the half-year's interest on the common stock at the rate of 6% per annum, will be paid by the Bank of Montreal, at the C.P.R. offices, Montreal or London, on and after Dec. 2.

Prince Edward Island Ry.—The report of the operations of this railway for the nine months ended Mar. 31, are given in the report of the Department of Railways just issued: Gross receipts, $215,434.97; working expenses, $283,148.50; loss, $67,713.53. The capital account shows a total expenditure of $7,307,299.21, an increase of $91,710.52, of which $70,316 was for increased accommodation at Charlottetown. Passengers carried, 232,371, producing $97,750.52; freight carried, 67,144 tons, producing $98,657.07; mails and sundries produced $19,027.38. Engine mileage, 344,050 miles; train mileage, 252,292 miles; car mileage 1,463,186 miles. Working expenses, per train mile, $1.12.23, and per mile of railway, $1,060.48. Receipts per mile of railway, $806.87.

Stanstead, Shefford and Chambly Ry.—At the annual meeting of shareholders at Waterloo, Que., Nov. 13, the usual formal business was transacted. The company line is operated by the Central Vermont Ry. under a lease for 99 years and no separate report is issued. Following are the officers and directors for the current year: President, Hon. S. W. Foster; Vice-President, E H. Fitzhugh; other directors: Hon. E. C. Smith; C. M. Hays, G. C. Jones, A. H. Moore, G. E. Robinson, J. P. Noyes, G. Stevens; Secretary-Treasurer, C. H. Parmelee; Assistant Secretary-Treasurer, W. H. Chaffee.

Temiskaming and Northern Ontario Ry.—Judgment has been reserved in the suit brought by Gillies Bros. against the commissioners of the T. and N.O. Ry. to recover $24,000 for damages done to timber limits during 1906, by sparks from the locomotives. Judgment has also been reserved in the action for $91,000 for damages caused to the same limits during 1905.

Gross earnings for July, $80,046; working expenses, $59,075; net earnings, $20,971, against $12,012 for July, 1906.

Receipts for Aug. $82,457, against $77,457 for Aug. 1906. Working expenses, $62,813.

Vancouver, Victoria and Eastern Ry. and Navigation Co.—At a meeting of the shareholders of the Victoria Terminal Ry. and Ferry Co., a resolution was passed transferring to the V.V. and E. Ry. and N. Co. the line on the mainland between Port Guichon and New Westminster. The shareholders of the Vancouver, Westminster and Northern Ry. have authorized a transfer of its line between Westminster and Vancouver to the V.V and E. Ry. and N. Co. These lines have been operated since their construction in connection with the Great Northern Ry., U.S., giving that company an entrance into Vancouver, and a ferry connection with Vancouver Island.

Vancouver, Westminster and Yukon Ry.—The transfer of the Westminster-Vancouver line to the Vancouver, Victoria and Eastern Ry. and Navigation Co. does not affect the other charter powers of the company, viz., the construction of a line from Vancouver to Dawson City

Victoria Terminal Ry. and Ferry Co.—See Vancouver, Victoria and Eastern Ry. and Ferry Co

Development of the Locomotive Engine.

This is the title of a well-illustrated volume of 668 pages, by Angus Sinclair, originally a Scottish locomotive engineer, for many years resident in the U.S., and publisher of Railway and Locomotive Engineering. It is issued at $5 by the Angus Sinclair Publishing Co., New York. The volume gives a history of the growth of the locomotive from its most elementary form, showing the gradual steps made toward the developed engine, with biographical sketches of the eminent engineers and inventors who nursed it on its way to the perfected form of to-day. The volume is divided into 33 chapters, and the author states that he has been 30 years collecting material for the work. He has succeeded in getting together from Europe and America a great deal of valuable and curious information respecting the railway locomotive and its development. It is written in a popular style, and is a book which can be read with interest and profit by every person, whether a mechanical expert or an outsider. A special chapter is devoted to railway development in Canada, and the power used thereon from the old St. John's-Laprairie Ry. in Quebec, to the present line. This chapter is written by G. S. Hodgins, son of J. G. Hodgins, of the Ontario Education Department, Toronto, and at one time connected with the C.P.R. Mechanical Department.

The Railway Y.M.C.A. is considering proposals for the establishment of branch associations at Moncton, N.B., and Hamilton, Ont.

The C.P.R. put on a new train to run between Toronto and Ottawa Nov. 25. There will be one train a day each way, leaving each city at 10.45 p.m., and reaching its destination at 7 a.m.

The Algoma Central and Hudson Bay Ry. Co.'s steamboat Paliki loaded a cargo of 2,000 tons of pig iron from the Atikokan blast furnace, Port Arthur, Ont., Nov. 5, for the steel rail mills at Sault Ste. Marie, Ont.

It is proposed on behalf of railway employes to ask the Dominion Parliament next session to amend the act passed last session dealing with labor disputes, commonly referred to as the Lemieux Act, by exempting them from the clause prohibiting strikes during investigations under the act.

Makers of highest grades Crucible Steels

GENERAL OFFICE: 133 READE ST., New York City.

BOSTON PHILADELPHIA CHICAGO PITTSBURG

Canadian Northern Ry. Construction, Etc.

Canadian Northern System Terminals, Ltd.—A company with this title has been incorporated under the Dominion Companies Act, with a capital of $2,000,000 and offices at Montreal, for the purpose of constructing railway terminals and everything connected therewith; hotels, parks, elevators, flour mills, smelters, power houses, etc., and to engage in mining, lumbering, the development of electric energy, shippers and forwarders and a variety of other businesses. The provisional directors are all connected with Mackenzie, Mann & Co.'s offices, or with the C.N.R.

Canadian Northern Quebec Ry.—The grading on the cut-off from near Garneau Junction to Quebec city is reported to be completed to within a few miles of the latter point. The substructures of the smaller bridges and most of those for the larger bridges have been completed. The steel for the superstructures is being delivered, and as soon as the bridge work has sufficiently progressed tracklaying will be gone on with. The contractors are O'Brien and Mullarkey.

Canadian Northern Ontario Ry.—The route for the company's projected line from Ottawa to Toronto has been approved by the Minister of Railways, for the portion between Toronto and Verona. With Toronto as a starting point the line runs up the Don Valley to East Don, and under the G.T.R. to the end of the York yards, passing in front of Scarboro cliffs. From there it goes north of Oshawa and Bowmanville along the height of land to Orono, 45 miles from Toronto. It skirts Port Hope and runs into Cobourg. Crossing the G.T.R. near Brighton it takes in Trenton and Belleville, and goes up the Salmon River to Verona. The route which the company desires to follow from this point goes on to Portland, runs south of Rideau Lake and Smith's Falls. The company has served notices of expropriation on property owners affected, for a new highway running from Rosedale Ravine Drive to Bay View Ave., which it is to construct under agreement with the city in return for rights over Bay View Ave. Several of the property owners have taken steps to fight the expropriation proceedings.

The Canadian Northern Ry. is erecting large freight sheds at Humboldt, Sask.

Grading on the new line into Regina, Sask., was expected to be completed by the end of Nov., and the tracklaying gang was following up closely. The track is expected to be laid into Regina early in Dec. The empty construction trains are being utilized to carry wheat out. The new line extends from Brandon, Man., crossing the Hartney-Virden branch at Scarth, and runs directly to Regina, where it effects a junction with the Qu'Appelle, Long Lake and Saskatchewan Ry., acquired by the company in 1906.

Construction on the line from Saskatoon to Goose Lake, Sask., is being proceeded with, and recent reports state that nearly 20 miles of grading has been completed from about 10 miles out of Saskatoon. The question of the entrance into Saskatoon was decided Nov. 11, and work was immediately started on the right-of-way in the city as well as at various points on the 10 mile gap. The route of the line from Dalmeny to Saskatoon, 15 miles, and from mileage 17 south of Saskatoon to the south-west of Goose Lake, mileage 73, has been approved by the Minister of Railways. Local reports state that the company's intention is to extend this line to Calgary. (Nov., pg. 825).

The Northern Navigation Co. of Ontario has decided, for the present, not to order a new vessel to replace the wrecked Monarch.

TRADE AND SUPPLY NOTES.

The matter which appears under this heading is compiled, in most cases, from information supplied by the manufacturers of, or dealers in, the articles referred to, and in publishing the same we accept no responsibility. At the same time we wish our readers to distinctly understand that we are not paid for the publication of any of this matter, and that we will not consider any proposition to insert reading matter in our columns for pay or its equivalent. Advertising contracts will not be taken with any condition that accepting them will oblige us to publish reading notices. In other words, our reading columns are not for sale, either to advertisers or others.

The Toronto Bolt and Forging Co., Ltd., has issued a comprehensive catalogue consisting of 168 pages, illustrated with cuts of the various articles manufactured at its works.

The Hamilton Steel and Iron Co. has completed the installation of an additional blast furnace of modern construction and equipment, with an output capacity of 300 tons a day.

The name of the Dominion Dump Car Co., Ltd., Montreal, has been changed to that of the Hart-Otis Car Co., Ltd., by supplementary letters patent issued by the Dominion Government.

The Rail Joint Company of New York, exclusive makers of base supporting rail joints, announce that their rail joints are now in use from ocean to ocean, the Panama Rd. being their latest equipment.

A H. Wheatley has been appointed Manager of the Locomotive and Machine Co. of Montreal, succeeding H. B. Ayres, resigned to become General Manager of H. K. Porter Co., Pittsburg, Pa.

The O. M. Edwards Co., manufacturers of window fixtures, shade rollers, sash balances, extension platform, trap doors, etc., of Syracuse, N.Y., will remove their Canadian factory from St. Catharines, Ont., to Montreal, in Jan., 1908.

The Canadian Westinghouse Co. has issued the following illustrated circulars: 1139, describing starting and field rheostats; 1089, describing Westinghouse No. 101-B2 railway motor; 1122, describing Standard three-point railway diverter.

H. B. Ayers, who recently resigned the managership of the Locomotive and Machine Co. of Montreal, has been appointed General Manager of H. K. Porter Co., locomotive manufacturers, Pittsburg, Pa. He was formerly General Manager of the Pittsburg Locomotive Works.

G.T.R. Betterments, Construction, Etc.

Tracklaying.—The work of replacing the present 85-lb. steel with 100-lb. rails is being proceeded with on different sections of the line. The section where the work is being gone on with at present is between Montreal and St. Anne's, and this mileage it is expected to complete this year. This 100-lb. steel has already been laid on some sections between Toronto and Hamilton, Ont., and on some sections between Port Huron, Mich., and Chicago. The 85-lb. steel released is being laid on other sections to replace lighter rails.

Montreal Track Elevation.—The Montreal City Council passed a resolution Nov. 13, instructing the committee on level crossings to report by Dec. 1 as to the position of the negotiations respecting the proposed abolition of level crossings on the G.T.R., by means of the elevation of the tracks. The Assistant City Clerk, in an interview, said the situation is that the city is willing to vote generously to raise the tracks if an agreement can be made with the company, but so far there has been a feeling on the part of the Council that the company wants to bear a smaller portion of the expense than is fair. The question of raising the tracks has been before the Council in one form or another for over 20 years. The position now is, however, that the City Council has authority to borrow money to the extent of $2,000,000 to raise the tracks.

St. Henri Yards.—The Montreal City Council has agreed to sell the company about 20,000 sq. ft. of land in Cote St. Paul at 12c. a foot, for the purpose of enlarging its trackage accommodation along the Boulevard St. Paul.

A Toronto-Ottawa Line.—Press correspondence suggests a short route from Toronto to Ottawa of 196 miles, by the construction of two stretches of line, and the utilization of two sections of existing lines as follows: The existing line between Toronto and Oshawa, 34 miles; a new section from Oshawa to Millbrook, 20 miles; the existing line from Millbrook to Lakefield, 22 miles; and a new line from Lakefield to Ottawa, 120 miles. This would mean 140 miles of new construction.

London Track Elevation.—Instructions have been received in London, Ont., that all properties recently purchased in connection with the track elevation and other improvements in the city, are to be kept in repair and rented. This is taken to indicate that nothing will be done for some considerable time in the way of track improvement.

Sarnia Tunnel.—Owing to some delays in obtaining material it is not expected that it will be possible to operate trains regularly through the Sarnia tunnel by electricity until early in the new year. It was intended that the work would have been completed by Aug. (Nov., pg. 831.)

Toronto Union Station Lands Purchase.—In the Supreme Court at Ottawa, Oct. 30, judgment was rendered on the motion made in the case of the G.T.R. against the C.P.R., the latter asking to have the minutes of judgment as settled varied as to the payment of interest by the C.P.R. only for the period between May 6, 1903, the date on which the G.T.R. paid the purchase money to the Crown for the Toronto station lands, and June 3, 1903, when the C.P.R. tendered half of such purchase money to the G.T.R., which was refused by the latter. The motion was granted with costs, and it was ordered that the minutes should be amended in the terms of the application as above stated, providing for payment of interest up to the date of the tender only

Hon. G. P. Graham, Minister of Railways, returned to Ottawa, Nov. 14, after having made his first official trip of inspection over the Intercolonial Ry.

The Board of Railway Commissioners' inspectors McCaul and Black have made an investigation of the circumstances attending the Moor Lake accident on the C.P.R., Nov. 15, and will report in due course.

We are advised that nothing has been definitely decided with reference to the inauguration of a motor car service on the C.P.R. Gibson branch, which press reports stated was to be put on in the spring.

At a special meeting of shareholders of the Lake St. Joseph Hotel Co., in which officials of the Quebec and Lake St. John Ry. are largely interested, held Nov. 5, it was decided to apply for the appointment of a liquidator, pending the issue of negotiations in progress for an adjustment of the company's affairs. J. G. Scott, General Manager Q. and L. St. J. Ry., said it was expected that the company's affairs would be adjusted during the winter, and that the hotel would be reopened in May, 1908. An order for the winding up of the company was made Nov. 13, and E. F. Wurtele was named provisional guardian of the company's property and assets, pending the appointment of an official liquidator. A meeting of creditors was held Nov. 25.

MAINLY ABOUT PEOPLE.

Lady Shaughnessy returned to Montreal from Great Britain Nov. 8.

E. Cotter, one of the oldest employes of the C.P.R. at Winnipeg, died there Nov. 6.

J. K. L. Ross has been appointed commercial manager of the Dominion Coal Co.

L. W. Gillen, infant son of U. E. Gillen, Superintendent G.T.R., Toronto, died there Nov. 2.

W. Whyte, Second Vice-President C.P.R., has been elected President of the Winnipeg Canadian Club.

C. Fitch-Kemp, President of the Dominion Atlantic Ry., died in London, Eng., Nov. 6, aged 68.

Miss Seath, who died in Montreal Oct. 26, was a sister of D. Seath, Secretary Montreal Harbor Commission.

Sir Wm. C. Van Horne, Chairman of the Board, C.P.R., spent some days in Winnipeg and Selkirk recently.

F. Markey, who died at St. Mary's, Ont., Ont., Oct. 18, was father of J. Markey, Master Mechanic, G.T.R., Toronto.

Hon. L. P. Brodeur, Minister of Marine, was the principal guest of the Empire Club, Toronto, at luncheon on Nov. 14.

W. R. Baker, Assistant to the President, C.P.R., Montreal, was married to Mrs. Drysdale, at Sherbrooke, Que., Oct. 30.

A bust of Sir Sandford Fleming, chancellor of Queen's University, Kingston, Ont., presented by the graduates, was unveiled Oct. 16.

A. Murray, heretofore with the Shedden Co., Montreal, has been appointed cashier of the Canadian Northern Transfer Co., Montreal.

R. Bickerdike, M.P., was struck by an electric car at the corner of Victoria Ave., Westmount, Que., recently, and had his left shoulder broken.

E. A. Evans, General Manager Quebec Ry., Light and Power Co., is Hon. Vice-President of the Quebec Hockey Club for the current year.

Hon. W. Pugsley, Minister of Public Works, is acting as Minister of Justice during the absence through ill-health of Hon. A. B. Aylesworth.

E. Walton, chief clerk in the office of the Third Vice-President G.T.R., Montreal, was married to Miss A. L. Bingham, at St. Albans, Vt., Oct. 30.

R. Seddon, chief clerk in the Divisional Accountant's office, Winnipeg, was presented with a suit case by the staff on the occasion of his marriage, Oct. 30.

H. C. Hammond, President of the Northern Navigation Co., Mrs. Hammond and their son, sailed recently for a three months' trip to the south of France.

Harvey Graham, a director and Assistant General Manager of the Nova Scotia Steel and Coal Co., died at New Glasgow, N.S., Oct. 31, after a lengthened illness.

Miss C. E. Nicholls, daughter of F. Nicholls, President Niagara, St. Catharines and Toronto Ry., was married at St. Paul's Church, Toronto, to J. E. Proctor, recently.

C. Shane has retired from the firm of Kelly Bros. & Co., contractors, Winnipeg, Man., and Kenora, Ont., the firm now consisting of Jas. Kelly, Geo. Kelly and Jas. McDole.

At Oil City, Pa., Nov. 22, the wife of E. D. MacKenzie, proprietor of the Arlington Hotel, and formerly Canadian Freight Agent, Pennsylvania Rd., at Toronto, of a daughter.

J. H. Walsh, General Manager Quebec Central Ry., returned to Sherbrooke, Oct. 28, from London, Eng., where he attended the directors' annual consultation.

A portrait of W. Kennedy, who has been appointed Superintendent of Motive Power, Central Vermont Ry., was given on pg. 713, and some biographical details on pg. 747 of our Oct. issue.

Mrs. Bickerdike, wife of R. Bickerdike, M.P., died at the residence of her son-in-law, D. W. Campbell, Manager in Canada of the Elder-Dempster Line of steamers, Montreal, Oct. 27.

L. B. Archibald, Superintendent Dining and Sleeping Cars, Intercolonial Ry., has recovered from his recent illness, and was able to be in Montreal recently in connection with his official duties.

P. Blais, Intercolonial Ry. section foreman at Levis, Que., was presented with the Imperial Service Medal, Nov. 6, by the Minister of Railways, on completing 25 years' service on the line.

A. Rawland, of the C.P.R. Atlantic Steamships office, Quebec, was presented with a cabinet of silverware by C.P.R. officials in that city, recently, upon the occasion of his marriage to Miss M. Jones.

Jas. Wattie, who died at Valleyfield, Que., Oct. 30, was for many years President of the Lake St. Francis Navigation Co., and was also actively engaged in the promotion of the St. Lawrence and Adirondack Ry.

H. E. Beasley, formerly Superintendent C.P.R. at Vancouver, B.C., who is now on leave of absence, is engaged in securing the right-of-way for the extension of the Esquimalt and Nanaimo Ry. to Alberni, B.C.

Miss M. C. Gibbons, daughter of G. C. Gibbons, K.C., chairman of the Canadian section of the International Waterways Commission, was married at London, Ont., Nov. 10, to J. L. Counsell, of Hamilton, Ont.

G. Hodge, engineer, and M. Grimes, conductor, of the excursion train which was wrecked at the Caledon horseshoe curve, Sept. 3, were acquitted of criminal negligence at the Brampton, Ont., assizes, Nov. 16.

M. D. Woodford, formerly President Cincinnati, Hamilton and Dayton Rd., died at Kalamazoo, Mich., recently. From 1872 to 1875 he was Assistant General Superintendent of the old Great Western Ry. of Canada.

J. Davis, postmaster of Alton, Ont., who was injured at a railway crossing Oct. 28, died at his home Nov. 8. He was chief engineer of the Guelph Junction Ry., and was engaged on the surveys for the Guelph and Goderich Ry.

E. Jordan, Jordan, Ont.; R. MacDonald, Goderich, Ont.; — Burnside, Toronto, and — Baby, Hamilton, Ont., sailed from Vancouver, B.C., Nov. 25, to take positions on the Canton-Hankow Ry.'s engineering staff in Northern China.

H. A. Norton, son of A. O. Norton, of Coaticook, Que., and Boston, Mass., manufacturer of Norton jacks, was married at Holy Trinity Church, Montreal, Nov. 9, to Miss Sidney Elizabeth, daughter of Benj. Austin, of Montreal.

D. Robertson, Trainmaster C.P.R., Ottawa, has been on sick leave for some time past, but expects to resume work at an early date. The position of Trainmaster at Ottawa having been abolished he will be given another appointment.

H. S. Head, who has been appointed District Passenger Agent, Wisconsin Central Rd., New York, is a native of Montreal, and started his railway service with the G.T.R. in that city, subsequently going to the company's New York office.

Mrs. Kennedy, wife of W. Kennedy, Superintendent of Motive Power, Central Vermont Ry., died at her parents' home, Cobourg, Ont., Nov. 20, aged 35, and was buried at Belleville, Ont., a large number of G.T.R. motive power department officials attending.

E. Ware, C.E., who died in London, Eng., recently, was a native of Quebec, and was engaged for many years in railway construction in South America. He was a son of W. Ware, C.E., the first white man to cross the divide between Quebec and Lake St. John.

A. E. Killam, Bridge Inspector of the Intercolonial Ry., returned to Moncton, N.B., Oct. 24, from Chicago, Ill., where he had been in attendance at the annual convention of the Association of Bridge Builders and Inspectors. He was accompanied by Mrs. Killam.

J. R. Donnelly was presented with a diamond pin and a ring by the employes of the mechanical department of the G.T.R. Ottawa Division, on his transfer to the position of Master Mechanic of the Northern Division, Allandale, Ont. A diamond pendant was presented to Mrs. Donnelly.

E. H. Williams, locomotive foreman, Canadian Northern Ry., Humboldt, Sask., was on the recent occasion of his transfer from that point, given a gold chain and engraved locket by the enginemen and trainmen, and a gold chain and fob by the shop employes. He was also given an address.

R. Meighan, who has been elected a director of the Montreal Street Ry., is also President of the New Brunswick Ry., and of the Lake of the Woods Milling Co., and a director of the St. John Bridge and Ry. Co., the Dominion Transport Co., Canada North-West Land Co., and the Bank of Toronto.

Sir Jas. Hector, Chancellor of the University of New Zealand, died at Wellington, N.Z., Nov. 6, aged 73. He was geologist to the Palliser expedition which marked the boundary between Canada and the U.S. in 1857, and was the discoverer of the Kicking Horse or Hector pass through the Rocky Mountains.

H. G. McMicken, General European Agent, Great Northern Ry., U.S., has returned to London, Eng., after a short visit to the company's offices at St. Paul, Minn., and to relatives at Winnipeg, Man. We are advised, with respect to press reports, that the company has not decided to close its London office.

G. H. Smith, who has been appointed Assistant General Freight Agent, C.P.R., Vancouver, was entertained to a farewell dinner by a number of friends, at the Mariaggi Grotto, prior to his departure from Winnipeg, Nov. 6. He was presented with a travelling bag, and Mrs. Smith with a cut glass fruit stand.

Sir R. G. Reid, of the Reid Newfoundland Co., has instituted proceedings against the estate of the proprietor of the Newfoundland Herald, and the editor, for libel, claiming $50,000 damages. The paper in a recent issue charged Sir Robert with bribery in connection with the company's contracts with the Government.

A. W. Smithers, Vice-President G.T.R., London, Eng., was the principal guest at a dinner given on board the steamboat Lady Grey, recently, by G. W. Stephens, President of the Montreal Harbor Commission. After the dinner a trip was made round the harbor for the purpose of inspecting the improvement works in progress. Mr. Smithers sailed from New York for Liverpool, subsequently, on the S.S. Lusitania

G. A. Walton, who has been appointed District Passenger Agent, C.P.R., at Brandon, Man., was born at Montreal, July 17, 1881, and entered railway service 1897, his record being: June, 1897, to Aug., 1901, clerk in G.T.R. Passenger Department, Montreal; Aug., 1901, to Feb., 1903, rate clerk, C.P.R. Passenger Department, Winnipeg; Feb., 1903, to Feb., 1906, chief clerk, same office; Feb., 1906, to Oct., 1907, station ticket agent C.P.R., Winnipeg

M. S. Blaiklock, who has been appointed Engineer of Maintenance of Way G.T.R., was born in 1859, and entered railway service in 1880, since which his record has been: 1880 to 1889, assistant engineer G.T.R.; 1889 to 1891, assistant engineer St. Clair Tunnel; 1892 to 1896, inspector; 1896 to April, 1902, resident engineer, Eastern Division G.T.R., Montreal; April, 1902, to Oct., 1907, Superintendent Eastern Division, G.T.R., Montreal.

Lieut.-Col. H. H. McLean, St. John, N.B., who has been selected as the Liberal candidate for Queens-Sunbury, N.B., is intimately connected with transportation interests in the province. He is Vice-President and Managing Director St. John Ry., President New Brunswick Southern Ry., President Fredericton Ry., director and treasurer St. John Bridge Extension Ry., director Imperial Dry Dock Co., in addition to being counsel in N.B. for the C.P.R., the Cumberland Ry. and Coal Co., and the Western Union Telegraph Co.

R. Main, who has been appointed Commercial Agent Canadian Pacific, Minneapolis, St. Paul and Sault Ste. Marie, and Duluth and South Shore railways, at Pittsburg, Pa., was born at Bellevue, Pa., Aug. 3, 1873, and entered railway service in 1888, his record being: 1888 to 1894, successively messenger and assistant westbound rate clerk Division Freight Agent's office, Pennsylvania Rd., Pittsburg; 1894 to 1895, chief clerk, C.P.R. offices, Pittsburg; 1895 to 1896, contracting Freight Agent C.P.R., Pittsburg; 1896 to Oct., 1907, Travelling Freight Agent C.P.R., Pittsburg, Pa.

R. W. McCormick, who has been appointed Assistant Superintendent C.P.R., Ottawa, was born at Liverpool, Eng., Jan. 8, 1867, and entered transportation service in 1879 as operator with the old Canada Central Ry. at Sand Point, Ont., and acted as operator and agent successively at Renfrew, Smith's Falls and Carleton Junction. He was subsequently: Oct., 1896, to Feb., 1897, relieving train dispatcher, Ottawa; Feb., 1897, to Oct., 1901, train dispatcher, Ottawa; Dec., 1901, to Oct., 1903, Chief Train Dispatcher, Ottawa; Oct, 1903, to Aug., 1906, Trainmaster, Ottawa; Aug., 1906, to Nov., 1907, Assistant Superintendent successively at Smith's Falls and Montreal.

A. T. Weldon, who has been appointed Division Freight Agent, Intercolonial Ry. at Halifax, N.S., was born at Dorchester, N.B., Mar. 6, 1876. Entered railway service 1890 as clerk in I.C.R. local freight office, Moncton, N.B., since which he has been consecutively to April, 1900, in different capacities in I.C.R. freight service; Dec., 1901, to Aug., 1904, in I.C.R. Division Freight Agent's office, Halifax, N.S.; Aug., 1904, to May 1, 1907, Secretary Halifax Board of Trade; May 1, 1907, to Nov. 18, 1907, General Sales Agent, Port Hood, Richmond Ry. Coal, Ltd., at Halifax, N.S.; from Nov. 18, 1907, Division Freight Agent I.C.R. at Halifax.

J. W. Hanley, who has been appointed General Passenger Agent Central Vermont Ry., St. Albans, Vt., was born at Malone, Franklin County, N.Y., Mar. 20, 1863, and entered railway service May, 1882, his record being: May to June, 1882, auditing department, Central Vermont Ry., St. Albans; June to Oct., 1882, billing and receiving clerk local freight station Rutland Rd., St. Albans; Oct., 1882, to June, 1884, ticket stock clerk, Passenger Department, Central Vermont Ry., St. Albans; June, 1884, to Mar., 1888, rate clerk Passenger Department, and assistant ticket agent same road; Mar. to Aug., 1888, ticket agent union station, Rutland, Vt.; Aug., 1888, to Nov., 1907, chief clerk Passenger Department Central Vermont Ry., and compiler of the New England Joint Western Tariff "J."

M. H. Brown, who has been appointed General Freight Agent in charge of local traffic of the Ontario Division of the C.P.R. at Toronto, was born at Richmond Hill, Ont., Sept. 2, 1866, and entered railway service as a junior clerk in the general freight office at Toronto, Oct. 1, 1887, remaining there until April, 1890. Since then his service has been: April, 1890, to Aug., 1893, chief clerk to District Freight Agent at Detroit; Aug., 1893, to Mar., 1896, chief clerk to the Freight Traffic Manager, Toronto; Mar., 1896, to July, 1899, chief clerk to the Freight Traffic Manager, Montreal; July, 1899, to June, 1901, District Freight Agent, Detroit; June, 1901, to Oct., 1902, Assistant General Freight Agent, Ontario Division, at Toronto; Oct., 1902, to Nov., 1907, General Freight Agent, Ontario Division, Toronto. Entire service with the C.P.R.

A. A. Tisdale, who has been appointed assistant to the Vice-President and General Manager G.T. Pacific Ry., Montreal, was born at Mount Vernon, Ont., Mar. 8, 1874, and entered railway service in Sept., 1889, serving until July, 1892, in various capacities in the G.T.R. local freight office at Hamilton, Ont. In July, 1892, he was transferred to the Chief Engineer's office as secretary, and remained in the same capacity when the engineering offices were moved to Montreal, Feb., 1896. Appointed secretary to F. H. McGuigan, then General Superintendent, G.T.R., Montreal, May, 1899. Mr. Tisdale remained with him in his successive positions as manager and Fourth Vice-President, as secretary, chief clerk and assistant, and after Mr. McGuigan's resignation he was appointed assistant to the General Transportation Manager.

W. M. Kirkpatrick, who has been appointed General Freight Agent C.P.R., Ontario Division, Toronto, for through traffic, is a son of the late Sir Geo. A. Kirkpatrick, formerly one of the C.P.R. directors. He was born at Kingston, Ont., Oct. 8, 1874, and entered railway service Mar. 7, 1892, in the office of the Vice-President, C.P.R., since which he has filled various positions in the Chief Engineer's office, foreign freight office, Montreal; General Freight Agent's office, Toronto; from July, 1899, to Dec., 1902, he was clerk in the office of the Fourth Vice-President; from Dec., 1902, to April, 1905, he was Assistant General Freight Agent Pacific Division, Vancouver; from April, 1905, to Feb., 1907, Export Freight Agent at Montreal; Feb., 1907, to date of his present appointment, General Freight Agent, Atlantic Division, St. John, N.B.

A. W. Wheatley, who has been appointed Manager of the Locomotive and Machine Co. of Montreal, Ltd., was born in Ashford, Kent, Eng., and served an apprenticeship as machinist in the South-Eastern Ry. shops there. In 1892 he went to the United States, since which his record has been: 1892 to 1894, in Northern Pacific Ry. employ at St. Paul, Minn.; 1894, transferred to Staples, Minn.; 1895 to 1900, roundhouse foreman there; 1900 to 1902, general foreman at Livingstone, Montana; Dec., 1902, to June, 1903, Master Mechanic, Yellowstone Division, at Glendive, Montana; June, 1903, to March, 1904, General Master Mechanic at St. Paul, Minn.; Feb., 1905, to Mar., 1906, Shop Superintendent, Rock Island Rd., at Moline, Ill.; Mar., 1906, to June 1, 1907, Assistant Superintendent Motive Power, Union Pacific Rd., at Omaha, Neb.; June 1, 1907, to Oct., 1907, General Inspector, American Locomotive Co., Schenectady, N.Y.

J. K. McNeillie, who has been appointed Assistant Superintendent C.P.R., Toronto, was born there Feb. 23, 1874, and entered railway service in 1890, his record being: May to July 1890, call boy and clerk in stores department, G.T.R., Lindsay, Ont.; July, 1890, to Nov., 1891, apprentice G.T.R. roundhouse, Lindsay; Nov., 1891, to Sept., 1896, apprentice, locomotive fitter and machinist, G.T.R. shops, Point St. Charles, Montreal; Sept., 1896, to Nov., 1897, clerk in Superintendent and Trainmaster's office, C.P.R., Farnham, Que.; Nov., 1897, to Nov., 1899, chief clerk in Superintendent's office, C.P.R., Farnham, Que.; Nov., 1899, to May, 1900, clerk in General Superintendent's office, C.P.R., Winnipeg; May, 1900, to July, 1902, chief clerk in same office; July, 1902, to Mar., 1903, Car Service Agent, C.P.R., Winnipeg; Mar., 1903, to Oct., 1907, in Car Service Department, C.P.R., Montreal, in charge of the distribution of passenger equipment.

T. J. Kennedy, General Superintendent Algoma Central and Hudson Bay Ry., whose portrait appears on the first page of this issue, entered railway service as chainman on the first survey for the C.P.R. east of Winnipeg in 1874, since which he has been consecutively: June, 1877, assistant engineer contract 15, C.P.R.; May, 1880, engineer for Manning, Macdonald & Co., contractors section B, C.P.R., at Rat Portage; Oct, 1882, to spring of 1885, superintendent of construction for Manning, Macdonald & Co. on section B.; June, 1885, roadmaster C.P.R. White River section; Aug., 1892, Superintendent Chapleau district C.P.R.; Sept., 1899, Superintendent North Bay district C.P.R.; June, 1900, to date, General Superintendent Algoma Central and Hudson Bay Ry., and Manitoulin and North Shore Ry. In 1904 he was also appointed manager of the International Transit Co., the Trans-St. Mary's Traction Co., and the Ferry Line at Sault Ste. Marie, Ont. and Mich.

Carl Howe, who has been appointed Manager of the Merchants Despatch and other fast freight lines at Buffalo, N.Y., was born at Berrien Springs, Mich., June 11, 1870, and entered railway service in the summer of 1889 with the Michigan Central Rd., at Niles, Mich., remaining with that company until the date of his present appointment. His record is: Oct., 1889, to Oct., 1890, clerk in local freight office, Michigan City, Ind.; Oct., 1890, to April, 1893, chief clerk and cashier, same office; April, 1893, to Sept., 1894, local agent, Chicago Heights, Ill.; Sept., 1894, to May, 1898, Travelling Freight Agent, Chicago, Ill.; May, 1898, to Oct., 1899, assistant chief clerk, Freight Traffic Manager's Office, Detroit, Mich.; Oct., 1899, to July, 1900, chief clerk, same office; July, 1900, to Jan., 1907, Assistant General Freight Agent, Buffalo, N.Y.; Jan. to Oct., 1907, manager Merchants Despatch Transportation Co., New York. He was President Canadian Freight Association, 1905-06.

H. C. Philpott, General Sales Agent, Dominion Car and Foundry Co., Ltd., Montreal, died suddenly near Galt, Ont., Nov. 21. He arrived at Galt in the morning, and in company with M. N. Todd, President of the Galt, Preston and Hespeler Electric Ry., drove a short distance into the country to look at some horses. While in the stable he complained of the atmosphere being stuffy, and went outside. A moment or two after another member of the party followed him and found he had collapsed. His body was taken to his residence in Toronto, and he was buried in Mount Pleasant cemetery there. Mr. Philpott, who was widely known and very popular in railway circles throughout Canada, was born at Belleville, Ont., Aug. 28, 1871. He was in the Illinois Malleable Iron Co.'s service at Chicago, and then with the Gould Manufacturing Co., Seneca Falls, N.Y. In 1903 he was appointed sales agent for the Canadian General Electric Co., and in Aug. 1906, entered the Dominion Car and Foundry Co.'s service. He leaves a wife and two children.

J. W. Loud, Freight Traffic Manager, G.T.R. and Central Vermont Ry., who was recently also appointed to a similar position on the G.T. Pacific Ry., was born in Warwickshire, Eng., and was in the employ of the Midland Ry. from Aug., 1861, to 1872, when he came to Canada, his subsequent record being: Sept., 1872, to Jan., 1875, clerk in General Eastern Freight Agent's office, G.T.R.; Jan, to April, 1875, G.T.R. Agent at Hamilton, Ont.; April, 1875, to Sept., 1877, chief clerk, Assistant General Freight Agent's office, G.T.R., Toronto; Sept., 1877, to Nov., 1881, chief clerk General Freight Agent's office, G.T.R., Montreal; Nov., 1881, to Dec., 1886, G.T.R. freight agent, Toronto; Jan., 1887, to Aug., 1889, General Freight Agent, through traffic, G.T.R., Montreal; Sept., 1889, to Feb., 1896, Traffic Manager, Detroit, Grand Haven and Milwaukee Ry., Detroit, Mich.; Feb., 1896, to April, 1900, General Freight Agent, G.T.R., Montreal; May, 1900, to date, Freight Traffic Manager, G.T.R. He was subsequently appointed Freight Traffic Manager Central Vermont Ry., and recently to a similar position on the G.T. Pacific Ry., and represents the G.T.R. company's interests on a number of its subsidiary and allied companies.

The resignation of Major Hodgins as District Engineer National Transcontinental Ry., Kenora, Ont., has given rise to a great deal of talk. H. D. Lumsden, Chief Engineer to the Commission, said: "There is always more or less trouble between engineers and contractors over the classification of loose stone excavation and rock, but this was not why Major Hodgins resigned. There was a good deal of friction between the men and Major Hodgins, and I considered that it would be in the interests of the Commission and all parties concerned that he should resign. I therefore asked him to tender his resignation, and he did so. It was accepted by the Commission." S. N. Parent, Chairman of the Commission, in referring to the matter said that the cause of the whole trouble with Major Hodgins and with his assistant engineer, Mr. Heaman, who has also resigned, was that an attempt was made to carry on the work in their division under conditions contrary to the terms of the specifications under which the contracts were let. To change these specifications on the Engineer's sole authority, and allow the contractors the cost of construction with an additional 10% profit on some parts of the contract, instead of compelling them to adhere strictly to the original specifications, was considered by the commissioners neither legal nor in the best interests of the public.

Ed. Porter, for many years connected with the C.P.R. stores department at Winnipeg, died there, Nov. 6, aged 76.

The Judicial Committee of the Privy Council, London, Eng., has dismissed the appeal of the City of Toronto against the C.P.R. and others, respecting the cost of protecting crossings. The Canadian Courts directed that the cost of protecting the crossings at Avenue Road, Bathurst and Dufferin Streets, should be divided between the city and the company, and it was against these decisions that the city appealed.

In an action heard at the Circuit Court, Montreal, recently, Judge Dorion directed the G.T.R. to pay a fine of $8 as provided by the Railway Act for refusal to check baggage. The complainant was H. Beaudry, who has a summer residence at Valois. In Sept., 1906, he bought a trunk in Montreal which he desired to have checked as baggage, but the baggageman contended, as it was new and empty, it was merchandise and compelled the complainant to send it by express. The judge held that the trunk was baggage.

Railway Rolling Stock Notes.

The Intercolonial Ry. is building four new passenger locomotives at its Moncton, N.B., shops.

The Temiskaming and Northern Ontario Ry. Commission has ordered four vans, two baggage and express cars, and two baggage and mail cars.

The Locomotive and Machine Co. of Montreal's output for Oct., included nine C.P.R. 10-wheel locomotives, and nine C.N.R. consolidation engines.

The Temiskaming and Northern Ontario Ry. received the following additions to rolling stock between Oct. 15 and Nov. 15: three workmen's cars and two second-class cars from the Crossen Car Mfg. Co., Cobourg, Ont., and one snowplow.

The specifications of the various cars ordered by the C.P.R. recently, as mentioned in our Nov. issue, have previously been given as follows: Colonist cars, Jan., pg. 17; stock cars, Mar., pg. 165; vans, June, pg. 413; box cars, freight refrigerators, flat and ballast cars, Sept., pg. 657.

The C.P.R., between Oct. 13 and Nov. 12 ordered the following rolling stock: 1 colonist car, 83 box cars, 8 freight refrigerator cars, 8 stock cars, 37 flat cars, and 1 Hart ballast car, from its Angus, Montreal, shops; 2 vans from its Farnham, Que., shops; and 4 steel coal cars from the Dominion Car and Foundry Co., Montreal.

The C.P.R. between Oct. 13 and Nov. 12 received the following additions to rolling stock: 466 box cars, 3 first-class cars, 3 passenger locomotives, Pacific type, and 1 switching engine from its Angus, Montreal, shops; 12 vans and 1 superintendent's business car, from its Farnham, Que., shops; 6 locomotives, passenger and freight, from the Locomotive and Machine Co. of Montreal, and 853 box cars from the U.S.

The Toronto, Hamilton and Buffalo Ry. has ordered from the Locomotive and Machine Co. of Montreal, one 10-wheel passenger locomotive, one 10-wheel freight locomotive, and one switching engine, to the following specifications:

	Passenger.	Freight.	Switching.
Weight on drivers	139,500 lbs.	107,000 lbs.	121,000 lbs.
Total weight	183,000 lbs.	141,000 lbs.	121,000 lbs.
Diameter of drivers	73 ins.	60 ins.	51 ins.
Cylinders	20 by 26 ins.	19 by 26 ins.	19 by 26 ins.
Boiler, type	Ext. wagon top	Ext. wagon top.	Straight top.
Boiler, working pressure	200 lbs.	200 lbs.	180 lbs.
No. and diameter of tubes	336—2 ins.	279—2 ins.	259—2 ins.
Length of tubes	15 ft. 0½ in.	14 ft.	11 ft.
Firebox, length	102 ins.	96 ins.	102 ins.
Firebox, width	65¼ ins.	41 ins.	33 ins.
Wheel base, driving	15 ft. 10 ins.	14 ft.	11 ft. 6 ins.
Wheel base, engine	26 ft. 10 ins.	24 ft. 7 ins.	11 ft. 6 ins.
Wheel base, total, with tender	55 ft. 6 ins.	52 ft. 0¼ ins.	37 ft. 5½ ins.
Tank capacity, U.S. gallons	5,500	5,000	3,500
Coal	9 tons	9 tons	5 tons
	Walschaert valve gear.		

The Canadian Northern Ry. between Oct. 15 and Nov. 15 received the following additions to rolling stock: 8 stock cars and one mail and express car, from the Crossen Car Mfg. Co., Cobourg, Ont.; 100 box cars, 3 coaches and 3 refrigerator cars, from Rhodes, Curry & Co., Ltd., Amherst, N.S.; 2 consolidation locomotives from the Canadian Locomotive Co., Kingston, Ont.; 8 consolidation locomotives from the Locomotive and Machine Co., Montreal; and 50 steel ore cars, from the Dominion Car and Foundry Co., Montreal.

The Hart-Otis Car Co., Ltd., Montreal, has sold to the Atikokan Iron Co., Ltd., Port Arthur, Ont., six Otis all steel dump cars, to the following specification: Length over end sills, 38 ft. 10 ins.; length inside, 36 ft. 9½ ins.; width, inside, 9 ft. 7 ins.; width, extreme, 10 ft. 0¼ in., height from rail to floor line, 4 ft. 4½ ins.; height of sides, 4 ft. 6 ins.; height from rail to top of sides, 8 ft. 10½ ins.; bottom composed of 12 doors, working in quarter sections of three doors each; body, all steel; underframe, built up box girder throughout length of car; M.C.B. couplers; trucks, 5 ft. 6 ins. wheel base; Simplex truck bolster, 50 tons capacity.

Following is the specification for the three steel coal cars of the Otis type, being built for the C.P.R. by the Dominion Car and Foundry Co: Length over buffers, 39 ft. 10 ins.; length between end sills, 38 ft. 1½ ins.; length over end sills, 38 ft. 10 ins.; length of car, inside body, 36 ft. 9½ ins.; width of car over angles at top, 10 ft. 0¼ in.; width of car inside, 9 ft. 7 ins.; height from rail to top of body, 8 ft. 10½ ins.; to top of brake mast, 9 ft. 9½ ins.; to top of center sills, 4 ft. 4¼ ins.; to center of coupler, 2 ft. 10½ ins.; capacity, 100,000 lbs; Westinghouse air brakes with 10 ins. cylinders; tower couplers, Susemihl roller side bearings. The drop doors comprise nearly the entire bottom of the car except the area over the center sills, so that the cars are practically self-cleaning when dumped.

Following is the specification for the new locomotive, class N.3a, which the C.P.R. is having built at its Angus shops, for delivery Mar. 15, 1908: Type, consolidation, 2-8-0; Vaughan-Horsey simple superheater; weight on drivers, 200,000 lbs.; total weight, 230,000 lbs.; diam. of cylinders, 24 ins.; stroke, 32 ins.; diam. of drivers, 63 ins.; type of boiler, radial stayed, wagon top; working pressure, 180 lbs.; heating surface, 2,780 sq. ft.; tubes, 24-5 ins., 272-2 ins.; tubes, outside diam., 2 ins. and 5 ins.; length, 15 ft. 2¾ ins.; firebox, length, 8 ft. 5⅜ ins. inside; width, 5 ft. 9¾ ins. inside; grate area, 49 sq. ft.; tank capacity, 5,000 imp. galls.; coal capacity, 10 tons; air brakes, Westinghouse; axles, open hearth steel; brake beams, Simplex, trussed for tender; brake shoes, C.P.R. standard; couplers, Tower; pilot, Tower tender; headlight, Pyle National Electric; journal bearings, C.P.R. standard; safety valves, 3 ins.; springs, C.P.R. crucible steel; steam gauges, graduated vertical reading dial, 6¾ ins. diam.; tyres, driving wheels, truck wheels, tender wheels, Krupp crucible steel; driving wheel centers, cast steel; truck wheel centers, cast steel tender wheel centers, wrought iron disc.

In our September issue we published an illustrated description of three motor cars built for the Intercolonial Ry. at its Moncton shops. Another motor car has been imported from Europe for this line. It has seats for 40 passengers, including eight in a smoking compartment. A baggage room 7 ft. long is also provided. At the forward end of the car is a compartment 7 ft. long, which contains the steam generator, control levers and all accessory apparatus. The rear end of the car is vestibuled. The car is handsomely finished in hardwood and the seats are upholstered in leather; it is heated by steam and lighted by acetylene. The outside of the car is of steel. The car is propelled by a 120-h.p. steam motor, which is mounted in the forward truck of the car and which drives on the rear axle thereof. This motor is of the inclosed type, so that all parts thereof are free from external influences. The working parts operate in an oil bath, thus insuring continuous and perfect lubrication. The steam generator is mounted in the motor-

STEEL CONCRETE COMPANY LIMITED

E. A. WALLBERG, Pres't — Merchants' Bank Building, MONTREAL

"PAGE FENCES WEAR BEST"

PAGE WIRE FENCES stretch tighter—posts can be set farther apart. That saves money—fewer posts, less labor digging post-holes, quicker erecting. PAGE FENCES last longer—made of No. 9 wire. PAGE FENCES are heavily galvanized, and for a small extra charge are supplied coated WITH PERMANENT PAINT. PAGE FENCES stand wear better, give longer service, keep your maintenance account down. The PAGE KNOT LOCK cannot slip and positively does not injure the wire. PAGE FENCES do not sag.

50 THOUSAND MILES OF RAILWAYS USE PAGE FENCES

There must be a dollars-and-cents reason for the standing PAGE FENCES have with railway men the world over. It will pay your road to hear that reason before you spend another cent on fences.

The Page Wire Fence Co., Limited, Walkerville, Ont. Branches in Montreal—Toronto—St. John

man's compartment. It is of light and compact construction, 42 inches in diameter and about 4 ft. high. The design is such that all parts in contact with fire and water can be quickly exposed for cleaning and repairs. Following is a record of a test trip of this car, no. 228, from Moncton to Harcourt and return, a distance of 74 miles, one mile being allowed for turning on the Y at Adamsville, making a total of 75 miles: Left Moncton, 9.33; arrived Harcourt, 10.38; elapsed time, 1 hr. 5 minutes; less 2 stops, 3 minutes; net, 1 hr. 2 minutes. Average speed per hour, 35.8 miles. Left Harcourt, 11.12; arrived Moncton, 12.42; elapsed time, 90 minutes; less detention en route, 26 minutes; making the return trip in 64 minutes. Average speed per hour, 34.7 miles. Total coal consumed for trip, 925 lbs. Average coal consumed per mile, 12.33 lbs.

DOMINION CAR AND FOUNDRY COMPANY.

At the beginning of the current year this company working on the following orders received during 1906: 500 Otis type drop bottom coal cars, 50-ton capacity, and 75 forty-ton hopper bottom ore cars for the C.P.R.; 1,500 steel underframes for the Quebec, Montreal and Southern Ry., 30 ton box cars.

Following are particulars of the principal orders received by the company during the current year: Feb. C.P.R., 36 steel underframe flat cars for unloaders, 30 ft. 5 ins. long, 10 ft. wide, special equipment including: Couplers, Tower; air brakes, Westinghouse; side bearings, Susemihl; journal boxes, McCord; truck bolsters and brake beams, Simplex; brasses, Canadian bronze. 500 Otis self-clearing all-steel drop bottom gondola cars, 50-ton capacity, special equipment including: Couplers, Tower; air brakes, Westinghouse; side bearings, Susemihl; journal boxes, McCord; brasses, Canadian bronze; wheels, 750 lbs.; truck bolsters, Simplex; brake shoes, steel back; brake beams, Simplex.

Mar. Winnipeg Electric Ry., 5 steel underframes for street cars, 41 ft. 0⅞ ins. long over sills.

Mar. C.P.R., 100 all-steel hopper bottom cars, 50-ton capacity; length, 28 ft. 8 in., with four doors dumping centrally. Special equipment including: Couplers, Tower; air brakes, Westinghouse; side bearings, Susemihl; journal boxes, McCord; truck bolsters, Simplex; brasses, Canadian bronze; brake beams, Simplex.

April. Canadian Northern Ry., 50 all-steel hopper bottom cars, 50-ton capacity, same as the 100 cars ordered by C.P.R. in March. 2 steel underframe flat cars for unloaders, length 30 ft. 5 in.

April. Montreal St. Ry., 10 steel underframes.

May. Temiskaming and Northern Ontario Ry., 100 steel underframe flat cars, 50-ton capacity, length 36¾ ft., width 9¼ ft. over flooring. Special equipment includes: Couplers, Tower; air brakes, Westinghouse; side bearings, Susemihl; journal boxes, McCord; brasses, Canadian bronze; truck bolsters, Simplex; wheels, 700 lbs.; brake beams, Simplex.

June. Canadian Northern Ry., 100 steel underframe flat cars, 30-ton capacity. Special equipment includes: Couplers, Latrobe; air brakes, Westinghouse; side bearings, Susemihl; journal boxes, McCord; truck bolsters, Simplex; brake beams, Simplex.

July. C.P.R., 54 all-steel hopper bottom cars, 50-ton capacity, duplicates of those ordered in April.

Aug. C.P.R., 8 Otis type drop bottom gondola cars, duplicates of those ordered in March.

The Otis type cars mentioned above were built under license from the Dominion Dump Car., Ltd., now the Hart-Otis Car Co., Ltd.

TRANSPORTATION APPOINTMENTS.

Canadian Northern Quebec Ry.—A. Seguin, heretofore outside agent for the Canadian Transfer Co., Montreal, has been appointed contracting freight agent there for the C.N.Q. Ry.

Canadian Northern Ry.—H. McLeod, heretofore road foreman mechanical department, Port Arthur, Ont., to Winnipeg, Man., has been assigned to other duties.

E. H. Williams, heretofore locomotive foreman at Humbolt, Sask., has been given special duties at Winnipeg.

W. A. Walker has been appointed locomotive foreman at Dauphin, Man., succeeding F. Wilson, appointed locomotive foreman at Humbolt, Sask.

J. Kyle has been appointed Master Mechanic at Edmonton, Alta.

Canadian Pacific Ry.—H. E. Macdonald, heretofore General Freight Agent Kootenay and Boundary districts, British Columbia, at Nelson, B.C., has been appointed General Freight Agent, Atlantic Division, succeeding W. M. Kirkpatrick, transferred to Toronto. Office, St. John, N.B.

The office of Engineer of Maintenance of Way, heretofore held by A. L. Hertzberg, has been abolished and the duties will in future be performed by the Assistant Chief Engineer, F. P. Gutelius, who was formerly Engineer of Maintenance of Way.

L. O Armstrong, Colonization and Tourist Agent at Montreal, has had some industrial work added to his duties, but up to Nov. 25 no circular had been issued respecting the same. A press report states that he has been appointed Industrial Agent, that the office has been changed into three divisions, viz., industrial, colonization and sports, and that J. A Hope has been appointed assistant in the sports branch.

J. M. R. Fairbairn, heretofore Division Engineer Ontario Division, has been appointed Division Engineer Eastern Division, succeeding J. H. Barber, resigned. Office, Montreal.

R. W. McCormick, heretofore Assistant Superintendent district 2, Eastern Division, at Montreal, has been appointed Assistant Superintendent district 4, Eastern Division, at Ottawa. The position of trainmaster, district 4, heretofore held by D. Robertson, who has been in ill-health recently, has been abolished.

W. B. Cronk, heretofore Inspector of Transportation, reporting direct to the Assistant General Manager, has been appointed Assistant Superintendent district 2, Eastern Division, succeeding R. W. McCormick, transferred. Office, Smith's Falls, Ont. The office for the district was heretofore at Montreal.

W. K. Thompson, heretofore Superintendent at White River, Ont., has been appointed Superintendent district 1, Ontario Division, Toronto, succeeding J. R. Nelson, transferred. Office, Toronto.

J. R. Nelson, heretofore Superintendent district 1, Ontario Division, Toronto, has been appointed Superintendent district 3, Ontario Division, succeeding A. L. Smith, transferred. Office, Toronto.

A. L. Hertzberg, heretofore Engineer of Maintenance of Way, has been appointed Division Engineer, Ontario Division, succeeding J. M. R. Fairbairn, transferred. Mr. Hertzberg held the position of Division Engineer at Toronto prior to his transfer to Montreal. Office, Toronto.

W. M. Kirkpatrick, heretofore General Freight Agent, Atlantic Division, has been appointed General Freight Agent, Ontario Division, in charge of through traffic. Office, Toronto. M. H. Brown remains as General Freight Agent in charge of local traffic as at present. We are advised that the increase in the company's mileage and in its business generally has made the additional appointment necessary. Mr. Kirkpatrick will have supervision over all freight traffic and Mr. Brown immediate supervision over local traffic.

A. L. Smith, heretofore Superintendent district 3, Ontario Division, Toronto, has been appointed Superintendent district 2, Lake Superior Division, succeeding W. K. Thompson transferred.

A. A. Sheppard has been appointed acting Locomotive Foreman at Schrieber, vice G. F. Morton, transferred to other duties.

R. R. Jamieson, heretofore General Superintendent, Western Division at Calgary, Alta., has been appointed General Superintendent Central Division, vice A. Price, transferred. Office, Winnipeg.

W. H. Robertson has been appointed Assistant General Freight Agent at Winnipeg, Man.

A. Price, heretofore General Superintendent Central Division at Winnipeg, has been appointed General Superintendent Western Division, vice R. R. Jamieson transferred. Office, Calgary, Alta. District 5, central division, embracing the main line from Broadview to Swift Current, Sask., and the branch lines from North to Patqua, and from Arcola to Regina, has been transferred from the central to the western division.

G. A. Walton, heretofore station ticket agent, Winnipeg, has been appointed District Passenger Agent in charge of the Central Division west of Winnipeg. Office, Brandon, Man.

A. Shortt, heretofore machine shop foreman, Calgary, Alta., has been appointed general foreman there, succeeding S. Newmarch, resigned.

R. D. Smith, heretofore District Master Mechanic Western Division, Cranbrook, B.C., has been appointed road foreman of engines district 1, Western Division.

G. Glasford has been appointed District Master Mechanic at Cranbrook, B.C., succeeding R. D. Smith.

W. C. Bowles, heretofore Assistant General Freight Agent at Vancouver, B.C., has been appointed General Freight Agent Kootenay and Boundary Districts, succeeding H. E. Macdonell, transferred. Office, Nelson, B.C.

G. H. Smith, heretofore Assistant General Freight Agent at Winnipeg, has been appointed Assistant General Freight Agent Pacific Division. Office, Vancouver, B.C.

Canadian Pacific Ry., Minneapolis, St. Paul and Sault Ste. Marie Ry., Duluth, South Shore and Atlantic Ry.—The following circular was issued jointly by W. R. MacInnes, Freight Traffic Manager C.P.R., W. L. Martin, Second Vice-President and Traffic Manager M., St. P. and S.S.M. Ry., and W. W. Walker, General Freight Agent D.S.S. and A. Ry.: "It is with the deepest regret that we must announce the death of F. W. Salsbury, who so ably represented our lines in Pittsburg for many years. His loss is felt very keenly by us in both a business and personal way. Mr. Salsbury will be succeeded by Robt. Main as Commercial Agent." Office, 320 Fifth Ave., Pittsburg, Pa.

O. Townsend has been appointed Travelling Freight Agent in the Pennsylvania-West Virginia territory, succeeding R. Main, promoted. Headquarters, Pittsburg, Pa.

Central Vermont Ry.—J. W. Hanley, heretofore chief clerk in the Passenger Department, has been appointed General Passenger Agent, succeeding J. E. Bentley, who has been appointed special agent to perform such duties as may be assigned to him by the General Manager or General Freight Agent. Office, St. Albans, Vt.

W. Kennedy, heretofore Master Mechanic G.T.R., Toronto, has been appointed Superintendent of Motive Power, C.V.R., succeeding A. Buchanan, Jr., resigned. Office, St. Albans, Vt.

HEAD OFFICE AND WORKS: **SYDNEY, CAPE BRETON, CANADA**

W. E. Costello, heretofore Assistant Superintendent Oregon Short Line, and previously with the G.T.R. at Stratford, London, Ont., and Battle Creek, Mich., has been appointed Superintendent C.V.R. Southern Division, at New London, Conn., succeeding E. D. Nash, who has resigned to go to Panama in charge of operation of a line for the United Fruit Co.

Detroit River Tunnel.—W. G. Wilgus, heretofore Vice-President New York Central Lines, has been retained as Consulting Engineer of the D.R.T.

Dominion Atlantic Ry.—T. R. Ronald, it is reported, will succeed the late C. Fitch Kemp as President, and will be succeeded as Vice-President by Col. J. M. Denny.

Grand Trunk Pacific Ry.—We are informed that there is no foundation for the press reports referred to in our Nov. issue that R. Watchorn, Montreal, had been appointed Purchasing, Fuel and Labor Agent there for the G.T.P.R.

W. J. Hunter, Commercial Agent G.T.R., Winnipeg, has been appointed Division Freight Agent G.T.P.R. Office, Winnipeg.

Grand Trunk Ry.—W. Gell, heretofore locomotive foreman at Sarnia Tunnel, Ont., has been appointed Master Mechanic Ottawa Division, succeeding J. R. Donnelly, transferred. Office, Ottawa.

J. R. Donnelly, heretofore Master Mechanic Ottawa Division, has been appointed Master Mechanic Northern Division, succeeding J. Markey, transferred. Office, Allandale, Ont.

J. Markey, heretofore Master Mechanic Northern Division, has been appointed Master Mechanic Middle Division, succeeding W. Kennedy, appointed Superintendent Motive Power Central Vermont Ry. Office, Toronto.

R. J. Cottrell, heretofore charge hand at St. Thomas roundhouse, has been appointed locomotive foreman at St. Thomas, Ont., succeeding W. H. Towner, transferred.

W. H. Towner, heretofore locomotive foreman St. Thomas, has been appointed locomotive foreman Sarnia Tunnel, succeeding W. Gell, promoted.

W. D. Hall has been appointed Superintendent in charge of Power Plant and Electrical Equipment, St. Clair Tunnel. Office, Port Huron, Mich.

The following agents have been appointed: Lacolle Jct., Que., R. Fortin (Acting); Barrington, Que., Mrs. F. I. Clayland; St. Agnes, Que., A. Martel; Keene, Ont., H. B. Nelson (Acting); Newmarket, Ont., R. C. Fair; Sundridge, Ont., H. J Quinlan; Elmvale, Ont., C. A. Caldwell; Swanton, Vt., W. J. Cronin; Killaloe, Ont., H. P. Toop; Wilno, Ont., R. J. Hardy; Ravensworth, Ont., W. H. Woodruff.

E. H. Boynton has been appointed New England Passenger Agent, succeeding T. H. Hanley, resigned to engage in other business. Office, 360 Washington St., Boston, Mass.

Great Western Ry. of England.—E. W. Burch, heretofore assistant to the District Goods Manager at Gloucester, Eng., has been appointed General Agent for Canada for the purpose of developing freight and passenger traffic. For the present his headquarters are at the King Edward Hotel, Toronto.

Intercolonial Ry.—A. T. Weldon has been appointed Division Freight Agent at Halifax, N.S., succeeding D. A. Story, assigned to other duties.

Merchants' Despatch, etc.—A joint circular issued by F. La Bau and G. H. Ingalls, Freight Traffic Managers New York Central Lines; A. S. Crane, Assistant Freight Traffic Manager Boston and Maine Rd.; B. H. Bail, General Freight Agent, Philadelphia and Reading Ry., and T. B. Koons, Freight Traffic Manager Central Rd. of New Jersey, on behalf of the New York Central and Hudson River, West Shore, Boston and Albany, Rutland, Lake Shore and Michigan Southern, Michigan Central, Cleveland, Cincinnati, Chicago and St. Louis, Pittsburg and Lake Erie, Peoria and Eastern, Lake Erie and Western, Chicago, Indiana and Southern, Boston and Maine, and the Philadelphia and Reading Railways, and the Central Rd. of New Jersey, announces that Carl Howe has been appointed Manager, and W. F. Wilson Assistant Manager, of the Merchants' Despatch, Red Line, Blue Line, White Line, North Shore Despatch, West Shore Line, Rutland-Michigan Central Line, Jersey Central-Lake Shore Despatch and Jersey Central-Michigan Central Despatch, with office at Buffalo, N.Y. The position of Traffic Manager of the Merchants' Despatch Transportation Co. in New York, heretofore held by Mr. Howe, has been abolished.

W. B. Pollock, Vice-President and General Manager of the Merchants' Despatch Transportation Co. has issued the following announcement Oct. 25: "On and after Nov. 1, 1907, this company will cease to operate the Merchants' Despatch and Dairy Line and thereafter they will be operated by the New York Central Lines. This company having, as of Nov. 1, 1907, sold to the New York Central and Hudson River Rd. Co. its ice houses and contents at East Buffalo and Karner, N.Y., and to the Lake Shore and Michigan Southern Ry. Co. its ice house and contents at West Seneca, N.Y., and to the Michigan Central Rd. Co. its ice house and contents at (Junction Yards), Detroit, Mich., the icing of perishable freight at those points on and after Nov. 1, will be performed by the railroad companies." Mr. Pollock has also issued the following notice: "This company having sold, as of Nov. 1, all of its box and carriage cars to the New York Central and Hudson River Rd., and Lake Shore and Michigan Southern Ry. companies, the allowance for use of such cars must thereafter be reported to those companies."

Transcontinental Ry. Commission.—S. R. Poulin, heretofore District Engineer at North Bay, has been appointed District Engineer at Kenora, Ont., succeeding Major Hodgins, resigned.

C. O. Foss, heretofore Assistant District Engineer at St. John, N.B., has been appointed Assistant District Engineer at Kenora, succeeding A. F. Heaman, resigned.

Wisconsin Central Ry.—H. S. Head has been appointed District Passenger Agent, with headquarters at 290 Broadway, New York City. His territory includes all the territory lying east of Buffalo in the United States, and the Canadian territory lying east of Toronto.

Railway Commissioners' Traffic Orders.

3925. Nov. 13.—In the matter of the application of the Canadian Manufacturers' Association and the shippers who were heard and represented at the hearings held by the Board in Windsor and Chatham, Ont., in May, 1906, and of the Toronto Board of Trade. Whereas, by Order no. 3258, dated July 6, 1907, the Board directed that certain revised tariffs of freight tolls were to be prepared, and published and filed by the railway companies; and whereas it has decided to fix a date upon which the said tariffs shall come into force; upon the report of the Chief Traffic Officer of the Board—The Board orders that the revised tariffs of freight tolls referred to in Order 3258 be, and they are hereby, ordered to come into force, from points in Canada, not later than Jan. 1, 1908.

National Transcontinental Railway.

The report of the Transcontinental Ry. Commission for the nine months ended Mar. 31, is referred to in the report of the Department of Railways and Canals. From the summary given it appears that the total amount expended during the nine months was $5,537,867.50, which with the $2,609,627.13 previously expended, makes total payments of $8,147,494.63. It is stated that the various surveys carried on have produced satisfactory results, and that the basal intention that the railway throughout should be so located as to afford grades of exceptional ease in operation not exceeding 0.40% against eastbound and 0.60% against westbound traffic, and curves of the greatest possible radius has been closely regarded, though the endeavor to meet this requirement has, of course, entailed much additional survey work. Connected lines of survey have now been obtained for the entire distance between Moncton and Winnipeg. Contracts for construction have been awarded for 852 miles.

The report of C. Schrieber, Consulting Engineer to the Department, is published in full, and is summarized as follows by the Deputy Minister: "On the Western Division of the railway to be built by the G.T. Pacific Ry., Mr. Schrieber's report shows the position up to Mar. 31. Surveys have been completed and the plans and profiles of location have been approved by orders-in-council from about 32 miles west from Winnipeg to Edmonton. From Edmonton to 27 miles west of Yellowhead Pass location plans and profiles have been approved; but may be revised as improvements develop. The balance of the line to Prince Rupert, the proposed terminus on the Pacific Coast, has been located, and plans and profiles submitted; but an improved revision was expected. The Chief Engineer states that a very good location has been made, only one grade exceeding 4-10 of 1%; the exception being a 1% grade for about 20 miles. The work, for mountainous work, will not be heavy, except for about 170 miles east from Prince Rupert, where it will be almost entirely very heavy rock excavation. The construction under contract and progress is from Portage la Prairie, 275 miles westward, on which about 75% of the grading was done, and about 60% of the culverts, bridges, etc., a further distance of 141 miles to a short distance west of the crossing of the South Saskatchewan River, on which 48% of the grading and about 38% of the entire work was done. For a further distance of about 316 miles to Edmonton about 25% of the grading was done. The bridges over the Assiniboine, the South and North Saskatchewan, and the Battle rivers, are under contract. The severity of the last winter greatly interfered with construction, with regard to tracklaying, though steel rails of 80 lbs. to the yard have been delivered for the whole distance from Winnipeg to Edmonton, 800 miles. The shortage of ties has delayed tracklaying, only 36 miles of track being laid to Mar. 31. About 36 miles of telegraph line have been erected."

The Commissioners visited Moncton, N.B., Nov. 8, for the purpose of considering the question of the terminals necessary there. They returned to Ottawa on the following day, and will confer with the Minister of Railways upon the subject.

The Commissioners have filed with the Registrar of Deeds for the County of L'Islet, route plans for the railway from mileage 89 to 130, from the north abutment of the Quebec Bridge, easterly through the County of L'Islet.

Reports received at Ottawa state that about 50 miles of track have been laid on the Quebec section, and that grading on the sections

Canadian Northern Ontario Railway

CANADIAN NORTHERN ONTARIO

HUNTING TRIPS

Deer—Moose—Bear—Partridge—Duck

The Canadian Northern Ontario opens up a new country—the best hunting on the Continent. Beside Muskoka Lakes, Georgian Bay, innumerable water-ways north of Parry Sound, including the Shawanaga, Magnetawan and Still Rivers, hitherto almost inaccessible, more Deer come out of this section than from the rest of Canada. Partridge, Duck and small game in abundance.

REDUCED RATES; costs no more to go where game abounds than to where it has been hunted out. Write C. PRICE GREEN, Passenger Agent, Toronto, for "Big Game Hunting," illustrated with best maps.

under contract is well advanced. Tenders for the greater part of the remaining 1,000 miles between Winnipeg and Moncton will, it is said, be called for in the spring. The portion of the line in Northern Ontario adjacent to the Temiskaming and Northern Ontario Ry. will probably be the last to be constructed, as tenders are not expected to be called for until the T. and N.O.R. is extended to the proposed point of junction.

GRAND TRUNK PACIFIC RAILWAY.

F. W. Morse, Vice-President and General Manager, recently completed a trip of inspection over the whole main line, and the Lake Superior branch. Fifty miles of track had been laid on this branch, and grading is reported to be progressing favorably. The Macdonald, McMillan Co. have completed their contract for grading from Portage la Prairie to the Touchwood Hills, 272 miles, and the Canadian White Co. is finishing up its contract for grading into Saskatoon, Sask. The grading between Saskatoon and Edmonton is also well forward, and it was expected that by Nov. 30, 600 miles of the 770 between Portage la Prairie and Edmonton would have been graded. It is expected that track will be laid into Saskatoon by the end of the year, but this depends entirely upon favorable weather. On Nov. 12, the steel-laying gang working westerly was reported to be on Sec. 5, about 20 miles south of Yorkton. Steel is also being laid easterly from Saskatoon, from which point 100 miles of grade has been fully completed. On Nov. 12, the tracklaying gang was working some miles east of French.

The substructure for the big bridge across the Saskatchewan River at Saskatoon has been completed, and the contractors have removed their plant to the Battle River, where another large bridge is to be constructed. The substructure consists of nine piers and two abutments in which there are 7,000 cubic yards of concrete. The false work is being erected and a large quantity of the steel for the superstructure has been delivered. The contractor for the steel work is the Canadian Bridge Co., Walkerville, Ont., and J. Gunn & Sons were the contractors for the substructure.

The route finally adopted for the line west of Edmonton, Alta., runs parallel with the Canadan Northern Ry., to near Stoney Plain. It skirts the shores of Wabamum Lake, 40 miles west, then to the Pembine River, crossing it several miles west of the mouth of the Lobstick River, and runs along the bank of that river until near Lobstick Lake. South of the lake the line runs along the valley following pretty nearly the old Yellowhead Pass trail, but crossing Upper Lobstick River, Carrot River, a branch of the McLeod, the Wolf, and crossing the McLeod a few miles below the Jasper trail crossing at White Mud creek, west along the south bank of the McLeod, beyond the big eddy, to within a mile of Leavings, the name given to the dividing land that separates the McLeod watershed from the Athabasca, the line traverses valley land. On this divide of the two rivers the G.T.P. strikes a heavy grade and winds over a hill, 3,470 ft. high. The line strikes the Athabasca River about three miles up from the mouth of Train Creek, and then runs through a beautiful valley to the Roche Miette, the first mountain the old Jasper trail crosses. Here there is an excellent grade to climb to the pass, the line winding up the river valley. At a meeting of the Commissioners at Ottawa, Nov. 12, it was reported that 10 parties were in the field locating the route from the Yellowhead Pass to the coast. These parties will remain in the field during winter. C. Van Arsdol, engineer in charge of the Western Division, returned to Vancouver, B.C., Nov. 2, after having gone over the route of the line from Prince Rupert easterly to Barkerville, B.C. He said alternative routes had been surveyed in various sections, and it would take some time to decide as to the final route to be followed. (Nov., pg. 839).

Department of Railways Expenditures.

The Dominion Parliament, in 1906, passed an Act respecting the fiscal year, enacting that it should extend from April 1 to Mar. 31, both inclusive, consequently the reports of the various departments which are now being issued cover nine months only, viz., from July 1, 1906, to Mar. 31, 1907, the previous reports having covered the 12 months ended June 30, 1906.

During the nine months ended Mar. 31, 1907, the Department of Railways and Canals made a total railway expenditure of $14,918,598.92, of which $7,174,370.17 was charged to capital, $6,328,745.65 to revenue, and $1,415,483.10 to income. The expenditure on capital included $5,537,867.50 for the National Transcontinental Ry. The expenditure on income included $1,323,367.48 paid as subsidies to railways other than Government roads, also $68,664.29 for the Board of Railway Commissioners. The expenditure on the Intercolonial Ry., including the Windsor branch $15,425.32, charged against revenue, was $7,551,806.41, of which $1,506,209.26 was on capital, and $6,045,597.15 on revenue account. The expenditure on the Prince Edward Island Ry. was $374,859.02, of which $91,710.52 was on capital and $283,148.50 on revenue account. The total Government expenditure on railways prior to and since Confederation amounts on capital account to $162,050,456.79, which includes $25,000,000 granted the C.P.R. for its main line. In addition there has been expended from the consolidated fund, $167,210,490.44, which includes $35,578,502.54 paid as railway subsidies in addition to the amount to the C.P.R., making a total expenditure of $329,260,947.23. This amount does not include the annual payment of $119,700 to the Quebec Government, under chap 8, 47 Vict., nor the annual payment of $107,730 in respect of the Ottawa-Quebec line transferred to the public debt as a liability and dealt with by the Finance Department. Of the total amount named, $13,881,460.65 was expended on construction works prior to Confederation on portions of what is now the Intercolonial Ry. system. The total revenue received from the Government railways from July 1, 1867, to Mar. 31, 1907, was $118,819,364.19. The financial statement and general statistics are given under the separate headings of the Intercolonial Ry. and the Prince Edward Island Ry. on pg. 895.

During the nine months ended Mar. 31, subsidy contracts were entered into with six companies for the construction of 248 miles of railway, and $1,324,889.30 was paid to the following companies under subsidy agreements:

Atlantic and North-West Ry.	$ 186,600.00
Bay of Quinte Ry.	72,602.45
Brockville, Westport and Sault Ste. Marie Ry.	35,600.00
C.P.R. Staynerville branch	9,600.00
Chateauguay and Northern Ry.	84,224.75
Halifax and Southwestern Ry.	268,107.20
International Ry. of New Brunswick.	51,200.00
James Bay Ry.	420,608.00
Klondike Mines Ry.	96,000.00
Middleton and Victoria Beach Ry.	27,667.20
Midland Ry.	4,967.70
Quebec and Lake St. John Ry.	67,712.00
	$1,324,889.30

The sum of $1,521.82, refunds in connection with subsidy payments to the Atlantic and Lake Superior Ry., makes the net payments $1,323,367.48.

It has been decided to connect Tofield, Sask., with other neighboring points by telephone.

C. P. R. Betterments, Construction, Etc.

Place Viger Freight Yards.—Excavation has been going on since Nov. 1 for the new freight sheds adjoining Place Viger station, Montreal. The site of the sheds is between Panet and Amherst Sts., and the total area to be occupied by the sheds and the tracks leading into and through them is about four acres.

Vaudreuil-St. Anne's Second Track.—Reconstruction work upon the bridges at Vaudreuil and St. Anne's, Que., was expected to be completed by Nov. 30. The new bridges are double-track structures.

Bridge at Hanover.—A wooden bridge to cross the G.T.R. tracks at Hanover, Ont., is under construction at a cost of about $18,000.

Walkerton and Lucknow Ry.—Good progress is being made with the construction of this line. The contractors received a bit of a check Oct. 23, when several rods of the completed track in the vicinity of Proton, Ont., sank. As the construction train was on the far side of the break, work was delayed for some days while repairs were made. An indenture of lease, dated Nov. 12, 1906, between the W. and L. Ry. Co. and the C.P.R., has been deposited with the Secretary of State at Ottawa, under the provisions of Sec. 361 of the Railway Act.

Manitoba and North-Western Ry.—Surveys are being made for the construction of a projected branch from Theodore, to connect with the Russell branch in tp. 20 or 21, range 28, west of the principal meridian. This line would serve the Round Plains district.

Saskatoon Improvements.—The company has completed the purchase of some additional properties on Third St., Riversdale, Saskatoon, adjoining the properties previously purchased. A 12-stall roundhouse is in course of erection, and considerable progress has been made with laying out the yards.

Saskatoon Westerly.—Recent reports state that grading has been completed westerly from Saskatoon to within a few miles of Hardisty, Alta., to which point the branch easterly from Wetaskiwin is in operation. Tracklaying has been suspended on the line, and the steel which was taken in has been taken east, and is being laid on the line into Saskatoon, the object being to complete the line eastward first. The grading into Hardisty is not expected to be completed this season, but it is expected that the line will be finished and opened for traffic in 1908.

Moose Jaw-Lacombe Branch.—The C.P.R. has purchased a section of school lands west of Davidson, at the Elbow, Sask., for a townsite. The line now under construction from Tuxford passes through this land.

The grading, etc., from mileage 50 to 123, on the Moose Jaw northwest line, was let in two contracts. A. C. Smith has a contract from mileage 50 to 53, the work to be completed by July 1, 1908; J. D. McArthur has a contract for mileage 53 to 123, the work to be completed by Sept. 1, 1908.

Belly River Bridge.—The first pile for the big bridge over the Belly River at Lethbridge, Alta., was driven Oct. 26, and the work of preparing for the putting in of the concrete substructure is about completed. The whole of the west bank of the river, about 300 feet in height, has to be cut down. Night and day shifts are at work, and the work is being rushed. It is desired to have the bridge completed by the end of 1908.

High Level Bridge at Edmonton.—W. Whyte, Second Vice-President, on his return to Winnipeg Nov. 5 from Edmonton, Alta., said all details in connection with

THE FARLOW DRAFT GEAR

DOES NOT FAIL AND IS ALWAYS GUARANTEED

It does away with the bother and expense of the riveted yoke and its sheared rivets. It cannot be pulled out or driven back. The draft sills cannot spread. Service has proven that it has almost entirely eliminated repairs to draft rigging. Its first cost is low. It is the easiest, simplest and cheapest of any to apply and is the strongest of all.

Refineries:

PETROLEA, CANADA. MARIETTA, OHIO.

the entrance of the C.P.R. into the city had been settled, and work on the substructure of the high level bridge over the Saskatchewan River would be carried on during the winter. The local municipalities desired that a joint traffic and railway bridge might be erected, and negotiations to this end had been in progress for many months. Under the plan now agreed to the railway will be carried beneath the general traffic road. Provision will be made in the center of the upper floor of the bridge for tracks for an electric railway. The bridge will be 2,500 ft. long, and will cost about $1 000,000. The cost of construction will be borne by the C.P.R., the Government and the municipalities.

Columbia and Western Ry.—A press report states that the C.P.R. is about to electrify the South Kootenay branch of the C. and W. Ry., with a view of securing the coke, coal and ore haulage. The motive power, it is reported, will be supplied by the West Kootenay Light and Power Co.

Empress Hotel, Victoria.—It is expected that the company's hotel at Victoria, B.C., will be opened early in Jan.

Kootenay Central Ry.—Grading is reported to be in progress upon a 10 mile section immediately south of Golden, B.C., upon this projected railway to connect the C.P.R. transcontinental line with the Crow's Nest Pass Line. The question of the route south of Windermere is giving some concern to the residents, on account of the fact that W. Whyte, Second Vice-President, on his recent trip, did not follow the line of survey originally made. The suggestion is that it is desired to enter the Cranbrook district instead of going direct to Fort Steele.

Esquimalt and Nanaimo Ry.—Tenders have been asked for the clearing and grading of 48 miles of the right-of-way of the extension of the E. and N. Ry. between Alberni and Nanoose.

The work of improving the roadbed and bringing it up to C.P.R. standard is being rapidly pushed forward. Three gangs of men have been at work for some time putting in concrete culverts; the bridge at Waugh's Creek has been renewed, and some 70,000 cubic yards of filling are being put in by a steam shovel gang at Millstream Crossing.

Sumas to Seattle—Spokane to Seattle.—A Tacoma, Wash., press despatch, dated Nov. 20, says it has been announced that the C.P.R. has survey parties in the field locating two lines of railway in Washington State. One of the proposed lines is said to be from Spokane through Yakuna Valley, across the Cascade Mountains to Tacoma and Seattle; and the other is a connecting north and south line from Sumas, on the International boundary, to Seattle and Tacoma. It is also stated that engineers have a coast line permanently located to Deeming, 40 miles south of Sumas, and that the C.P.R. has an option of 200 acres of land alongside deep water, at Tacoma, for terminals. D. C. Corbin, President of the Spokane International Rd., which at present has a connection with the C.P.R. at Yahk, B.C., was in Montreal, Nov. 14, conferring with Sir Thos. G. Shaughnessy, President C.P.R., in connection with railway construction matters in Washington State. A despatch from Bellingham, B.C., announces the arrest of a Canadian survey party working along the Noosack River Valley, towards Seattle. Other press reports state that the C.P.R., or interests allied with it, have acquired the charter of the North Coast Ry., of which R. E. Strathorn, Spokane, is President. The N.C.R. Co. was incorporated several years ago; considerable survey work was done between Spokane and Walla Walla, and some construction work is in progress out from Spokane on Hangman's Creek. Another report respecting the N.C.R. Co. says that "all the negotiations have been concluded and the final surveys are being made preliminary to the actual construction between Seattle and the boundary line near Sumas." (Nov., pg. 827.)

Western Freight and Car Service Bureaus.

The 5th annual meeting of the Canadian Freight Association, Western Lines, Freight Inspection Bureau, was held at Winnipeg, Nov. 18, when the following were elected for the current year: President, G. H. Shaw, General Traffic Manager, Canadian Northern Ry.; Vice-President, W. B. Lanigan, General Freight Agent C.P.R. Freight Inspector and Executive Committee, G. H. Shaw; Manager and Secretary-Treasurer, H. R. Patriarche. The membership of this Association consists of the C.P.R., Canadian Northern Ry. and Alberta Ry. and Irrigation Co.

The Great Northern Ry. (U.S.A.) has been admitted as a member of the Canadian Car Service Bureau Western Lines, and the Bureau's car service committee has been elected as follows: J. A. McGregor, Assistant Superintendent Car Service, C.P.R.; J. McLellan, Superintendent Terminals, C.P.R.; J P. Driscoll, Superintendent Canadian Northern Ry.; A. Wilcox, Superintendent C.N.R.; M. Nicholson, Superintendent Dakota Division Great Northern Ry.; C. Leverich, Superintendent Minot Division G.N.R.; Chairman, H. Patriarche.

Railway Equipment and Appliances.

The Secretary of the Board of Railway Commissioners has issued the following circular to railway companies: "I have by direction to call your attention to the fact that the Board's Inspector reports numerous defects in the equipment and safety appliances used on the trains of the railway companies subject to the jurisdiction of the Board, and the failure on their part to comply with the provisions of the Railway Act in this regard. These reports show that over 30% of the very large number of cars and engines —numbering well into the thousands—which have recently been inspected, are being operated with defective safety appliances. Particular mention may be made in this connection of the large number of cars that are operated daily with defective air brakes. The Board trusts that it may be necessary only to bring this condition of affairs to the notice of the railway companies, to ensure within a reasonable time the necessary improvement being made in these respects, and that the Board will be relieved from taking definite action in the matter."

The Board of Railway Commissioners.

After considering a number of questions in connection with the fixing of forms of returns of operating and other expenses, the adoption of uniform railway rules, and a general plan for the abolition of railway crossings, the Commissioners heard several cases at Ottawa affecting Fort William, Brandon and Vancouver. The Commissioners then visited Hamilton, Ont., where a number of cases in which the Toronto, Hamilton and Buffalo Ry., the Brantford and Hamilton Ry., the G.T.R., and the Hamilton Street Ry. were interested, were heard. No decisions were given out and the Commissioners went on to Chatham, Ont., where some cases were heard Nov. 3. On Nov. 5, the Commissioners opened the sittings at Toronto, at which a large number of questions were taken up, including: The application of the Canadian Northern Ry. to cross Winchester St., Toronto, on the level; the viaduct question in Toronto, and the Toronto Union station matter; the supply of refrigerator cars for fruit; the question of who should pay interswitching charges, and a question of car shortage brought forward on the complaint of the Dominion Millers' Association. A number of minor matters affecting different localities were also taken up. Orders will be issued later.

J. B. McManus Limited, railway contractors, of Memramcook, N.B., have failed, and at a creditors' meeting in Moncton, Nov. 18, made an offer of 40c. on the dollar cash, payable in 10 days. They have a contract for double tracking the Intercolonial Ry. between Moncton and Painsec Jct.

The Board of Railway Commissioners has decided not to make public its inspector's report on the C.P.R. Caledon, Ont., accident, for the present at least, owing to the fact that criminal proceedings are being taken in connection with the accident. The Board has directed its engineering department to examine the line at and near the place where the accident occurred, and to report whether any change should be made therein or any regulation adopted as to speed or otherwise.

THE CANADIAN NORTHERN ONTARIO RAILWAY COMPANY

NOTICE is hereby given that The Canadian Northern Ontario Railway Company will apply to the Parliament of Canada, at its next session, for an Act empowering it to construct and operate a line of railway from a point on its authorized line between Udney and Ruthburn to Orillia.

GEO. F. MACDONNELL,
1 Toronto St., Toronto,
Assistant Solicitor.

Toronto, Ontario, 18th November, 1907.

CANADIAN NORTHERN RAILWAY COMPANY

NOTICE is hereby given that application will be made to the Parliament of Canada, at its next session, for an Act authorizing the construction of the following lines, from:

(a) Humboldt, in Saskatchewan, south-westerly to Calgary;

(b) Brandon-Regina line near west boundary of Manitoba westerly to Lethbridge, Alberta;

(c) North Battleford north-westerly to Athabasca Landing with a branch to Green Lake;

(d) Strathcona, Alberta, southerly to Calgary, with a branch to connect with authorized line from Regina to Red Deer River;

(e) Regina south-westerly to International boundary;

(f) Edmonton to headwaters of McLeod and Brazeau Rivers;

(g) Russell, Manitoba, via Yorkton to authorized line near Goose Lake, Saskatchewan;

(h) South of Neepawa, Manitoba, to main line crossing of South Saskatchewan River;

And extending the time for commencement and completion of the following lines, from:

(a) North of the line between Winnipeg and Ste. Anne to International boundary;

(b) Between Port Arthur and Fort Frances to Quebec, with branches to Port Arthur, Ottawa and Montreal;

(c) Battleford westerly to the Brazeau River;

(d) Regina to Humboldt and via Carrot River to Pas Mission and between Humboldt and South Saskatchewan River to crossing of same river south of Prince Albert.

Also authorizing the increase of the capital stock of the company by $19,250,000.

GERARD RUEL,
Chief Solicitor.

G.T.R. Shops at Stratford, Ont.

Among the various railways which are reconstructing and enlarging their locomotive repair shops according to modern designs is the G.T.R., which is spending large sums on its various repair shops over the entire system. Those of particular interest on this road are the new shops under construction at Stratford, Ont., and Battle Creek, Mich. The latter were described and illustrated in our April issue. This work, as well as the various other similar jobs now under construction, are in accordance with the natural tendency of railways to adopt modern methods in their repair shops to turn out the maximum amount of work.

One of the accompanying illustrations shows the general layout of the new shops at Stratford. The large machine and erecting shop, 616 by 175 ft., and boiler shop, 154 by 135 ft., indicated in the foreground, are under construction, and are being rushed as fast as possible with the hopes of having 15 bents under cover and in operation this winter. The above-mentioned shops occupy nearly three acres of ground space. The building to the left and adjoining the boiler shop is now standing, and is used for the repair of locomotive tenders. The other proposed buildings indicated in the background of the illustration are, from left to right, store house 60 x 200 ft.; blacksmith shop, 100 x 300 ft.; power house, 90 x 90 ft.; and foundry 110 x 140 ft. The construction of these buildings will follow in the order of their importance and needs, after the machine and erecting shop is well under way, and the weather permits. The old machine shop, which is being torn down in sections as fast as the new shop is erected, occupied a portion of the space covered by the new building.

As the ground selected for the plant was irregular and low in places, it was necessary to fill and level off the surface before starting construction. Concrete piles were used in the foundations of the new boiler shop and a portion of the new machine and erecting shop. It was necessary to drive these piles from 15 to 18 ft. below the average elevation of the ground to provide sufficient bearing power for building foundations. The concrete piling thus far has given satisfactory results, and no trouble is anticipated with it. The foundation concrete work is under charge of G. Mitchell, Master of Bridges and Buildings.

The building walls are of reinforced concrete with the outside surface finished as to give a neat appearance. While this building does not possess any striking architectural designs, it is marked by its massiveness, clear-cut line, and simplicity of construction. The structural steel is being manufactured and erected by the Canadian Bridge Co., Walkerville, Ont. The general building contract has been awarded to B. V. Hole, of London, Ont., whose work begins shortly after the erection of the structural steel.

R. Patterson, Master Mechanic at Stratford, is completing the machine tool layout for the machine and erecting shop which is arranged to handle the work on the various parts of a locomotive in the most economical manner, and is the result of considerable investigation and study on his part. Most of the large machine tools are to be driven individually by electric motors, as this practice has proven by experience to be the most desirable. This innovation of individual electric drive has revolutionized the machine tool layouts in shops where belt or group drive were used, ever since the desirable features of separate drive were realized by engineers. One of the facts in favor of this drive is that the tools may be placed in any convenient space about the shop regardless of the source of power, as the latter fact, with belt drive, determined the location of machines within a short distance of shafting. The common method of belt drive will be used for the smaller machine tools that require less power to drive. Considerable use is to be made of compressed air as a source of power for the various tools and appliances throughout the plant. Some of its uses are the driving of riveting machines, chisels, turntable motor, forge fires, blowing out engines, painting, etc. This system of operating tools has proven by experience to be flexible and most satisfactory for the purpose it is to serve.

The new shop will be capable of repairing 28 locomotives standing over pits at the same time, and the layout has been arranged so that should this be insufficient space in future the capacity of the shop can be increased at any time.

A cross section through the center of the machine and erecting shop which is shown in the other accompanying illustration indicates the 120-ton electric travelling crane, which spans the engine pit bay, lifting up one of the largest locomotives operated on the line, and conveying it to a repair pit. Any one seeing this practice of conveying a locomotive overhead with men working underneath for the first time is inclined to have a queer sensation of fear, dreading what the results would be should the locomotive fall, but this method of handling locomotives has proven entirely satisfactory wherever used, and it is marked with many advantages over the old style method of extending a track from a turntable or ladder on to the various pits. Jacking up engines to place drivers, etc., is also eliminated by this practice. Some of the equipment done away with by the use of the large crane to place locomotives at the various pits, is the transfer table with its necessary pit, that ordinarily covers valuable space and otherwise could be used for shop purposes. A ten-ton electric travelling crane is indicated in illustration, installed in the same bay, directly below the large 120-ton crane that handles the lighter repair parts. This crane is particularly designed to rapidly handle miscellaneous parts, thus relieving the large crane that is slow to act, due to its mass.

The heating ducts indicated under the floor line in the illustration, provide passage for the distribution of hot air received from heater located on balcony floor throughout the entire shop. This system of heating shop buildings has proved successful, as the exhaust steam from the power house, as well as the fan engine, is utilized for heating coils in heater. Separate lockers will be provided at convenient places throughout the shops for men to keep their belongings. In some cases these lockers will be portable, so that men working on odd jobs around the shop can move them near their work. Drinking

fountains with a continual stream of artesian water are to be installed at convenient places throughout the shop. Lavatories will also be arranged in various portions of the shop. At night the shops will be brilliantly lighted by one of the improved systems of vapor lamps which have recently been perfected.

The designs, etc., for the work were prepared subject to the approval of E. H. Fitzhugh, Third Vice-President, and W. D. Robb, Superintendent of Motive Power. Considerable credit is due R. Patterson, Master Mechanic at Stratford, for the general facilitation of the construction work as well as the admirable way in which the repair work on locomotive boilers during construction of the new shop has been handled in spite of being cramped for room.

Stark Telephone, Light and Power Co., Limited.

An application was made, Nov. 19, for a winding-up order against this company, on behalf of a creditor, for $700. The petition sets forth that the company is indebted to the extent of $127,500 outside its bond issue, and that a judgment had been filed against it three weeks previously for $1,400, on which only $100 had been paid; also that it had made an assignment on Nov. 16. A statement which has been issued says that the failure had come as the result of financial stringency, but that immediate steps would be taken to reorganize. At present the plant is being operated by the assignee, and it is intended that the bondholders and others shall contribute to a fund to keep it in operation in the meantime. The company was incorporated in 1903, with a capital of $1,000,000, at $10 a share. There are 25,000 preferred shares, of which 21,700 have been issued. Of 75,000 shares of common stock, 35,000 have been allotted and fully paid up. The company supplies light to Toronto Junction, North Toronto, Etobicoke and York townships. It also owns a plant in St. Catharines, and has a franchise in Welland. At Weston a by-law has been passed to lease the municipal plant there to the company. The bond issue amounts to $400,000, of which $94,000 worth have been sold, and it is said there are loans against the remainder. Litigation is pending between the company and one of the subsidiary companies of the Ontario Power Co., at St. Catharines, Ont. The company operates a telephone exchange at Toronto Junction. The directors are: Hon. J. Dryden, President; R. Y. Ellis, Vice-President; A. M. Stark, W. Dineen, and W. B. Rogers, Toronto.

D. B. Hanna, Third Vice-President Canadian Northern Ry., addressed the Empire Club, Toronto, Nov. 28, on "some transportation problems in the west."

The New Western Freight Rates.

The Winnipeg Board of Trade appears considerably exercised over the new freight tariff, which has been filed with the Railway Commission, to become effective Nov. 25, in accordance with the Commission's order in what is known as the "Portage La Prairie Complaint." The Portage La Prairie, Man., Board of Trade, on Aug. 13, filed a complaint with the Railway Commission to the effect that the tariffs then in effect from Winnipeg were illegal, inasmuch as they discriminated in favor of and against individuals, localities and commodities, and they called upon the Commission to declare these tariffs illegal. In his decision, Chief Commissioner Killam, after citing the complaint, concluded his judgment with the following words: "In my opinion the objections to the tariffs are well founded; they appear to me to be contrary to the provisions of the Railway Act prohibiting undue or unreasonable preference in favor of particular persons and unjust discriminations between different localities, and the charging of higher tolls for a shorter than for a longer distance where the shorter distance is included in the longer, and which require that all tolls shall always, under substantially similar circumstances and conditions in respect of traffic of the same description, etc., be charged equally to all persons. In my opinion the parties interested should be notified that the Board considers that these tariffs are contrary to the provisions of the Railway Act, and that they will be disallowed, and that the railway company should, not later than Nov. 15 next, file and put in force other tariffs in lieu of those complained of. I think it advisable that the Board should not, in this instance, determine the rates to be substituted, as much delay would be involved in making the necessary enquiries; but that it will be sufficient to disallow these tariffs, allowing the company to substitute new ones, which may be made the subject of complaint if found to be unjust to any interests."

Under this order the railways had until Nov. 15 to file and put in force other tariffs in lieu of those complained of, but under the Act 10 days filing in advance of the date effective is required in the case of increases in any rates. The new tariffs were filed Nov. 15, and, therefore, became effective on Nov. 25. When the C.P. freight officials appeared before the Board in the Portage La Prairie case, and heard the argument, they realized, as did Winnipeg Board of Trade members, who were also present, that there was only one decision that the Commission could give, which was that the tariffs complained of were discriminatory. There was no uniform scale of rates in these old traders' tariffs from Winnipeg; the rate for 50 miles in one direction was higher or lower than for 50 miles in another direction. In some instances the rates from Eastern Canada to Winnipeg added to these traders' rates to points west were lower than the through rates from the east to such western points. In some cases the rates from Winnipeg to a point west were lower than to a point intermediate. The tariffs were full of inconsistencies and discrimination, as a result of years of rapidly changing conditions and complications which will invariably creep in when a new country is being opened up by new lines of railways shortening the distances between points. There were also carried in these tariffs certain commodity rates lower than the rates applicable on goods of the same class, and which ordinarily took the same rates. Prominent among such commodities were what is known as the "Crow's Nest Commodities," with which western people are familiar.

Just about the date of the Portage La Prairie complaint, the Commission's judgment was handed down in what is known as the "Vancouver Complaint," in which some time ago the Vancouver Board of Trade complained that the rates from Vancouver eastbound to Alberta points were relatively higher than the rates from Winnipeg westbound; for instance, the class rates from Vancouver to Calgary, 643 miles, were higher than the rates from Winnipeg to Calgary, 840 miles. Furthermore, they complained that from Winnipeg the C.P.R. carried some commodity rates on iron and hardware articles into the Kootenay, which were very much lower than the rates on some commodities from Vancouver to the Kootenay. The distance from Winnipeg to Nelson is approximately 1,100 miles, from Vancouver to Nelson 556 miles. All of these rates, it was claimed, constituted an unjust and unlawful discrimination against Vancouver.

We have already published the Commission's judgment on the Vancouver case. Briefly it was to the effect that under all the circumstances they could not find that the class rates from Vancouver eastbound were excessive compared with the Winnipeg class rates westbound, but that the commodity rates on iron and other hardware articles carried from Winnipeg to Nelson were discriminatory, as compared with the rates applicable on such commodities from Vancouver to Nelson, and they ordered that this discrimination be removed, and the rates made more relative. The C.P. was, therefore, confronted with the condition, that if they continued to carry these low carload commodity rates from Winnipeg to Nelson, they would have to put in such rates from Vancouver to the

Kootenay as would undoubtedly divert the trade in a large number of these articles to the Vancouver gateway; that is, it would enable manufacturers in England to reach the Kootenay market in many of these lines, because of the low rates they can obtain by the China Mutual, or the Blue Funnel Lines to Vancouver, and it would seriously affect, not only the railway's own interests, but also Eastern Canada's iron and hardware trade.

The C.P.R. officials, therefore, had to consider two of the Board's judgments when they proceeded to frame up their new tariff from Winnipeg, and furthermore, in order to conform with the Board's order, they had to re-issue all tariffs which carried the same discriminatory conditions as those in what are known as "Winnipeg Traders' Rates." They, therefore, had to re-issue their tariffs out of all points, which are recognized as distributing centers, such as Brandon, Regina, Moose Jaw, Calgary, etc. This work of harmonizing these numerous tariffs, and eliminating what was complained of, and conforming with the two different judgments of the Board, involved an immense amount of labor, and the C.P.R. officials now say they have filed with the Commission a set of tariffs from all points affected, which are on a uniform scale, based upon mileage; they claim that the new rates from Winnipeg to all points in any direction are on exactly the same scale, according to the distance; that on every commodity, such, for instance, as 5th class, the rate is the same, and that no different rate is charged no matter who the shipper or consignee is. The effect of this, however, seems to be that in bringing about this uniformity they have made some increases in their rates, particularly to points in Southwestern Manitoba, and in fact, to all points within a radius of 150 miles from Winnipeg. These increases vary from 1 and 2c. up to 15c., with one exception, where there is an increase of 20c. 1st class, but when the tariff extends beyond this area the rates begin to decrease, until to Nelson the class rates are 1st ciass 20c., and 5th class 10c. lower than before, and to Calgary 1st class 5c., 5th class 4c. lower. To these latter points, however, the old commodity rates referred to are cut out, so that on these particular articles, viz., iron, hardware, paints, etc., to the Kootenay it means an advance, and at Calgary it breaks even; therefore, while the iron interests are not benefited at the distant points, the grocery, dry goods, drugs and other lines of trade are benefited.

While the Winnipeg Board of Trade have not made any specific complaints against the new tariff, they ask that more time be given for consideration thereof before they are published. From the reports received from other centers in the west, such points seem satisfied with the new tariffs; apparently they realize that the only proper adjustment of these questions is under a mileage scale, so that places which are situated geographically so as to be in the center of a large consuming territory, can get the benefit of such geographical position. To the ordinary observer it would seem improbable that the change such as appears to have been made in the rates could seriously affect Winnipeg's jobbing interests, with it's geographical position, and the firm hold they have secured upon the jobbing trade of Manitoba and Saskatchewan. It would seem that some of the consumers in central Manitoba would pay higher freight rates on their goods shipped from Winnipeg, but as against this the C.P.R. says, outside of the question of uniformity in the rates, etc., that they are reducing their all-rail rates from Eastern Canada 30c. per 100 lbs. 1st class, and 10c. per 100 lbs. 5th class, and that such reductions are more than equivalent to any advances made in the rates from Winnipeg to Manitoba points.

From press despatches it would appear that the Manitoba Government have simultaneously with these changes in the Winnipeg rates, which changes are made on the same basis by the Canadian Northern Ry. out of Winnipeg, ordered the latter company to reduce their rates on oats, barley, rye and speltz 1 to 2c. per 100 lbs. It is stated that under the terms of the Provincial Act, which authorized the transfer of the old Northern Pacific and Manitoba Ry. lines in Manitoba to the Canadian Northern, the Government could call upon them for certain reductions in the rates on grain then in effect, and the above order calling for a reduction in the rates on coarse grains, which is effective Nov. 25, is issued under the act referred to. It is claimed, therefore, by the Manitoba Government that this reduction in the rates of oats, barley, etc., will more than compensate the Manitoba farmer for any advances there may be in the Winnipeg distributing rates, combined with the reductions in Western and Northwestern Manitoba.

It will certainly be a relief to the railways in the Northwest if the revision of these rates will put a stop to the numerous complaints that have been made constantly by ambitious centers opening up in the great west, which have in the past held the opinion that Winnipeg has been favored by the C.P.R. in the matter of freight rates.

THE CHIEF COMMISSIONERS' OPINION

Following is the full text of the opinion of A. C. Killam, Chief Railway Commissioner, in re the Portage la Prairie Board of Trades complaint: "This is a complaint of the Board of Trade of the town of Portage la Prairie, Man., against a series of special freight tariffs of the C.P.R. Co., expressed as, 'To be used on re-shipments by Winnipeg wholesale houses only to traders doing business at or tributary to stations specified herein.' The grounds of objection to the tariffs are, 'That these tariffs are illegal inasmuch as they are discriminatory as between different shippers and different consignees, and also as between different communities.'

"Evidence was taken in the matter before me alone at Winnipeg, under special order of the Board. Notice of the taking of this evidence was given to the Winnipeg Board of Trade, that those representing the commercial interests of Winnipeg affected by or interested in the tariffs, might have an opportunity of taking part in the proceedings, and of taking any action which they might desire in support of the tariffs objected to; and the President, the Secretary and two other members of the Winnipeg Board of Trade attended.

"The evidence given before me showed that no persons, outside of those whose names appeared upon a certain list of wholesale merchants doing business in Winnipeg, could ship goods under the rates mentioned in those tariffs, and that the company had no tariff giving similar rates to other persons or classes, and that the rates, also, were limited to shipments to consignees whose names appeared in certain lists of traders furnished to the railway company's agents at the different points, respectively. The evidence further showed that shipments made by or to others than the parties named in these respective lists were governed generally by the rates in the ordinary mileage tariffs of the company, which were considerably higher than the rates in the tariffs objected to. The evidence further showed that there was no tariff of a similar description for shipments by similar classes of persons from Portage la Prairie, but that such shipments were governed by the ordinary mileage tariffs under which the rates were higher for proportionate distances. It further showed that, in some instances, the rates from Winnipeg, under the tariffs objected to, were lower than those charged from Portage la Prairie to points westward therefrom, although the goods were carried over the same routes from Portage la Prairie in addition to the distance from Winnipeg to Portage la Prairie. The evidence also showed that in many cases the rates from Winnipeg to Portage la Prairie, under these tariffs, were much less for the same classes of goods than those from Portage la Prairie to Winnipeg.

"Opportunity was given, both to the railway company and to the Winnipeg Board of Trade, to discuss the subject and to offer any remarks or arguments which they might desire to make in regard to the complaint. While counsel for the railway company did, to some extent, contend that the tariffs were justified by the conditions existing when they were originally framed, no real argument in support of them was made. The gentlemen of the Board of Trade were informed that if, after further consideration and taking legal advice, they desired to offer anything in support of the tariffs, it would be considered by the Board. They did state, that, as these tariffs had been established for a considerable length of time and business had been transacted under them, it would be unfair and would cause too much disturbance in business to have them suddenly abrogated. All this occurred some two months ago, and no communication has since been received from the Winnipeg Board of Trade.

"While refusing at the time to express an opinion upon the subject, I warned the parties that it would be advisable that they should prepare for a change. Ample opportunity has now been given for the purpose, and I have been informed by the Assistant Freight Traffic Manager of the railway company that the company is prepared to substitute by Nov. 15, 1907, new tariffs which would not be open to the objections put forward on this complaint.

"In my opinion, the objections to the tariffs are well founded; they appear to me to be contrary to the provisions of the Railway Act prohibiting undue or unreasonable preferences in favor of particular persons and unjust discriminations between different localities and the charging of higher tolls for shorter than for a longer distance where the shorter distance is included in the longer, and which require that all tolls shall always, under substantially similar circumstances and conditions in respect of traffic of the same description, etc., be charged equally to all persons.

"In my opinion, the parties interested should be notified that the Board considers that these tariffs are contrary to the provisions of the Railway Act and that they will be disallowed, and that the railway company should, not later than Nov. 15, 1907, file and put in force other tariffs in lieu of those complained of. I think it advisable that the Board should not, in this instance, determine the rates to be substituted, as much delay would be involved in making the necessary inquiries; but that it will be sufficient to disallow these tariffs, allowing the company to substitute new ones, which may be made the subject of complaint if found to be unjust to any interests."

The special meeting called for Oct. 28, to ratify the proposals for the reconstruction of the Pere Marquette Rd. Co., was adjourned indefinitely, it having been found impracticable to arrange the preliminaries of the reconstruction.

Press dispatches from St. John, N.B., Nov. 14, stated that it was expected that an official announcement would shortly be made to the effect that the C.P.R. had taken over the New Brunswick Southern Ry. from the late Russell Sage's estate.

The Work of the Freight Traffic Department.

By John Pullen, Assistant Freight Traffic Manager G.T.R.

To the members of the Canadian Railway Club, whose lives are devoted to the study of scientific, engineering, and mechanical problems, I am sure that anything I can say in reference to the railway freight traffic work, even though described in charming literary style, will seem dull and commonplace. If in what follows there should seem to be what you would term "shop talk" or departmental phraseology, I must ask your indulgence. We live in an environment which calls for the use of technical terms, apt, but expressive, at least to ourselves, if not always clear to others.

To operate a railway successfully, it is essential that it be organized into special and separate departments, each having certain well-defined objects, namely, to centralize responsibility and give direction to trained experts, who in time become specialists in their particular work. For this purpose there is established the engineering department, motive power department, transportation department, passenger department, accounting department, freight department, etc. I have been asked to tell you something about the workings of what to me is the best and most important department of all—the freight department.

This department is responsible for the gross earnings derived from the transportation of freight and live-stock traffic. It is the duty of its officers to obtain all the freight they can for the railway. This can only be done by a constant and systematic solicitation on the part of its representatives, by carefully looking after the transportation requirements of its customers, by properly arranging its freight rate schedules so as to permit the utmost freedom of interchange of commercial commodities between various sections of the country, and by framing its rules and regulations for the carrying out of the thousand and one details which must necessarily be followed in order that the public may be properly served and the interests of the railway protected.

In somewhat the same manner that the organization of the railway is subdivided into departments, so each department is again subdivided, in order that the work may be systematized and centralized for close supervision. The head of the freight traffic department must necessarily be at the company's headquarters, in close relation to the executive officers, who decide matters of policy and questions of supreme importance. His title is usually that of vice-president or freight traffic manager. He assumes direct charge of matters of greater importance, the selection and appointment of subordinate officers, all negotiations leading up to and culminating in formal contracts with connecting railways and steamship lines relating to traffic, and through the medium of daily or weekly reports from many sources keeps a close supervision of every part of the department's work, in order that he may direct its affairs and report results to the executive officers. He must have close at hand an efficient staff of assistants, who can be relied upon to carry out his directions to the minutest details. These assistants are usually designated as assistant freight traffic manager, general freight agent and assistant general freight agent, each reporting to the next ranking officer. Their jurisdiction is co-extensive and embraces all portions of the railway.

It is manifestly impossible to handle from headquarters all the details of the freight traffic of a railway having a large mileage. Therefore the system is divided into districts or divisions, the boundaries of which are usually determined by the sources and amount of traffic requiring supervision. A division freight agent, or officer of corresponding title, reporting to the general freight agent, is placed in charge. He supervises and instructs the station freight agents in their duties for the freight department and keeps on friendly terms with, so as to best serve, the patrons of the railway. The division freight officer, in carrying out the purposes of the department, is required to study his section of the country and its agricultural and commercial conditions, that he may assist in the development of the company's traffic. He will see that the freight rates which are prescribed for use in his jurisdiction are properly adjusted to each other and in their relation to other sections, that the merchants and manufacturers may be assisted in carrying on a successful business. He should maintain a personal acquaintance with practically all of the shippers. He is expected to interest investors in the location and establishment of manufacturing enterprises along the line, to co-operate with producers in finding markets for their products, and to work with the civic authorities in all towns and cities in promoting local enterprises. If he can establish a saw mill in a lumbering country, he creates traffic and assists in clearing the forest preparatory to the agricultural pursuits which follow. If he can interest a grain buyer to erect a small elevator at or near a railway station, to which the farmers can bring their grain for sale, it is an advantage to the community and to the railway. If he can persuade the farmers in a given community that it is to their interest to sell in a distant market their high grade grains, such as wheat, peas, and barley, instead of feeding them to their live-stock, and in place thereof to buy a cheaper grain brought in by the railway, he aids the community and creates traffic for the railway. In the newer sections of the Northwest the division officer assists the Government officials in their tours, where lectures are given to the farmers regarding the proper selection of seeds best adapted for their particular localities.

The largest part of the traffic of the railway originates on its own line. For our present purposes this may be designated as "local." While it requires and receives the closest attention of its carefully selected staff of subordinate officers, there is also a large traffic designated as "through," which originates beyond its own lines, brought to its various junction points by connecting railways and steamship companies, with which friendly traffic relations must always be maintained by the officers. This traffic is always of a keenly competitive character, and in order to secure its full share, each railway provides an organization of outside district officers, who in turn supervise the work of the commercial or general agencies maintained in many of the large cities. It is the duty of these agents to keep themselves fully informed regarding traffic that is to move in the future and through the good-will of the customer, which they must at all times cultivate, secure the traffic for the railway which they represent. As there is always the keenest strife between competing railways for this through traffic, it is important that the commercial agent, to be successful, must be a man who stands high in the community for integrity and faithful performance of duty to the public as well as to his company.

His success is measured by the amount of traffic that he secures, and the extent to which he enjoys the confidence of the public. Such agencies are maintained in most of the large manufacturing and commercial centers from the Atlantic to the Pacific, as well as in Great Britain and on the continents of Europe, Asia and Australia.

Amongst other instrumentalities used in securing the through traffic, are organizations known as fast freight lines or despatch lines. Several connecting railways extending between east and west, whose interests are mutual, co-operate in maintaining offices and joint agencies, whose duty it is to secure traffic for their particular fast freight line. These "lines" are not incorporated. They are merely organized co-operation. The expense of maintaining these joint establishments is paid pro rata by the railways in interest according to the benefits received. There are many such organizations, and as each has a distinct name and trademark, which becomes well known to the public as indicating a through route, they are successful in building up traffic for the railways which comprise the through route.

The traffic to and from abroad is placed under another specially trained officer, the foreign freight agent. The foreign freight (that imported as well as that exported) is competed for by all the railways and steamship lines serving the seaports on the Atlantic coast and the Gulf of Mexico, from Montreal and Halifax on the north to New Orleans on the south. The Oriental traffic is largely handled through ports on the Pacific ocean. The problems arising from the keen competition for this foreign traffic are complex and require a keenly discerning and discriminating judgment. A great deal of this work is directed by telegrams and cables. The foreign freight agent must not only keep himself informed regarding the probable movement of traffic, but must watch all his competitors with unceasing vigilance, and maintain the closest and confidential relations with steamship companies and owners, in order to secure from them at all times the lowest ocean rates and the treatment accorded to the "most favored nation."

From the transportation of the hundreds of thousands of consignments of countless varieties of traffic of domestic and foreign origin, which are distributed over the American continent as well as abroad, and which pass through so many different hands, there inevitably arise some errors which result in claims from the public for loss of or damage to goods, or for excess charges. For the purpose of promptly investigating and equitably adjusting such claims, another department, under a freight claim agent, is established. A large staff of experienced investigators of freight claims is here employed. The head of that department must have a thorough knowledge of the rules and regulations, not only of the freight department, but of the transportation department as well. He must have a keen appreciation of, and sympathy for, the apparently unavoidable annoyance which such claims necessarily give the public, and by the manner in which his work is carried on he can win many friends or may create many enemies for the railway. He must have a knowledge of commercial practices and trade conditions, and be familiar with the laws, federal, state, and provincial. He must be able quickly to discern whether a claim has merit or not, and above all, be courteous and fair and just in his dealings with the public.

In recent years there has arisen on this continent a public demand for regulation of railways by federal or state commissions, to which appeal may be made wherever a merchant has reason to feel that his freight rates are excessive, or are unjustly discriminatory. So long as men are constituted with different temperaments, and endowed with firm convictions as to what is right and wrong, it is too much to expect that freight officers—even of the highest skill and the best intention to be fair and reasonable—will always succeed in avoiding differences of opinion with their patrons. Although we believe and broadly declare that the interests of the public and of the railways are mutual and

interdependent, there are certain to arise from time to time disputes which have their origin in the desire of shippers to obtain some further advantage by lower freight rates, which the railways either are unwilling to concede, because its necessity or fairness has not been established, or because such a concession, if made, might have the far-reaching effect of disturbing a considerable part of what is termed the rate fabric, and thus result in serious loss of revenue to the company, which it is the duty of the department to conserve.

Each of these appeals to the railway commissions can be likened to a suit at law, and is dealt with in much the same way. By reason of their far-reaching importance it is often found necessary to call into use the services of the company's best legal talent. These suits are expensive to the company, and require much of the time and attention of the departmental officers, hence, they are to be avoided, whenever possible, by patient explanation, persuasion, or reasoning with the complainant. Most of the complaints are based on what is alleged to be unjust discrimination in rates. It is, therefore, of paramount importance that the freight-rate schedules of the company be compiled with skill and care, with the object of not only fixing rates which, applied to the probable traffic, will in the aggregate yield reasonable returns, but which are at the same time free from unjust discriminations. This is one of the most important functions of the freight traffic department. Skilled mathematicians, trained in the department and experienced in the making of tariffs, are employed.

Some idea may be had of the complex nature of this branch of the work when I say, without attempting at length to explain the object of each, that there are:

Local tariffs and joint tariffs;
Through tariffs and proportional tariffs;
Export tariffs and import tariffs;
Standard tariffs and differential tariffs;
All rail tariffs and ex-lake tariffs;
Ocean and rail tariffs, and lake and rail tariffs;
Winter tariffs and summer tariffs;
Eastbound tariffs and westbound tariffs;
Class-rate tariffs and commodity tariffs;
Association tariffs and individual tariffs;
and others too numerous to mention.

There is no branch of the traffic work, of which so little is known to the outside world as that of making freight-rate schedules. The public demands, and is entitled to receive, fair and reasonable freight rates, so adjusted as to avoid unjust discriminations. With the keen competition between rival manufacturers and merchants, the prime requisite is that there should be stability of rates, fairly related, and given to all without partiality. A freight officer is sometimes asked —"How do you make these freight rates? What is the basis upon which you start? How do you determine what is a fair and reasonable rate? With the thousands and thousands of rates which you make, how do you determine what each shall be and the relation between them?"

The balance of Mr. Pullen's paper, which was read at a meeting of the Canadian Ry. Club recently, will appear in our next issue.

The following officers were elected at the recent annual meeting of the Fort Seneca (B.C.) Mutual Telephone Co.: President, L. C. Umsted, Vice-President, W. C. Rosenberger; Secretary, I. S. Edwards; Treasurer, F. Edwards.

An investigation is being made by the Manitoba Attorney-General's Department, into a series of accidents arising out of dynamite explosions on the Eastern Division National Transcontinental Ry. construction work north of Kenora, Ont.

TOO LATE FOR CLASSIFICATION.

Railway Development, Etc.

Central Ontario Ry.—Tenders are being received to Dec. 2, for clearing, grading, tracklaying, ballasting and other work required in the construction of the extension from near Bancroft to Whitney, Ont., a distance of about 18 miles. The extension is in progress between Bancroft and Lake St. Peter, 25 miles, W. Gibson, Port Hope, Ont., being the contractor. Grading upon this portion of the extension is reported to have been completed for 14½ miles and track to have been laid upon four miles.

Edmonton, Dunvegan and British Columbia Ry.—Application will be made at this session of the Dominion Parliament for an act granting an extension of time for the commencement and completion of the projected railway. Pringle and Guthrie, Ottawa, are solicitors for the company.

Ottawa, Brockville and St. Lawrence Ry.—Application will be made at this session of the Dominion Parliament for an Act extending the time for the commencement and completion of the line authorized to be constructed between Ottawa and Brockville, Ont. N. Belenger, Ottawa, is secretary of the company.

Pontiac Central Ry.—An application will be made this session of the Dominion Parliament for an Act declaring the Pontiac Central Ry., authorized to be constructed last session of the Quebec Legislature, to be a work for the general advantage of Canada. Powers will also be asked to extend the lines authorized by the Quebec Act to James Bay, along the valley of the Nottaway River, and also to extend in a southerly direction to the Brockville, Westport and Northwestern Ry.

Stanstead, Shefford and Chambly Ry.—The Central Vermont Ry., which operates this railway under lease, is engaged in bringing the roadbed up to a higher standard, and ballasting and other work is in progress. At a meeting of shareholders, Nov. 13, a petition was presented asking for an extension of the line from Waterloo, Que., to Island Pond, Vt., via Eastman, Magog, Fitch Bay, Beebe Plain, Derby and Charleston, about 50 miles. Such a line would shorten the distance between Montreal and Island Pond by 26 miles and give the G.T.R. a second route between the two points. G. C. Jones, General Manager Central Vermont Ry., has promised to give the matter every consideration.

Grain Elevator Notes.

W. C. Thornburn is building an elevator at Broadview, Sask., and another at Oakchella, Sask.

It was stated, Nov. 15, that over 170,000 bushels of grain had arrived at the C.P.R. elevator at St. John, N.B.

The C.P.R. is installing eight 75 h.p. motor attachments, in connection with the motors operating the receiving and shipping legs of its elevator B, at Fort William, Ont. It is estimated that a saving of about $1,500 a year will be achieved thereby.

H. Kippen, President, Farmers' Elevator Co., Ltd., Carlyle, Sask., was presented with a gold watch and chain, Nov. 9, in accordance with a vote passed at the annual shareholders' meeting, as a testimony of the work done by him in connection with the company during the past season.

Atlantic and Pacific Ocean Marine.

The Salvation Army is said to intend acquiring a steamship to enable it to deal with its own immigrants, the vessel to be entirely manned by Army members.

M. Balmer, a retired captain, who had commanded vessels sailing to the West Indies, and to South American and European ports, died at St. John, N.B., Nov. 12, aged 70.

Two stewards employed on the C.P.R. steamship Empress of Britain were arrested Nov. 13, and charged with defrauding the company by smuggling passengers on that vessel. They were taken to Liverpool, Eng., for trial.

The mail contract with the Orient Co. for the Australian mail service has been signed, covering ten years from 1910. A subsidy of £170,000 a year is provided, the company to run five 17-knot steamships, effecting a saving of two days, and to build two more vessels later.

The new Royal Edward Dock, at Avonmouth, Eng., was opened by Sir H. Campbell-Bannerman, Prime Minister, Nov. 14; and at the luncheon which followed, Hon. C. Sifton, responding to the toast of "Ships, Colonies and Commerce," referred to the proposed fast service between Great Britain and Canada.

The Cunard Line steamship Mauretania arrived at New York, Nov. 22, on her maiden trip. On account of heavy weather at sea, and fog in approaching the harbor, the anticipated lowering of the Lusitania's record did not take place. She had on board gold to the value of $12,500,000, which is believed to be the largest amount ever transported on one vessel.

Maritime Province and Newfoundland Marine.

Tenders are being received for the construction of an extension to the public wharf at Dorchester, N.B.

The steamboat Victoria struck a log in the St. John River near Fredericton, N.B., Nov. 11, and broke her paddle wheel.

Two schooners, of 167 and 100 tons, named, respectively, Mildred and Silver, were launched at Lunenburg recently.

J. Perry, who had been in charge of the Sheet Harbor lighthouse, N.S., for 28 years, died at Pope's Harbor, N.S., recently.

A press report states that Mackenzie, Mann & Co., Ltd., intend having a steamboat built to run between St. John, N.B., and Port Wade N.S.

It is reported that control of the Consolidated Steamship Co., of which the Eastern Steamship Lines is a part, has passed to J. Pierpont Morgan.

Tenders are under the consideration of the New Brunswick Public Works Department, for the construction of a low water wharf at the Jemseg mouth, Cambridge, N.B.

The Dominion Government steamship Lady Laurier struck on a shoal near Clark's Harbor, N.S., about Nov. 13, and broke a propeller blade. It is stated that the accident was due to the shoal being wrongly charted.

The Plant Line steamships' winter service went into operation Nov. 20, the steamship Halifax being placed on the Halifax-Boston route, while the A. W. Perry is undergoing repairs. When these are completed she will be sent south.

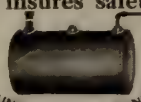
The steamboat Sincennes, recently purchased by D. J. Purdy, St. John, N.B., from the Sincennes-McNaughton Co., Montreal, struck a floating log in the St. John River, Nov. 15, and broke her paddle wheels. It is feared that she will not be ready to be placed on the route again before the close of navigation.

The Bathurst Lumber Co., Ltd., has been incorporated under the Dominion Companies Act, with a capital of $100,000 and office at Bathurst, N.B., to carry on the business of lumbermen, timber merchants, etc., and to construct, charter and employ steam and other vessels, and to carry on the businesses of wharfingers and vessel owners.

The Sydney, N.S., schooner Basutoland, from Point du Chene, bound for New York, struck at White Point, Nov. 13. She was

STOP!

Your present method of handling oil in signal and interlocking towers is dangerous. It's out of date because safety is not considered. It's out of date because the Bowser insures safety.



THE BOWSER SYSTEM
OF OIL STORAGE FOR SIGNAL TOWERS, ETC.

Provides for storing the oil in an underground tank outside the tower alongside the track where the tank can be easily filled direct from the supply car.

An adjustable measure pump in the tower draws exactly enough oil at each stroke to fill a lamp, measuring the oil directly into the lamp.

There is no spill, no waste, no overflow, no evaporation, no gases and no danger, no tin funnels, no measure, no oily waste. For information send for bulletin 18

subsequently floated and towed to Canso, but is waterlogged. She was built at Bath, Me., in 1870, and reconstructed at Liverpool, N.S., in 1903, her dimensions being: Length, 116.9 ft.; breadth, 29 ft.; depth, 8.4 ft.

Province of Quebec Marine.

The Dominion Government tugboat Jessie Hume collided with the tug Corrine, in Lake St. Peter recently, and an inquiry into the circumstances has been held by Commander O. G. V. Spain, Wreck Commissioner.

The Dominion Marine Association's executive committee has passed a resolution condemning the proposal to dam the St. Lawrence River in the interests of power companies, as being against the interests of navigation.

The proposed car ferry between Quebec and Levis was discussed at a meeting of the Quebec and Levis Ferry Co.'s directors, Nov. 14, but as plans and other information necessary to allow a decision to be arrived at had not been completed, nothing was settled. A special meeting to consider the plans, etc., will be held later.

The New Ontario Steamship Co.'s steamboat Neepawah crashed into the gates of lock 1, Lachine Canal, Nov. 12, carrying them away, and causing a considerable amount of damage to other shipping. The Montreal Transportation Co.'s barge Regina was caught in the wave and sank after colliding with the wharf in the river. She was loaded with 25,000 bush. of wheat, all of which, with the vessel, is lost. The barge Hurona, belonging to the same company, was also damaged to the extent of $5,000. The Department of Railways and Canals has held an investigation into the circumstances of the accident and the extent of the damage to the canal, while the Department of Marine will conduct an enquiry in order to fix the responsibility.

Ontario and Great Lakes Navigation.

The losses on the Great Lakes for Oct. are estimated at $500,000.

Tenders are being received for the purchase of the Richelieu and Ontario Navigation Co.'s steamboat Picton, which was burnt out in Toronto harbor recently, and abandoned to the underwriters.

R. Roddick, who has been in charge of the Gull lighthouse between Cobourg and Port Hope, Ont., for a number of years, resigned Nov. 18. His place has been taken by his brother, J. Roddick.

The Canadian Towing and Transportation Co.'s barges Onondaga and Black Diamond were sunk off Stoney Light Point, Lake Ontario, recently, while bound from Oswego, N.Y., to Montreal with coal.

It is reported that the Belle Isle and Windsor Ferry Co. has purchased Peche Island, which lies near the junction of Lake St. Clair and the Detroit River, and will establish a summer resort and park there.

W. McGannon, who was for 56 years a pilot on the St. Lawrence between Montreal and Toronto, chiefly in the employ of the Richelieu and Ontario Navigation Co., died at Windmill Point, Ont., Nov. 18, aged 88.

The steam barge Resolute, which sank in Toronto harbor last year, is being raised. Considerable work had been accomplished in this direction Nov. 23, and it was hoped that the raising would be completed by the end of the month.

Canadian Colored Marbles Ltd. has been incorporated under the Dominion Companies Act, with a capital of $375,000 and offices at Montreal, amongst other things, to build, charter and operate steam and other vessels for its purposes.

The Ontario Car Ferry Co.'s ferry steamboat Ontario No. 1 made her maiden trip between Cobourg, Ont., and Charlotte, N.Y., Nov. 14, with a full load of 26 cars, and passengers, being the first car ferry to cross Lake Ontario. She is making two trips a day between these points, with loaded coal cars, and it is hoped that it will be possible to operate her all the year round.

A plan has been submitted to the Port Arthur, Ont., City Council for a proposed breakwater to enclose the whole of the water front between Bare Point and the Kaministikwia River. The Dominion Government will be urged to proceed with construction, so that the harbor may be deepened to 26 ft.

The Montreal Transportation Co.'s barge Regina, which was sunk in the Montreal harbor by the accident to the Lachine Canal lock gates, was abandoned to the underwriters, who decided that it was not advisable to go to the expense of raising her. She was therefore broken up at once, as the wreckage was dangerous.

The U.S. lake survey reports the water levels in the Great Lakes, for Oct., as follows, the figures given being feet above tide water at New York: Superior, 603.19; Michigan, 581.19; Huron, 581.19; Erie, 572.71; Ontario, 246.37. With the exception of Lake Superior, all the levels are lower than in Sept., and a further lowering for Nov. should show: Superior, 1¾ ins.; Michigan and Huron, 2½ ins.; Erie, 2½ ins.; Ontario, 3½ ins. Lake Ontario was 11 ins. above the average Oct. depth of the last 10 years.

The Department of Marine has given notice that all Canadian lights and fog alarms in Lake Superior will be kept in operation until Dec. 10, except the Caribou Island light, which may not be kept in operation later than Dec. 5. All Canadian lights and fog alarms in Lake Huron, Georgian Bay, Lakes St. Clair, Erie and Ontario, will be kept in operation until Dec. 15, excepting at Lonely Island, Western Islands, and Red Rock, in Georgian Bay, which may not be operated later than Dec. 10. All Canadian lights in the River St. Lawrence will be kept in operation as long as navigation is open, and all gas buoys will be kept at their stations as long as ice conditions will admit.

Fleck Bros. Ltd. has been incorporated under the Dominion Companies Act, with a capital of $49,500 and offices in Ottawa, for the purposes of dealing in hewed timber for telegraph and telephone poles, etc., and to build, charter, purchase or otherwise acquire, all kinds of steam and other vessels, wharves, docks, elevators, etc., and to tow, carry passengers and freight, and generally carry on the business of an elevator, navigation and transportation company. The provisional directors are: A. W. Fleck, B. W. Fleck, H. G. Fleck, W. Greene, Ottawa, Ont.; and J. G. Fleck, Vancouver, B.C.

Manitoba, Saskatchewan and Alberta Navig'n.

The Post Office Department has made arrangements for mail service to Fort Smith and intermediate points along the Mackenzie River basin similar to that provided last year.

The season of navigation just closed on Lake Winnipeg is reported to have been very good. The general freighting showed an increase, but the fishing was not up to the average.

B.C. and Pacific Coast Marine.

A press report states that vessels will be constructed early next year, for service on the Skeena River, by the North-West Trading Co., and Capt. W. Langley.

The B.C. Transportation and Commercial Co. has deposited with the Dominion Public Works Department, plans of a proposed wharf in Telegraph Passage, Skeena River.

The C.P.R. steamship Charmer, which was damaged recently in a collision with the steamship Tartar of the same company, has been examined, and it is estimated that the necessary repairs will cost about $30,000.

The Hudson Bay Co. has placed a contract with A. Watson, Victoria, for the construction of two stern-wheel steamboats, for service on the Skeena River. One of these is to replace the steamboat Mount Royal, wrecked on July 6. The contract price is about $80,000. The machinery is to be built by the Polson Iron Works, Toronto. The dimensions are to be: length, 136 ft.; breadth, 36 ft.; with a deadweight capacity of 100 tons, and cabin accommodation for 40 passengers.

The C.P.R. freight steamship Princess Ena left Liverpool, Eng., for Victoria, Nov. 7, in charge of Capt. Cooper, formerly commander of the C.P.R. steamship Athenian, recently sold to a Japanese company. The Princess Ena, which is expected to arrive early in January, is of a somewhat different type to the majority of the company's vessels. She has been built with special consideration for cattle and lumber freights, and there is no passenger accommodation. Her dimensions are: length, 202 ft.; breadth, 38 ft.; depth, moulded, 17 ft. She has a flush deck, and extra large hatches and side ports.

Among the Express Cos.

N. J. Robinson, Dominion Ex. Co.'s messenger, Winnipeg, was killed in an accident on the C.P.R., at Regina, Sask., recently.

Telegraph and Cable Matters.

The G.T.R. has applied for a board of conciliation and investigation under the Labor Act, to take up all points at issue between the company and its telegraph operators.

W. F. Shiebler, who received the first message over the Atlantic cable, died Nov. 13, at Brooklyn, N.Y. He was later placed in charge of the first military telegraph station established in the U.S.

The construction of a telegraph office for the Dominion Government at Saskatoon, Sask., has been commenced. The building, which is to be of timber, will be 26 by 30 ft., and two stories high, and will include an operator's residence.

The award of the Board of Conciliation, consisting of Prof. Adam Shortt, W. Nesbitt, K.C., and J. Campbell, recently appointed to investigate the demands of the Temiskaming and Northern Ontario Ry. telegraphers, etc., will be issued shortly.

The Canadian Northern Telegraph Co. submitted a plan of a proposed line from Winchester St. to its head office, Toronto St., Toronto, to the city Board of Control, Nov. 15. The application was referred to the City Engineer for a report as to what portion of the line it was advisable to place underground.

W. M. Napper, a boat builder at Lake Geneva, Wis., who was engaged on the old Great Eastern at the time she was chartered to lay the cable between Newfoundland and the coast of Ireland, is still living there at the age of 67. In connection with the 50th anniversary of the laying of the cable, he recently related his experiences on board at the time.

One of the difficulties attendant on the wireless transmission of telegraphic signals has been the absorbing power of daylight on the Hertzian waves. This is in a fair way to being overcome. A system of impulses of a somewhat different nature has been tried with success, whereby the absorption by daylight has been reduced to a minimum. The new system is not so efficient by night as the old, but it is claimed that the advantage by daylight will compensate for any difference.

General Telephone Matters.

Work has been commenced on a telephone line between Lumby and Vernon, B.C.

The extension of the Niagara District Telephone Co.'s line to Silverdale is practically completed.

THE TORONTO PRESSED STEEL CO.

Submarine Signal
COMPANY

BOSTON, MASS.

Construction has been commenced by the Blenheim and South Kent Telephone Co. on its line to Guilds, Ont.

It is proposed to start a public telephone system at Woodstock, N.B., under the name of the Citizens' Telephone Co., with a capital of $24,000.

The ratepayers of Havelock, Ont., recently asked the Havelock Electric Light and Power Co. to instal and operate a telephone system in that town.

The Minneapolis Street and Town Lighting Co., of Minneapolis, Minn., has applied for a franchise for the supply of a telephone system to the town of Carnduff, Sask.

The Saskatchewan Government is having a survey made for the construction of a telephone line from Fort Qu'Appelle, passing through Lebret to Balcarres, thence to File Hills Indian agency.

Considerable improvements and extensions of line are to be undertaken by the Yarmouth (N.S.) Amalgamated Telephone Co., and the capital of the company is to be increased to $50,000 for that purpose.

The Burgessville Telephone Co. is extending its lines on the metallic circuit system. Connections have been made with Ingersoll and Harrietsville, and connections with Buffalo and other places in New York State are under consideration.

The People's Telephone Co., of Maynooth, Ont., operates about 150 miles of line with about 200 instruments. The officers are: President, W. J. Sargent; Vice-President, W. J. Fitzgerald; Treasurer, H. Harriett; Secretary and Manager, J. Harriett; while D. Smith, J. E. Weaver and S. Harriett are directors.

Province of Quebec Marine.

A Marconi wireless telegraph station has been opened at Three Rivers, Que., which will enable vessels equipped with the wireless apparatus to keep in communication with the shore line of telegraphs between Montreal and Quebec.

CANADIAN PACIFIC RAILWAY CO.

NOTICE TO SHAREHOLDERS

THE sanction of the shareholders is required before the Directors can issue the balance of the authorized ordinary capital stock of the Company that is unissued, namely, twenty-eight million three hundred and twenty thousand dollars ($28,320,000), and as it is desirable that the Directors should be empowered to make the issue when in their discretion they may deem it in the Company's interest to do so, a Special General Meeting will be held in accordance with the following Notice:

A Special General Meeting of the Shareholders of the Company will be held at the principal office of the Company at Montreal on Monday, the thirtieth day of December next, at noon, for the purpose of considering and, if approved, of authorizing the issue of ordinary capital stock of the Company to the amount of twenty-eight million three hundred and twenty thousand dollars, being the balance of the unissued ordinary capital stock of the Company heretofore authorized, such issue to be made in such amounts and at such times, according to the requirements of the Company, as the Directors may determine.

The Ordinary Stock Transfer Books will close in Montreal, New York and London at three p.m. on December 9th next. The Preference Stock Books will close in London at three p.m. on the same date.

All books will be re-opened on Tuesday, December 31st.

By order of the board.

CHARLES DRINKWATER,
Secretary.

Montreal, 28th November, 1907.

ELECTRIC RAILWAYS.

Projects, Construction and Betterments.

Berlin and Waterloo Ry.—The Berlin St. Ry. Commission has purchased three cars from the St. John (N B.) Ry., which have been in use for about a year, and are equipped with four motors and air brakes, and are heated by electricity.

Brantford and Hamilton Ry.—The laying of rails has been completed almost to Brantford, and it is proposed to run a partial service thereon.

British Columbia Electric Ry.—It is stated that extensions and improvements to plant and rolling stock at Victoria are contemplated, involving an expenditure of about $200,000, including an extension to Uplands and Ross Bay cemetery on the Cadboro Bay line, and possibly through to Foul Bay.

Hon. Maurice Gifford stated, Nov. 1, that it was almost certain that the company would immediately formulate plans for the construction of a water power plant for the city of Victoria, for the supply of power for the Victoria-Saanich line, using the minimum supply from the Esquimalt Power Co. for the remainder of the contract term.

Tenders for the construction of the first portion of the New Westminster-Chilliwack line from New Westminster to Cloverdale are under consideration.

The contract for the additions to car barns in Store St., Victoria, has been let to W. A. Gleason, Victoria, at $10,000.

Buffalo, Niagara and Toronto Ry.—Options have been arranged on lands for a right-of-way from Falls View to the Niagara, St. Catharines and Toronto main line near Stamford station, and the clearing of the route has been commenced. The lands acquired are parts of the right-of-way from Buffalo to Niagara-on-the-Lake, and it is stated that part of the route may be used for a power transmission line to St. Catharines.

Calgary St. Ry.—The tenders received for about 13 miles of street track, with overhead trolley work, six semi-convertible cars with equipment, and a steel bridge with concrete abutments were dealt with by the city council committee, Nov. 8. The amount allowed for the work by by-law is $250,000, and the only complete tender received was for $357,576. The committee decided to report to the council, and to recommend that further tenders be invited. (Nov., pg. 841).

Cobalt-Haileybury Electric Ry.—The municipal councils of Cobalt and Haileybury, and the councils of Coleman and Bucke have granted a franchise for the construction of an electric railway between Cobalt and Haileybury, Ont. It is proposed to run a line up the Montreal River valley, through Cobalt, Haileybury, Argentite, North Cobalt, and New Liskeard to Quinze rapids, and ultimately to Larder Lake. An hourly service between Cobalt and Haileybury, and a half-hourly service in the municipalities is talked of. The promoters say they hope to have the road completed by July, 1909. F. Latchford, J. W. Fitzpatrick, Ottawa; T. Fitzpatrick, New Liskeard; W. J. O'Brien, Renfrew, and C. M. Stone, Cleveland, Ohio, are the interested parties.

Chatham, Wallaceburg and Lake Erie Electric Ry.—Application is being made for an order to compel the executors of the Inches estate to allow the company to lay its tracks on the west side of Queen St., Chatham. The city granted the company permission to lay its tracks along the center of Queen St., for construction purposes only, and refuses to give permission for permanent tracks to be laid there. The trustees of the Inches estate say it is being laid out for residential purposes, and the laying of tracks on the west side of the street would depreciate the value of the property. (Oct., pg. 759).

Work is to be commenced on the subway under the M.C. Rd. tracks at Charing Cross, Ont., and it is hoped to have cars running through from Wallaceburg to the lake, about 35 miles, shortly. It is proposed to connect up with the Windsor, Essex and Lake Shore Rapid Ry., possibly during next year.

Hamilton, Grimsby and Beamsville Electric Ry.—Arrangements have been made for cars to run from the new terminal station in Hamilton, and the old H.G. and B.R. offices and sheds on Main and Catharine streets will in future be used for freight sheds for all the Dominion Power and Transmission Co.'s lines. C. Green has been appointed traction manager; G. E. Waller, general freight and passenger manager; A. Orr, chief clerk in the freight and passenger departments, and J. M. Seabrook and L. Pfeiffer, ticket agents, under the new arrangements.

Hamilton Radial Ry.—The city of Toronto has withdrawn its opposition to the H.R.R. Co.'s bill which is to be brought before Parliament at its next session, as the company has inserted a clause therein, whereby it agrees not to construct a line along any highway without obtaining the consent of the municipalities concerned.

London St. Ry.—The curve on Richmond St. which was stated to be dangerous when two cars passed, has been reconstructed to avoid any possibility of danger.

The company has agreed to pay $582, its share of the repairs to Beaconsfield Ave.

A request for a plebiscite on the question of a Sunday car service was ruled out of order at a meeting of the city council recently, on the ground that it had been already dealt with.

C. B. King, Manager, requested the city council, Nov. 7, to insert a clause in the by-laws under consideration, giving the company the privilege of using 70-lb. high T rails in 60 ft. lengths instead of the grooved rail. The request was granted.

Montreal and Southern Counties Ry.—A delegation of manufacturers located in Mill St. recently opposed the application of the company to construct a track along Mill St., and stated that the street was too narrow. It transpired that the street is wider than either McGill or Notre Dame streets, on which there are already tracks in use. The application was adjourned to allow of more detailed plans being submited.

Niagara Peninsula Ry.—The plans of the proposed route have been certified by the Ontario Railway and Municipal Board. The line will run from Port Colborne through the townships of Humberstone and Wainfleet.

The Niagara, St. Catharines and Toronto Ry. Co. will make application at the forthcoming session of the Dominion Parliament for an act extending the time within which it may construct the railway and branches which it is already authorized to do.

North Midland Ry.—A. E. Welch, of the South-Western Traction Co., London, Ont., stated, Nov. 7, that an English firm was arranging to undertake the construction of an electric railway from London to Stratford, Ont., under the charter of the N.M.R. Co. The proposed line would to some extent parallel the G.T.R., but would touch at some points which the latter does not serve. Mr. Welch was in Stratford Nov. 5, looking over the district with a view of selecting the best route for an entrance to the city. He said a proposition would shortly be made to the city council in connection with the project. (Jan., pg. 45).

Ontario West Shore Electric Ry.—The route proposed for this line is from near

Underwood

The Underwood Condensed Billing Typewriter describes itself in its title. An invoice (and as many carbon records as may be required) as well as the salesbook entry are made at the one writing.

The salesbook entries are made on a long sheet, and are condensed, eliminating all waste space. Both sides of the sheet are utilized, a distinguishing colour may be added to the right of the total column upon the sales sheet, in which sales can be classified according to departments or ledgers.

We have an interesting catalogue which illustrates and fully explains this, and the other special Underwood bookkeeping machines. It is worth the trouble of asking for it.

THOS. C. IRVING,
Gen. Man. Western Canada, Toronto.

Amberley, along the Saugeen road to Kincardine, Ont. The company proposes to endeavor to raise the funds required for the construction of the line, in either Great Britain or the United States, by the sale of its bonds. The municipalities through which it is intended to run the line will be asked to guarantee the bonds.

The Ottawa Electric Ry. Co. has expressed its willingness to share the cost of constructing the proposed viaduct, provided it is not called upon to widen the Somerset St. bridge. It is possible that this street bridge may be abandoned entirely as far as street railway traffic is concerned.

St. John (N.B.) Ry.—The work of double tracking the line in various parts of the city is practically completed. An application for an injunction to restrain the company from carrying out a part of the work had been applied for, but permission had been obtained, and it was expected that the tracklaying would be completed before the application could be heard.

St. Joseph and Stratford Radial Ry.—N. Cantin, the founder of St. Joseph, on the Ontario shore of Lake Huron, and the principal promoter of a number of industrial projects in connection therewith, amongst which is the construction of an electric railway to connect St. Joseph with Stratford, Ont., in an interview recently said, that the stories going about that the town was to be sold were incorrect. It was true that notices of sale by the sheriff had been given several times, but he had always managed to find the money required to keep his engagements. He had already expended $600,000 in his projects at St. Joseph, but considerably more money would have to be found. The Dominion Government was constructing a wharf, and when this and the electric railway were completed the town would go ahead. In regard to the electric railway he said that a considerable portion of the right-of-way had already been purchased, and negotiations were in progress for a further mileage. (April, pg. 271).

Sarnia St. Ry.—The Sarnia town council has passed a by-law permitting the company to construct about 1½ miles of track, to be completed by Dec. 1, 1908.

Southwestern Traction Co.—The service from London to Port Stanley, Ont., was commenced recently, a number of invited guests taking part in the inaugural trip.

A freight and express shed is being erected at Horton St., London, and it is proposed to erect a station also. The freight shed is nearing completion, but the station building is not to be commenced this year.

Strathcona Radial Tramway Co.—J. Walter, President, stated recently that reports to the effect that the company was anxious to sell out were incorrect. If the franchise were granted, the company would be quite prepared to finance and construct the system outlined.

A right-of-way has been purchased into the centre of Edmonton, and the company are asking for running rights over one or two streets which it is necessary to cross.

Sydney Mines (N.S.).—A proposal is on foot to construct an electric railway to Sydney no. 3 mine, and eventually to no. 4, and through to little Bras d'Or. It was anticipated that the Cape Breton Electric Ry. Co. would extend its line to cover the points named, but the scheme has not materialized. By the terms of the agreement between the C.B.E.R. Co. and the town council, any persons can, after May 28, 1908, construct a tram line on any street in the town not already covered, with the consent of the council. If the company does not construct the line by that time the promoters of the present scheme propose to take it in hand.

Toronto Ry.—A portion of the tracks on Yonge St., ¾ mile north of Scollard St., has been relaid with new 90-lb. rails, in 60 ft. lengths.

The relaying of the tracks between Kingston Road and Woodbine Ave. is proceeding, and in the meantime stub line cars are being utilized between the point of operation and Scarboro' Beach.

Pending the relaying of tracks on Dundas St., Toronto Junction, and the settlement of the dispute between the company and the council there, a stub line service is to be supplied from the Dundas St. car barns to the city limits as soon as possible.

Windsor and Tecumseh Ry.—The township of East Sandwich has applied to the Ontario Railway and Municipal Board for an order against the company to grade and extend Ottawa St., to supply better cars, and to sell 10 tickets for 25c. to school children whether they attend school in the country or in Detroit, Mich., as per contract. See also Sandwich, Windsor and Amherstburg Ry.

Electric Railway Notes.

The Sydney and Glace Bay Ry. Co., Sydney, N.S., wants a man to take charge of its equipment, including engines, boilers, generators, and cars.

The Omaha (U.S.) St. Ry. Co. recently paid out in wages, on one month's pay-roll, 600,000 five cent pieces, which had been retained for the purpose in view of the financial stringency there.

The Ontario Railway and Municipal Board has approved of the appointment of J. E. Hutcheson, R. Ingram and G. W. Lang, as examiners of motormen for the Ottawa Electric Ry. Co.

P. G. Gossler, of the J. G. White Co., New York, and at one time with the Montreal Light, Heat and Power Co., has been elected President of the Pottsville Union Traction Co., of Pottsville, Pa.

In pursuance of the Ontario Railway and Municipal Board's order regarding the provision of doors for the vestibules of Toronto Ry. cars, these have been provided, and will be fixed in place immediately it is considered necessary to do so.

R. M. Horne-Payne, Chairman of the B.C. Electric Ry. Co., at a meeting of shareholders in London, Eng., Nov. 15, said that Canadians might point with pride to the fact that no serious monetary crisis had arisen there. A debt of gratitude was due to the managers of the great Canadian banks, whose foresight produced such results.

The buildings at Dominion Park, Montreal, were destroyed by fire Nov. 6, the damage being estimated at about $100,000. The insurance carried on the buildings affected was about $85,000. The directors of the company decided, at a meeting held Nov. 9, to reconstruct the buildings at once. A number of Montreal St. Ry. Co.'s directors are interested in the Park Co.

The Ontario Railway and Municipal Board is considering what steps it may take respecting the enforcement of its order of April last, respecting the overcrowding of the Toronto Ry. Co.'s cars, when 15 miles of new track were directed to be laid and 100 new cars placed in service. The company has waited on the city to designate the streets on which tracks were to be laid, but this has not been done, and it is possible that the Board may consider it within its jurisdiction to do so without consulting the city. R. J. Fleming, Manager, recently stated that 25 of the new cars were practically ready, and would be placed in service as soon as the weather demanded the complete removal of all open cars from the routes.

Electric Ry. Finance, Meetings, Etc.

British Columbia Electric Ry.—Gross earnings for Sept., $152,568, against $114,221 for Sept., 1906. Working expenses, $79,227; renewal fund, $10,750; net earnings, $62,591; income from investments, $11,036; net income, $73,627; against $56,202 working expenses; $9,638 renewal fund; $48,381 net earnings; $9,536 income from investments, and $57,917, net income for Sept., 1906. Earnings for three months ended Sept. 30, $456,334 gross; $219,569 net; against $329,457 gross, and $160,302 net, for same period 1906.

At a meeting of directors in London, Eng., Nov. 7, it was recommended that the deferred and ordinary stocks be placed on a dividend basis, at 8% and 6% respectively.

Grand Valley Ry. Co.—An Order-in-Council has sanctioned the agreements entered into by this company, and the Brantford St. Ry., and the Woodstock, Thames Valley and Ingersoll Ry. Cos. for the purchase of the two latter. (June, pp. 427, 428)

The Brantford City Council has passed a by-law granting a franchise for a period of 50 years, during the last 25 years of which the company will pay to the city $2,500 a year. All local tracks will be reconstructed within a year, and the proposed extensions completed in two years. No stipulations have been made regarding Sunday car service. (Nov., pg. 841).

Halifax Electric Tramway Co.—Earnings for Oct., $14,403.93, against $16,096.58 for Oct., 1906.

Montreal St. Ry.—Total earnings for Oct., $311,898.38; operating expenses, $164,575.14; net earnings, $147,323.24; city percentage on earnings, $10,822.02; interest on bonds and loans, $16,706.31; contingent for renewals, $15,420.48; rent leased lines, $339.96; surplus, $104,034.47; against $281,822.28 total earnings; $157,689.47 operating expenses; $124,132.81 net earnings; $9,668.62 city percentage on earnings; $16,850.17 interest on bonds and loans; $14,091.11 contingent for renewals; no rent leased lines; and $83,522.91 surplus for Oct., 1906.

Quebec Ry., Light and Power Co.—The Dominion Parliament will be asked at its forthcoming session for an act amending the act of incorporation, providing for an increase of capital stock, the division of such stock into common and preferred shares, and to alter the date of the general meeting.

Sandwich, Windsor and Amherstburg Ry.—The Ontario Railway and Municipal Board has approved of the lease for 99 years of the Windsor and Tecumseh Ry., running from Walkerville to Tecumseh, a distance of about 12 miles, to the S. W. and A. Ry. (Aug., pg. 605).

Toronto Ry.—Car earnings for Oct., $290,443.51, against $264,860.61 for Oct., 1906. Approximate earnings for 10 months ended Oct. 31, $2,822,607, an increase of about $282,580 over those for the same period 1906. Operating expenses show a proportion to earnings of 53.7% against 52.9% for 1906. The percentage of earnings paid to the city for Oct. was $23,551.57, against $20,688.38 for Oct., 1906, and $12,370.48 for Oct., 1902.

Winnipeg Electric Ry.—The city solicitor has been instructed to proceed against the company to enforce payment of the amount alleged to be due to the city for default of service as provided by by-law. The city claims $9,930 at the rate of $10 a day while such default continues The claim is to be defended.

The Southwestern Traction Co., has inaugurated an express and freight service between London, St. Thomas and Port Stanley.

International Ry. Employes' Association.

This Association, which has its headquarters in Buffalo, N.Y., issued its 7th annual report Nov. 1, showing a membership of 1,527, comprising 58% of all employes of the International Ry. system, trackmen excepted. The increase in receipts for the year was $1,404.89, and increase in death benefits paid $550.00. The increase in sick benefits and medical attendance paid during the year was $889.00. Notwithstanding these increased expenditures, the surplus increased during the year $3,048.85, reaching a total of $14,269.18. During the year $3,930 was in International Traction Co. bonds; the total amount invested in securities of all kinds being $12,367.50. During the year the International Ry. Co. contributed $3,082.56 towards the expenses of the Association in addition to the free use of the club rooms at Virginia St. Since the organization of the Association seven years ago, the members have paid for dues and initiation fees $56,989.32, and with payments to the beneficiaries of 37 members who have died and also payments to members for sick benefits and medical attendance, the members have paid into the Association but $724.81 more than has been returned to them and their beneficiaries. There is a surplus of $14,269.18, resulting almost entirely from donations from the International Ry. Co. and others, interest on securities and profits from the annual ball. The experience of the past warrants the belief that this will be sufficient to provide for the future obligations of the Association.

The year's income account contains the following receipts: Initiations, $967; Dues, $8,730; toilet supply, $117.25; interest receivable, $608.16; sale of lost articles, $85.06; net proceeds of ball, $2,191.22; total, $12,698.69. The disbursements were: sick benefits, $6,430; death benefits, $1,200; medical attendance, $2,019.84, total, $9,649.84: net surplus, $3,048.85.

The Edmonton, Yukon and Pacific Railway Co.

Notice is hereby given that the Edmonton, Yukon & Pacific Railway Company will apply to the Parliament of Canada at its next session for an act empowering it to construct and operate a branch line from a point on its authorized line to Vancouver, and a branch or branches from a point or points on its authorized line to the headwaters of the McLeod and Brazeau rivers, and extending the time for the completion of its line from a point on its authorized line either to the Yellow Head Pass or to the Peace River Pass, and thence by such route as is found or deemed most practicable to a port in British Columbia, or to connect with the authorized line of the British Pacific Railway Company.

PIPER'S PATENT DISTANT SEMAPHORE

Montreal Street Railway Company.

The report for the year ended Sept. 30, 1907, was presented at the annual meeting, Nov. 6, as follows: Your directors beg to submit their 47th annual report, accompanied by the financial statements, which show the following results:

Gross earnings		$3,503,643.43
Operating expenses		2,104,653.42
Net earnings		$1,398,990.01
To which add: Received from M.P. & I. Ry. on account of interest		55,101.44
Total net revenue		$1,454,091.45
From which deduct:		
City per cent. on earnings	$214,840.36	
Interest on bonds and l'ns.	195,833.64	
Contingent account for renewals	171,517.04	
Rental of leased lines	3,059.64	
		585,250.68
Surplus		$868,840.77
From this there has been paid 4 quarterly dividends of 2¼% each	$768,100.00	
Placed to the credit of fire insurance fund	25,000.00	
		793,100.00
Transferred to surplus account		$ 75,740.77

The gross earnings increased during the year $403,156.55, or 13.00%; the operating expenses, $253,933.45, or 13.72%; the net earnings, $149,223.10, or 11.94%. The operating expenses for the year were 60.07% of the gross earnings, as compared with 59.69% in 1906. The increase in expenses is largely due to the increased wages paid to the men and the principal increase in fixed charges is due to the increased payment made to the City of Montreal for percentage on earnings. Your directors have continued the policy adopted of setting aside a certain percentage of gross earnings each month to the credit of contingent renewal account to meet the extensive renewals to the system of tracks, etc. This amount added to the balance of $7,816.94 carried forward from the previous year, makes a total credit to this account of $179,333.98, against which has been charged $167,696.12, expended during the year; $25,000.00 has been placed to the credit of fire insurance fund; the interest on the investments for the year for this fund were to $15,438.75. The amount now at the credit of the fund is $381,450.93.

Your directors expect to receive power from the new power house now being erected on Notre Dame Street in Dec., in time to help out the heavy requirements due to the winter load and conditions. The storage batteries installed at the St. Henri and St. Denis substations have been in operation during the year and have given entire satisfaction. It is expected that the battery station at Maisonneuve will be completed in Nov.

In accordance with the power conferred on the directors by the shareholders on Nov. 7, 1906, $2,000,000 of stock was issued to the shareholders at a premium of 75. This stock was all subscribed for and the calls on the same have been promptly met. The last call falls due Oct. 15. The premium on the stock, $1,372,192.50, has been placed to the credit of surplus account. Owing to the conditions of the money market and in order to provide funds for the purchase of the Montreal Terminal Ry., £208,000 of the company's notes were negotiated in England.

In the city proper few extensions have been made, as the city has not seen fit to grant any new routes, notwithstanding that the company has persistently urged the council to consider the question of granting new routes in order to meet the growing requirements of the public. This attitude is to be regretted, as the company has been, and is, anxious to keep well ahead of the requirements in order that the public may get the best possible satisfaction from its car service. Your directors intend to continue to press this matter upon the council in the hope that they will soon realize the importance of considering and

dealing with a question of such public importance.

In accordance with the wishes of the shareholders expressed at the last annual meeting, your directors applied to the Quebec Legislature for power to increase the number of directors to seven. This application was granted and your directors appointed to the board P. Galibert and G. Caverhill, to fill the number until the annual meeting should be held.

Your directors regret to have to report the death of one of their members, Lt.-Col. F. C. Henshaw, and in doing so, take the opportunity of paying tribute to his efforts and able assistance to the Board in the many and complex questions arising from time to time. Col. Henshaw was an enthusiastic believer in the company, and a regular attendant at the meetings until his health precluded it.

An agreement has been entered into with the Montreal Park & Island Ry. Co., whereby its tracks, situated in the town of Outremont, are leased to this company.

At the request of a number of shareholders and financial institutions, your directors decided that it would be to the interest of the shareholders that negotiable stock certificates be issued, covering the fully paid-up stock of the company, and on May 1 last, the same was put into effect.

The company has paid to the City of Montreal the usual property and business taxes and tax on earnings, $229,672.45, an increase of $37,975.86; account snow cleaning, $66,-647.27, making a total $296,319.72.

The Montreal Park & Island Ry. Co. has, during the past year, shown satisfactory results. In past years the M.P. & I.R. has been a charge on the Montreal St. Ry., but this year the company has shown improved earnings and was enabled to pay to the Street Railway Co. $55,101.44 on account of interest, and your directors believe that the returns from this investment will continue to increase. The M.P. & I.R. Co. has entered into a franchise with Notre Dame de Grace, for the extension of its system through the municipality extending over 50 years, and has secured a right-of-way from the present terminus of the Back River route to a point outside the village of St. Vincent de Paul, on the south shore of the river. During the past year additional right-of-way was purchased on the Cartierville line in order to permit the continuing of double tracking in this division.

The Montreal Terminal Railway purchase was completed on July 1, and your directors anticipate that this property will become a valuable asset to your shareholders in the future.

Hamilton Terminal Company's Station.

The station which has been built by the Hamilton Terminal Co., Ltd., on King St. East, Hamilton, Ont., is one of the most imposing structures in that city and stands out in bold relief to its surroundings.

It is thoroughly fireproof, being constructed of solid masonry and terra cotta with metal frames. The outside is of Indiana blue limestone for the first story and of pressed brick with trimmings of terra cotta above. The cornices and balustrades are all of terra cotta, richly ornamented. On the roof is a large clock with a dial 6 ft. in diameter, surmounted by a flag pole. The interior column and beam construction are of reinforced concrete surrounded by terra cotta blocks. The floors are hollow 8 x 10 tile and reinforced beams 5 ins. wide, alternating, allowing of large floor slabs, 22 ft. x 70 ins. On top of these is laid the usual construction of cinder concrete as a filler in between the 2 x 3 sleepers, on which is nailed the ward wood flooring for office rooms and solid Terrazzo construction 3 ins. thick for corridors and public spaces.

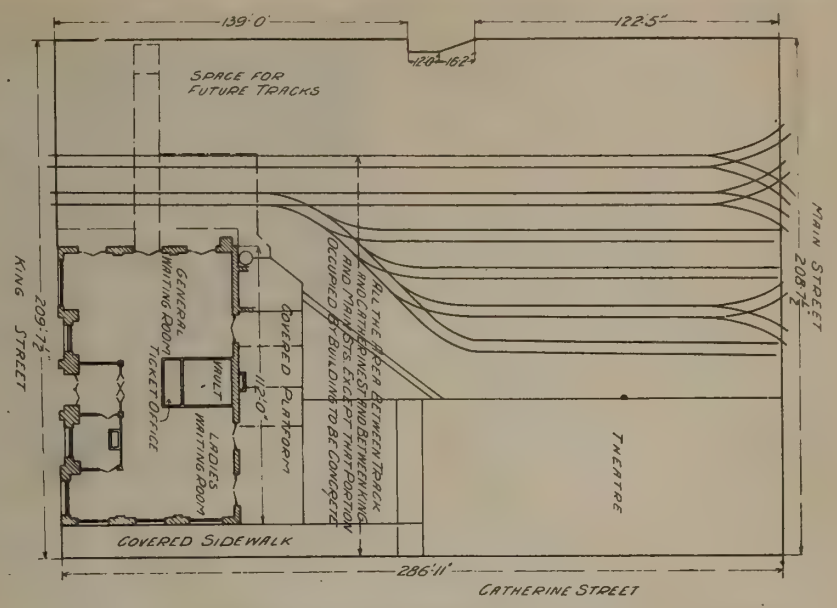
The main entrance doorway is a very handsome affair of richly carved stone, and at either side stand two magnificent bronze electroliers on stone pedestals. The entrance vestibule is 22 x 22 ft., and in the floor is a large monogram D.P. & T. Co., standing for Dominion Power and Transmission Co., which controls several companies whose offices and terminals are in the station building. The station floor consists of one large room 68 by 108 ft. Its floor is laid in ceramic tile with borders. The ceiling is 20 feet high, and the walls are wainscoted to a height of 10 ft. with English veined Italian marble. In the front part of the building is the ticket office, which is entered through the vestibule door. Immediately behind it is a large fire and burglar proof vault 16 ft. square, which runs from the basement to the second floor, which also has its Mezzanine floors, making four stories high inside and connected with each other by spiral iron staircases. To the right of the main entrance is an electric passenger elevator leading to the upper floors. The station floor is lighted throughout by electric glower lamps, placed in the ceiling and around the columns. Five double doors from the main room lead to iron fenced inclosures leading to the tracks outside, so as to control traffic to and from the cars. All the doors are arranged so that traffic must pass to the right in every case, thus avoiding conflict of passengers. The station room is very handsomely finished; the woodwork is of quarter-sawed oak, highly polished, and the metal work is of brush brass finish on bronze metal. In the basement are located the toilet rooms.

On the upper floors are the general offices of the company with its subsidiary companies. They are large and airy and finished in quarter-cut oak, except the board room on the corner, which is finished in mahogany and commands a fine view up King St.

The entire wiring for the building is laid in conduit and is on the 3-wire system with 8-ampere outlets (1,000 circular-mils for each ampere). The main distributing panel, located on the station floor, and the sub-panels on the upper floors are all controlled by main cut-out switches in the motor generator room in the basement. The entire wiring of the building is made especially heavy in order to provide for any future electrical development. The front of the station building is supplied with outlets for illuminating purposes so that when desired the entire front of the building may be covered with lights. The covered passageways at the right and the verandah in the rear are built of steel and copper, and are brilliantly lighted by nearly 1,000 incandescent lamps.

A battery of three boilers located under the tracks outside heat the station and office building, and also the Bennet Theatre, which is shown in one of the accompanying illustrations in the rear to the right.

The new station will be used by the Hamilton Radial Electric Ry., the Hamilton & Dundas Street Ry., the Brantford & Hamilton Electric Ry., and the Hamilton, Grimsby & Beamsville Electric Ry.



HAMILTON TERMINAL CO'S STATION—GROUND PLAN OF TRACK LAYOUT.

THE HAMILTON TERMINAL CO.'S STATION, HAMILTON, ONT.

Grain Elevator Notes.

The elevator heretofore owned by A. A. Wright at Kingston, Ont., has been purchased by the Renfrew Roller Mills Co.

The grain elevator at Caledonia, Ont., was destroyed by fire, Nov. 13, at the same time as the G.T.R. station was burned.

The name of the Imperial Elevator Co., Winnipeg, has been changed to that of the Imperial Elevator and Lumber Co., by order-in-council.

D. J. Murphy, for six years foreman of the Great Northern elevator at Quebec, accidentally shot himself while cleaning a revolver, Nov. 11.

The capital of the Zenith Grain Co., Ltd., has been increased from $25,000 to $50,000, by supplementary letters patent under the seal of the Secretary of State of Canada.

The partnership of R. Murray, A. M. Lyle, A. E. Venton, and G. R. White, carrying on business at Lyleton, Man., under the name of the Lyleton Elevator Co., has been dissolved as far as regards G. R. White.

The Chicago and Northwestern Granaries Co., Ltd., organized in London, Eng., in 1889, and owning a number of elevators in Minnesota, and North and South Dakota, has sold the whole of its interests therein to the Van Dusen-Harrington Co., of Minneapolis, Minn.

The Great Northern elevator at Superior, Wis., was recently destroyed by fire, together with 700,000 bush. of grain, three flour mills, 40 houses, two tugs, two scows, and a derrick. The cause of the fire has not been discovered. The damage done is estimated at $3 000,000.

The elevators at Port Arthur have been working to their full capacity recently, dealing with about 400 carloads a day. To cope with the accumulation of grain there, nine locomotives are working during the day and four at night, switching the cars to and from the elevator tracks.

The Goderich Elevator and Transit Co. will be able to deliver wheat to the C.P.R. cars on the Guelph and Goderich Ry., by means of a conveyer spout crossing the G.T.R. tracks. The application for permission to carry this spout across the G.T.R. tracks was made to the Board of Railway Commissioners Oct. 30.

It is stated that the Montreal Transportation Co. has transhipped over 11,000,000 bushels of grain so far this season. This is said to be the largest quantity passing through the Montreal elevator in one season. It is estimated that at least a further 2,000,000 bushels will be dealt with there before the season closes.

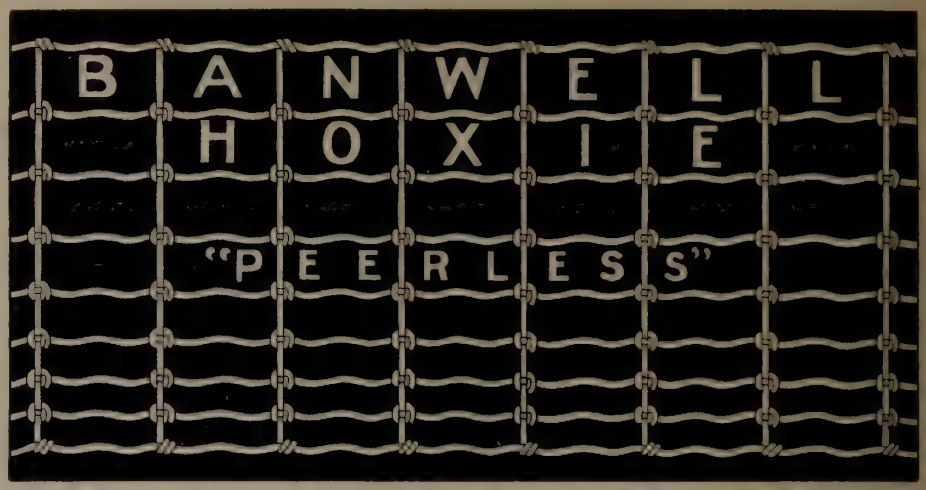
McLaughlin and Ellis, Ltd., has been incorporated with a capital of $100,000 and office at Winnipeg, for the purposes of constructing, acquiring, operating, hiring, leasing, selling, or otherwise disposing of elevators, for elevating wheat, grain or other produce, with the requisite docks, wharves, sheds and warehouses for the reception and storage of such grain, and generally to carry on an elevator and storage business, and for other purposes.

A deputation of members of the Manitoba Grain Growers' Association had a conference at Winnipeg, Nov. 8, with the Federal representatives of the Province, to discuss several recommendations which the Association are making respecting the grain trade. Amongst them are the questions of Government-owned elevators at lake terminals, transportation and tariff, regulations of elevators and railways, and legislation to prevent discrimination in charges by the elevator companies.

Regarding the establishment of elevators at Vancouver, B.C., W. Whyte, Second Vice-President, C.P.R., while in that city recently, said: "It is the intention of the company to reserve sites for grain elevators on the Vancouver waterfront. This idea is being kept in view in the yard improvements now being carried out, as it is impossible to tell what effect the building of the Panama canal may have on the export movement of wheat from the prairie provinces. One result may be that a very large percentage of the grain may seek an outlet via Vancouver instead of reaching the Liverpool markets via the St. Lawrence river route. Under these circumstances we have felt justified in making provision for future contingencies. If the grain from a big area of the Canadian west can be hauled here and loaded on steamers, making the passage of the Panama canal and landing it in Liverpool, only one transhipment being involved, as compared with elevator charges for transhipment at Fort William and Montreal—I say if this can be done more cheaply via Vancouver, then the business is bound to come this way."

The G.T.R. Co.'s appeal against the decision of the Board of Railway Commissioners in what is known as the penny-a-mile fare case, was argued before the Supreme Court at Ottawa, Oct. 29. Judgment was reserved.

The Imperial Service Medal has been granted to the following: Jas. Bradley, lockmaster, Welland canal; D. Hunter, lightkeeper, Port Dalhousie, Ont.; M. H. Johnstone, lockmaster, Rideau Canal; W. McG. Lambert, lightkeeper, Chantry Island, Ont.; J. G. Martin, lightkeeper, Little Metis, Que.; J. G. Newman, lockmaster, Rideau Canal; W. Newman, lockmaster, Rideau Canal; C. Sampson, lightkeeper, Ouetique Island, N.S.



PEERLESS WOVEN WIRE FENCING

Made from uniformly heavy hard steel wire, well galvanized.
Made in large rolls ready to stretch up.
Requires but few posts; costs very little to erect.
Conforms perfectly to any surface, no matter how rough.
Reduces the cost of fence maintenance to a minimum.

C.P.R. LANDS

THE CANADIAN PACIFIC RAILWAY COMPANY have 10,000,000 acres of selected lands for sale in Manitoba, Saskatchewan and Alberta.

Map No. 1—Winnipeg to Second Meridian	$ 8.00 to $15.00 per acre.
Map No. 2—South-Eastern Saskatchewan, 2nd to 3rd Meridians	10.00 to 25.00 per acre.
Map No. 3—Main Line, 3rd Meridian to Range 10 W., 4th Meridian(generally)	8.00 " "
Map No. 5—Calgary District	8.00 to 10.00 per acre.
Map No. 6—Part of Alberta—Edmonton, Battle and Saskatchewan Rivers Districts—Range 11 West, 4th Meridian to Range 7, West 5th Meridian	10.00 to 25.00 per acre.
Map No. 7—Part of Western Saskatchewan and Eastern Alberta, 3rd Meridian to Range 10 West, 4th Meridian	10.00 to 25.00 per acre.

Maps showing these lands in detail will be sent free on application.
All prices are subject to change without notice.

TERMS OF PAYMENT

An actual settler may purchase not more than 640 acres on the ten instalment plan by paying a cash instalment at time of purchase, interest at six per cent. on the unpaid purchase money at the end of the first year, and the balance of the principal, with interest, in nine equal instalments annually thereafter, as shown in the following table:

160 Acres at	$ 8.00 per acre,	cash payment	$191.70	first year's interest	$65.28	and nine instalments of	$160.00
" "	9.00	"	215.70	" "	73.36	" "	180.00
" "	10.00	"	239.70	" "	81.62	" "	200.00
" "	11.00	"	263.60	" "	89.78	" "	220.00
" "	12.00	"	287.60	" "	97.96	" "	240.00

Car Ferry Traffic on Lake Erie.

Winter navigation on Lake Erie between the coal shipping ports of Ohio and Canadian harbors, 60 miles across, has long been a problem. For more than a decade, Lake Erie car ferries have attempted to run uninterruptedly the year round, but time and again in late winter are overtaken by ice conditions which result in their being frozen in for weeks, sometimes a mile or more from shore. Nevertheless the car ferry traffic of this notable inland body of water is a success and is increasing. A new ferry, with novel features for ice battling, of which great things are expected, has recently been put into service, and it is reported that another large ferry is to be built. The navigation season for ore vessels on the lower lakes closes during the early part of December. After this time business at the docks is suspended except for the loading of ore from stock piles into railway cars bound for the furnace districts, and the loading of coal, steel, and other freight to the car ferries. There is a constant demand for U.S. coal on the Canadian side, and, as to the supply, it is more plentiful in winter for these routes than in summer, when large numbers of vessels are waiting for cargoes for the Upper Lakes. One of the car ferry routes on Lake Erie extends from Port Dover, Ont., to Conneaut, Ohio. Other Canadian ports which are reached from Conneaut are Port Stanley and Rondeau. The latest route on Lake Erie is one which has been inaugurated during the past year between Ashtabula, the world's greatest ore receiving port, and Port Burwell, Ont. Any of these routes compares favorably in length with the notable ones of Lake Baikal, which connect with the Trans-Siberian Railway.

The first two ferries introduced on Lake Erie were each 300 feet long, 54 ft. beam, 60 ft. high from keel to deck, and equipped as 3,500 h.p. ice crushers. The number of cars which could be placed aboard was from 26 to 30, depending on the size of the cars. The ice crusher, located at the bow and shaped something like a spoon, climbs up on to the ice in its path and crushes it down. In 1904 another type of ferry—the Marquette & Bessemer No. 1—was placed on a coal route between Conneaut and Rondeau. This boat is not a car ferry in the strict sense of the word, since, while the cars are run aboard via two tracks, they are not carried across the lake but discharge their contents from hopper bottoms into a continuous hatch over which the tracks are suspended. Ten cars at one time can be unloaded in this manner. The capacity of the hold is 2,500 tons. At the Canadian terminal four grappler unloaders remove the cargo in eight hours. The time of unloading, of course, is much longer than that of a ferry which carries the loaded cars, but the load carried is several times as great and the time of loading is but little more than that of the regular car ferries. The length of this vessel is 255 ft., depth 22 ft., beam 43 ft.

The new car ferry Ashtabula is notable especially for her water bottom, which is so controlled that she can free herself from the ice in several different ways, dependent upon the kinds of ice with which she has to battle, or other conditions. There are eight transverse bulkheads, six of which run to the car or main deck and two to the lower deck. The water in the compartments is controlled by ballast pumps. Simultaneously one pump may be pumping the water out of one compartment and another pumping into another compartment. By filling the tanks aft and pumping out the ones forward, the ferry's bow is made to climb up on to a field of ice and crush it down in its path. To plow directly into a field of ice, when travelling light, the vessel is lowered to the desired depth by filling all the water compartments. Again, in freeing herself from ice, it may be deemed best to list the ferry to one side. This is accomplished by filling the tanks on one side of the ferry and pumping out those on the other. This ferry is 50 ft. longer than the ones on the Conneaut-Port Dover line, heretofore referred to, and has a 56 ft. beam. Her keel is 330 ft., her depth 20 ft. She is propelled by twin screws, driven by two triple-expansion engines with cylinders 19½, 31 and 52 ins. in diameter by 36 in. stroke supplied with steam from four Scotch boilers. On board the Ashtabula there are four tracks, which will accommodate thirty 50-ton cars coupled together and then fastened to bumper posts. New cars have been built especially for this ferry traffic. They are each 38 ft. long. In the cabin amidships are the galley and the eating quarters of the ferry. The dining-room for officers and guests is elaborately furnished. There are also baths, lavatories, and all modern conveniences. Even the quarters of the deck hands are equipped for comfort. The vessel is lighted by electricity and, when in port, is connected with the telephone service. The ferry can make two trips a day between Ashtabula and Port Burwell. Her actual running time for the round trip on her official test was 9 hours and 25 minutes. Going to Port Burwell with a full load of 30 cars of coal, and with the lake quite rough, she made a little more than 15 miles an hour, and returning averaged 15¼ miles an hour.

The method of loading and unloading a car ferry calls for an apron which can be raised and lowered, and which is equipped with tracks which will connect the tracks of the docks with those on board the ferry. This apron hangs from powerful balance arms, from the opposite ends of which are counterweights aggregating 40 tons. This lift is controlled by electric machinery. With the touch of a lever, the outer end of the apron can be raised or lowered to the level of the vessel's dock, the inner end working on rockers. The apron at the Ashtabula car ferry dock weighs 75 tons, and is 30 by 52 ft. in size. There are usually four tracks on the dock, four on the ferry, and two on the apron. The cars go to and from their respective tracks by switching. Two of the tracks in the car ferry yards are kept for empty cars and two for loaded cars. The switching of loaded cars aboard and empty cars to shore may progress at the same time. At the Canadian terminals, when switched to the docks, the cars are picked up by the Canadian railways and distributed to distant destinations for unloading.

Lake Erie car ferries in starting out upon a one-day trip, in Jan. and Feb. especially, take with them a stock of provisions sufficient for at least three weeks. This is to provide for an emergency in case the ferry is frozen in on the route. When frozen in, members of the crews often walk to and from the mainland over the fields of ice. The wind has a great deal to do with the ice conditions, often piling the ice up mountains high in the ferries' path. In such cases, if an opening can be found in the windrows, the ferry may break through. Otherwise, dynamiting is sometimes done with good effect.

Atlantic and Pacific Ocean Marine.

The Dominion Line steamship Kensington sailed on her last voyage from Montreal for the season Nov. 9.

J. Allan, of the Allan Steamship Line, was a candidate on the Socialist platform at the recent municipal elections in Glasgow, Scotland.

C. H. Wilson, Baron Nunburnholme, head of Thos. Wilson, Sons & Co., Hull, Eng., owners of the Wilson Steamship Line, died Oct. 27, aged 74.

Dr. A. A. Wilson, Montreal, has been appointed surgeon of the C.P.R. steamship Empress of Ireland, succeeding Dr. G. G. Winder, resigned.

The Union Line steamship Taviuni, on the New Zealand route, recently reported a seismic disturbance at sea lasting about twenty seconds, while on the way to Suva.

The British steamship Queen Christina, in ballast from San Francisco, Cal., to Portland, Ore., struck on the North Seal rock, off California, recently, and is considered a total loss.

The C.P.R. Atlantic Steamship Department entertained the Dominion immigration officials at Quebec to a trip to Montreal by train, returning by the S.S. Lake Manitoba, Oct. 26.

The Dominion Line steamship Dominion arrived in Montreal Oct. 30, on her last trip to that port for the season. She took thirteen days to make the voyage from Liverpool, on account of the severe weather.

Dr. G. G. Winder was presented with an address and a purse of gold by the passengers on the S.S. Empress of Ireland recently, on his retiring from the C.P.R. service to take up private practice in British Columbia.

The C.P.R. steamship Lake Manitoba, and the Dominion Line steamship Ottawa, sailed from Montreal, Oct. 26, for the last time this season. A large number of people assembled at the pier to bid good-bye to the respective captains.

Capt. Dunlop, who was a few years ago in command of the Allan Line steamship Pretorian, has been transferred to the Corinthian, in place of Capt. Lindsay, who, it is reported, will fill a responsible position on shore, on this side, for the same company.

The Allan Line steamship Mongolian and the Thomson Line steamship Hurona, both of which were damaged in collision in the Straits of Belle Isle recently, have arrived in Great Britain, and will each undergo thorough repairs on the Clyde and Tyne, respectively.

The Donaldson Line steamship Alcides, with a cargo of coal and steel for the I.C.R. buildings at Moncton, N.B., arrived at St. John, N.B., Nov. 5, much overdue. Considerable anxiety had been felt for the safety of the vessel, on account of the rough weather.

It is understood that though the C.P.R. has not yet placed an order for the construction of the two vessels, which it was authorized to do at its recent annual meeting, negotiations are in progress with the Fairfield Shipbuilding Co., Glasgow, Scotland, with that end in view.

The winter schedules for the Allan and C.P.R. steamships on the Atlantic have gone into force. The boats will call at Halifax to drop the mails, and take on customs and immigration officials for the examination of baggage and passengers en route to St. John, similar to last winter.

It is reported that a steamship line is projected between England, Bermuda, Boston, and St. John, N.B. The prime mover in the proposal is stated to be Capt. Golin-

sky, who arrived in St. John recently from Bermuda, en route to England, where it is proposed to finance the scheme.

The Allan Line steamship Bavarian, which was wrecked on Wye rock in the St. Lawrence two years ago, and subsequently sold by the underwriters to a U.S. wrecking company, has been resold by the latter, and is to be dismantled and scrapped. The price paid for her is stated to be $65,000.

The Dominion Line steamship Canada, which was scheduled to sail from Liverpool Nov. 21, was taken off the route and docked for a general overhauling. Her place was taken by the Dominion, the Kensington replacing the Dominion. It is expected that the Canada will be ready to sail from Liverpool Dec. 21.

The Thomson Line steamship Escalona, which arrived at Quebec Nov. 1, reported exceedingly rough weather. Almost from the time she left North Shields, Eng., Oct. 12, she encountered high seas, and in mid-ocean during the height of a storm, a ship's carpenter was washed overboard and lost, and one of the firemen severely injured.

W. I. Gear, Managing Director of the Robert Reford Co., agents for the Thomson Steamship Line, is at present in Great Britain. It is presumed that his visit is in connection with the inquiry into the collision between the Allan Line steamship Mongolian and the Thomson Line steamship Hurona, which is being held at Glasgow, Scotland.

The Nord Deutscher Lloyd steamship Kaiser Wilhelm der Grosse, which sailed from New York Oct. 25, lost her rudder off Newfoundland, but continued her voyage, steering by her screws alone. She arrived in Plymouth safely, one day late. The captain has been decorated with the third-class Order of the Crown by the Emperor of Germany.

Capt. Lindsay, formerly in command of the Allan Line steamship Corinthian, has been appointed shore captain for that company in place of Captains Griffiths and McGiffin, who have hitherto occupied the position jointly. Capt. Lindsay took up the work of winding up the summer season at Montreal before proceeding to St. John, N.B., where he is stationed for the winter.

The C.P.R. steamship Montreal, which recently grounded in Lake St. Peter, near Sorel, Que., was released Nov. 2, and proceeded to Montreal under her own steam. As far as can be ascertained very little damage was done, but if after arriving in England it is found that she has been more seriously damaged than at present is believed, she will be dry-docked and repaired there.

The St. John, N.B., City Council has received a communication from W. Downie, General Superintendent C.P.R., and W. Thomson & Co., agents for the Allan Steamship Line, stating that a working agreement had been arrived at regarding the supply of grain to the Allan vessels at berth 5. It is stated that the C.P.R. will supply grain at berths 2 or 3 to the Allan vessels, as berth 5 has not yet been equipped with grain conveyors.

Sir Thos. G. Shaughnessy stated recently that no decision had been arrived at as to the transfer of the C.P.R. steamships Empress of Britain and Empress of Ireland to the Pacific ocean service. There was a possibility of building two other vessels for that service, if it was decided not to transfer them, and it was almost an assured fact that two more boats would be built, but whether they would be placed on the Pacific or the Atlantic route had not been decided.

The recent sinking of the C.P.R. steamship Empress of China at her slip at Victoria, B.C., and the subsequent delay in pumping her out, has called attention to the lack of facilities in the harbor for dealing with accidents of this description, and those arising from fire. The attention of the city and Dominion authorities has been directed to the need for such facilities as the importance of the harbor demands, and it is stated that the provision of a fireboat may be made in the near future.

The lighthouse recently erected on the Fastnet rock, on the south-east coast of Ireland, is supplied with the latest pattern of lantern of the dioptric type, with a series of incandescent burners giving 1,200 candle power, increased by lenses to about 750,000 c.p., giving a flash of three-twenty-fifths of a second every five seconds. The granite stones, numbering 2,074, used in construction weighed 4,300 tons, and the entrance door to the tower is 57 ft. 9 in. above high water mark. The cost of the lighthouse is said to have been £84,000.

Notwithstanding official denials that any negotiations are in progress for an arrangement between the G.T.R. and the Cunard Steamship Line for the handling of passenger and freight traffic between England and Australia and the Orient via Canada, reports are being circulated in London and Liverpool, Eng., to that effect. It is stated that possibly the Allan Line and the Cunard Line will co-operate, one supplying the Atlantic and the other the Pacific service. C. M. Hays, Second Vice-President and General Manager, and H. H. Norman, secretary G.T.R., have stated that they have heard nothing of the negotiations referred to.

Capt. Braes, of the Allan Line steamship Tunisian, brought that vessel into Montreal for the last time, Oct. 26. On the arrival at Liverpool he will give up command and retire from active service, after having spent fifty-one years at sea, forty-one of them being as a commander. He has commanded, successively, the Star of India, Oceanica, Bruce, State of Pennsylvania, State of Nebraska, State of California, Mongolian, Parisian and Tunisian, and has made 596 voyages. The following "limerick" dedicated to the captain, enlarging on one of his peculiarities, was perpetrated by a well-known professor in a recent voyage:

There was a gay captain called Braes,
Who had most remarkable ways;
He'd stay out from dinner,
Yet never get thinner—
Though absent for several days.

Maritime Provinces and Newfoundland.

The schooner Lady Effie, 36 tons, was reported lost at Kettle Cove, Nfld., recently.

The barque Guldregn, 640 tons register, built in Norway in 1879, was offered for sale by tender recently, at North Sydney, N.S.

The St. John, N.B., civic Board of Works recommend that tenders be asked for the construction of two additional steamship berths.

The schooner Olivetta was driven ashore at Bay de Verde, Nfld., recently in a gale and became a total wreck. The crew were saved.

The Government steam tender Montcalm is engaged in the removal of the Marconi apparatus and operators from the Labrador coast for the winter.

The S.S. Hercules, owned by Tapley Bros., St. John, N.B., struck a submerged rock while entering St. John harbor recently, and broke her rudder stock. No other damage was sustained.

It is feared that the schooner Orion has been lost off Newfoundland, together with her crew of 16 men. She belonged to Grand Bank, and beyond a dory bearing her name, no trace has been found.

The barque Hillside, built at Grangemouth, Scotland, in 1897, has been sold at Yarmouth, N.S., to a U.S. firm. Her dimensions, etc., are: length, 158 ft.; breadth, 33.1 ft.; depth, 13.1 ft.; 439 tons.

T. McRae, first officer of the Charlottetown Steam Navigation Co.'s steamship Empress, died suddenly while on board recently, aged 67. He had been in the company's service for 15 years.

The schooner Gevestar, of Murray Harbor, P.E.I., which left North Sydney about Oct. 30, and had not been reported several days after she was due at Murray Harbor, is stated to have been lost with her crew.

The Dominion Department of Marine has supplied a lifeboat for Prince Edward Island, and will also provide three fully equipped life saving stations. It is hoped to have all completed before the close of navigation.

The Plant Line S.S. Halifax is being overhauled at Halifax, N.S., having been taken off the Boston-Charlottetown route for the season. She will leave early in Dec. to take up her winter service between Key West and Havana.

The schooner May Flower ran ashore in Orwell Bay recently, and is regarded as a total wreck. She was built at Summerside, P.E.I., in 1890, her dimensions being: length, 61.5 ft.; breadth, 21.6 ft.; depth, 8 ft., and 60 tons register.

The Charlottetown, P.E.I., schooner Parthenia was totally wrecked at Liverpool harbor entrance, Nov. 7. She was built at Lunenburg, N.S., in 1882, her dimensions being: length, 79.8 ft.; breadth, 24 ft.; depth, 9.6 ft.; tonnage, 99 registered.

J. F. Morse, of the Eastern Steamship Co., stated recently that he knew nothing of the rumored establishment of a line of boats on the St. John River by his company, but considered that there was an opportunity for development in that direction.

The Italian barque Affezione, bound from Weymouth, N.S., to Buenos Ayres with lumber, put in at Halifax, Nov. 10, with masts, sails and deck cargo gone, and in a leaky condition, as a result of being battered about in a storm off Cape Sable.

The schooner Loyal recently wrecked off Rexton, N.B., has been surveyed and declared a total wreck. She was built at Mahone Bay, N.S., in 1900, her dimensions being: length, 94.5 ft,; breadth, 25 ft.; depth, 9.6 ft., and 99 tons register.

The Lurcher lightship, which has recently been thoroughly overhauled, and was only replaced in her position on Lurcher shoal, Yarmouth, N.S., at the end of Oct., broke from her moorings during a storm, Nov. 7, and was for several days out of service.

The schooner Tartar, bound from Sydney, N.S., to Richibucto, N.B., struck the harbor bar at the latter place, Nov. 7, and later fell off and sank in deep water. She was built at La Have, N.S., in 1892, her dimensions being: length, 65.7 ft.; breadth, 21.4 ft.; depth, 8.5 ft., and 61 tons register.

The Swedish steamship Oscar II, chartered by the Nova Scotia Steel Co., which went ashore on Flint Island some four months ago, is again in service, after repairs. This is one of the vessels which had to be removed to New York for completion of repairs, owing to a strike at the Halifax dry dock.

The Halifax and Canso Steamship Co., operating the steamboat Scotia in the coasting trade, is a local company, with G. S. Campbell and Co., Halifax, as agents, managers and part owners. The officers are: President, A. M. Bell; Vice-President, G. S. Campbell; Secretary-Treasurer, W. T. Davidson.

The schooner Hattie D., which went ashore recently, has been floated and placed on the marine railway at Yarmouth, N.S., where it was found that her keel and rudder were gone, and her stern post and stem broken.

She is being repaired and refitted before again being placed in service by H. Cann & Son, who purchased her.

The paddle steamboat Springfield, owned by the Springfield Steamship Co., Ltd., Springfield, N.B., was destroyed by fire at Hatfield's Point, N.B., Nov. 5. She was built at Woodstock, N.B., in 1882, her dimensions being: length, 111 ft.; width, 17.4 ft.; depth, 3.8 ft.; tonnage, 233 gross, 147 net, with engine of 26 h.p.

The Newfoundland schooner Hispanola was seized at North Sydney, N.S., Nov. 8, and her captain charged with a violation of the customs laws in not entering and clearing his vessel at Georgetown last May. Capt. Kennedy pleaded that he was unable to conform to the law owing to ice conditions and the negligence of the customs officials at the port.

The New Brunswick Government has renewed the licenses of the following foreign corporations, to enable them to do business in the province for one year from Nov. 1: The Robert Reford Co., Halifax, N.S.; The Eastern Steamship Co., Portland, Me.; The Dominion Coal Co., Ltd., Montreal; The Dominion Atlantic Ry. Co., London, Eng.; The C. Robin-Collas Co., Halifax, N.S.

The first steamship to dock at Amherst, N.S., entered the harbor Nov. 4. This was the Donald Line steamship Alice, with a cargo of oak for Rhodes, Curry & Co., from Virginia. The boat was gaily decorated and the captain of the vessel expressed his satisfaction with the accommodation. Other vessels are expected shortly, and a second pier, 364 ft. long, is being constructed to provide facilities for handling the increased traffic.

The management of the Consolidated Steamship Lines Co., of which the Eastern Steamship Co., owning vessels calling at St. John, N.B., forms a part, has recently undergone a complete change. The control of the Eastern Steamship Co., and another, has been vested in Calvin Austin, formerly president of the Consolidated Co., and who has been succeeded by C. M. Englis. A cashier has been appointed for each of the subsidiary companies, who will be responsible for the funds.

The Campobello Corporation has been incorporated under the New Brunswick Companies Act, with a capital of $25,000 and offices at Campobello, N.B., for the purpose of developing the island of that name. The company is empowered, among other things, to carry on a general navigation business, and to purchase, charter or construct steam and other vessels. The provisional directors are: H. M. Merriman, Campobello, N.B.; T. Askenasy, New Rochelle, N.Y.; A. Buchanan, P. Armitage, A. Douglas, New York City.

The Government surveying schooner Ellinor has been placed in winter quarters at Halifax. Her sounding apparatus and gear will be thoroughly overhauled during the winter. The Ellinor replaced the Gulnare on survey work on the Newfoundland, Labrador and Gulf shores two years ago, prior to which she had a rather adventurous career. Originally built in England for the Prince of Monaco, she was sold by him to a German who, it is presumed, fell a victim to cannibalism on the west coast of Africa; the crew who were left in charge of the vessel took her to sea, and subsequently quarrelled and abandoned her, taking to the boats. The derelict vessel was sighted by an Italian ship and towed to Genoa, and as no claimant turned up, she was sold to an Englishman, who passed her on to the British Government, when she was placed in the present survey.

Hon. R. F. Sutherland, Speaker of the Dominion House of Commons, was a guest of the Knife and Fork Club, Kansas, Mo., recently, and on the subject of a proposed 21 ft. channel from the Great Lakes, said: "People now alive may live to see the minimum depth made 21 ft., and when that day arrives, Montreal, Quebec, Halifax, and St. John, and perhaps some quiet harbor that is as yet only dreamed of, will be the busiest ports of the North American continent. Of this great highway Canada holds the door. It is a great asset, and more than anything else gives Canada a dominating position on this continent. This will be more manifest in the future than it has been in the past. New York State is about to spend $100,000,000 in deepening the Erie canal to 12 ft. Even then it would be 2 ft. shallower than the waterway it is intended to rival, and while in the one a vessel will be almost in straightened waters, in the other, with the exception of a few places, a ship will have ample room for full steam ahead. And as I have said, Canadians are looking forward to the 21 ft. channel of the future."

LIST OF STEAM VESSELS REGISTERED IN CANADA FROM OCT. 15, 1907, TO NOV. 15.

Province of Quebec Marine.

N. Rosa, one of the first shipbuilders in the province, died at Quebec, Nov. 3, aged 87.

A steel lighthouse is being erected on the breakwater at Quebec, replacing the wooden one in use there.

By the burning of a tugboat at Murray Bay, Nov. 2, two boys who were sleeping on board were burnt to death.

The steam tugboat Michael Davitt, owned in Welland, Ont., was reported to have been wrecked at Batiscan, Que., in a storm on Nov. 9.

Information has been received by the Department of Marine, that the lighthouse at Portneuf, Que., was completely destroyed in a recent storm.

J. McDonald, in the employ of the Richelieu and Ontario Navigation Co., in connection with its Saguenay pleasure service, died suddenly at Montreal, Nov. 6, aged 60.

The Dominion Department of Marine has approved of the purchase by the Montreal Harbor Commissioners of three locomotives, for operating the harbor terminals, at a cost of $42,570, for delivery in April, 1908.

The barge Germaine broke from her moorings at Montreal, Nov. 7, and was swept two miles down stream and across the channel, where she lies partly submerged without however causing any obstruction to navigation.

The Montreal Harbor Commissioners recently announced that the upper stories of the first group of seven of the permanent sheds in the harbor were ready for the storage of cargo. This adds 350,000 sq. ft. to the space already available.

The telephone signal service on the St. Lawrence between Quebec and Montreal, recently completed, has been fully tested during the past month, and has been found to be of considerable practical use. It is intended to instal a station on similar lines on Crane Island.

Capt. Jones, formerly Dominion Steamship Line wharf superintendent at Portland, Me., has been appointed superintendent of the Dominion and Leyland Lines at Montreal, in place of the late M. H. Scanlan. Capt. Jones was at one time chief officer of the steamship Labrador.

The Montreal Harbor Commissioners are forwarding to the Department of Marine plans, specifications and estimates for a modern floating crane for use in the harbor, and asking for the necessary authorization for the purchase of same, to be delivered ready for the opening of navigation in 1908.

As a result of the recent enquiry into the causes of the running down of the Donaldson Line steamship Cassandra by the U.S. steamboat John Lambert, D. T. Sullivan, master of the latter vessel, was fined $20 and costs, or in the alternative, one month's imprisonment, for a breach of navigation rules.

It was reported at Quebec, Nov. 9, that the schooner Lizzie Lindsay, owned by A. Nadeau, of Cascapedia, Que., had gone down with all hands in a storm in the St. Lawrence. She was built at Douglastown, Que., in 1884, her dimensions being: length, 74.1 ft.; breadth, 22.3 ft.; depth, 9.9 ft.; 91 tons.

GASOLINE ENGINES

The "STICKNEY" ENGINE is something unique

The most ECONOMICAL ENGINE for RAILWAY PUMPING

The GOVERNOR is so sensitive that it never wastes fuel

Constructed without any useless frills but made to stand hard work.

Sizes from 1 H.P. to 25 H.P.

We state size of Cylinder and are prepared to guarantee power developed.

ONTARIO WIND ENGINE AND PUMP CO. LIMITED

WINNIPEG, MAN. TORONTO. MONTREAL, QUE.

SAFETY AND COAL ECONOMY

Are realized by our Hollow Staybolts. Steam from the center of a broken bolt gives positive warning, hence **SAFETY**

Air passing into the firebox through the hollow bolts helps combustion, hence **ECONOMY**

Tell-tale holes clog up. Hollow stays never." Passage of air always keeps the holes open.

Also Solid Staybolt Iron made from the best double refined charcoal iron.

FALLS HOLLOW STAYBOLT CO.
STAYBOLT BARS.

The misfortunes attendant on the recent voyage of the steamship Bermuda from Quebec to Green Bay, Wis., when she ran aground twice in the River St. Lawrence, appear to have affected the captain's mind. On the arrival of the vessel at the latter port he was found to have committed suicide in his cabin.

The C.P.R. recently made application to the Montreal Harbor Commissioners for the use of two sheds in the harbor, after the close of navigation of the St. Lawrence, for the storage and delivery of import freight arriving at St. John, N.B., and also for the use of tracks, as in former years, which was subsequently granted.

At a meeting of directors of the Richelieu and Ontario Navigation Co. held at Montreal, Nov. 7, a quarterly dividend of 1¼% was declared, and J. P. B. Casgrain and A. H. Sims were elected directors of the company. An advanced policy involving the construction of new vessels, and the renovation of some of the older ones, was announced.

The Richelieu and Ontario Navigation Co.'s steamboat Quebec, which was taken off its route and laid up at Sorel early in the season, has been taken to Quebec, where she will be placed in the dry dock, and overhauled. Considerable alterations were made to this vessel some time ago, and it was found that she was rather top-heavy. This is to be rectified.

At a recent meeting of the Montreal Harbor Commissioners $175,000 was received from the Government Department of Marine, as an advance on loan, on account of expenditure on the new steel freight sheds, and a debenture was authorized to be signed and forwarded to the Finance Department in accordance with the by-law relating to such advances.

The steamboat Dominion, which had been running as a ferry below the Lachine rapids, was recently burned to the water's edge. She was a small paddle-wheeler formerly known as the Riviere du Loup, and was built at Sorel in 1873, her dimensions being: length, 104.8 ft.; breadth, 22.7 ft.; depth, 4.6 ft.; tonnage, 199 gross, 130 register; driven by engine of 19 h.p.

The revenue for Oct. of the Montreal harbor was $51,461; $31,000 from imports, $14,000 from exports, and $6,461 from local traffic; compared with $48,729 for Oct., 1906, of which $33,500 was derived from imports, $12,500 from exports, and $2,729 from local traffic. Since the opening of navigation the revenue has been $283,291, against $276,643 for the same period 1906.

M. H. Scanlan, who died at Montreal recently, had held the position of Superintendent for the Dominion, Liverpool and Bristol, and Leyland Lines at Montreal and at Boston and Portland, U.S., since the inauguration of the Dominion Steamship Line in 1872. He was born in Sligo, Ireland, and at 17 years of age entered the service of D. Torrance & Co., Montreal, who became agents for that company.

Following on the remarks recently made by Commander O. G. V. Spain in delivering judgment in the John Lambert-Cassandra case the captains, certified officers and master pilots engaged in the river and gulf of St. Lawrence have decided to form an association under the name of the National Association of Captains and Certificated Officers, to defend their interests against the encroachments of those who navigate the St. Lawrence without proper certificates.

The Quebec and Lake St. John Ry. has not, as reported, taken over the operation of the Lake St. John and Saguenay Navigation Co.'s vessels. That company has ceased operations for the present, and the Q. & L. St. J. Ry. has resumed possession of the light draught stern-wheel steamboat Pikouagami, which had been leased to the navigation company for the season. This boat was built by the Polson Iron Works, Toronto, especially to run up the shallow rivers which flow into Lake St. John. Other vessels of the Navigation Co.'s fleet are being operated as follows: Mistassini, by the Hotel Roberval; Roberval, by the Peribonka Pulp Co., and Marie Alma, by M. Dery, Quebec.

The Montreal Chamber of Commerce transportation committee is again calling attention to the desirability of establishing a dry dock at that port. Such construction has been more than once confirmed by the Dominion Government, and in 1898 an act granting $750,000 for this purpose was passed. The Harbor Commissioners at that time did a considerable amount of preliminary work, but no practical result has so far been achieved. The report to the Chamber of Commerce points out that the lack of such accommodation is prejudicial to the interests of the port, as any vessels sustaining any damage have merely to make temporary repairs until a port offering proper facilities can be reached.

Ontario and the Great Lakes.

J. Conlon, of J. & T. Conlon, Thorold, formerly owners of vessels trading on the lakes, died there Nov. 11, aged 75.

The contract for the construction of a dock at Port Colborne, Ont., has been awarded to Lastner and Porter, Wiarton, Ont.

The lifeboat for Cobourg, Ont., built under instructions from the Department of Marine, at Collingwood, has been completed and delivered.

A fire occurred on the schooner Dundee in Toronto harbor recently, caused by the overheating of a stove. The damage done was small.

R. E. Jamieson, Ottawa, has been appointed registrar of shipping and measuring surveyor for that port in place of the late R. C. W. McCuaig.

The steamboat City of Grand Rapids, owned at Wiarton, Ont., was destroyed by fire at Tobermory dock recently. She was built at Grand Haven, Mich., in 1879.

While manœuvring in the Port Stanley harbor, Nov. 6, the Government cruiser Vigilant collided with the tug Nettie B., and also did some damage to the dock.

The Pere Marquette Rd. is considering the advisability of putting on an additional car ferry to run between Port Stanley, Ont., and Conneaut, Ohio, in the coal trade.

The Montreal, Ottawa and Georgian Bay Canal Co. is to request an extension of time for the commencement of the work of construction on its proposed waterway from Montreal to Georgian Bay.

Tenders are under consideration by the Dominion Public Works Department for the construction of a wharf and approach at White Cloud Island, Georgian Bay, and also at Rossport, Thunder Bay

Capt. John Paul, who had been in the employ of the Dominion Government from 1881 to 1896, engaged in the removal of shoals in Kingston, Ont., harbor, died at Belleville, Ont., Nov. 6, aged 77

The Dominion Department of Marine has arranged to keep navigation on Lake Superior open until Dec. 10, and will pay the expense entailed by keeping the lighthouse at Passage Island, near Port Arthur, going till that date.

Tenders are under consideration of the Dominion Public Works Department for the construction of an extension to the breakwater, the removal of a portion of the landing pier, and other work at Meaford harbor, Ont.

The Farrar Transportation Co.'s steamboat Collingwood was successfully launched on the Georgian Bay Oct. 30, and left for Fort William for her maiden trip Nov. 9. She was fully described and illustrated in our May issue.

The new Government steamboat Bessie Butler left Peterborough Nov. 2, in charge of Capt. Morin, for her maiden trip on the Trent Valley Canal. She went as far as Nassau, and the trip was most successful from every point of view.

P. R. Hepburn & Co.'s steamboat Niagara, returning to Picton light through the Lachine canal, rammed the Wellington bridge recently, and did damage to the extent of $1,000. The vessel was allowed to proceed on the captain furnishing a bond sufficient to cover the damage.

Capt. Cleland's steamboat Mabel Bradshaw, on the route between Collingwood and Sault Ste. Marie, ran on a shoal near Twin islands, Shawanaga, recently, and tore a hole in her hull. She had a full cargo of freight, and about 20 passengers, who were transferred to the steamboat City of Meaford.

The Norwegian steamboat Pollux, under charter, was held at Port Dalhousie recently, on a claim for $4,000 damages. The vessel was chartered for the purpose of taking grain to Norway, but when partially loaded, it was discovered that the hold was covered with coal oil, and the owners refused to clean it.

The steamboat Norwalk, which collided with and sank the Montreal Transportation Co.'s barge Jet, recently, and was subsequently seized at Welland, Ont., was released Nov. 9, and proceeded to the Upper Lakes. The owners of the Jet have entered an action against the owners of the Norwalk, claiming $26,000 damages.

The enquiry into the causes of the wreck of the Ontario Government fisheries cruiser Lurline, off Goderich harbor, which occurred Oct. 27, is to be held by the Dominion Wreck Commissioners. The vessel struck on the sunken cribwork at the mouth of the harbor, of which the captain said he was unaware. The Lurline, which had recently been purchased from J. H. Walker, Walkerville, Ont., for $10,000, is a complete wreck.

A Goderich deputation waited on Hon. W. Pugsley, Dominion Minister of Public Works, recently, to urge the completion of the breakwater at the mouth of the harbor, and the addition of about 1,000 ft. thereto, to insure the safety of vessels in the harbor. The estimated cost will be about $200,000. The recent wreck of the Lurline on the submerged work was mentioned to show the dangerous state of the work as it is at present.

The Minister of Railways and Canals has transferred J. C. Boyd, Superintendent of the Canadian canal at Sault Ste. Marie, to the Williamsburg canal, with headquarters at Morrisburg; the superintendent at the latter place, J. Le B. Ross, C.E., being transferred to the Sault Ste. Marie canal. It was thought advisable to make the change in view of the friction which had arisen out of certain allegations regarding the administration of the Sault canal.

The Temiskaming Navigation Co., subsequent to a judgment against it recently on a claim for damage done to a small vessel in entering New Liskeard, has called the attention of the New Liskeard Board of Trade to the difficulty in entering caused by the blocking of the Wabi River with logs and small craft. The Board of Trade is to take the matter up, and has invited suggestions from the navigation company as to the method of procedure.

The following changes have been announced in the commands of the C.P.R. Upper Lake fleet, on account of the addition of the two new vessels, Assiniboia and Keewatin: Capt. L. Pyette of the Alberta is transferred to the Manitoba, Capt. E. B. Anderson being placed in command of the Assiniboia, with A. G. Cameron, formerly of the Alberta, as Chief Engineer. J. McIntyre, formerly first officer of the Alberta, has been appointed captain of that vessel. As it is improbable that either of the vessels will reach Owen Sound much before the close of navigation, further appointments will not as yet be made, but it is said that Capt. Pyette will take charge of the Keewatin, being succeeded on the Manitoba by Capt. F. X LaFrance.

The Canadian section of the International Waterways Commission met in Montreal Nov. 6, to discuss the proposed works at the Long Sault Rapids, near Cornwall, and at the foot of Lake Erie, by the St. Lawrence Power Co. It was stated that no works should be allowed in the St. Lawrence which could possibly affect navigation, and this view was strongly represented by H. A. Allan of the Allan Steamship Line, and Chairman of the Shipping Federation of Canada. The promoters of the scheme announced that the proposal to construct a dam at the foot of Lake Erie had been abandoned in favor of the construction of a dam across the Niagara River above the Falls, which would have the effect of increasing the depth of that lake.

Z. Mulhoit, government engineer, returned to Edmonton, Alta., recently, after a tour of inspection at the wing dams in course of construction at the Lesser Slave River rapids. The dams, of which there will be about 50, will extend a distance of 20 miles; 12 have already been completed, varying in length from 50 to 400 ft. The work has been in progress all summer, and it is intended to continue it as far into the winter as conditions will allow, and again early next year.

The navigators of the Red River and Lake Winnipeg state that by placing the swing pier of the Redwood bridge on the west side instead of the east, the channel for vessels will be on the wrong side of the river. When the St. Andrew's locks are completed, considerable transportation will be conducted from the lake to the city by water, and they claim that with the channel on the west side, it will be impossible to get cargoes through, and that navigation to the lake for large boats will be blocked. A watermen's association has been formed to deal with the matter and place their views before the Winnipeg Board of Trade.

The Dominion Government has decided to press on with the construction of the canal and locks between the St. Andrew's rapids and Winnipeg, and as far as possible arrange for the work to be carried on during the winter, allowing the contractors an additional $10,000, provided they complete the work in one year from April, 1908. The contract was let in May last to Quillan and Robertson, Montreal, and the work was practically commenced in July, since when considerable progress has been made. The total length of the canal will be 1,600 feet, with a depth of 37 feet, with a lock 290 ft. long, being 215 ft. from gate to gate, 45 feet wide, and with a drop of 21 feet. The walls are cement, 20 feet thick: at the gates reinforced cement has been used. The canal above the locks will be 50 ft. wide at the bottom and 100 ft. at the top. A dam of solid concrete, 800 ft. wide, with a steel superstructure, which can be raised or lowered as desired, is also being built across the river. The total cost of the work is estimated at $1,000,000.

B.C. and Pacific Coast Marine.

An application is to be made to the B.C. Chief Commissioner of Lands and Works for permission to remove obstructions from he Indian river, flowing into the north arm of Burrard Inlet.

A deep sea fishing company to engage in he cod fishing industry in the Behring sea and North Pacific is projected in Victoria, and it is stated that orders for four schooners have been placed at Lunenberg, N.S.

A report is current that a company is to be formed in Victoria to build or purchase a steamship and two schooners to engage in deep sea fishing off Queen Charlotte islands. The steamer will be equipped with cold storage, etc.

The Tidal and Current Survey section of the Department of Marine has issued tide tables for the Pacific coast for 1908, including those for the Fuca Strait, the Strait of Georgia, and the northern coast, and data for slack water in the navigable passes and narrows.

The British Columbia Marine Ry. Co.'s salvage plant consists of three steamboats with a modern equipment of pumps, cranes, etc., and highly trained salvage crews. The vessels are under steam at all times ready to proceed to the assistance of ships in distress.

The British Dominions Marine Insurance Co., Ltd., of London, England, has been licensed under the act respecting extra-provincial companies to carry out the objects of the company in the province of British Columbia, with W. D. Whitehead, Vancouver, B.C., as its attorney.

It is stated that the British Coast Steamship Co. is chartering a vessel to run between Victoria, Vancouver, and Mexico, calling at San Francisco, to commence next spring; this with the steamship transit now operated by the company will maintain a monthly service between the points named

The Watkins Logging and General Contract Co., Ltd., has been incorporated under the British Columbia Companies Act, with a capital of $100,000, and with power amongst other things to charter, build or otherwise acquire steam and other vessels, and to operate same in connection with its business.

The Saanich Lumber Co., Ltd., has been incorporated under the British Columbia Companies Act, with a capital of $100,000, with power amongst other things to maintain and operate docks, wharves, etc., and to build, purchase or otherwise acquire steam and other vessels, and to receive goods as wharfingers, warehousemen and carriers.

The whaling steamer St. Lawrence, 110 tons, has arrived at Victoria, having completed her season's work west of Vancouver island. She will shortly proceed to the east side, where she will be engaged during the winter. She had a very successful season, earning over $500,000, and bringing to port a cargo of more than usually exciting whaling yarns.

The Vancouver-Nanaimo Coal Mining Co., Ltd., has been incorporated under the British Columbia Companies Act, with a capital of $250,000, to buy certain lands and coal mining rights in the province; to purchase, lease, or acquire by other means, wharves, docks and lands for same on the sea coast, lakes, bays, rivers or other waters, also to acquire, construct and operate steam and other vessels for the purposes of the company.

The Caledonia Trading Co., Ltd., has been incorporated under the British Columbia Companies Act, with a capital of $100,000, and offices at Victoria, to take over as a going concern the steamship Caledonia, owned by A. McDermott, and in addition to other things to purchase, hire, build or otherwise acquire steam and other vessels, and to carry on the businesses of merchants, carriers by land and water, wharfingers, barge owners, forwarding agents, etc.

The Western Canada Timber Co., Ltd., of London, Eng., has been licensed under the act respecting extra-provincial companies, to carry on its business in the province of British Columbia. Amongst other things the company has power to promote or assist in the promotion of undertakings of all kinds, particularly of those relating to ships, lighters, harbors, piers, docks, quays, wharves, tramways, railways, telegraphs, cables, telephones, etc. The capital of the company is £175,000. L. Hill, Nelson, is its attorney.

The Shuswap and Thompson River Boom Co. will apply next session of the Dominion Parliament for an act authorizing it to develop the navigable waters of the North and South Thompson Rivers, Kamloops Lake, Shuswap Lake and its several arms, the Lower Spallumcheen River and the navigable waters connected therewith, by establishing dams, slides, canals, removing impediments to navigation, to construct tramways, docks and wharves; and to acquire and operate for the company's purposes only telephone and telegraph lines. McGivern, Haydon and Greig, Ottawa, are solicitors for the applicants.

H. B. Co.'s Steamboat Peace River.

The Hudson's Bay Co.'s steamboat Peace River was designed in the U.S., and built by A. Watson, Victoria, B.C., afterwards being taken to pieces and reconstructed at Fort Vermillion. She is a stern-wheel boat, built for passengers and freight, her principal dimensions being: length, 110 ft.; beam, 22 ft.; draught, light, 2 ft. The season for navigation commences generally on May 1, and continues till late in Oct., during which time runs are made from Peace River Chutes to Hudson's Hope, a distance of about 540 miles. At present the chief trade on the route is in furs, but the Peace River Valley is considered to be one of the coming wheat growing areas of Alberta. The Hudson's Bay Co. has a large flour mill at Fort Vermillion. The illustration given on this page is from a photograph supplied by J. Sutherland, engineer of the steamboat Peace River.

THE HUDSON'S BAY COMPANY'S STEAMBOAT PEACE RIVER, WHICH RUNS BETWEEN PEACE RIVER CHUTES, ATHABASCA AND HUDSON'S HOPE, B.C., 540 MILES.

Among the Express Companies.

W. E. Norman has been appointed route agent Canadian Ex. Co., with office at Toronto.

S. H. Baker, Sherbrooke, Que., has been appointed on the staff of the American Ex. Co., Quebec.

H. H. Carr has been appointed agent Dominion Ex. Co., North Bay, Ont., in place of A. Parker.

The Canadian Ex. Co. has resumed service over the P.E.I. Ry. between Montague Jct. and Montague.

A. C. Thorne, Dominion Ex. Co., Montreal, has been appointed agent at Halifax, N.S., in place of W. R. Spooner.

J. L. Stark has been appointed agent Dominion Ex. Co. at Revelstoke, B.C., in place of G. D. McKenzie, transferred to Edmonton, Alta.

C. A. Cunningham has been appointed route agent Canadian Northern Ex. Co., Winnipeg, in place of G. J. Bothwell, transferred.

The Board of Railway Commissioners has granted an extension of time to March, 1908, to the express companies in which to file their contract forms and have them approved

The Canadian Northern Ex. Co. has opened offices at the following places: Lavoy, Alta.; Fielding and Kenaston, Sask.; Glenella, Lavenham, Oakland, and Warren, Man.; Kakabeka Falls, Ont.

The Canadian Ex. Co. has opened offices at the following stations on the Windsor, Essex and Lake Shore Rapid Ry.: Cottam, Essex, Kingsville, Maidstone, North Ridge, Ruthven, and Leamington, Ont.

G. J. Bothwell, heretofore route agent, Canadian Northern Ex. Co., has been appointed joint agent of the Canadian Northern and Great Northern Ex. Cos. at Winnipeg, in place of W. T. Perry, resigned.

A judgment of some importance to express companies was rendered recently in the Superior Court, in the case of Rutenberg & Co. vs. Dominion Ex. Co. The plaintiffs claimed $1,920.75 for a consignment of furs, presumed to have been destroyed in one of the Express Co.'s cars near Cartier, Ont., in Nov., 1906. The defence was that the company was not liable, as the value of the furs had not been declared at the time of dispatch, and that the action should have been taken against the C.P.R., in whose car the furs were destroyed. Justice Loranger, in delivering judgment, held that plaintiffs were not bound by the terms of the receipt unless all the conditions were previously specially pointed out in order to have consent. Moreover, defendants were bound to deliver the goods or to pay their value, and the burden of proof was upon them to show that the goods had been destroyed by fire, and without any fault on the part of defendants' employes. Defendants having failed to make such proof, judgment went against them for the full amount of plaintiffs' claim with costs.

HEAD OFFICE - - TORONTO

Telegraph and Cable Matters.

G. Marconi sailed from Quebec for England on the Allan Line steamship Victorian, Nov. 8.

The Canadian Northern Telegraph Co. has opened an office for commercial business at Old Battleford, Sask.

By the burning of the I.C.R. freight sheds at Campbellton, N.B., Nov. 1, six months' supplies for the G.N.W. Telegraph Co.'s office at that point were destroyed

Application was recently made at St. John's, Nfld., to the Governor-in-Council, for letters patent for a new system of wireless telegraphy, by E. Bellini and A. Tosi, of Paris, France.

The G.T.R. telegraph department is installing 20 new wires at its Glencoe, Ont., station, with the object of making it the testing point for all lines west of London and St. Thomas, Ont.

Telestereography is the somewhat fearsome name which has been applied by the inventor to a mechanical system whereby copies of photographs, etc., may be transmitted over ordinary telegraph wires.

E. J. Haughton, who had charge of the west coast wire on Vancouver Island, recently taken over from the C.P.R. by the Dominion Government, has been appointed in charge of the Government wireless telegraph station at Victoria, B.C.

The strike of operators employed by the Western Union Telegraph Co., which commenced Aug. 12, was by a vote of the operators' union definitely suspended from Nov. 7, "until a full opportunity has been given the telegraph companies to make good the assurances practically conveyed to us."

All the vessels of the Nippon Yusen Kaisha fleet running between Vancouver, B.C., and Japan, are to be equipped with wireless telegraph apparatus, thus enabling them to communicate with the stations on the B.C. coast, and the one established near the Inaboe lighthouse on the first point reached on the Japanese coast.

Hon. W. H. Cushing, Minister of Public Works for Alberta, in the course of a speech at Vermillion, Man., Nov. 6, said he thought it might be advisable in the near future for the Government to be given control of the telegraphs. It would cost very little to put in a Government telegraph line as the telephone poles now in use on the Government lines could be utilized.

The Government telegraph line on the west coast of Vancouver island, connecting Victoria with Port San Juan, Carmanah, Cape Beale, Pachena, Banfield Creek, Ucluelet, Alberni and Clayoquot, which has hitherto been operated by the C.P.R. in connection with its own lines, has been taken over by the Government, and will in future be operated by the Dominion Public Works Department.

J. Taylor, Dominion Atlantic Ry. station agent at Weymouth, N.S., has been missing for over a month, and a warrant has been issued for his arrest. The books, it is stated, are in a bad state, and there is a considerable shortage of cash. It is presumed that Taylor is in New York.

The Winterport Coal Mining Co. has been incorporated under the New Brunswick Companies Act, with a capital of $99,000 and offices at Winterport Mines, N.B., for the purpose of acquiring the business now carried on as the Winterport Coal Mines; to develop and extend the same, and in connection therewith to construct and operate tramways, wharves, piers, and to purchase or charter steam and other vessels. The provisional directors are: J. S. and C. H. Gibbon, W. E. Vroom, N. S. Springer, St. John, N.B.; C. M. Larkin, Newcastle, N.B

Marine Wireless Telegraph Stations.

Following is a list of wireless telegraph stations established by the Department of Marine:

STATIONS	CALL LETTERS
Fame Point lighthouse, Gaspé Co., Que.	F P
Heath Point lighthouse, Anticosti, Que.	H P
Cape Whittle, Quebec Labrador	W R
Point Rich lighthouse, west coast Nfld.	T C
Cape Ray lighthouse, s.w. pt. Nfld.	C R
Cape Sable lighthouse, s.w. pt. N.S.	S B
Partridge Id. lighthouse, St. John, N.B.	S J
Clark City, Seven Islands, north shore Que.	C K
Father Pt. lighthouse, south shore, Que.	R T

The above stations have a normal range of 125 miles and are available, day and night, for communication with vessels fitted with Marconi apparatus.

Point Amour lighthouse, Nfld., Labrador	P R
Belle Isle lighthouse, s.e. end of island, Nfld.	B L
Cape Race lighthouse, s.e. pt. Nfld.	C E
North Sydney, entrance to Sydney Harbor, N.S.	N D

The above stations have a normal range of 60 miles and are available, day and night, for communication with vessels equipped with Marconi apparatus.

Cape Bear lighthouse, s.e. end of P.E.I.	B E
Pictou, N.S.	R U

The above stations have a normal range of 60 miles, but are in operation only during the winter months, primarily for communication with the P.E.I. winter ferry.

The stations formerly operated at Belle Isle and Chateau Bay by the Public Works Department have been discontinued and dismantled.

Sable Island, Atlantic Ocean	S D
Camperdown, entrance to Halifax Harbor, N.S.	C N

These stations are operated by the Marconi Wireless Telegraph Co. of Canada, Ltd., and are available, day and night, for communication with vessels equipped with Marconi apparatus.

The following stations located in British Columbia are owned and operated by the Department of Marine. After Dec. 15 they will be available, day and night, for communication with vessels equipped with any system of wireless telegraphy. They have a normal range of 125 miles, and for communication the 300-metre wave should be used.

Estevan Point, Hole-in-the-wall light stn.	U S D
Pachena Point, light station	K P D
Victoria, Shotbolt hill	V S D
Point Grey, extremity	P G D
Cape Lazo, summit	S K D

General Telephone Matters.

The North-Western Telephone Co. has taken over the management of the telephone system at Phœnix, Sask.

The Bell Telephone Co. has been granted an extension of time to March, 1908, in which to have its telephone rates approved.

The Norfolk County Telephone Co. has commenced operations on the new line from Waterford to Lynedoch, via Delhi, Ont.

The Doukhobor Telephone Co. has been incorporated under the ordinance of the Northwest Territories respecting public companies.

F. Harris, local manager of the New Brunswick Telephone Co. at Sackville, was married recently to Miss G. Hazen, at Fredericton, N.B.

The Bell Telephone Co. has been granted permission to erect poles on various streets in Toronto, and to undertake underground work in connection therewith.

The American Telephone and Telegraph Co., operating the telephone lines in the United States, has raised the night rates to the same figure as the day rates.

The ratepayers of South Crosby township, Brockville, Ont., have passed a resolution providing for the construction of a rural telephone system throughout the township.

A report from Berlin, Germany, states that wireless telephony is being conducted from Nauen to various places about 60 miles distant. It is said that conversation can be heard quite clearly.

The Bell Telephone Co.'s new north branch exchange at Toronto is almost completed, and it was hoped to have it ready by Dec. 1.

You Will FIND THAT THE PERE MARQUETTE, FROM PORT HURON OR DETROIT, WILL

Reach the Spot. ALL LINES TICKET VIA PERE MARQUETTE TO MICHIGAN POINTS.

The accommodation is equal to that at the main exchange, and has 4,500 lines.

W. J. Jones, chief of the Bell Telephone Co.'s instrument department at Toronto, was entertained to dinner recently and presented with a smoking set by employes of the company, on his leaving the service after 30 years' connection with it.

K. J. Dunstan, Toronto manager of the Bell Telephone Co., in referring to the Telephone Commission's report, recently said, although the report was against the company, the facts were not as stated. The efforts made by the company proved to be correct to bring about a remedy for existing conditions.

L. De Forest has equipped one of the U.S. battleships with a wireless telephone system, and it is stated that all the vessels of the fleet going to the Pacific will be similarly equipped. Tests have shown that messages can be received by an ordinary telephone receiver, and conversations have been carried on at a distance of 22 miles.

The Minister of Public Works for Alberta, speaking at Vermillion, Man., Nov. 6, said that the Government originally intended to construct long distance telephone lines only, but had since determined to construct rural lines, and to equip local exchanges throughout the province. As a result of this policy they now had over 500 miles of long distance lines completed, and in operation, a number of local exchanges equipped, and were going steadily ahead with the construction of additional lines.
